**Patients at Risk** Jul 16 2020 **Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare** exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be. While advocates for these professions insist that research shows that they can provide the same care as physicians, patients do not know the whole truth: that there are no credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as *An American Sickness*, this book provides a roadmap for patients to protect themselves from medical harm. **WORDS OF PRAISE and REVIEWS** Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media

outlets are missing and one that puts you and your family's health at real risk. --John Irvine, Deductible Media Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and solutions to ensure quality care. --Marilyn M. Singleton, MD, JD A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of Profits Over Patients, echoed by hospitals and health insurance companies. --John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA

*More Than Medicine* Mar 24 2021 In *More Than Medicine*, LaTonya J. Trotter chronicles the everyday work of a group of nurse practitioners (NPs) working on the front lines of the American

health care crisis as they cared for four hundred African American older adults living with poor health and limited means. Trotter describes how these NPs practiced an inclusive form of care work that addressed medical, social, and organizational problems that often accompany poverty. In solving this expanded terrain of problems from inside the clinic, these NPs were not only solving a broader set of concerns for their patients; they became a professional solution for managing "difficult people" for both their employer and the state. Through *More Than Medicine*, we discover that the problems found in the NP's exam room are as much a product of our nation's disinvestment in social problems as of physician scarcity or rising costs.
