This volume assesses the achievements and limitations of a new set of non-state or multistakeholder institutions that are concerned with improving the social and environmental record of business, and holding corporations to account. It does so from a perspective that aims to address two limitations that often characterize this field of inquiry. First, fragmentation: articles or books typically focus on one or a handful of cases. Second, the development dimension: what does such regulation imply for developing countries and subaltern groups in terms of well-being, empowerment and sustainability? This volume examines more than 20 initiatives or institutions associated with different regulatory and development approaches, including the business-friendly corporate social responsibility (CSR) agenda, 'corporate accountability' and 'fair trade' or social economy. The explosive economic development in China over the last three decades has created social challenges unprecedented in the country's history. In response, China has overhauled its existing tort laws and even created new tort laws. By exploring its principles, theories and history, this book provides international readers a fresh outlook on China's tort law system. Granted that some concepts or theories in China's modern tort laws were "borrowed" from the west, the principles behind them can nevertheless often find their roots in ancient Chinese philosophies, concepts or even laws. This book also uses real cases to explain the courts' application of China's tort laws and the meaning of the corresponding statutes. Give in to the thrill of the chase. "Three smart, dynamic, and captivating stories." —Niobia Bryant, *Essence*® bestselling author There's nothing hotter than a crush that tempts you to take a chance. . . .

A Victorian glass-reader and a psychic investigator play a deadly game of cat-and-mouse with a killer in the second installment of the New York Times bestselling Looking Glass Trilogy. Virginia Dean wakes at midnight beside a dead body, with a bloody knife in her hand and no memory of the evening's events. Dark energy, emanating from the mirrors lining the room, overpowers her senses. With no apparent way in or out, she's rescued by a man she's met only once before, but won't soon forget... Owen Sweetwater inherited his family's talent for hunting the psychical monsters who prey on London's women and children, and his investigation into the deaths of two glass-readers has led him here. The high-society types of the exclusive Arcane Society would consider

Virginia an illusionist, a charlatan, even a criminal. But Owen knows better. Virginia's powers are real—and so is the power she exerts over him simply with her presence. And if her abilities can be relied upon in the midst of great danger, they just might be the key to his investigation. Experiments in Film Appreciation is the fruit of academic collaboration between India (Banaras Hindu University), Italy (University of Turin) and France (University Lyon 2). It involves both scholars and research students, the latter from BHU and the Department of Oriental Studies Turin. Its articles deal with social and gender issues in Indian contemporary society: communalism, Kashmir, female foeticide, national identity, transgender, a Hindu anthropology of food, educational cinema, problematic conjugality and more. The multicultural approaches are mostly seen through the earnest view of young researchers: the volume stands also as a suggestion of India in the coming. Take control of your investment decisions The investment industry is in a state of inertia. Recent events highlight an overreliance on mathematical foundations and flawed investment models. Investors need to find new paths to effective wealth creation. The Empowered Investor provides a proven framework for wealth creation. Built around 7 key principles and practical real-world examples, the book provides insight into the limitations of traditional investment concepts, and illustrates how investors can take control of their investments. Instead of relying on often flawed financial advice, investors need to develop their own investment approach, drawing on their unique skill sets and experiences. This book: -Presents a practical strategy for wealth creation, based on practical experience and sound theoretical foundation; -Provides real world cases and excerpts from interviews with highly successful investors; -Demonstrates how investors can build on their core strengths, exploit opportunities and differentiate their investments; -Illustrates how to protect a portfolio from threats and risks This book will help you: -Build on your core strengths; -Identify and make the most of new opportunities; -Cultivate quality networks; -Differentiate your investments; -Protect yourself against threats and risks; -Understand and manage the time dimension; -Execute with efficiency. Written in a practical and straightforward manner, The Empowered Investor provides a robust strategic toolkit for investors, bringing the individual to the core of the investment strategy and creating new opportunities for wealth creation. Facility

performance evaluations inform the long-term life of a building and do not end with design or construction. To this aim, Patricia Andrasik created LEED Lab, in collaboration with the US Green Building Council, an increasingly popular international interdisciplinary collegiate laboratory course, which utilizes campus buildings as demonstration sites to facilitate the green assessment of existing buildings. LEED Lab: A Model for Sustainable Design Education uses the LEED O+M building rating system to measure and achieve performance-driven campus facilities in which the readers work and operate. The book explains in simple terms the theory, tasks, tools and techniques necessary for credit implementation and achievement, and includes case studies and exercises for practical application in each chapter. Readers will learn the conceptual scientific framework used to understand existing operational performance and how to quantify sustainable synergies, create green campus policies with administrators, and understand systems such as energy and water in a research-based application. The entire manual is accompanied by a vast online 'Teaching Toolkit' to provide helpful educational resources such as syllabi, lectures, examinations, assignments, Individual Student Progress Presentation (ISSP) templates, web resources, and much more. An excellent guide for undergraduate or graduate students enrolled in LEED Lab or a similar campus building assessment course, as well as construction or architectural professionals and facility managers, this manual navigates the complexities of using a green building diagnostic tool such as LEED O+M towards greater environmental literacy. Alastair McKenzie's GST —

A Practical Guide is widely considered to be the authoritative New Zealand text on goods and services tax. In addition to covering the broad framework and operation of GST in New Zealand, the book provides in-depth coverage of special problem areas and contentious issues regarding the application of the Goods and Services Tax Act 1985. The ninth edition has been comprehensively updated to incorporate the new legislative regimes for input tax, apportionment of input tax, adjustments and the zero-rating of land transactions which came into force in 2011. It also encompasses other legislative developments, case law and IRD rulings and statements that have been released since the publication of the eighth edition in 2008.
