**Les Sept Passages** Jul 11 2022 ROMAN. Sept récits qui nous entraînent à un moment décisif de la  
vie de sept femmes de différentes générations, nationalités, pays, qui vont chacune vivre un  
événement exceptionnel, une révélation spirituelle majeure qui changera leurs vies à tout jamais.  
Les personnages nous font voyager en Grèce, en France, au Burkina Faso, au Nouveau Mexique, à

[lotus.calit2.uci.edu](http://lotus.calit2.uci.edu)

Londres et en Inde. Chacun de ces sept récits constitue une histoire inoubliable. [www.faihpeaceandculture.com/fr](http://www.faihpeaceandculture.com/fr)

**The Orbit Method in Representation Theory** Dec 24 2020 Ever since its introduction around 1960 by Kirillov, the orbit method has played a major role in representation theory of Lie groups and Lie algebras. This book contains the proceedings of a conference held from August 29 to September 2, 1988, at the University of Copenhagen, about "the orbit method in representation theory." It contains ten articles, most of which are original research papers, by well-known mathematicians in the field, and it reflects the fact that the orbit method plays an important role in the representation theory of semisimple Lie groups, solvable Lie groups, and even more general Lie groups, and also in the theory of enveloping algebras.

*Travel Writing and Cultural Memory / Écriture du voyage et mémoire culturelle* Apr 08 2022 The present volume looks at the relation between travel writing and cultural memory from a variety of perspectives, ranging from theoretical concerns with genres and conventions to detailed analyses of single texts. As befits the topic, the contributions roam far and wide, both geographically and historically. Some detail early Portuguese voyages of discovery, particularly to the East. Others

[lotus.calit2.uci.edu](http://lotus.calit2.uci.edu)

depict encounters between Early, and not so early, Modern Western travelers and their Other interlocutors. Still others focus on travel writings as literature. Voyages and voyaging in literature form the subject of the last category of essays gathered here. Amongst the authors discussed are Fernão Mendes Pinto, Jean de Sponde, Furtado de Mendonça, Sor Juana Inéz de la Cruz, Elsa Morante, Ingeborg Bachmann, Sophia Andresen, Paul Claudel, Graham Greene, Valéry Larbaud, David Mourão-Ferreira, J.M.G. le Clézio, José Saramago, Michel Leiris, and Claude Lévi-Strauss. The volume concludes with an essay by the French-Lebanese author Salah Stétié.

**Le moment de l'éternité Ernest NYARY, archevêque de Bagdad** Feb 23 2021 „The enamel pictures of the Hungarian Saint Crown" mark the pick of the successful painter's carrier of Éva Nyáry. Her uncle, Ernest Nyáry, Archbishop of Baghdad inspired the paintings of equal size, representing the pictures decorating the crown of our first king, Saint Stephan's, presented with national and international recognition to the interested public. the artist published the birth of the art pieces and the spirit and history of the crown in a work published with the similar title in 2002. She took the pen in 2006 and composed her following book entitled the Ancient Hungarian decorative art. Mgr. Ernest Nyáry, Carmelite monk, archbishop of the Catholic Latin mission of Baghdad, a member of the Saint Congregation of the Oriental Churches, awarded with the French Legion of Honor, approaching the age of 80 came to see his disciples, parents and friends living in Hungary for the last time, and than he transmitted his legacy in full to his brother Joseph's daughter,

confiding her to preserve and manage it. Her father told many stories to Éva Nyáry about the romantic priest's carrier in her childhood. the several long meeting with him in the eighties meant her extraordinary impressions. the recorded conversations, the writings published about the noble thinking, sainted monk, matured the conception to share her impressions with readers. When she was handed over his diaries, texts, correspondence, photos and recorded memories, having his uncle's complete confidence, she has already felt as an obligation to work this fantastic treasury up. Ernest Nyáry's history of life who was born in an ancient Hungarian noble family in Turcansky Peter, today Slovakia in 1906, evolved in the priest's vocation, bridging world wars and continents--served as a lesson about faith, tolerance, decisions made in critical moments, and especially about humanity. Éva Nyáry's newest work follows her uncle's fantastic life relying on the documents at her disposal, many original quotations, and contemporary descriptions with historic fidelity. the unordinary story is completed by the archive photos of the legacy.

*Partial Differential Equations and the Calculus of Variations* Jul 19 2020 The Italian school of Mathematical Analysis has long and glorious traditions. In the last thirty years it owes very much to the scientific pre-eminence of Ennio De Giorgi, Professor of Mathematical Analysis at the Scuola Normale Superiore di Pisa. His fundamental theorems in Calculus of Variations, in Minimal Surfaces Theory, in Partial Differential Equations, in Axiomatic Set Theory as well as the fertility of his mind to discover both general mathematical structures and techniques which frame many different problems, and profound and meaningful examples which show the limits of a theory and give origin to new results and theories, makes him an absolute reference point for all Italian mathematicians, and a well-known and valued personage in the international mathematical world. We have been

students of Ennio de Giorgi. Now, we are glad to present to him, together with all his colleagues, friends and former students, these Essays of Mathematical Analysis written in his hon our on the occasion of his sixtieth birthday (February 8th, 1988), with our best wishes and our thanks for all he gave in the past and will give us in the future. We have added to the research papers of this book the text of a conversation with Ennio De Giorgi about the diffusion and the communication of science and, in particular, of Mathematics.

Libraries Serving Dialogue Dec 04 2021 The IFLA Religious Libraries in Dialogue Special Interest Group is dedicated to libraries serving as places of dialogue between cultures through a better knowledge of religions. This book based on experiences of libraries serving interreligious dialogue, presents themes like library tools serving dialogue between cultures, collections dialoguing, children and young adults dialoguing beyond borders, story telling as dialog, librarians serving interreligious dialogue.

*Recherches ouvertes sur le numérique* May 09 2022 En quelques années, les organisations publiques et privées ont imposé à leurs salariés une grande conversion numérique au nom de la performance économique et de l'optimisation des ressources et des moyens. Ce diktat technologique a été massivement plébiscité par les individus eux-mêmes qui ont volontairement intégré ce processus de numérisation à leurs activités personnelles, socialisantes et ludiques. Malgré les études menées ces dernières années en sciences humaines et sociales, confirmant la persistance de fossés numériques, l'émergence de situations de non-usages volontaires et le risque d'avènement d'une société du contrôle, la transformation numérique sociétale apparaît réellement irréversible. Ce nouvel ordre numérique engendre de nouvelles recompositions en matière de communication et de gouvernance au sein des organisations, des changements radicaux dans les relations sociales, des

logiques de flux, d'instantanéité, d'immédiateté et d'interopérabilité, etc., et s'avère d'une grande richesse pour la Recherche en Sciences Humaines qui découvre dans cet univers numérique, de nouveaux objets d'étude que cet ouvrage invite à découvrir.

*Ecole d'Ete de Probabilites de Saint-Flour XVIII - 1988* Dec 16 2022 This book contains three lectures each of 10 sessions; the first on Potential Theory on graphs and manifolds, the second on annealing and another algorithms for image reconstruction, the third on Malliavin Calculus.

**Où sont passés tous les manuels scolaires?** May 17 2020 Cette étude de la Banque mondiale est une riche compilation d'informations sur le matériel pédagogique d'apprentissage (MPA) sur la base de la vaste expérience et les multiples facettes de l'oeuvre de l'auteur dans le secteur de l'éducation en Afrique. L'étude examine un large éventail de questions autour de la fourniture MPA dont le curriculum, l'alphabétisation et le calcul, la langue de la politique d'instruction, d'approvisionnement et de distribution des défis, ainsi que le développement et la production du MPA et de leur disponibilité, gestion et utilisation dans les écoles. Il se penche également sur le rôle de la technologie de l'information et de la communication (TIC) basé sur le matériel pédagogique d'apprentissage et de leur disponibilité. L'étude reconnaît que l'amélioration de la gestion du système MPA est un élément essentiel dans la réalisation de la prestation du MPA abordable et durable pour tous les élèves. Cette étude, qui puise dans plus de 40 pays anglophones, francophones, lusophones et de pays arabophones sera particulièrement utile pour les décideurs, les partenaires au développement, et d'autres intervenants qui tentent de comprendre le large éventail

de questions liées à la complexité de la fourniture de manuels scolaires en Afrique subsaharienne.

*Information Literacy: Moving Toward Sustainability* Apr 15 2020 This book constitutes the refereed proceedings of the Third European Conference on Information Literacy, ECIL 2015, held in Tallinn, Estonia, in October 2015. The 61 revised full papers presented were carefully reviewed and selected from 226 submissions. The papers are organized in topical sections on information literacy, environment and sustainability; workplace information literacy and knowledge management; ICT competences and digital literacy; copyright literacy; other literacies; information literacy instruction; teaching and learning information literacy; information literacy, games and gamification; information need, information behavior and use; reading preference: print vs electronic; information literacy in higher education; scholarly competencies; information literacy, libraries and librarians; information literacy in different context.

*Approximations Diophantiennes et Nombres Transcendants. Diophantine Approximations and Transcendental Numbers* Mar 27 2021 The series is aimed specifically at publishing peer reviewed reviews and contributions presented at workshops and conferences. Each volume is associated with a particular conference, symposium or workshop. These events cover various topics within pure and applied mathematics and provide up-to-date coverage of new developments, methods and applications.

Proceedings of the Tunisian Mathematical Society, Volume 11 Jun 10 2022 These proceedings consist of ten carefully refereed and selected papers which were presented at the 12th symposium of Tunisian Mathematical Society held on March 18-23, 2004 in Mahdia (Tunisia). This symposium was one of the largest international meeting on Mathematics in Tunisia. A total of 200 participants from several countries attended to the meeting. In addition to the plenary, invited and contributed talks, there was a panel discussion on future research directions and problems in various areas of mathematics.

**Noncommutative Harmonic Analysis** Nov 03 2021 Dedicated to Jacques Carmona, an expert in noncommutative harmonic analysis, the volume presents excellent invited/refereed articles by top notch mathematicians. Topics cover general Lie theory, reductive Lie groups, harmonic analysis and the Langlands program, automorphic forms, and Kontsevich quantization. Good text for researchers and grad students in representation theory.

*Open Book/Livre Ouvert* May 21 2023

Lectures on Probability Theory and Statistics Aug 12 2022 This volume contains lectures given at the Saint-Flour Summer School of Probability Theory during 17th Aug. - 3rd Sept. 1998. The contents of the three courses are the following: - Continuous martingales on differential manifolds. - Topics in non-parametric statistics. - Free probability theory. The reader is expected to have a graduate level in probability theory and statistics. This book is of interest to PhD students in probability and statistics or operators theory as well as for researchers in all these fields. The series of lecture notes from the Saint-Flour Probability Summer School can be considered as an encyclopedia of probability theory and related fields.
