The 4% Solution May 14 2022 Foreword by President George W. Bush With contributions from world renowned economists and Nobel prizewinners, *The 4% Solution* is a blueprint for restoring America's economic health The United States is reaching a pivotal point in its economic history. Millions of Americans owe more on their homes than they are worth, long-term unemployment is alarmingly high, and the Congressional Budget Office is projecting a sustainable growth rate of only 2.3%—a full percentage point below the average for the past sixty years. Unless a turnaround comes quickly, the United States could be mired in debt for years to come and millions of Americans will be pushed to the sidelines of the economy. *The 4% Solution* offers clear and unflinching ideas on how to revive America's economy. It sets a positive economic goal and asks some of the top economic minds on how to achieve it. With a focus on removing government constraints, *The 4% Solution* defines the policies that will allow Americans to save, invest, and create the jobs that the United States needs. *The 4% Solution* draws on the best minds in the business, including five Nobel laureates: · Robert E. Lucas, Jr., on the history and future of economic growth · Gary S. Becker on why we need immigrants in order to grow · Edward Prescott on the cost (to growth) of the welfare state · Vernon Smith on why housing leads us into and out of recessions · Myron Scholes on why we need to innovate in order to grow the economy

The 48 Laws of Power Mar 12 2022 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
