The story of Mount St. Helens is that of an active volcano and human interaction with it. The mountain is culturally important to the regional native people. Its Cowlitz name, Lawetlat'la, means "Person From Whom Smoke Comes." Early European settlers saw opportunities to make a living from the natural resources, and people fell in love with the forested valleys and slopes of the glacier-clad peak with the blue lake at its foot. Forgotten were the eruptions of the 19th century and the fact that the landscape was a product of frequent violent explosions. A report from the 1970s reminded locals that Mount St. Helens is an active volcano and could erupt again before the end of the 20th century. Only a few people at that time were aware of what the mountain was capable of, and many were surprised at the events that took place in 1980. "The epic story of the U.S. Army's 10th Mountain Division, whose elite soldiers broke the last line of German defenses in Italy's mountains in 1945, spearheading the Allied advance to the Alps and final victory."--Provided by publisher. Pays tribute to America's strongest brand icons. Reveals brand history, heritage, market position and

achievements as well as many fascinating insights into more than 70 of America's leading brands. Seminar paper from the year 2005 in the subject Geography / Earth Science - Regional Geography, grade: 2, Friedrich-Alexander University Erlangen-Nuremberg (Institut für Geographie), course: High Mountains in North America, language: English, abstract: In the nineteenth century visits to the mountains were limited because of a lack of access, poor roads, limited leisure time and low income of the majority of North American citizens (Goeldner, 1996). In the 1860s railroads were built and roads improved, so travel increased slowly, although it was still a privilege of people with high incomes. The number of travellers did a huge jump after World War I as the automobile became affordable for “middle class” families. As the infrastructure improved, more and more summer tourists arrived. A tourism-based economy began to grow, hotels, motels and restaurants were built. Until the skiing movement started in the 50's and 60's the winter season was long and uneventful (Goeldner, 1996). When skiing finally became a national trend, major ski resorts developed and many of them were and still are two-season resorts. Central to the tourist group from the mid 60's on were the baby boomers, ranging in age from 18 to 35 (Goeldner, 1996). As the numbers of tourists were still rising in the 1980's, locally owned establishments saw themselves competing with big-time operators. Usually a whole complex of lodging, restaurants and everything else to serve the tourists was developed. In the 1990's mountain tourism has grown to be a powerful economic force. Fast food chains like McDonalds and accommodation chains such as Holiday Inn have come on the scene (Goeldner, 1996). Today in mountain communities outlet stores, gambling, country clubs, exclusive residences etc. can be found. Competition is tougher than ever before and environmental issues challenge the high mountain communities.
