You may be wondering why the cover photo of Pearson Baccalaureate's Theory of Knowledge 2nd Edition was chosen. The building featured in the photo is the planetarium at the site of the Bibliotheca Alexandria - The New Library of Alexandria, Egypt. Considered to be the largest and most significant library of the ancient world, the original Library of Alexandria aimed to capture the world's knowledge through the collection and storage of books. Following numerous fires which contributed to the eventual destruction of the library, The New Library of Alexandria was built in 2002 to commemorate and emulate the original. One of the library's objectives is to be a leading institution of the digital age and one way of achieving this goal is allowing visitors of the planetarium to learn through technology. We therefore thought it was the perfect choice of image to illustrate the move to digital that Pearson Baccalaureate is making, with the launch of more interactive digital resources to allow new ways of learning. We must admit it's also a spectacular building to look at, so that made the decision a bit easier!
