The Generation Gap, Or, Belarusian Differences in Goals, Values and Strategy May 31 2023

Next-Generation Automated Cognitive Skill Training: Problems, Goals, and Approaches Apr 05 2021 Research efforts toward the next generation of training systems should have two goals. First, training should achieve significant improvements in speed and quality of skill acquisition. Second, development and production of computer-based training systems should advance beyond the current hand-crafting approach by devising both methodologies and tools that make it possible for a large number of developers to engineer many different high quality training systems. This paper focuses on two key problems that currently confront the computer-based cognitive skills training community: the needs for (1) strong models of cognitive skill acquisition that prescribe what students should learn and how they should learn it and (2) robust engineering methodologies that can support the rapid, widespread development of effective computer-based training for cognitive skills.

Partnership for a New Generation of Vehicles (PNGV) May 26 2020

Intelligent Agents V: Agents Theories, Architectures, and Languages Feb 01 2021 The leading edge of computer science research is notoriously ?ckle. New trends come and go with alarming and unailing regularity. In such a rapidly changing ?eld, the fact that research interest in a subject lasts more than a year is worthy of note. The fact that, after ?ve years, interest not only remains, but actually continues to grow is highly unusual. As 1998 marked the ?fth birthday of the International Workshop on Agent Theories, Architectures, and Languages (ATAL), it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth, and re ect on how the ?eld has developed and matured. The ?rst ATAL workshop was co-located with the Eleventh European Conference on Arti?cial Intelligence (ECAI-94), which was held in Amsterdam. The fact that we chose an AI conference to co-locate with is telling: at that time, we expected most researchers with an interest in agents to come from the AI community. The workshop, whichwasplannedoverthesummerof1993,attracted32submissions,andwasattended by 55 people.ATAL was the largest workshop at ECAI-94, and the clear enthusiasm on behalfofthecommunitymadethedecisiontoholdanotherATALworkshopsimple.The ATAL-94proceedingswereformallypublishedinJanuary1995underthetitleIntelligent Agents, and included an extensive review article, a glossary, a list of key agent systems, and — unusually for the proceedings of an academic workshop — a full subject index. Thehighscienci?candproductionvaluesembodiedbytheATAL-94proceedingsappear to have been recognized by the community, and resulted inATAL proceedings being the most successful sequence of books published in Springer-Verlag s Lecture Notes in Arti?cial Intelligence series.

Report of the Workforce Leadership Committee of the Workforce Development Council Jun 19 2022

Goal Crusher Jan 15 2022 Discover The Most Effective Strategy To Crush Your New Year Resolutions And Turn Your Goals Into Reality! The common meaning of goal is something that any person wishes to achieve but only we ourselves can truly define our unique goals to ourselves. Throughout the civilization of the human race, every achievement originates from the ideas and efforts of our ancestors. Since then, many individuals have gathered and aspired to achieve goals in their respective fields. In each generation, we have found meanings of our lives in our different goals when we possess the desire to achieve a certain purpose in life. By all means, we will use our best efforts to achieve these goals. Then, these achievements, in turn, inspire the next generation to improve and achieve more than our predecessors have succeeded. As it is subjective to define a person's goal to another, the chances for a person achieving his/her goal can depend on various factors as shown by multiple research from various fields of study. While some pursuits of success are limited by certain factors, there are others whose success grows on different factors. Industry experts, business people, motivational speakers, entrepreneurs have all shared their knowledge, methods and skills with us to achieve our targets or emulate their success. Despite that, many have often overlooked the importance of setting their goals clear enough to utilize the information and skills they possess effectively. Below are the chapters that you are about to explore: Chapter 1: The Truth about Goals Chapter 2: The Power Of Goal Setting Chapter 3: Goal Crushing Techniques Chapter 4: Reasons Of Failures Chapter 5: Goal Crushing Shortcuts Chapter 6: Short Term Goals and Long Term Goals Chapter 7: Balancing Your Life Chapter 8: Successful Mindset Conditioning **The Relationship Between Achievement Goals and the Academic Success of First-generation College Students** Oct 12 2021 "Recent research has established that first-generation college students, or those students without a parent with a four-year college degree, tend to underperform academically compared to continuing-generation college students, or those with at least one parent with a four-year college degree. The current study was undertaken to attempt to explain this discrepancy, known as the social class achievement gap, through the use of achievement goal theory. A survey of 351 undergraduates was conducted with students reporting their generational status and their adoption of three achievement goals. Their first-semester GPA was later acquired. It was expected that generational status would predict achievement goal adoption, that achievement goal adoption would predict academic performance, and that goal adoption would mediate the relationship between generational status and academic performance. Results did not support these hypotheses. Potential explanations for the null effects and implications of these findings for the social class achievement gap literature are discussed." -- Page 5

The Evolution of Corporate Disclosure Dec 14 2021 This book provides a critical analysis of the evolution of corporate disclosure. Building upon prior academic literature, it assesses the most important changes in mandatory corporate disclosure, the growing relevance of social and environmental disclosure, and revolutionary new forms of corporate communication, in particular social media. It also includes empirical analyses that shed further light on the impact of voluntary communication, i.e. social and environmental reporting and corporate social media communication, on managerial and investment decisions. Lastly, it discusses new directions for accounting and corporate governance research on the theoretical and empirical challenges of corporate disclosure. Offering a wealth of relevant and timely advice, the book will help regulators design policies that allow businesses to overcome current and emerging economic, social, and technological challenges.

Post-2015 Development Goals Mar 05 2021 The Millennium Development Goals (MDGs) were launched at the UN General Assembly in 2001, and have had great influence on the field of international development. The Goals cover areas such as extreme poverty (i.e. living on less than US\$1.25 per day), primary education, child and maternal mortality, and HIV/AIDS; each Goal is supported by underlying targets, most of which have a target date of 2015. In July 2012, the UN Secretary-General established a High-level Panel, tasked with making recommendations as to what should replace the MDGs after 2015. Under the MDGs, some of the targets are phrased in universal terms, but others are relative - on extreme poverty, for example, the target is not to eliminate it but to reduce it by half. The Prime Minister has argued that the post-2015 framework should aim for the elimination of extreme poverty, and the Committee agrees. Another key debate is whether the post-2015 framework should incorporate issues of environmental sustainability, again supported by the Committee. The MDGs undoubtedly had great resonance around the world. The simplicity and measurability of the MDGs, and the level of responsibility countries have taken for meeting them, have been crucial factors in their success. For those involved in developing the post-2015 framework, the most critical task is to ensure that these strengths are retained.

New Renewable Generation Needed to Comply with Policy Goals Jul 21 2022

Partnership for a New Generation of Vehicles (Pngv) Jul 29 2020 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work.As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. Solar Power Generation Problems, Solutions, and Monitoring Jun 07 2021 Solar Power Generation Problems, Solutions, and Monitoring is a valuable resource for researchers, professionals and graduate students interested in solar power system design. Written to serve as a pragmatic resource for solar photovoltaic power systems financing, it outlines real-life, straightforward design methodology. Using numerous examples, illustrations and an easy to follow design methodology, Peter Gevorkian discusses some of the most significant issues that concern solar power generation including: power output; energy monitoring and energy output enhancement; fault detection; fire and life safety hazard mitigation; and detailed hardware, firmware and software analytic solutions required to resolve solar power technology shortcomings. This essential reference also highlights the significant issues associated with large scale solar photovoltaic and solar power generation technology covering design, construction, deployment and fault detection monitoring as well as life safety hazards.

Generation Z's Quick Guide to Leaving Home: What No One Ever Told You About Planning For The Future Oct 24 2022 How Can Generation Z Plan for the Future?When deciding it's time to move out of your parents' house, the future is filled with the unknown. Nonetheless, finding your new environment, making new friends, and setting new goals are all a part of the journey.Generation Z Guide to Leaving Home helps you identify why you are leaving home, where you want to go, and how to prepare for the transition ahead. We want to empower every member of Generation Z to be the author of your own narrative and to use your power to achieve your goals.This Practical Guide Includes:Advice on how to prepare for changeTips for the actual moving processStrategies to help you set and achieve your goalsA guide to set yourself up for success in your new home

Towards the Third Generation University May 19 2022 The book is very well-structured. . . [It] provides a timely contribution to a conversation with a long history, and debates over the nature and purpose of the university seem certain to figure prominently in educational discourse for many years to come. Peter Roberts, Journal of Educational Administrative and History Drawing from experience as a professor in innovation and entrepreneurship and as a consultant to universities, Wissema offers deep insights into management of the modern universities. The book is well-written and all those university administrators who wish to transform their universities into entrepreneurial universities would find the book very useful. Jandhyala B.G. Tilak, Journal of Educational Planning and Administration In Central and Eastern Europe, universities are struggling to adapt to the new economic and institutional situations. The concept of the Third Generation University is powerful in giving direction. In addition, the book offers much practical advice, taken from the author s experience as a consultant to universities. Marjan Bojadzhiev, University American College Skopje, Macedonia Although the quality of university management makes or breaks the effectiveness and efficiency of a university, most university managers come unprepared to the job while only few books and courses in the subject are available. This book offers, amongst other things, welcome insights into the issue of university management. In Wageningen,

the concept of the Third Generation University has proven to be inspiring, challenging and operational. It enabled us to develop science for Impact for a variety of new stakeholders. M. Kropff, Wageningen University and Research Centre, the Netherlands This book demonstrates that universities are subject to fundamental change, evolving from science-based, monodisciplinary institutions into transfunctional, international know-how hubs named third generation universities or 3GUs. J.G. Wissema explores the combination of forces that propel this dramatic change, tracing the historic development of universities, and exploring the technology-based enterprises, technostarters and financiers for start-ups and young enterprises that are the main partners of these 3GUs. He goes on to illustrate that universities play a new role as incubators of new science- or technology-based enterprises and take an active role in the exploitation of the knowledge they create. The book concludes with suggestions regarding the way in which changes in the university s mission should be reflected in subsequent organisational changes. Offering practical advice on the route forward for universities, and elucidating the role of education in entrepreneurship, this unique book will prove invaluable to academics and practitioners who seek to implement and facilitate changes for 3GU status. It will also appeal to students and researchers with an interest in business and management, education, entrepreneurship and public policy on education.

Dual-Process Theories of the Social Mind Jan 03 2021 "This volume provides an authoritative synthesis of a dynamic, influential area of psychological research. Leading investigators address all aspects of dual-process theories: their core assumptions, conceptual foundations, and applications to a wide range of social phenomena. In 38 chapters, the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation; social perception; thinking and reasoning; self-regulation; and the interplay of affect, cognition, and motivation. Current empirical and methodological developments are described. Critiques of the duality approach are explored and important questions for future research identified"--

Automatic Generation of Goal Models from Regulations Apr 25 2020 Organizations in many domains such as healthcare, finances, telecommunications, educa-tion, and software development, must comply with an ever-increasing number of regula-tions, including laws and policies. In order to measure compliance to regulation, several recent approaches propose modelling regulations using goals and indicators. However, creating goal models for regulations is time consuming and prone to errors, especially as this is usually done manually. This thesis tackles this issue by automating some of the steps for creating goal models, and by offering better ways to create graphical views of goal models than what is currently available nowadays in goal modelling tools. The notation used in this thesis is the Goal-oriented Requirement Language (GRL), which is part of the User Requirements Notation standard and is supported by the jUCMNav tool. The concepts of regulations and their indicators are captured using a tab-ular presentation in Comma-Separated Value (CSV) files. An import mechanism is added to jUCMNav to automatically create regulation goal models from such files. The imported GRL model can then be visualized using novel features that enable the addition of multiple views/diagrams in an efficient and usable way.

Climate Change, World Consequences, and the Sustainable Development Goals for 2030 Aug 22 2022 Climate change and its impact on society is considered one of the most important factors in understanding social and economic variables. Changing patterns in ecosystems, populations, and economic sectors form a perfect system for the 2030 Sustainable Development Goals. In order to understand how these goals can be addressed, further study on the current tactics and initiatives is required. Climate Change, World Consequences, and the Sustainable Development Goals for 2030 discusses the impact of climate change on the environment and the prospects for citizens, cities, and industry. The book also conducts an analysis of climate change to understand how society is coping and its effect on economic sectors. Moreover, it examines current strategies for achieving the Sustainable Development Goals and mitigating the negative impact on the environment. Covering a range of topics such as energy, global warming, and smart cities, this reference work is ideal for policymakers, environmentalists, government officials, practitioners, academicians, scholars, researchers, instructors, and students.

Setting Goals with Your Teen Mar 17 2022 When it comes to the evolution of your teen, where exactly do you fit into their big picture? From the dawn of time, parents have been coping with the yo-yo effect of their teenagers needing them one moment and pushing them away the next. As each generation has been inspired with new ideas, new insights and new technologies, the gap keeps getting a little wider. The wisdom of the elder generation is sometimes seen as irrelevant by the younger generation - at least until they reach about 30! If you've got a teen you may be seeing this very same yo-yo effect unfold in your daily life. But there is one key factor that can make all the difference in raising a well-grounded teenager. That difference is Goal Setting. In this ebook, you will discover practical parenting strategies used by successful parents of high achievers, athletes, celebrities and leaders. You can begin using these parenting techniques today, even if your communications with your teenager have been strained and you're not sure how to begin. Certified Life Coach Liv Montgomery guides you through proven methods to help you make a positive change in the life of your teen and set-up your young adult for an exceptionally successful life.o Learn how to determine age-appropriate goals for your teeno Uncover the secret to helping your teen achieve excellenceo Learn a step-by-step strategy for and reaching that big dream starting todayo Refine your parenting skills and connect with your teen at a deeper level

You Can Succeed!: This Book Was Written to Encourage the New Generation to Get an Education, Pursue Their Goals and Become Successful in Aug 02 2023 This book is not only about how to succeed, but it is a true story of my life and the trials and tribulations you go through even though you are on track for a happy and successful life. It takes effort and determination to reach your goal and continue to a happy retirement.

Review of the Research Program of the Partnership for a New Generation of Vehicles Jun 27 2020 This is the most recent report of the National Research Council's Standing Committee to Review the Research Program of the Partnership for a New Generation of Vehicles (PNGV), which has conducted annual reviews of the PNGV program since it was established in late 1993. The PNGV is a cooperative R&D program between the federal government and the United States Council for Automotive Research (USCAR, whose members are DaimlerChrysler, Ford Motor Company, and General Motors) to develop technologies for a new generation of automobiles with up to three times the fuel economy of a 1993 midsize automobile. The reports review major technology development areas (four-stroke direct-injection engines, fuel cells, energy storage, electronic/electrical systems, and structural materials); the overall adequacy of R&D efforts; the systems analysis effort and how it guides decisions on R&D; the progress toward long-range component and system-level cost and performance goals; and efforts in vehicle emissions and advanced materials research and how results target goals. Unlike previous reports, the Seventh Report comments on the goals of the program, since the automotive market and U.S. emission standards have changed significantly since the program was initiated.

Educational Objectives and the Teaching of Educational Psychology Sep 22 2022 The purpose of this book is to promote discussion about educational objectives generally and objectives in the teaching of educational psychology in particular. To this end, Part 1 contains a review of the literature concerned with these two subjects, and also reports on investigations into the views of British students, teachers, college staffs and educational psychologists on the question of the objectives of educational psychology in teacher preparation. A comprehensive bibliography is provided. A further important section of Part 1 proposes a method of systematizing teaching objectives, and suggests a heuristic device for the generation of objectives at different levels of conceptual generality and complexity of learning. An example of this model in the field of educational psychology is presented, which illustrates the general approach to the generation of teaching objectives and proposes a specific approach to the production of teaching objectives in educational psychology. In Part 2 a selection of readings in the fields of objectives and educational psychology provides the reader with some of the key source material referred to in Part 1. As well as being a valuable and stimulating addition to the current debate on the specifying of educational objectives, the arguments in this book about the role of educational psychology in teacher preparation raise some fundamental questions for those concerned with teacher education.

Service Goals for Three Generation Families Mar 29 2023

Fundraising and the Next Generation Aug 10 2021 Step-by-step guidance to key fundraising methods to attract, engage, and retain donors of all ages Fundraising and the Next Generation brings readers up to date on cases, research, opportunities, and challenges regarding philanthropy's next generation. Readers will learn practical strategies for cultivation, solicitation, and stewardship of Gen X and Y philanthropists using new technologies and traditional tools. Fundraising and the Next Generation covers the behaviors, key characteristics, and approaches for working with philanthropists under the age of forty. In addition, other age cohorts will be discussed to provide perspective, comparison, and related strategies. Includes step-by-step tools for setting up next gen technology in your organization and engaging Gen X and Y as donors Features a glossary of social media terms, a list of academic resources for development and professional advancement, and an assessment toolkit Defines the key characteristics of the four current generations, their habits for charitable giving, and how every development office can successfully engage them in philanthropy Provides a website with additional information beyond the book Savvy fundraising leaders understand that successful and sustained philanthropy is not just an issue for today. Long-term planning and diversified strategies allow fundraisers to access every prospective contribution possible. Timely and relevant, Fundraising and the Next Generation brings readers up to date on cases, research, opportunities, and challenges regarding philanthropy's next generation.

Finance and Manage Your Life May 07 2021 "A new twist on financial planning books." Finance and Manage Your Life: A Planning Guide for Generation Y was written specifically for the generation of young people who are just starting their adult life and are in the early stages of financial planning (though people over 34 may also find this material useful). The book's overriding theme is that any discussion of personal finance also needs to consider other important life issues; that you can't manage your finances successfully unless you have clear life goals and objectives. Conversely, you can't achieve most life goals without looking at your finances. In other words, these topics are inherently interrelated and, together, they should become part of a total life plan that includes: *Establishing your life goals and objectives. *Managing your time. *Managing and reducing your stress. *Planning your career development. *Organizing your physical environment. *Developing a "me" plan for health, fitness, and appearance. *Managing interpersonal relationships. *Developing and implementing a financial plan for now and the future. *Focusing on the interrelationship of financial planning with all of the other parts of your total life plan. The time to think about planning your life and finances is now. The earlier you do so, the more likely you are to achieve all of your goals.

A Generation from Now Apr 29 2023

Interplan: a Plan Generation System which Can Deal with Interactions Between Goals Jan 27 2023

Life Project for Generation Z Youth Nov 24 2022 Are you young and feel lost, not knowing which way to go in life? The book "Life Project for Young People of Generation Z" is the answer to your questions. In this complete guide, you'll learn how to define your personal and professional goals, develop skills that are important for success, and prepare yourself for a bright future. Written by subject matter experts, this book covers everything from the importance of having a life plan to the tools and resources that can help you achieve your goals. You'll discover how to stand out in the job market, how to prepare for job interviews, and how to identify and overcome obstacles along the way. In addition, this book also addresses the characteristics of Gen Z and how they relate to work and education, as well as the challenges and opportunities they face. You'll learn to leverage the knowledge and experience of previous generations, fighting ageism and building a support network for your success. If you are a young generation Z and want to create a bright future for yourself, this book is for you. With its practical and accessible approach, "Life Blueprint for Gen Z Youth" is the definitive guide to help you reach your goals and build the life of your dreams. Get it now and start transforming your life!

Achieving College Access Goals Sep 10 2021 With so much interest around the use of new media, many people concerned with improving college access are striving to master this emerging set of resources in order to better reach students, who without encouragement, are unlikely to pursue higher education. But, how much do individuals understand about the way low-income, first-generation, and other underserved students use new media? Do organizations perform audience research, create a strategy and include an evaluation plan as part of their new media efforts? This brief explores the meaning of new media and what research tells everyone about how underserved students use it. It also summarizes the results of a recent survey of low-income, first-generation students' media use. In addition, the brief discusses the implications of these results and other national research for using new media communications strategies to focus students on actions they need to take to prepare and plan for college. (Contains 7 endnotes.).

First Generation Millionaires Jul 01 2023 First Generation Millionaires is a daily success planner built to help individuals plan each day successfully to set them up to achieving their goals. This planner was put together mirroring some of the most successful people in history and how they manage their daily schedule.

Multiple Goals' Effect on Means Generation Sep 03 2023

Does Goal Generation Vary as a Function of Depressive Status? Oct 31 2020 ABSTRACT: Although many theories attempt to explain the manner in which deficits in goal generation may lead to an episode of Major Depressive Disorder (MDD), few studies have actually described how persons with depression vulnerability generate goals for themselves. The current project used a multi-dimensional approach to examine the types, numbers, and domains in which goals are generated, comparing individuals with MDD with individuals with remitted depression, and never-depressed controls. In addition, we examined possible mechanisms that may mediate the relationship between depressive status and goal generation. Surprisingly, results suggested little group difference in the types of goals or subjective ratings of goals that were generated. Instead, we suggest that cognitive and behavioral aspects of motivation may underlie an individual's efficacy of achieving goals. Limitations and future directions are discussed.

Setting Up Your Own Financial Goals - How to Tips for Millennials Jul 09 2021 Table of Contents Introduction Personal Financial Goals Finding Your Motivation Making Your 401K Investments Work for You Credit Card Debt Goal-setting in Your 30s Conclusion Author Bio Publisher Introduction This book is for all those millennials who are in the age group of 18 – 35, have just either begun to manage their own finances or are looking for ways in which they can set up doable financial goals, to be accomplished in their 20s and 30s. Every generation had its own way to tackle finances as well as budget. Generation X put apart a bit of its money, to be used as an emergency fund, because they had already seen what could happen when people invested in Wall Street and it came crashing down. Generation Y invested a bit of its money in stocks, shares, debentures, and lately in the 2000s, penny shares. Generation Z, the latest generation does not want to invest money into ventures and shares and a very volatile stock market. However it wants to have full control over the money it has in hand. So now you are going to get tips and techniques on how to achieve financial goals, and what you need to do to control your money, in your 20s as well as your 30s. If you are already in your 30s and you have not started managing your money, you are starting out late. But then you have the excuse that you were so busy in your career planning, in relationships, and in other important personal and professional activities in your life that you really do not bother much about money, money sources, investing money, and how money could be managed in the future by you. So let us suppose you are in your 30s. You already have reach some stage of personal and professional responsibility. You have set up your “house” and now you intend to

start with your idea of Real Life from Now on. Possibly you do not have so many financial assets, because you have just finished your education, and the only problem is, perhaps you have burdened yourself with student loans which you are going to pay off for the next 10 years.

Generation Z Goes to College Feb 25 2023 Say Hello to Your Incoming Class—They're Not Millennials Anymore Generation Z is rapidly replacing Millennials on college campuses. Those born from 1995 through 2010 have different motivations, learning styles, characteristics, skill sets, and social concerns than previous generations. Unlike Millennials, Generation Z students grew up in a recession and are under no illusions about their prospects for employment after college. While skeptical about the cost and value of higher education, they are also entrepreneurial, innovative, and independent learners concerned with effecting social change. Understanding Generation Z's mindset and goals is paramount to supporting, developing, and educating them through higher education. Generation Z Goes to College showcases findings from an in-depth study of over 1,100 Generation Z college students from 15 vastly different U.S. higher education institutions as well as additional studies from youth, market, and education research related to this generation. Authors Corey Seemiller and Meghan Grace provide interpretations, implications, and recommendations for program, process, and curriculum changes that will maximize the educational impact on Generation Z students. Generation Z Goes to College is the first book on how this up-and-coming generation will change higher education.

Education for Sustainable Development Goals Feb 13 2022

Selling Against the Goal Sep 30 2020 In a perfect world, sales professionals would have prime territories, unlimited budgets and a high-powered marketing department generating qualified leads. In reality most corporations expect sales reps to generate their own leads, find new business and meet stiff quotas in a tight marketplace. Selling Against the Goal is the ultimate survival guide for sales executives, managers and reps. Unlike other books on the subject, this title places lead generation within a strategic context and goes far beyond traditional techniques such as cold calling. Kendra Lee is president of the KLA Group, a consultancy focused on improving corporate sales productivity and performance. Recognised by the national media and her peers, she has featured in numerous publications.

FME 2002: Formal Methods - Getting IT Right Dec 02 2020 This book constitutes the refereed proceedings of the international symposium Formal Methods Europe, FME 2002, held in Copenhagen, Denmark, in July 2002. The 31 revised full papers presented together with three invited contributions were carefully reviewed and selected from 95 submissions. All current aspects of formal methods are addressed, from foundational and methodological issues to advanced application in various fields.
