Old Testament Study Guide, Pt. 2: Deuteronomy to Solomon. This volume is the second of three on the Old Testament. It covers the Bible from the Book of Deuteronomy to the reign of King Solomon. We read Moses' counsel to his people during the final days before his translation. We follow the children of Israel into the Promised Land under the leadership of Joshua, beginning at Jericho and ending with the total conquering of all the lands promised to Abraham. We are introduced to the Judge-Heroes, including but not limited to Gideon, Deborah, and Samson. We read of the rise of the prophet Samuel and reigns of Saul, David, and Solomon. We thrill at the faith and gifts of David and mourn over his fall from grace. We are inspired by the wisdom of Solomon and the beauty of the House of Lord He built at Jerusalem, but are saddened by his idolatry in his old age. Along the way, we become familiar with the ministries and teachings of Elijah, and Elisha, and the courage and faith of Job. The cover features an extremely rare photograph of the rock (es-Sakhara) inside the Dome of the Rock, which at one time stood inside the Holy of Holies of Solomon's temple. When did Christians begin to address environmental questions? What can be learned from these pioneering thinkers? This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature. The focal point is the work of Joseph Sittler (1904-1987), an American Lutheran and ecumenical theologian. The role of these early ecotheologians is discussed in relation to environmental history and education. The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s. "Important both historically and theologically. Readers will not be able to see the New Testament in the same way again." —Marcus Borg, author of *The Heart of Christianity* "A New New Testament does what some of us never dreamed possible: it opens the treasure chest of early Christian writings, restoring a carefully select few of them to their rightful place in the broad conversation about who Jesus was, what he did and taught, and what all of that has to do with us now." —Barbara Brown Taylor, author of *Leaving Church and An Altar in the World* There are twenty-seven books in the traditional New Testament, but the earliest Christian communities were far more vibrant than that small number might lead you to think. In fact, many more scriptures were written and just as important as the New

Testament in shaping early-Christian communities and beliefs. Over the past century, many of those texts that were lost have been found and translated, yet are still not known to much of the public; they are discussed mainly by scholars or within a context of the now outdated notion of gnostic gospels. In *A New New Testament* Hal Taussig is changing that. With the help of nineteen important spiritual leaders, he has added ten of the recently discovered texts to the traditional New Testament, leading many churches and spiritual seekers to use this new New Testament for their spiritual and intellectual growth. "Remarkable . . . Not meant to replace the traditional New Testament, this fascinating work will be, Taussig hopes, the first of several new New Testaments." —Booklist
