Labyrinth of Ice Dec 23 2020 National Outdoor Book Awards Winner Winner of the BANFF Adventure Travel Award "A thrilling and harrowing story. If it's a cliché to say I couldn't put this book down, well, too bad: I couldn't put this book down." —Jess Walter, bestselling author of *Beautiful Ruins* "Polar exploration is utter madness. It is the insistence of life where life shouldn't exist. And so, *Labyrinth of Ice* shows you exactly what happens when the unstoppable meets the unmovable. Buddy Levy outdoes himself here. The details and story are magnificent." —Brad Meltzer, bestselling author of *The First Conspiracy: The Secret Plot to Kill George Washington* Based on the author's exhaustive research, the incredible true story of the Greely Expedition, one of the most harrowing adventures in the annals of polar exploration. In July 1881, Lt. A.W. Greely and his crew of 24 scientists and explorers were bound for the last region unmarked on global maps. Their goal: Farthest North. What would follow was one of the most extraordinary and terrible voyages ever made. Greely and his men confronted every possible challenge—vicious wolves, sub-zero temperatures, and months of total darkness—as they set about exploring one of the most remote, unrelenting environments on the planet. In May 1882, they broke the 300-year-old record, and returned to camp to eagerly await the resupply ship scheduled to return at the end of the year. Only nothing came. 250 miles south, a wall of ice prevented any rescue from reaching them. Provisions thinned and a second winter descended. Back home, Greely's wife worked tirelessly against government resistance to rally a rescue mission. Months passed, and Greely made a drastic choice: he and his men loaded the remaining provisions and tools onto their five small boats, and pushed off into the treacherous waters. After just two weeks, dangerous floes surrounded them. Now new dangers awaited: insanity, threats of mutiny, and cannibalism. As food dwindled and the men weakened, Greely's expedition clung desperately to life. *Labyrinth of Ice* tells the true story of the heroic lives and deaths of these voyagers hell-bent on fame and fortune—at any cost—and how their journey changed the world.

K2, The Savage Mountain May 08 2022 When eleven climbers died on K2 on August 1, 2008, it was a stark reminder that the world's second-highest mountain has, for more than a century, been regarded as the most difficult and dangerous of all—for every four people who reach the top, one dies in the attempt. *K2, The Savage Mountain* tells the dramatic story of the 1953 American expedition, led by Charles S. Houston, when a combination of terrible storms and illness stopped the team short of the 28,251-foot summit. Then on the descent, tragedy struck, and how the climbers made it back to safety is renowned in the annals of climbing. *K2, The Savage Mountain* captures this sensational tale with an unmatched power that has earned this book its place as one of the classics of mountaineering literature.

that were nearly 50 years old, he reminisced about his father, Al Randall, the interesting people who took part in the expedition, and the difficult climb that they were able to complete. In conjunction with more than forty color photographs, this book is a record of these important recollections and an exciting piece of mountaineering history associated with Mount Robson.

Expedition: Fashion from the Extreme Mar 18 2023 The first major study to explore the relationship between clothing made for survival in the most inhospitable environments on earth and beyond, and the high fashion it has inspired Today— from haute couture to ready- to- wear— parkas, puffer coats, and backpacks, as well as garments made of neoprene and Mylar are everywhere. But the roots of these ubiquitous items of dress and cutting- edge textiles are rarely acknowledged or understood. Inspired by the so-called “heroic era” of polar navigation (1890- 1922), extreme mountain climbing, deep sea exploration, and journeys to outer space, *Expedition* explores how garments made for the most inhospitable environments on earth and beyond have inspired more than sixty years of fantastical, otherworldly fashions. Lavishly illustrated, this publication features approximately 150 color photographs. The images include high fashion magazine editorials by Irving Penn, Richard Avedon, and others; museum objects from the permanent collections of The Museum at FIT and the American Museum of Natural History; and unpublished photographs of early expeditions in the archives of the Explorer’s Club in New York.

The Shameless Diary of an Explorer Nov 02 2021 In 1903, aspiring journalist Robert Dunn joined an expedition attempting the first ascent of Mt. McKinley, the highest mountain in North America. Led by explorer Frederick Cook (who would later win infamy for faking the discovery of the North Pole), the climbers failed to conquer McKinley, but they did circumnavigate the great peak—an accomplishment not repeated until 1978. The trek also spawned a book unique in the literature of exploration: Dunn's frank, sardonic, no-holds-barred look at day-to-day existence on an Alaskan expedition. Before Dunn, most such accounts were sanitized and expurgated of anything unflattering. Dunn, however, a protege of the muckraker Lincoln Steffens, endeavored to report what he saw, with panache. And what Dunn reported was a journey rife with conflict, missed opportunity, incompetence, privation, and danger. By showing men reduced to their rawest state, the young journalist produced a compelling, insightful, and oddly amusing book that disturbed and riveted his contemporaries. As Hudson Stuck—the Episcopal archdeacon of the Yukon who completed the first ascent of Mt. McKinley in 1913—observed, “[Dunn's] book has a curious undeniable power, despite its brutal frankness. ... One is thankful, however, that it is unique in the literature of travel.”

High and Mighty Jun 21 2023 SUVs have taken over America's roads. Ad campaigns promote them as safer and “greener” than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect—for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

of men into the mountains during one of the worst winters in recorded history...

K2: Triumph And Tragedy Jan 24 2021 K2 is the second highest mountain in the world, at 8611 metres only a couple of hundred metres lower than Everest. It is one of the most unrelenting and testing of the world's 8000-metre peaks. Jim Curran came to K2 as a climbing cameraman with an unsuccessful British expedition, but stayed on through the climbing season. This is his account of the dramatic events of that summer, a story of ambitions both achieved and thwarted on a mountain which all high-altitude climbers take the most pride in overcoming. In 1986 K2 took its toll of those ambitions. Curran vividly describes the moments that contribute to the exhilaration of climbing on the world's most demanding mountain, and he assesses the tragedy of that summer with compassion and impartiality.

No Shortcuts to the Top Oct 01 2021 NATIONAL BESTSELLER • This gripping and triumphant memoir from the author of *The Mountain* follows a living legend of extreme mountaineering as he makes his assault on history, one 8,000-meter summit at a time. "From the drama of the peaks, to the struggle of making a living as a professional climber, to the basic how-tos of life at 26,000 feet, *No Shortcuts to the Top* is fascinating reading."—Aron Ralston, author of *Between a Rock and a Hard Place* and subject of the film *127 Hours* For eighteen years Ed Viesturs pursued climbing's holy grail: to stand atop the world's fourteen 8,000-meter peaks, without the aid of bottled oxygen. But *No Shortcuts to the Top* is as much about the man who would become the first American to achieve that goal as it is about his stunning quest. As Viesturs recounts the stories of his most harrowing climbs, he reveals a man torn between the flat, safe world he and his loved ones share and the majestic and deadly places where only he can go. A preternaturally cautious climber who once turned back 300 feet from the top of Everest but who would not shrink from a peak (Annapurna) known to claim the life of one climber for every two who reached its summit, Viesturs lives by an unyielding motto, "Reaching the summit is optional. Getting down is mandatory." It is with this philosophy that he vividly describes fatal errors in judgment made by his fellow climbers as well as a few of his own close calls and gallant rescues. And, for the first time, he details his own pivotal and heroic role in the 1996 Everest disaster made famous in Jon Krakauer's *Into Thin Air*. In addition to the raw excitement of Viesturs's odyssey, *No Shortcuts to the Top* is leavened with many funny moments revealing the camaraderie between climbers. It is more than the first full account of one of the staggering accomplishments of our time; it is a portrait of a brave and devoted family man and his beliefs that shaped this most perilous and magnificent pursuit.

K2 Sep 19 2020 A thrilling chronicle of the tragedy-ridden history of climbing the world's most difficult and unpredictable mountain, by the bestselling authors of *The Mountain* and *No Shortcuts to the Top* "Gripping . . . reveals a good deal about the rarefied noble-gonzo world of high-altitude mountaineering."—The New York Times Ed Viesturs, one of the world's premier high-altitude mountaineers, explores the remarkable history of K2 and of those who have attempted to conquer it. At the same time, he probes the mountain's most memorable sagas in order to illustrate lessons about the fundamental questions mountaineering raises—questions of risk, ambition, loyalty to one's teammates, self-sacrifice, and the price of glory. Viesturs knows the mountain firsthand. He and renowned alpinist Scott Fischer climbed it in 1992 and got caught in an avalanche that sent them sliding to almost certain death before Ed managed to get into a self-arrest position with his ice ax and stop both his fall and Scott's. Focusing on seven of the mountain's most dramatic campaigns, from his own troubled ascent to the 2008 tragedy, Viesturs crafts an edge-of-your-seat narrative that climbers and armchair travelers alike will find unforgettably compelling. With photographs from Viesturs's

personal collection and from historical sources, this is the definitive account of the world's ultimate mountain, and of the lessons that can be gleaned from struggling toward its elusive summit.

Innovating Analytics Oct 13 2022 How does a CEO, manager, or entrepreneur begin to sort out what defines and drives a good customer experience and how it can be measured and made actionable? If you know how well the customer experience is satisfying your customers and you know how to increase their satisfaction, you can then increase sales, return visits, recommendations, loyalty, and brand engagement across all channels. More reliable and more useful data leads to better decisions and better results. *Innovating Analytics* is also about the need for a comprehensive measurement ecosystem to accurately assess and improve the other elements of customer experience. This is a time of great change and great opportunity. The companies that use the right tools and make the right assessments of how to satisfy their customers will have the competitive advantage. *Innovating Analytics* introduces an index that measures a customer's likelihood to recommend and the likelihood to detract. The current concept of the Net Promoter Score (NPS) that has been adopted by many companies during the last decade—is no longer accurate, precise or actionable. This new metric called the Word of Mouth Index (WoMI) has been tested on hundreds of companies and with over 1.5 million consumers over the last two years. Author Larry Freed details the improvement that WoMI provides within what he calls the Measurement Ecosystem. He then goes on to look at three other drivers of customer satisfaction along with word of mouth: customer acquisition, customer loyalty, and customer conversion.
