From the birch to the willow, Sharlyn Hidalgo invites you to walk in the footsteps of the druids and enrich your life with the sacred power of trees. This wise and inspiring book will introduce you to all fifteen revered trees of the Celtic Tree Calendar and their unique gifts of healing, guidance, and higher consciousness. Progress through the calendar in sequence or choose a particular month to cultivate a relationship with these majestic spirits of nature. Perform guided meditations and go on journeys to discover the totems, guides, and deities corresponding to each species. Travel through the Wheel of the Year and learn about each tree's astrology, ruling planets, rune symbol, and ogham—its letter of the Celtic tree alphabet. *The Healing Power of Trees* is your guide to living the principles of the Celtic tradition—tuning in to the rhythms of nature, respecting the land, and fulfilling your role as a steward of the earth. Includes information on all 25 ogham letters, Celtic holidays, and how to conduct a tree-honoring ceremony. Size 8.25x11 inches Hardcover A guide to conscious living through the moon and her phases, incorporating wellness rituals, spellwork, and witchcraft for the modern seeker. We all know the moon. We all have a relationship with it. The earliest people obeyed her orbit, timed their months and holidays and celebrations and agriculture to the moon; the echoes of that system are still visible today, though the connection to the moon is often forgotten. Sarah Faith Gottesdiener is the leader of a movement to remind us of that lineage, guiding our rhythms and our sleep, our energy and our emotions, reminding us of our humanity and our magic. In her self-published Many Moons Workbooks and Lunar Journals, as well as her sold-out classes, she has guided over 50,000 readers to a deeper relationship with the moon, and through it, with themselves. This evergreen book will be an informative and comprehensive guide to lunar living, incorporating radical, self-empowering, and magical tools and resources for the beginner and experienced lunar-follower alike. Depending on where we are in our lives, depending on what we are feeling or what is happening around us, the moon allows us a space to invite ritual into our daily lives. The Moon Book will provide a framework on how to utilize the entire lunar cycle holistically, while offering ways for the reader to develop a personal relationship with their own cycles—energetic, personal, and emotional—through the lens of the moon's phases. Add intention, purpose and balance into your life with this beautifully designed Planner. Fill in the months and dates, pick up where you left off and avoid unused pages. Organize your schedule and learn to make the moon phase, daily card draws and self-affirmations part of your everyday life. Includes the wheel of the year and a quick guide to moon phases. Improve your Work-Life balance and reach new goals. Great for beginners and experienced witches and magical people. Makes for the perfect gift no matter the time of year. An Instant New York Times Bestseller! In their first collaboration since the Newbery Medal- and Caldecott Honor-winning *Last Stop on Market Street*, Matt de la Peña and Christian Robinson deliver a poignant and timely new picture book that's sure to be an instant classic. When Carmela wakes up on her birthday, her wish has already come true--she's finally old enough to join her big brother as he does the family errands. Together, they travel through their neighborhood, past the crowded bus stop, the fenced-off repair shop, and the panadería, until they arrive at the Laundromat, where Carmela finds a lone dandelion growing in the pavement. But before she can blow its white fluff away, her brother tells her she has to make a wish. If only she can think of just the right wish to make . . . With lyrical, stirring text and stunning, evocative artwork, Matt de la Peña and Christian Robinson have crafted a moving ode to family, to dreamers, and to finding hope in the most unexpected places. The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ

will rule a new Jerusalem. With an introduction by Will Self. Add intention, purpose and balance into your life with this beautifully designed Planner. Fill in the months and dates, pick up where you left off and avoid unused pages. Organize your schedule and learn to make the moon phase, daily card draws and self-affirmations part of your everyday life. Includes the wheel of the year, a quick guide to moon phases and Spell or Ritual log pages.. Improve your Work-Life balance and reach new goals. Great for beginners and experienced witches and magical people. Makes for the perfect gift no matter the time of year. An earthy and beautiful collection of four stories that celebrate the seasons, nature, and life, from award-winning author-illustrator Phoebe Wahl. Little Witch Hazel is a tiny witch who lives in the forest, helping creatures big and small. She's a midwife, an intrepid explorer, a hard worker and a kind friend. In this four-season volume, Little Witch Hazel rescues an orphaned egg, goes sailing on a raft, solves the mystery of a haunted stump and makes house calls to fellow forest dwellers. But when Little Witch Hazel needs help herself, will she get it in time? Little Witch Hazel is a beautiful ode to nature, friendship, wild things and the seasons that only Phoebe Wahl could create: an instant classic and a book that readers will pore over time and time again. Follow the Sauk and Meskwaki through a year of their seasonal activities, during the time of their residence along the Upper Mississippi River valley, centered on the present-day Quad Cities, from 1735 to 1831. Rich illustrations coupled with clear text, bring the life of the people alive. Presents a broad-range thematic unit on astronomy for use with intermediate and middle school students, based on three reference selections, each with activities across the curriculum, and suggestions and instructions for bulletin boards. Features reproducible activity sheets. The perfect gift for moon and space enthusiasts, a collection of photographs and global folklore capturing Earth's only natural satellite. From Strawberry to Dragon, Harvest to Storm, the full moon is known by many names around the world and across the seasons, and each name has a story behind it. This beautiful photographic celebration of our closest celestial neighbor captures the visual wonder and the connection we feel to the moon. Including three dozen folk names and short evocative explanations drawn from Native American, Inuit, Celtic, medieval English, Hindu, Chinese, Japanese, and pagan cultures, Seasons of the Moon presents an inspired visual pairing for each, taken in the month the folk name represents. This portrait of our eternal fascination with the moon is a welcome companion as we look to the sky throughout the seasons. The stars at Hanna's birth predict greatness, but she experiences precious little of it as the only girl growing up at an all male Monastery. Everyone there learns the same skills: how to perform basic magic spells and how to access the Memories, a pictorial historical system embedded into the brains of humans by the Ancients, a now defunct race. Even as she studies the Memories, Hanna wonders what could be so great about accessing them. Yet this ability is more exceptional than Hanna believes; most humans have lost the ability to access the Memories. Hanna earns exile for her father and herself when she inadvertently reveals that she knows the secret language of the Priests-a crime normally punishable by death. As Hanna and her father embark on their journey over frighteningly unfamiliar land and sea, searching for a safe place to make their new life, she ruefully longs for the security of the Monastery. Facing seasickness and walking distances greater than she has ever imagined, Hanna's doubts grow that she is bound for anything but despair and banishment. But the stars did speak the Truth. Greatness

does await Hanna—if only she can survive being kidnapped, betrayed time and again, and can outrun a flood such as her world has never experienced before. *Moon Bath* a luxurious guide that invites readers to immerse themselves in the healing powers of nature. Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is *Fair Play*: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, *Fair Play* helps you prioritize what's

important to your family and who should take the lead on every chore, from laundry to homework to dinner. “Winning” this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in. Did you know the cycles of the moon have a huge effect on our health, our mood, our relationships, and our work? By understanding these phases, we can work with them to improve and empower every aspect of our lives. In *Moonology*, world-renowned astrologist Yasmin Boland unveils:

- why connecting with the moon can change your life for the better
- powerful rituals and ceremonies for each moon phase
- how the moon connects us to nature and the cosmos
- how to work out where the moon is in each cycle
- international New Moon and Full Moon dates for the next 10 years

You will also learn affirmations, visualizations, and chants to use during each phase of the moon, and will discover the role of Angels, Goddesses, and Ascended Masters during the New and Full Moons. This is a book for all those wishing to deepen their connection with nature and take their spiritual practice to a new level. This rich visual guide takes readers aged 9–14 on a journey through the Earth's solar system, around the galaxy, and into deep space to learn about the moon, sun, planets, stars, and constellations. Prior to the advent of electricity, every night held the possibility of a celestial light show. People in even the most urban environments were exposed to the awe and majesty of the heavens, which clearly "proclaim the glory of God." The contemplation of the celestial orbs and their movements provided early man with the most direct connection to his Lord. In the Qur'anic story of Abraham, it is his observance of heavenly phenomena that leads him to his certainty of God's unity and transcendence. Since the time of the Seljuq Turks, the crescent moon has been a sign of Islam. For Muslims in North America, there has been much confusion regarding when Ramadan begins, when to fast, and when to break the fast. Hamza Yusuf provides clarity through this detailed and scholarly work that decisively makes the case for sighting the crescent moon with the naked eye, as has been the Islamic tradition for 1400 years. This is essential reading for anyone seeking guidance on this important and sacred matter. An irresistible photographic story featuring wild squirrels in homemade miniature domestic settings -- taking a bath, doing laundry, and barbecuing -- will surprise and amuse readers and animal lovers of all ages! Adorable squirrels as you've never seen them! You may think you know what squirrels do all day...but Mr. Peanuts is no ordinary squirrel. Instead of climbing trees, he plays the piano. ("Moonlight Sonata" is his favorite.) Instead of scurrying through the woods, he reads books (such as *A Tale of Two Cities*). But everything is more fun with company, so Mr. Peanuts writes a letter to Cousin Squirrel and invites him for a visit! Featuring candid photographs of wild squirrels in handcrafted, homemade miniature settings, this irresistible book is sure to delight readers young and old! The *Farmers Almanac* is an annual publication published every year since 1818. It is the only publication of its kind which generations of American families have come to trust. Its longevity speaks volumes about its content which informs, delights, and educates. Best known for its long-range weather predictions, the *Farmers Almanac* provides valuable information on gardening, cooking, fishing, and more. The moon's constant phases remind us that even in our failings, when our light decreases, there is always hope for renewal. The

moon also teaches about the reality of (spiritual) darkness and the need for the (spiritual) light of Messiah. Perhaps this is one reason that Yeshua revealed to Nicodemus the need to be born again at nighttime. The moon would have been visible in the evening sky as the two spoke about heavenly things. While it's possible that Nicodemus may have wanted to question the Master under the cover of darkness, Yeshua allowed their physical surroundings to teach spiritual truth: "You must be born again." This booklet gives the basics of the new moon as mentioned in Scripture, suggests spiritual applications, and gives a concise reference guide for each month's themes and relationship to a specific tribe of Israel. This set comprises a book and pack of cards and is a divinatory system and an introduction to lunar astrology. It allows the reader to align their life to the fluctuating rhythms of the moon and to make in-depth, multi-layered readings. In Joker Moon, the next Wild Cards adventure from series editor George R. R. Martin, we follow Aarti, the Moon Maid, who can astrally project herself onto the surface of the moon and paint projections across the lunarscape. Theodorus was a dreamer. As a child, he dreamt of airplanes, rockets, and outer space. When the wild card virus touched him and transformed him into a monstrous snail centaur weighing several tons, his boyhood dreams seemed out of reach, but a Witherspoon is not so easily defeated. Years and decades passed, and Theodorus grew to maturity and came into his fortune . . . but still his dream endured. But now when he looked upward into the night sky, he saw more than just the moon . . . he saw a joker homeland, a refuge where the outcast children of the wild card could make a place of their own, safe from hate and harm. An impossible dream, some said. Others, alarmed by the prospect, brought all their power to bear to oppose him. Theodorus persisted never dreaming that the Moon was already inhabited. And the Moon Maid did not want company. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Take a look at our other Books too, you will certainly find another one that you will also like ! The Effect: An Introduction to Research Design and Causality is about research design, specifically concerning research that uses observational data to make a causal inference. It is separated into two halves, each with different approaches to that subject. The first half goes through the concepts of causality, with very little in the way of estimation. It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation. Subjects include heavy emphasis on data-generating processes and causal diagrams. Concepts are demonstrated with a heavy emphasis on graphical intuition and the question of what we do to data. When we "add a control variable" what does that actually do? Key Features: • Extensive code examples in R, Stata, and Python • Chapters on overlooked topics in econometrics classes: heterogeneous treatment effects, simulation and power analysis, new cutting-edge methods, and uncomfortable ignored assumptions • An easy-to-read conversational tone • Up-to-date coverage of methods with fast-moving literatures like difference-in-differences Lunar calendars suffer from an inherent uncertainty in the length of each month and the number of

months in the year. Variable atmospheric conditions, weather and the acuity of the eye of an observer mean that the first sighting of the new moon crescent can never be known in advance. Calendars which rely on such observations to define the beginning of a new month therefore suffer from this lack of certainty as to whether a month will begin on a given day or the next. The papers in this volume address the question of how ancient and medieval societies lived with the uncertainties of a lunar calendar. How did lack of foreknowledge of the beginning of the month impact upon administration, the planning of festivals, and historical record keeping? Did societies replace the observation of the new moon crescent with schematic calendars or calendars based upon astronomical calculations and what were the ideological and practical consequences of such a change? The contributors to this volume address these topics from the perspectives of a variety of Ancient Near Eastern, Jewish, Ancient and Medieval European, Asian and American cultures.
