The Man Who Could Work Miracles Illustrated May 17 2020 The Man Who Could Work Miracles is a black-and-white 1937 British fantasy-comedy film directed by the German-born American director Lothar Mendes. Reputedly the best-known of Mendes' 20 films, it's a greatly expanded version of H. G. Wells's short story of the same name and stars Roland Young with a cast of supporting players including Sir Ralph Richardson and in a London Films production from the famous Hungarian-born British producer, Sir Alexander Korda. H.G. Wells himself worked on the adaptation, the plot revised to reflect Wells's socialist frustrations with the British upper class, and

the growing threat of Communism, Fascism and Nazism in Europe at the time, something to which Mendes, Korda and Wells were all committed to combating in their creative work.

A Family of Readers Apr 15 2020 Two of the most trusted reviewers in the field join with top authors, illustrators, and critics in a definitive guide to choosing books for children—and nurturing their love of reading. A FAMILY OF READERS is the definitive resource for parents interested in enriching the reading lives of their children. It's divided into four sections: 1. Reading to Them: Choosing and sharing board books and picture books with babies and very young children. 2. Reading with Them: Launching the new reader with easy readers and chapter books. 3. Reading on Their Own: Exploring what children read—and how they read—by genre and gender. 4. Leaving Them Alone: Respecting the reading privacy of the young adult. Roger Sutton knows how and why children read. He must, as the editor in chief of THE HORN BOOK, which since 1924 has been America's best source for reviews of books for young readers. But for many parents, selecting books for their children can make them feel lost. Now, in this essential resource, Roger Sutton and Martha V. Parravano, executive editor at the magazine, offer thoughtful essays that consider how books are read to (and then by) young people. They invite such leading authors and artists as Maurice Sendak, Katherine Paterson, Margaret Mahy, and Jon Scieszka, as well as a selection of top critics, to add their voices about the genres they know best. The result is an indispensable readers' companion to everything from wordless board books to the most complex and daring young adult novels.

[So Many Books, So Little Time](#) Mar 19 2023 "Will make many readers smile with

recognition.”—The New Yorker “Readaholics, meet your new best friend.”—People “This book is bliss.”—The Boston Globe Sometimes subtle, sometimes striking, the interplay between our lives and our books is the subject of this unique memoir by well-known publishing correspondent and self-described “readaholic” Sara Nelson. The project began as an experiment with a simple plan—fifty-two weeks, fifty-two books—that fell apart in the first week. It was then that Sara realized the books chose her as much as she chose them, and the rewards and frustrations they brought were nothing she could plan for. From Solzhenitsyn to Laura Zigman, Catherine M. to Captain Underpants, the result is a personal chronicle of insight, wit, and enough infectious enthusiasm to make a passionate reader out of anybody.

Voices and Books in the English Renaissance Jan 05 2022 "Two ideas lie at the heart of this study and its claim that we need a new history of reading: that voices in books can affect us deeply ; that printed books can be brought to life with the voice. *Voices and Books* offers a new history of reading focussed on the oral and voice-aware silent reader, rather than the historical reader we

have privileged in the last few decades, who is invariably male, silent, and alone. It recovers the vocality of education for boys and girls in Renaissance England, and the importance of training in pronuntiatio (delivery) for oral-aural literary culture. It offers the first attempt to recover the voice-and tone-from textual sources. It explores what happens when we bring voice to text, how vocal tone realizes or changes textual meaning, and how the literary writers of the past tried to represent their own and others' voices, as well as manage and exploit the voices of their readers. It offers fresh readings of the key Tudor authors who anticipated oral readers: John Bale, Anne Askew, William Baldwin, Thomas Nashe. And it aims to rethink what a printed book can be, searching the printed page for vocal cues, and exploring the neglected role of the voice in the printing process"-- Provided by publisher.

Leave Me Alone, I'm Reading Apr 20 2023 In this delightful memoir, the book critic for NPR's Fresh Air reflects on her life as a professional reader. Maureen Corrigan takes us from her unpretentious girlhood in working-class Queens, to her bemused years in an Ivy League Ph.D. program, from the whirl of falling in love and marrying (a fellow bookworm, of course), to the ordeal of adopting a baby overseas, always with a book at her side. Along the way, she reveals which books and authors have shaped her own life—from classic works of English literature to hard-boiled detective novels, and everything in between. And in her explorations of the heroes and heroines throughout literary history, Corrigan's love for a good story shines.

Report of the National Reading Panel : Teaching Children to Read : an Evidence-based Assessment of the Scientific Research Literature on Reading and Its Implications for Reading Instruction Feb 23 2021

Publishers' Weekly Jun 29 2021

Reader, Come Home Mar 07 2022 The author of the acclaimed *Proust and the Squid* follows up with a lively, ambitious, and deeply informative book that considers the future of the reading brain and our capacity for critical thinking, empathy, and reflection as we become increasingly dependent on digital technologies. A decade ago, Maryanne Wolf's *Proust and the Squid* revealed what we know about how the brain learns to read and how reading changes the way we think and feel. Since then, the ways we process written language have changed dramatically with many concerned about both their own changes and that of children. New research on the reading brain chronicles these changes in the brains of children and adults as they learn to read while immersed in a digitally dominated medium. Drawing deeply on this research, this book comprises a series of

letters Wolf writes to us—her beloved readers—to describe her concerns and her hopes about what is happening to the reading brain as it unavoidably changes to adapt to digital mediums. Wolf raises difficult questions, including: Will children learn to incorporate the full range of "deep reading" processes that are at the core of the expert reading brain? Will the mix of a seemingly infinite set of distractions for children's attention and their quick access to immediate, voluminous information alter their ability to think for themselves? With information at their fingertips, will the next generation learn to build their own storehouse of knowledge, which could impede the ability to make analogies and draw inferences from what they know? Will all these influences change the formation in children and the use in adults of "slower" cognitive processes like critical thinking, personal reflection, imagination, and empathy that comprise deep reading and that influence both how we think and how we live our lives? How can we preserve deep reading processes in future iterations of the reading brain? Concerns about attention span, critical reasoning, and over-reliance on technology are never just about children—Wolf herself has found that, though she is a reading expert, her ability to read deeply has been impacted as she has become increasingly dependent on screens. Wolf draws on neuroscience, literature, education, and philosophy and blends historical, literary, and scientific facts with down-to-earth examples and warm anecdotes to illuminate complex ideas that culminate in a proposal for a biliterate reading brain. Provocative and intriguing, *Reader, Come Home* is a roadmap that provides a cautionary but hopeful perspective on the impact of technology on our brains and our most essential intellectual capacities—and what this could mean for our future.
