Teaching for Experiential Learning Nov 01 2021

This book describes how to change the way in which educators conduct business in the classroom. Our current educational systems lack ways to reach today's learners in relevant, meaningful ways. The five approaches in this book inspire and motivate students to learn. The authors provide in-depth descriptions into these overlapping approaches for experiential learning: active learning, problem-based learning, project-based learning, service learning, and place-based education. Each of these five approaches includes an element of student involvement and attempts to engage students in solving problems. The chapters are presented in a consistent, easy-to-read format that provides descriptions, history, research, ways to use the approach, and resources. This book will help educators transform their classrooms into dynamic learning environments.

An Experiential Approach to Group Work, Second Edition Jun 20 2023 An Experiential Approach to Group Work is not your typical group work text! Using dozens of exercises that build practice-tested skills, the authors' approach is in perfect step with CSWE's competence-based education requirements.

The book is organized into three sections-the first addresses stages of group practice, the second looks at major types of groups, and the final section looks at examples of group work practice with special populations.

Ecopedagogies Apr 13 2020 Ecopedagogies showcases a range of creative approaches that educators across multiple disciplines use to empower students to access and engage with nature, an increasingly important consideration in a post-COVID world in environmental crisis. The volume includes chapters written by scholars from the environmental arts and humanities, literature, writing studies, rhetoric, music, religious studies, environmental studies and sustainability, sociology and anthropology, physical education, and outdoor education. Each author walks the reader through the details of how their ecopedagogy works, identifies potential challenges while also detailing how to address them, and explains the rewards to students, instructors, and more-than-human nature that they have witnessed through the use of these approaches. The contributions represent diverse types of academic institutions, offering broad applicability to instructors, including community colleges, private liberal arts colleges, and large state, regional, public, and private universities. The book explores a series of key questions about how educators can facilitate meaningful learning experiences with the natural world, inside and

outside the classroom, and it looks at how to foster inclusivity, navigate problems with access, and explore intersections with environmental justice. As a practical guide, the book delivers a well-provisioned toolbox containing exercises, activity guides, and assignments for those teaching environmentally focused college courses.

Learning Group Leadership May 07 2022 “The writing is both highly personable and also very specific about techniques and attitudes students may take on as they experiment with membership leadership. I think my students will like it and will use it to engage even more fully with the experiential group. It most certainly fills a niche that needed filling.” –Adam L. Philosophy Lab Oct 20 2020 Philosophy Lab: An Experiential Approach to Conceptual Analysis gives students the skills and strategies needed to do philosophical work in the Analytic tradition. They are presented with a step-by-step method for performing a preliminary conceptual analysis and practice examples to apply the method to standard philosophical problems. Students are introduced to the work of great thinkers including Descartes, Hobbes, Locke, Wittgenstein, and Ryle. These works are complemented by contemporary empirical findings concerning perception, desire, emotion, moral intuition, and other basic elements of explicit intentional cognition. Each chapter features primary source material, commentary, and activity instructions. The activities are designed to allow students to experience each mode of cognition in relative isolation, and then to see how they combine and interrelate in more complex contexts. Finally, students use the template model of conceptual analysis to explore the material. They identify and isolate the concept to be analyzed, determine whether it is simple or complex, and if complex, identify the constituent parts of the concept. Specific topics covered include causal power, sex and marriage, compassion, ambition, justice, and death. Through presentation and modeling the book not only enables student to do conceptual analysis with precision, it helps them understand and interpret philosophical issues. Philosophy Lab is a

comprehensive, carefully designed text for first courses in philosophy. It may be used with first-year undergraduate students, advanced high-school students, or adult learners. Asher Walden holds a Ph.D. in philosophy and religion from Drew University. Dr. Walden is currently an adjunct lecturer at the University of Massachusetts, Dartmouth.

Challenging Experience Jul 29 2021 This book presents an approach to using drama therapy treatment providers who work with adult or adolescent sexual abusers and violent offenders. People attend plays for catharsis and vicarious experience, to feel through performance without harming self or others. The same principle applies to drama therapy -- role-play ignites "in-the-moment" responses that simulate real-life behavior and emotion for examination and contemplation in a safe, therapeutic environment. The book presents a variety of exercises range from warm-ups to low- and high-intensity activities, and include calming and cooling exercises as well. The focus is on using the proper exercise for the client's stage in treatment and emotional ability to participate. Information accompanies each exercise regarding the number of clients and amount of time needed to implement.

Acceptance and Commitment Therapy Nov 13 2022

The prevailing view among therapists as well as clients is that a more vital life can be attained by

overcoming negative thoughts and feelings. Yet despite efforts to achieve this goal, many individuals continue to suffer with behavior disorders, adjustment difficulties, and low life satisfaction. Acceptance and Commitment Therapy (ACT) is a unique psychotherapeutic approach that addresses this issue by altering the very ground on which rational change strategies rest. Within a coherent theoretical and philosophical framework, ACT illuminates the ways clients understand and perpetuate their difficulties through language. The book shows how interventions based on metaphor, paradox, and experiential exercises can enable clients to break free of language traps and make contact with thoughts, feelings, memories, and physical sensations that have been feared and avoided. Detailed guidelines are presented for helping clients recontextualize and accept these private events, develop greater clarity about personal values, and commit to needed behavior change. Providing in one volume a scientifically sound theory of psychopathology and a practical treatment model, and illustrated by a wealth of clinical examples, this is an important resource for practitioners and students in the full range of behavioral health care fields.

Employing Community-Based Experiential Learning in Teacher Education Jan 23 2021 This book positions itself at the intersection of the interrelationship between three key areas of initial teacher education: constructivist learning theories, teaching practicum, and the promotion of reflective practices. It presents an innovative approach to teacher preparation at undergraduate and postgraduate levels by critically examining the implementation of a mandatory experiential learning block across subject disciplines on undergraduate and postgraduate teacher preparation courses. This book presents multiple examples and case studies of these varied experiential learning projects that will inform academics, teachers and policymakers. Through these rich examples the authors set out to address the theory-practice dilemma in teacher education, where teachers-to-be are often positioned as 'consumers' of educational research in classrooms, read reference books and academic papers on teaching, and observe university and school experts before applying the same acquired theories and

practices in their own classes. In the book the authors argue for a shift away from this conventional teacher-learning curriculum that is characterised by the separation of theory and practice, choosing instead to promote pedagogy and methods courses where practice underpins all learning. These pedagogical perspectives include the promotion of a diverse range of learning contexts (including on- and off-campus learning sites) for student teachers to experience during their time on teacher education courses.

Learning Emotion-focused Therapy Sep 11 2022 "In Learning Process-Experiential Therapy: The Process-Experiential Approach to Change, the originators of process-experiential therapy describe in detail the various tasks and techniques of this theoretically grounded, empirically supported humanistic therapy, while emphasizing the importance of the therapeutic relationship. The authors, Robert Elliott, Jeanne C. Watson, Rhonda N. Goldman, and Leslie S. Greenberg, well-respected scholars and leading figures in the field, discuss theory, case formulation, treatment, and research in a way that makes this complex form of therapy accessible to all readers. Particularly valuable are their careful moment-to-moment exchanges in extended case examples, which show the reader how deliberate and skillful use of these techniques can bring about change. This informative book will be of great practical value to therapists and students learning

process-experiential therapy as well as to those who teach this mode of psychotherapy."--BOOK
