How Concepts Solve Management Problems Sep 22 2022 This book offers a process for conceiving solutions to complex, wicked, messy, swampy or socio-technical problems. When charged with complex problem solving, a useful set of concepts needs to emerge, be agreed, and acted upon. Using relevant examples a

Key Concepts in Sport and Exercise Research Methods Apr 17 2022 "What a helpful book! This will be a 'friend' to many undergraduate students looking for clarification." -

Helen Hazelwood, St Mary's University College "This is a great book that really helps the students understand research and the complex processes that can often daunt even the most intelligent students." - Phil Barter, Middlesex University "Few can bring

research methods to life like Mike Atkinson. His breadth of research interests and experience mean he can introduce you to all you need to know and inspire you to get down to doing some research yourself." - Dominic Malcolm, Loughborough University

This book systematically demonstrates the significance and application of research methods in plain language. Written for students, it contains the core methodological concepts, practices and debates they need to understand and apply research methods within the field of sport and exercise. It provides a comprehensive panoramic introduction which will reassure and empower students. Written by a leading academic and drawing on years of teaching experience, it includes carefully cross-referenced

entries which critically engage with interdisciplinary themes and data. Each concept includes: clear definitions suggestions for further reading comprehensive examples practical applications Pragmatic, lucid and concise the book will provide essential support to students in sports studies, sport development, sport and exercise science, kinesiology and health.

Political concepts and time Mar 17 2022 The essays compiled in this volume, written by distinguished experts, present a broad panorama of the most important methodological challenges faced by conceptual history today, as well as some more specific contributions regarding the temporal dimension of certain modern concepts. At a moment when time and concepts ,and political concepts in particular, are no longer obvious and taken for granted but have themselves become historical matter, this book does not limit itself to an updating of the state of the art; it also offers very useful lessons for the development of future research into this field.

ZBrush Creature Design Jun 27 2020 Zero in on the most cutting-edge trend in creature design for film and games: ZBrush! ZBrush allows you to develop a creature for film and games in realistic, 3D format. With this book, you will learn how to create a unique creature from start to finish and search for and repair any foreseeable problems. Clear instructions guide you through using Photoshop in combination with ZBrush to finely render a creature so you can see how it will appear on screen. Experienced ZBrush author and designer Scott Spencer shows you how to start with your concept in ZBrush as a preliminary digital model and then further refine it in Photoshop in order to fabricate a hyperrealistic image. Guides you through artistic concepts to visualize your creature Walks you through the process of conceptualizing a creature in ZBrush Details techniques for using Photoshop to refine your design Encourages you to use ZBrush as a sculpting and designing tool and then use Photoshop as a painting and finishing tool ZBrush Creature Design helps you bring your creature concepts to life.

The Concept of Modernism May 07 2021 The term "modernism" is central to any discussion of twentieth-century literature and critical theory. Astradur Eysteinnsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes, but is in fact a product of critical practices relating to nontraditional literature. Intervening in these practices, and correlating them with modernist works and with modern literary theory, Eysteinnsson undertakes a comprehensive reexamination of the idea of modernism. Eysteinnsson critically explores various manifestations of modernism in a rich array of American, British, and European literature, criticism, and theory. He first examines many modernist paradigms, detecting in them a conflict between modernism's culturally subversive potential and its relatively conservative status as a formalist project. He then considers these paradigms as interpretations-and fabrications-of literary history. Seen in this light, modernism both signals a historical change on the literary scene and implies the context of that change. Laden with the implications of tradition and modernity,

modernism fills its major function: that of highlighting and defining the complex relations between history and postrealist literature. Eysteinnsson focuses on the ways in which the concept of modernism directs our understanding of literature and literary history and influences our judgment of experimental and postrealist works in literature and art. He discusses in detail the relation of modernism to the key concepts postmodernism, the avant-garde, and realism. Enacting a crisis of subject and reference, modernism is not so much a form of discourse, he asserts, as its interruption—a possible "other" modernity that reveals critical aspects of our social and linguistic experience in Western culture. Comparatists, literary theorists, cultural historians, and others interested in twentieth-century literature and art will profit from this provocative book.

The Fundamental Concepts of Metaphysics Dec 26 2022 This book, the text of Martin Heidegger's lecture course of 1929/30, is crucial for an understanding of Heidegger's transition from the major work of his early years, *Being and Time*, to his later preoccupations with language, truth, and history. First published in German in 1983 as volume 29/30 of Heidegger's collected works, *The Fundamental Concepts of Metaphysics* presents an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature. Heidegger's concepts of organism, animal behavior, and environment are uniquely developed and defined with intensity. Of major interest is Heidegger's brilliant phenomenological description of the mood of boredom, which he describes as a "fundamental attunement" of modern times.

Marketing Concepts that Win! Nov 24 2022 Crisply communicating a new idea or innovation in a well-articulated product or positioning concept is one of the most difficult challenges many marketers face. The inability to be objective and single-minded in one's concept writing efforts can make the difference between executing a marketplace win or a flop. Don't let it happen to you. Writing great concepts early on in your development cycle can save time, money and rework. You will discover how to: Determine whether you need a product or a positioning concept? Learn tips and tricks to accelerate your concept writing efforts? Develop Acceptable Consumer Beliefs that consumers nod their heads in agreement when heard? Write Benefit statements that consumers understand and differentiate a product or service? Craft Reasons to Believe that are consumer meaningful and relevant? Prepare a concept to maximize quantitative testing potential

Proof of Concept Jul 29 2020 On a desperately overcrowded future Earth, crippled by climate change, the most unlikely hope is better than none. Governments turn to Big Science to provide them with the dreams that will keep the masses compliant. The Needle is one such dream, an installation where the most abstruse theoretical science is being tested: science that might make human travel to a habitable exoplanet distantly feasible. When the Needle's director offers her underground compound as a training base, Kir is thrilled to be invited to join the team, even though she knows it's only because her brain is host to a quantum artificial intelligence called Altair. But Altair knows something he can't tell. Kir, like all humans, is programmed to ignore future dangers. Between the artificial blocks in his mind, and the blocks evolution has built into his host, how is he going to convince her the sky is falling? *Proof of Concept* is a science fiction novella from Arthur C. Clarke Award-winning author Gwyneth Jones. At the Publisher's request, this title is being sold without Digital Rights Management

The Concept of Nature in Marx Sep 10 2021 In *The Concept of Nature in Marx*, Alfred Schmidt examines humanity's relation to the natural world as understood by the great philosopher-economist Karl Marx, who wrote that human beings are 'part of Nature yet able to stand over against it; and this partial separation from Nature is itself part of their nature'. In Marx, industry and science are the mediation between historical man and external nature, leading either to reconciliation or mutual annihilation. Schmidt explores this tension between man and nature in Marx and shows how his understanding of nature is reflected in the work of writers such as Bertolt Brecht, Walter Benjamin and Ernst Bloch.

Advanced Concepts for Renewable Energy Supply of Data Centres Jun 19 2022 The rapid increase of cloud computing, high performance computing (HPC) and the vast growth in Internet and Social Media use have aroused the interest in energy consumption and the carbon footprint of Data Centres. Data Centres primarily contain electronic equipment used for data processing (servers), data storage (storage equipment), and communications (network equipment). Collectively, this equipment processes, stores, and transmits digital information and is known as information technology (IT) equipment. *Advanced Concepts for Renewable Energy Supply of Data Centres* introduces a number of technical solutions for the supply of power and cooling energy into Data Centres with enhanced utilisation of renewable energy sources in order to achieve low energy Data Centres. Because of the high energy density nature of these unique infrastructures, it is essential to implement energy efficiency measures and reduce consumption before introducing any renewable energy source. A holistic approach is used with the objective of integrating many technical solutions such as management of the IT (Information Technology) load, efficient electrical supply to the IT systems, Low-Ex air-conditioning systems, interaction with district heating and cooling networks, re-use of heat, free cooling (air, seawater, groundwater), optimal use of heat and cold storage, electrical storage and integration in smart grids. This book is therefore a catalogue of advanced technical concepts that could be integrated into Data Centres portfolio in order to increase the overall efficiency and the share of renewable energies in power and cooling supply. Based on dynamic energy models implemented in TRNSYS some concepts are deeply evaluated through yearly simulations. The results of the simulation are illustrated with Sankey charts, where the energy flows per year within the subsystems of each concept for a selected scenario are shown, and graphs showing the results of parametric analysis. A set of environmental metrics (as the non-renewable primary energy) and financial metrics (CAPEX and OPEX) as well of energy efficiency metrics like the well-known PUE, are described and used to evaluate the different technical concepts.

The Concept of Time May 31 2023 *The Concept of Time* presents the reconstructed text of a lecture delivered by Martin Heidegger to the Marburg Theological Society in 1924. It offers a fascinating insight into the developmental years leading up to the publication, in 1927, of his magnum opus *Being and Time*, itself one of the most influential philosophical works this century. In *The Concept of Time* Heidegger introduces many of the central themes of his analyses of human existence which were

subsequently incorporated into *Being and Time*, themes such as *Dasein*, *Being-in-the-world*, *everydayness*, *disposition*, *care*, *authenticity*, *death*, *uncanniness*, *temporality* and *historicity*. Starting out by asking: *What is time?*, Heidegger proceeds to radicalise the concept of time and our relation to it, ending with the question: *Are we ourselves time? Am I time?* William McNeill is currently British Academy Postdoctoral Research Fellow at the University of Warwick England. He has published several articles on Heidegger and is at present co-translating Heidegger's 1929/30 course *The Fundamental Concepts of Metaphysics: World - Finitude - Solitude*.

[Doing Without Concepts](#) Oct 24 2022 In *Doing without Concepts*, Edouard Machery argues that the dominant psychological theories of concept fail to provide a coherent framework to organize our extensive empirical knowledge about concepts. Machery proposes that to develop such a framework, drastic conceptual changes are required. *Children's Social Concepts* Oct 12 2021

The Decadent Gardener Apr 25 2020 This book looks at the role in gardening played by torture, eroticism, blasphemy, the grotesque, narcotics, the artificial, and many other subjects dear to the decadent's heart.

Concept-store Aug 29 2020 Préfacé par Gérard Laizé, directeur général du VIA, ce troisième titre de la collection "Carnets de mode" est consacré au design et à l'architecture des espaces de vente dans le monde. Il présente les derniers concepts et tendances de ces lieux innovants dédiés aux consommateurs, pop-up stores, guerilla stores, boutiques éphémères ou magasins amiraux, tous ces "flagship-stores" qui rivalisent de créativité. Illustré de plus de 700 photos, plans, planches et croquis, *Concept-Store* réunit nombre de contributions prestigieuses : Louis Vuitton, Marithé + François Girbaud, Chanel, Christian Dior, Hermès, Prada, Lancel, Colette, L'Éclaireur, Patrick Norguet, Éric Gizard... Un livre dédié à tous les amoureux de la mode et aux passionnés d'architecture.

Design Concepts for a Virtualizable Embedded MPSoC Architecture Sep 30 2020 Alexander Biedermann presents a generic hardware-based virtualization approach, which may transform an array of any off-the-shelf embedded processors into a multi-processor system with high execution dynamism. Based on this approach, he highlights concepts for the design of energy aware systems, self-healing systems as well as parallelized systems. For the latter, the novel so-called Agile Processing scheme is introduced by the author, which enables a seamless transition between sequential and parallel execution schemes. The design of such virtualizable systems is further aided by introduction of a dedicated design framework, which integrates into existing, commercial workflows. As a result, this book provides comprehensive design flows for the design of embedded multi-processor systems-on-chip.

[Robotic Systems: Concepts, Methodologies, Tools, and Applications](#) May 19 2022 Through expanded intelligence, the use of robotics has fundamentally transformed a variety of fields, including manufacturing, aerospace, medicine, social services, and agriculture. Continued research on robotic design is critical to solving various dynamic obstacles individuals, enterprises, and humanity at large face on a daily basis. *Robotic Systems: Concepts, Methodologies, Tools, and Applications* is a vital reference source

that delves into the current issues, methodologies, and trends relating to advanced robotic technology in the modern world. Highlighting a range of topics such as mechatronics, cybernetics, and human-computer interaction, this multi-volume book is ideally designed for robotics engineers, mechanical engineers, robotics technicians, operators, software engineers, designers, programmers, industry professionals, researchers, students, academicians, and computer practitioners seeking current research on developing innovative ideas for intelligent and autonomous robotics systems.

New Steering Concepts in Public Management Oct 31 2020 Multifaceted social problems such as safety, social inclusion, poverty, mobility, rural development, city regeneration, or labour market integration require integrated approaches to steering. This book looks at various organisational arrangements and mechanisms, including whole-of-government, collaborative governance, and outcome steering.

The Family Concept May 26 2020 The Bible is our guidebook for successful living, so it stands to reason that the Word of God contains principles that can be applied to every part of our lives, including how to cultivate and maintain successful family relationships. The Family Concept is an exploration of the Bible's many family relationship principles and how they apply to our lives. A concept is an idea of what something is intended to be. It is the construct for what the inventor intends to design. God created the family according to grand design and purpose. To accomplish his purpose, God left nothing to chance. His Word gives us the principles that lead to the satisfaction of his purpose and the abundant goodness of God to appear in our lives. The Family Concept identifies those principles, gives understanding as to how they work, and highlights the benefits that are derived from their application. Is love more than emotions? Where does sacrifice fit into a successful relationship? What is my obligation to you if we are in a relationship? What does submission really mean, and does it work both ways? The Family Concept addresses those questions and provides many positive insights that will enhance our relationships when applied.

Formal Concept Analysis Apr 29 2023 This first textbook on formal concept analysis gives a systematic presentation of the mathematical foundations and their relations to applications in computer science, especially in data analysis and knowledge processing. Above all, it presents graphical methods for representing conceptual systems that have proved themselves in communicating knowledge. The mathematical foundations are treated thoroughly and are illuminated by means of numerous examples, making the basic theory readily accessible in compact form.

Key Concepts in Developmental Psychology Dec 14 2021 Perfect for courses in child development or developmental psychology and arranged thematically in sections corresponding to chapter headings usually found in textbooks, this book is ideal for students wanting an accessible book to enrich their learning experience. **Key Features:**

- Provides an overview of the place of each concept in Developmental Psychology under three headings, namely its meaning, origins and current usage.
- Concepts are grouped into sections corresponding to the main themes usually covered in teaching.
- Relevant concepts in the book are emboldened and linked by listing at the end of each concept
- Guidance is provided to further reading on each of the concepts discussed.

The book will be centrally important to undergraduate students who need to learn the language used by developmental psychologists in describing their studies, but will also

help more advanced readers in checking their ideas regarding the nature and uSAGE of particular concepts.

Conversations About Group Concept Mapping Feb 13 2022 **Conversations About Group Concept Mapping: Applications, Examples, and Enhancements** takes a concise, practice-based approach to group concept mapping. After defining the method, demonstrating how to design a project, and providing guidelines to analyze the results, this book then dives into real research exemplars. Conversations with the researchers are based on in depth interviews that connected method, practice and results. The conversations are from a wide variety of research settings, that include mapping the needs of at-risk African American youth, creating dialogue within a local business community, considering learning needs in the 21st century, and identifying the best ways to support teens receiving Supplemental Social Security Income. The authors reflect on the commonalities between the cases and draw out insights into the overall group concept mapping method from each case.

Individuals and Societies for the IB MYP 4&5: by Concept Jun 07 2021 This guide helps users to develop their skills to become an inquiring learner and ensure they navigate the MYP framework with confidence using a concept-driven and assessment-focused approach to individuals and societies, presented in global contexts.

The Big Book of Concepts Aug 02 2023 Concepts embody our knowledge of the kinds of things there are in the world. Tying our past experiences to our present interactions with the environment, they enable us to recognize and understand new objects and events. Concepts are also relevant to understanding domains such as social situations, personality types, and even artistic styles. Yet like other phenomenologically simple cognitive processes such as walking or understanding speech, concept formation and use are maddeningly complex. Research since the 1970s and the decline of the "classical view" of concepts have greatly illuminated the psychology of concepts. But persistent theoretical disputes have sometimes obscured this progress. The Big Book of Concepts goes beyond those disputes to reveal the advances that have been made, focusing on the major empirical discoveries. By reviewing and evaluating research on diverse topics such as category learning, word meaning, conceptual development in infants and children, and the basic level of categorization, the book develops a much broader range of criteria than is usual for evaluating theories of concepts.

The Concept of the Political Mar 29 2023 In this, his most influential work, legal theorist and political philosopher Carl Schmitt argues that liberalism's basis in individual rights cannot provide a reasonable justification for sacrificing oneself for the state—a critique as cogent today as when it first appeared. George Schwab's introduction to his translation of the 1932 German edition highlights Schmitt's intellectual journey through the turbulent period of German history leading to the Hitlerian one-party state. In addition to analysis by Leo Strauss and a foreword by Tracy B. Strong placing Schmitt's work into contemporary context, this expanded edition also includes a translation of Schmitt's 1929 lecture "The Age of Neutralizations and Depoliticizations," which the author himself added to the 1932 edition of the book. An essential update on a modern classic, **The Concept of the Political, Expanded Edition** belongs on the bookshelf of anyone interested in political theory or philosophy.

Thick Concepts Jul 09 2021 An international team of experts explores the distinction between 'thin' concepts (general, evaluative terms like 'good' and 'bad') and 'thick' concepts (more specific concepts, such as 'brave', or 'rude'). Their essays touch on key debates in metaethics about the evaluative and normative, and raise fascinating questions about how language works.

Bow Ties in Risk Management Jul 01 2023 AN AUTHORITATIVE GUIDE THAT EXPLAINS THE EFFECTIVENESS AND IMPLEMENTATION OF BOW TIE ANALYSIS, A QUALITATIVE RISK ASSESSMENT AND BARRIER MANAGEMENT METHODOLOGY
From a collaborative effort of the Center for Chemical Process Safety (CCPS) and the Energy Institute (EI) comes an invaluable book that puts the focus on a specific qualitative risk management methodology – bow tie barrier analysis. The book contains practical advice for conducting an effective bow tie analysis and offers guidance for creating bow tie diagrams for process safety and risk management. Bow Ties in Risk Management clearly shows how bow tie analysis and diagrams fit into an overall process safety and risk management framework. Implementing the methods outlined in this book will improve the quality of bow tie analysis and bow tie diagrams across an organization and the industry. This important guide: Explains the proven concept of bow tie barrier analysis for the preventing and mitigation of incident pathways, especially related to major accidents Shows how to avoid common pitfalls and is filled with real-world examples Explains the practical application of the bow tie method throughout an organization Reveals how to treat human and organizational factors in a sound and practical manner Includes additional material available online Although this book is written primarily for anyone involved with or responsible for managing process safety risks, this book is applicable to anyone using bow tie risk management practices in other safety and environmental or Enterprise Risk Management applications. It is designed for a wide audience, from beginners with little to no background in barrier management, to experienced professionals who may already be familiar with bow ties, their elements, the methodology, and their relation to risk management. The missions of both the CCPS and EI include developing and disseminating knowledge, skills, and good practices to protect people, property and the environment by bringing the best knowledge and practices to industry, academia, governments and the public around the world through collective wisdom, tools, training and expertise. The CCPS has been at the forefront of documenting and sharing important process safety risk assessment methodologies for more than 30 years. The EI's Technical Work Program addresses the depth and breadth of the energy sector, from fuels and fuels distribution to health and safety, sustainability and the environment. The EI program provides cost-effective, value-adding knowledge on key current and future international issues affecting those in the energy sector.

The Advertising Concept Book Sep 03 2023 Now thoroughly revised and updated, this systematically presented coursebook tells you everything you need to know about advertising, from how to write copy and choose a typeface, to how agencies work and the different strategies used for print, TV or cinema and other media, including interactive. Exercises throughout help the reader judge their own work and that of others. By getting to the heart of the creative process in a way that other guides dont,

the book can help anyone produce better advertising. This new edition features a thoroughly revised and updated chapter on interactive advertising, with new exercises and some thirty new illustrations. 'Invaluable' Creative Review 'Enormously encouraging, practical and entertaining. If this book could stand in front of a class (of creative students) and talk, I'd be out of a job.' Tony Cullingham, Course Director, The Watford Creative Advertising Course, West Herts College

The Concept of Discrimination in International Law Aug 22 2022 This book was written as a dissertation for the Doctorate of Laws, University of Amsterdam. I am most grateful, first of all, to Professor A. J. P. Tammes, who acted as Promotor. Throughout my working at this study he managed to afford at the same time guidance, inspiration, and complete freedom. I have also benefited much from the suggestions and advice of Dr. Th. e. van Boven of the Dutch Ministry of Foreign Affairs, Member of the U.N. Commission on Human Rights, who was a very helpful Co referent. In earlier stages of the work, the critical remarks by Mr. S. A. Kuipers, Dr. H. Meijers and Miss J. M. van Wouw were of great importance to me. So was the experience of participating in the program of graduate studies of the Columbia University School of Law, in 1968- 1969. I owe gratitude to the Amsterdam Law Faculty for having offered this opportunity to me. I am indebted to Miss Sinja Alma for her transforming a chaotic manuscript into a neat typescript in a most capable and patient manner; to Miss E. D. J. Jongens for her assistance in sorting out the United Nations documentation; and to Howard S. Gold (Gersono vitch), who was so kind as to correct the faults in my English. Since I went on tinkering with the text I am to blame for all linguistic errors in it. The research for this study was concluded in October, 1972.

Foodservice Operations and Management: Concepts and Applications Nov 12 2021 Foodservice Operations & Management: Concepts and Applications is written for Nutrition and Dietetics students in undergraduate programs to provide the knowledge and learning activities required by ACEND's 2017 Standards in the following areas: • Management theories and business principles required to deliver programs and services. • Continuous quality management of food and nutrition services. • Food science and food systems, environmental sustainability, techniques of food preparation and development and modification and evaluation of recipes, menus, and food products acceptable to diverse populations. (ACEND Accreditation Standards for Nutrition and Dietetics Didactic Programs, 2017) The textbook can also be used to meet the competencies in Unit 3 (Food Systems Management) and Unit 5 (Leadership, Business, Management, and Organization) in the Future Education Model for both bachelor's and graduate degree programs.

Geographic Information Systems: Concepts, Methodologies, Tools, and Applications Mar 05 2021 Developments in technologies have evolved in a much wider use of technology throughout science, government, and business; resulting in the expansion of geographic information systems. GIS is the academic study and practice of presenting geographical data through a system designed to capture, store, analyze, and manage geographic information. Geographic Information Systems: Concepts, Methodologies, Tools, and Applications is a collection of knowledge on the latest advancements and research of geographic information systems. This book aims to be useful for academics and practitioners involved in geographical data.
