When acclaimed historian Sarah Knott became pregnant, she started looking for a history of motherhood - only to find that no such book exists. For centuries, historians have concerned themselves with wars and revolutions, not the everyday details of carrying and caring for a baby. These details matter- they shape our feelings and give structure to our hours. But they leave little historical trace. Much to do with becoming a mother, past or present, is lost or forgotten. Using the arc of her own experience, from miscarriage to the birth and early babyhood of her two children, Sarah Knott explores the changing traditions,

experiences and cultural implications of motherhood. Drawing on diaries and letters, paintings and songs, Mother vividly brings to life the lost stories of both ordinary and extraordinary women - from the labour pains of a South Carolina field slave to the triumphant smile of a royal mistress pregnant with a king's first son - to create a moving depiction of a universal and endlessly various human experience. WITH A FOREWORD BY TOM BRADY "As a sportscaster and sports historian, Jim's career genuinely stands the test of time. . . . This book is sports history about some of the greats by one of the greats, who was taking it all in on the sidelines, in the stands or the dugout, by the eighteenth green, courtside, or in the broadcast booth." —Tom Brady, seven-time NFL Super Bowl champion GOAT A riveting, insightful memoir of never-before-told stories from Jim Gray, twelve-time Emmy Award-winner, Hall of Fame sports broadcaster, and renowned interviewer— that explores the author's career and the inside stories and memorable moments of the famous legends he has covered including, Muhammad Ali, Tom Brady, Kobe Bryant, LeBron James, Michael Jordan and Mike Tyson. In Talking to GOATs, award-winning broadcaster Jim Gray looks back at his four decades of sports reporting from the unparalleled perspective of one of the world's most respected and skilled interviewers. A journalist who many iconic athletes have trusted to tell their stories (of both triumph and disgrace), Jim has had unprecedented access to the people, places and extraordinary events in the world of sports. Asking tough but fair questions, he has broken

numerous stories, and landed squarely in the middle of others, from the Ben Johnson and Barry Bonds steroid scandals, to Michael Jordan's surprise retirement, to the off-the-court Kobe/Shaq feud which led to their on-the-court break up, to being part of the live broadcast for twenty-two Super Bowls. He's climbed into the ring to interview Mike Tyson after he bit off a chunk of Evander Holyfield's ear, and stood next to Ron Artest when the "Malice at the Palace" melee erupted, and was on site at the bombing of the Atlanta Olympics. Anyone who has watched Jim effortlessly engage his subjects at the precise moment of triumph or tragedy has little idea what it takes to secure the interview, or what actually happens when the camera cuts away. These are real, mesmerizing, and previously untold stories. Talking to GOATs features numerous world-class athletes, including Muhammad Ali, Tom Brady, Kobe Bryant, LeBron James, Michael Jordan, Floyd Mayweather, Michael Phelps, Mike Tyson and Tiger Woods, and world leaders George W. Bush, Barack Obama, Mikhail Gorbachev, and many more. On each page, Jim gives the reader a coveted all-access pass as he reviews the best interviews, the best athletes, and the best games in modern sports history. It's like a personal introduction to the characters and careers of these heroes and villains we've known since childhood. He examines how money, celebrity, the media, and power interact, and how sports, more than any other institution, has led to momentous transformations in American society. Global warming and concerns about sustainability recently have pushed ecological design to the forefront of architectural study and debate. As Peder Anker explains in *From Bauhaus to Ecohouse*, despite claims of novelty, debates about environmentally sensitive architecture have been ongoing for nearly a century. By exploring key moments of inspiration between designers and ecologists from the Bauhaus projects of the interwar period to the eco-arks of the 1980s, Anker traces the historical intersection of architecture and ecological science and assesses how both remain intertwined philosophically and pragmatically within the still-evolving field of ecological design. The idea that science could improve human life attracted architects and designers who looked to the science of

ecology to better their methodologies. Walter Gropius, the founder of the Bauhaus school, taught that designed form should follow the laws of nature in order to function effectively. With the Bauhaus movement, ecology and design merged and laid the foundation of modernist architecture. Anker discusses in detail how the former faculty members of the Bauhaus school -- including László Maholy-Nagy and Herbert Bayer -- left Nazi Germany in the mid-1930s and engaged with ecologists during their "London period" and in the U.S. A subsequent generation of students and admirers of Bauhaus, such as Richard Buckminster Fuller and Ian McHarg, picked up their program, and -- under the general banner of merging art and science in the design process -- Bauhaus-minded architects began to think ecologically while some ecologists lent their ideas to design. Anker charts complicated currents of ecological design thought spanning pre-- and post--World War II and through the cold war, including pivotal changes such as the emergence of space exploration and new theories on closed-system living in space capsules, space stations, and planetary colonies. Space ecology, Anker explains, inspired leading landscape designers of the 1970s, who used the imagined life of astronauts as a model for how humans should live in harmony with nature. Theories of how to design for extraterrestrial living impacted design and ecological thinking for earth-based living as well, as evidenced in Disney's Spaceship Earth attraction as well as in the Biosphere 2 experiments in Arizona in the early 1990s. Illuminating important connections between theories about the relationship between humans and the built environment, Anker's provocative study provides new insight into a critical period in the evolution of environmental awareness. XLH883, XL883R, XLH1100, XL/XLH1200 **Named One of the New York Post's Best New Books to Read ** FIRE IN THE STRAW is the

witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter, to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press.. Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life. Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. *Fire in the Straw* is a love story, a confessional, and a beautiful big-hearted memoir. *The Utrecht Psalter*, one of the great survivals of the Carolingian Renaissance, was made about 820-835 at the Benedictine monastery of Hautvilliers and decorated with 166 dynamic, almost impressionistic pen drawings which are masterly interpretation of the Psalter text. In 1996 it was exhibited in Utrecht, alongside related manuscripts such as the Aachen and Ebbo Gospels, the Byzantine Khludov Psalter and the later English Harly and Eadwine Psalters, copied in Canterbury when the Utrecht Psalter was for some centuries in England. Five scholarly essays, designed for a wide-ranging readership, include a discussion of Carolingian cultural achievements; an analysis of the Psalter itself and its place in the history of book production; an overview of medieval Psalter illustration in both Byzantium and the West; and an examination of the English copies of the Utrecht Psalter in the later Middle

Ages. FXDB (1991-1992), FXDC (1992), FXDL (1993-1998), FXDWG (1993-1998), FXD (1995-1998), FXDS-CONV (1995-1998) The Leveller movement of the 1640s campaigned for religious toleration and a radical remaking of politics in post-civil war England. This book, the first full-length study of the Levellers for fifty years, offers a fresh analysis of the originality and character of Leveller thought. Challenging received ideas about the Levellers as social contract theorists and Leveller thought as a mere radicalisation of parliamentarian thought, Foxley shows that the Levellers' originality lay in their subtle and unexpected combination of different strands within parliamentarianism. The book takes full account of recent scholarship, and contributes to historical debates on the development of radical and republican politics in the civil war period, the nature of tolerationist thought, the significance of the Leveller movement and the extent of the Levellers' influence in the ranks of the New Model Army. Vols. for 1964- have guides and journal lists. Phylogenetic Systematics, first published in 1966, marks a turning point in the history of systematic biology. Willi Hennig's influential synthetic work, arguing for the primacy of the phylogenetic system as the general reference system in biology, generated significant controversy and opened possibilities for evolutionary biology that are still being explored. Its translator into English, Charles P. Loomis, well described it as a volume which pointed back into the Middle Ages and ahead into the future in its attempt to answer the questions: "What are we? Where are we? Whence did we come? Where are we going?" If the questions seem portentous in the extreme, the answers Toennies provides are modest and compelling. Every major field from sociology, to psychology, to anthropology, has found this to be a praiseworthy book. The admirable translation by Professor Loomis did much to transfer praise for the Toennies text from the German to the English-speaking world. Now, outfitted with a brilliant new opening essay by John Samples, the author of a recent full-scale biographical work on Toennies, 'Community and Society' is back in print; a welcome reminder of the glorious past of German social science. Record your encounters with nature in this fantastic, interactive book Kids can write about and draw the plants and animals they see. They can paste photos, postcards and feathers found on the ground. Plus, there's great info to learn about nature. Implicit Meanings was first published to great acclaim in 1975. It includes writings on the key themes which are associated with Mary Douglas' work and which have had a major influence on anthropological thought, such as food, pollution, risk, animals and myth. The papers in this text demonstrate the importance of seeking to understand beliefs and practices that are implicit and a priori within what might seem to be alien cultures. This brief examines the interaction and synergy between the philosophical concepts embedded in the ideas of Community Oriented Policing (C.O. P.) and urban security aided by technological innovations. While the philosophy of C.O.P. stresses the importance of collaboration between members of the public and its police forces technology that is becoming rapidly integrated in various police tactics creates new legal challenges and operational hurdles. This approach, coined as "Next Generation Community Policing", is discussed through

the chapters of the brief and illustrated with examples from a number of different countries and their approaches to this topic. This Brief will be of interest to researchers in criminology and criminal justice, particularly in police studies, as well as related fields such as urban security planning and sociology.

Index Descriptive content provided by Syndetics™! a Bowker service. Based on the blockbuster movie starring Meryl Streep and Kevin Bacon. To help heal a marriage on the rocks, river-rafting expert Gail, her husband Tom, and their son embark on a white water adventure in Montana. Along the way, they encounter two inexperienced rafters supposedly looking for their friends downriver. Little do they know that the men are escaped convicts whose bid for freedom has a body count. Things take a turn when the young family learns that they are now the captives of two armed killers, and it becomes clear that there is much more at stake than a marriage. Desperate to evade both the police and federal marshals, the men force the family down the river and into the mouth of a deadly class 5 white-water rapid. Careening towards mortal peril, Gail and Tom must bond together to save their family from the brutality of nature and the savageness of man. This high-stakes thriller is both a testament to the power of mother nature and a classic adventure story that is perfect for fans of CJ Box and Craig Johnson. Denis O'Neill, the screenwriter for the movie *The River Wild*, brings the striking beauty of the film into his writing and ratchets up the danger that races forward to a breathtaking conclusion. ** A delight from paddock to finish line." --Booklist (STARRED REVIEW) ** Brad Smith "rivals Elmore Leonard at his best" (Publishers Weekly). His latest novel, for fans of Richard Russo and Jane Smiley, is a terrific novel about a thirty-something single woman, the untried colt she inherits, a horse crazy little girl, and their band of misfits and has-beens who stick it to the establishment in the cutthroat world of horse racing. Billie Masterson is a thirty-something chronic

underachiever, drowning herself in alcohol and bad relationships in Ohio. She hasn't been home to the family's broken-down thoroughbred farm in Kentucky since college. Her mother committed suicide when Billie was a teen and she blames her father, Will Masterson. When Will drops dead while working on the farm, Billie returns to rural Kentucky for the funeral, intending only to pay her respects before high-tailing it back to Ohio. However, she's informed by her father's lawyer, the garrulous David Mountain Clay, that she now owns the farm...and all the debt that goes with it. Determined to sell everything, settle the debts and get out of town, Billie discovers that her father's colt, a horse named Cactus Jack, is the object of obsession for billionaire Reese Ryker, the louche scion of a department store dynasty and now owner of Double R Racing, one of the top thoroughbred stables in the world. Billie is willing to sell everything to Ryker—until she realizes that he's an entitled misogynist and a not-so-subtle racist. Against her better judgment, she decides to keep the farm and the untested horse. To do that she needs to race the animal—and beat Ryker at his own game. Assisted by a team of misfits, including a washed-up trainer with whom she has a bit too much history, the horse-crazy little girl next door, and her father's ex-girlfriend, Billie and Cactus Jack take the track by a storm. Issued also in French under title: L'art au Canada. The palms are among the most abundant, diverse, and important families of plants found in the Amazon. Based on extensive field work, this book provides a systematic treatment of all palms that occur naturally in the Amazon region. Each species is exhaustively described with reviews of their distribution, habitat, and ecology. Introductory chapters describe the physical setting of the Amazon region as well as on the biogeography and ecology of the palm family. This first modern treatment of the 135 species of Amazon palms provides a definitive account of their ecology, uses, and biogeography. It will be welcomed by students, teachers, and researchers of botany, ecology, agronomy, and conservation biology.
