International Education and Schools May 30 2021 Over the last forty years, the estimated number of international schools worldwide has increased from fewer than 300 to 6400 in 2012. This explosion is a response to the needs of a world in which borders are being traversed with ever greater ease and children increasingly need to be prepared for the global opportunities that await them. In this book, international school specialists reflect on where the movement has come from, how it stands and where developments are heading, offering insightful observations on these unique institutions. This is a comprehensive resource for students, researchers and professionals with an interest in the future of education in a globalized world.

European Economics and Politics in the Midst of the Crisis Aug 21 2020 This book presents an overview of the economics and politics implemented in the European Union and especially the Eurozone during the crisis of 2008-2012. Although it focuses on these four years, the analysis starts from the establishment of the European Union and covers the period up to the outbreak of the Cypriot banking crisis in mid-2013. The long-term creation of structural changes in European economics and politics is associated with a growth lag within the global economic environment dynamics. The economic and political consequences of the crisis and the development of new institutions will shape the future growth dynamics towards a Fragmented European Federation.

Why States Recover Nov 04 2021 State failure takes many forms. Somalia offers one extreme. The country's prolonged civil war led to the collapse of central authority, with state control devolving to warlord-led factions that competed for the spoils of local commerce, political power, and international aid. Malawi, on the other hand, is at the other end of the scale. During President Bingu's second term in office, the country's economy collapsed as a result of poor policies and Bingu's brand of personal politics. On the surface, Malawi's economy seemed largely stable; underneath, however, the polity was fractured and the economy broken. In between these two extremes of state failure are all manner of examples, many of which Mills explores in the fascinating and profoundly personal *Why States Recover*. Throughout he returns to his key questions: how do countries recover? What roles should both insiders and outsiders play to aid that process? Drawing on research in more than thirty countries, and incorporating interviews with a dozen leaders, Mills examines state failure and identifies instances of recovery in Latin America, Asia, and Africa. For anyone interested in the reasons behind states' failure, and remedies to ensure future economic stability, it is important reading.

Hits and Misses in the Baseball Draft Sep 21 2020 If unpredictability is so much of what makes sports compelling, the baseball draft might be the best place to look. This book explores the intricate uncertainties of the draft and the people who face it. Since the modern draft began in 1965, major league teams have attempted, with varying degrees of success, to identify and develop stars of the future. Whether because of injury, poor performance or mental and physical struggles, a large percentage of the most ballyhooed prospects never reach the game's highest level. Though teams have improved in recent years at turning top picks into major leaguers, the baseball draft is still centered on educated guesswork. This book explains why.

The Substance of EU Democracy Promotion Jun 30 2021 The book investigates the substance of the European Union's (EU) democracy promotion policy. It focuses on elections, civil and political rights, horizontal accountability, effective power to govern, stateness, state administrative capacity, civil society, and socio-economic context as components of embedded liberal democracy.

Persian Gulf 2014 Jun 18 2020 This series called Persian Gulf focuses on India's bilateral relations with the region and discusses the political, strategic, economic, energy, cultural and social relations. Backed by statistical information, it provides a comprehensive account of various aspects of the bilateral relations and gives detailed analytical insights into recent developments. It also delves into the internal dynamics of the Persian Gulf states, particularly focusing on the economic and political developments during 2013. Persian Gulf 2014, second in the series, examines the bilateral developments during 2013.

Bending the Cost Curve in Health Care Aug 01 2021 Through Canadian and international perspectives, *Bending the Cost Curve in Health Care* explores the management of growing health costs in an extraordinarily complex arena. The book moves beyond previous debates, agreeing that while efficiencies and better value for money may yet be found, more fundamental reforms to the management and delivery of health services are essential prerequisites to bending the cost curve in the long run. While there is considerable controversy over direction and details of change, there also remains the challenge of getting agreement on the values or principles that would guide the reshaping of the policies, the structures, and the regulatory environment of health care in Canada. Leading experts from around the world representing a range of disciplines and professional backgrounds come together to organize and define the problems faced by policy-makers. Case studies from the United States, the United Kingdom, Australia, the Nordic countries, and industrialized Asian countries such as Taiwan offer useful reform experiences for provincial governments in Canada. Finally, common Canadian cost factors, such as pharmaceuticals and technology, and paying the health workforce, are explored. This book is the first volume in *The Johnson-Shoyama Series on Public Policy*, published by the University of Toronto Press in association with the Johnson-Shoyama Graduate School of Public Policy, an interdisciplinary centre for research, teaching, and executive training with campuses at the Universities of Regina and Saskatchewan.

Designing Tasks in Secondary Education Apr 21 2023 Engaging students in learning about their subject is a central concern for all teachers and teacher educators. How teachers view and use the pedagogic potential of different tasks to engage pupils with knowledge in different subjects, is central to this endeavour. *Designing Tasks in Secondary Education* explores models for effective task design, helping you translate the curriculum into the tasks and activities that you ask your students to do in order to facilitate developmental or higher-level understanding of curriculum content. Written by experts in the field of education from a range of subjects and including a foreword written by renowned author Professor Walter Doyle, this book spans an international context and offers a refreshing alternative of how to plan and design tasks that will not only intellectually stimulate but improve teaching quality. Key topics explored include: Designing tasks which engage learners with knowledge Policy perspectives on task design Designing cognitively demanding classroom tasks Task design issues in the secondary subjects *Designing Tasks in Secondary Education* offers essential insight into task design and its importance for enhancing subject understanding and student engagement. It will challenge and support all education professionals concerned with issues of curriculum design, subject knowledge, classroom organisation, agency in the learning process and teaching quality.

The Revised European Social Charter Aug 13 2022 This detailed Commentary explores the boundaries of social rights at a European level through analysis of the Revised European Social Charter (RESC), the most comprehensive regional document on social rights. The Commentary considers the treaty as the counterpart of the European Convention on Human Rights, examining how it sets out fundamental

rights in the social field. It focuses primarily on the rich jurisprudence developed by the Charter's monitoring body, the European Committee of Social Rights (ECSR).

The Military Balance 2013 Oct 03 2021 The Military Balance 2013 is the annual assessment of the military capabilities and defence economics of 171 countries world-wide. New features of the 2013 edition include; reorganised and expanded analytical essays. New sections on trends in contemporary armed conflicts in Afghanistan and Syria, as well as trends in defence capability areas, with a focus on equipment, technological or doctrinal developments. There is also an essay on trends in defence economics and procurement, one on European defence industries, and another on anti-access/area denial, detailed analysis of regional and national defence policy and economic issues for selected states, updated graphics feature on comparative defence statistics, with focus on defence economics, and major land, sea and, air capability concerns, tables, graphics and analysis of defence economics issues, additional national capability summaries, additional data on, land forces: combat support and combat service support, new graphics and maps on defence capability issues and additional data on cyber capabilities.

Smart Grid Standards Jun 11 2022 A fully comprehensive introduction to smart grid standards and their applications for developers, consumers and service providers The critical role of standards for smart grid has already been realized by world-wide governments and industrial organizations. There are hundreds of standards for Smart Grid which have been developed in parallel by different organizations. It is therefore necessary to arrange those standards in such a way that it is easier for readers to easily understand and select a particular standard according to their requirements without going into the depth of each standard, which often spans from hundreds to thousands of pages. The book will allow people in the smart grid areas and in the related industries to easily understand the fundamental standards of smart grid, and quickly find the building-block standards they need from hundreds of standards for implementing a smart grid system. The authors highlight the most advanced works and efforts now under way to realize an integrated and interoperable smart grid, such as the "NIST Framework and Roadmap for Smart Grid Interoperability Standards Release 2.0", the "IEC Smart Grid Standardization Roadmap", the ISO/IEC's "Smart Grid Standards for Residential Customers", the ZigBee/HomePlug's "Smart Energy Profile Specification 2.0", IEEE's P2030 "Draft Guide for Smart Grid Interoperability of Energy Technology and Information Technology Operation

with the Electric Power System (EPS), and End-Use Applications and Loads”, and the latest joint research project results between the world’s two largest economies, US and China. The book enables readers to fully understand the latest achievements and ongoing technical works of smart grid standards, and assist industry utilities, vendors, academia, regulators, and other smart grid stakeholders in future decision making. The book begins with an overview of the smart grid, and introduces the opportunities in both developed and developing countries. It then examines the standards for power grid domain of the smart grid, including standards for blackout prevention and energy management, smart transmission, advanced distribution management and automation, smart substation automation, and condition monitoring. Communication and security standards as a whole are the backbone of smart grid and their standards, including those for wired and wireless communications, are then assessed. Finally the authors consider the standards and on-going work and efforts for interoperability and integration between different standards and networks, including the latest joint research effort between the world’s two largest economies, US and China. A fully comprehensive introduction to smart grid standards and their applications for developers, consumers and service providers Covers all up-to-date standards of smart grid, including the key standards from NIST, IEC, ISO ZigBee, IEEE, HomePlug, SAE, and other international and regional standardization organizations. The Appendix summarizes all of the standards mentioned in the book Presents standards for renewable energy and smart generation, covering wind energy, solar voltaic, fuel cells, pumped storage, distributed generation, and nuclear generation standards. Standards for other alternative sources of energy such as geothermal energy, and bioenergy are briefly introduced Introduces the standards for smart storage and plug-in electric vehicles, including standards for distributed energy resources (DER), electric storage, and E-mobility/plug-in vehicles The book is written in an accessible style, ideal as an introduction to the topic, yet contains sufficient detail and research to appeal to the more advanced and specialist reader.

Critical Psychiatry and Mental Health May 10 2022 Critical Psychiatry and Mental Health critically explores the current theory and practice of ethno-psychiatry and multicultural mental health practices and policies. Through an in-depth discussion of the work of Suman Fernando, one of the world’s leading scholars and researchers in race, culture and mental health, an international selection of contributors discuss and debate issues affecting mental health and minority ethnic individuals and groups. The book offers a new approach to global mental health, arguing that the use of outdated and outmoded ways in which psychiatry is researched and practiced is a thing of the past, that social justice can only be achieved through a more democratic approach to mental health care and emphasising that the inclusion of cultural and traditional healing methods and practices are vital to meeting diverse needs. Split into five parts, the book covers: Critique of Western Psychiatry and Mental Health Challenges and Opportunities in Mental Health Care Training and Development in Mental Health Practice Transnational Contexts: Engaging the work of Suman Fernando Personal Reflections on Suman Fernando’s Life and Work Critical Psychiatry and Mental Health is ideal for researchers and practitioners in health and mental health, psychiatry, counselling and psychotherapy and anyone interested in the intersection of race, culture and mental health.

Stem Cells in Regenerative Medicine Apr 28 2021 This book is a unique guide to emerging stem cell technologies and the opportunities for their commercialisation. It provides in-depth analyses of the science, business, legal, and financing fundamentals of stem cell technologies, offering a holistic assessment of this emerging and dynamic segment of the field of regenerative medicine. • Reviews the very latest advances in the technology and business of stem cells used for therapy, research, and diagnostics • Identifies key challenges to the commercialisation of stem cell technology and avenues to overcome problems in the pipeline • Written by an expert team with extensive experience in the business, basic and applied science of stem cell research This comprehensive volume is essential reading for researchers in cell biology, biotechnology, regenerative medicine, and tissue engineering, including scientists and professionals, looking to enter commercial biotechnology fields.

The Establishment Jul 20 2020 THE PHENOMENAL BESTSELLER 'Fantastic, timely, eye-opening' Armando Iannucci, *New Statesman*, Books of the Year 'Captures a collective sense of anger and awakening' Matt Haig, *Observer*, Books of the Year Behind our democracy lurks a powerful but unaccountable network of people who wield massive power and reap huge profits in the process. In exposing this shadowy and complex system that dominates our lives, Owen Jones sets out on a journey into the heart of our Establishment, from the lobbies of Westminster to the newsrooms, boardrooms and trading rooms of Fleet Street and the City. Exposing the revolving doors that link these worlds, and the vested interests that bind them together, Jones shows how, in claiming to work on our behalf, the people at the top are doing precisely the opposite. In fact, they represent the biggest threat to our democracy today - and it is time they were challenged. 'A book of revelations ... The Establishment have stitched it up - stitched you up - and they know it' Danny Dorling, *Times Higher Education Supplement* 'A dissection of the profoundly and sickeningly corrupt state that is present-day Britain. He is a fine writer, and this is a truly necessary book' Philip Pullman 'Owen Jones is a phenomenon of our times' David Kynaston, *The Times Literary Supplement* 'You will be enlightened and angry' Irvine Welsh

The Ashgate Research Companion to International Criminal Law Dec 17 2022 International criminal law is at a crucial point in its history and development, and the time is right for practitioners, academics and students to take stock of the lessons learnt from the past fifteen years, as the international community moves towards an increasingly uni-polar international criminal legal order, with the International Criminal Court (ICC) at the helm. This unique Research Companion takes a critical approach to a wide variety of theoretical, practical, legal and policy issues surrounding and underpinning the operation of international criminal law as applied by international criminal tribunals. The book is divided into four main parts. The first part analyses international crimes and modes of liability, with a view to identifying areas which have been inconsistently or misguidedly interpreted, overlooked to date or are likely to be increasingly significant in future. The second part examines international criminal processes and procedures, and here the authors discuss issues such as victim participation and the rights of the accused. The third part is a discussion of complementarity and sentencing, while the final part of the book looks at international criminal justice in context. The authors raise issues which are likely to provide the most significant challenges and most promising opportunities for the continuing development of this body of law. As international criminal law becomes more established as a distinct discipline, it becomes imperative for international criminal scholarship to provide a degree of critical analysis, both of individual legal issues and of the international criminal project as a whole. This book represents an important collective effort to introduce an element of legal realism or critical legal studies into the academic discourse.

India's National Security Oct 15 2022 This fourteenth volume of India's National Security Annual Review intensively analyses India's national security with respect to the changing internal and external dynamics. In the global environment, the situation is characterised by rising tensions between United States and Russia, intensified rivalry between United States (US) and China, and increasing cooperation between China and Russia. For India which seeks peaceful growth to emerge as a major power, this poses severe diplomatic challenges. This volume discusses the complexity of these challenges and the deftness with which India gets the best out of its strategic partnerships with the US and Russia while warding off the transgressions of a mighty adversary like China. It also studies the impact of internal convulsions and external intrusions on India's security from South Asian nations such as Afghanistan, Bangladesh, Nepal and Sri Lanka. Examining the field of internal security, the essays carry rare insights into the causes of expansion of Naxalite violence in tribal areas and the dynamics of conflict resolution in the Northeast, as well as India's deep concern as a growing power with its economic slowdown in the recent past, and energy and cyber security. Bringing together contributions from eminent scholars and diplomats, the volume will be indispensable for policymakers, government think tanks, defence and strategic studies experts, as well as students and researchers of

international relations, foreign policy and political science.

Masculinities and Place Jan 26 2021 *Masculinities and Place* bring together an impressive range of high-profile and emerging researchers to consolidate and expand new domains of interest in the geographies of men and masculinities. It is structured around key and emerging themes within recently completed and on-going research about the intersections between men, masculinities and place. Building upon broader themes in social and cultural geographies, cultural economy and urban/rural studies, the collection is organised around the key themes of: theorising masculinities and place; intersectionality; home; family; domestic labour; work; and health and well-being.

Women Psychotherapists' Reflections on Female Friendships Feb 19 2023 Psychologists, as well as the general public, have recognized the importance of female friendships. Scientists call this bond the tending instinct- a kind of female relaxation response that has salutary effects. Such special attachment shields women from isolation and provides an enhanced sense of wellbeing. Intimate friends can therefore act as sisters of the heart to promote connection, solace, wholeness, and longevity. Moreover, women friends frequently provide emotional, social, physical, and spiritual benefits. Indeed, sisters of the heart constitute an unparalleled bond that encourages women to connect with themselves, with others, and with the world at large. In this book, twelve women therapists, who are diverse in age-- young, middle, and older women; as well as in ethnicity--White, African American, Latina, Asian American, Native American, and multiracial women---examine the psychological and physical aspects of this unique female bonding. Through their narratives we hear their distinctive voices as women and as healers. In this fashion, they reflect on both the functional and dysfunctional dynamics occurring between intimate female friends. Finally, these women therapists examine how their experience with a sister of the heart informed their development as healers, and discuss how they use this special bond in psychotherapy with women. This book was originally published as a special issue of *Women & Therapy*. 'This enlightening, iconic book is for anyone who wants to understand more about the powerful roles of friendships—including challenges--among women that facilitate their ability to survive and thrive. It is special in that the chapter authors are psychotherapists who describe the impact of female bonding, from scientific as well as personal bases. The descriptions are rooted in theory, research, extensive clinical experience and personal lives. Refreshing and much needed, this book will prove useful to professionals as well as any women or men who want to understand the value and salience of female relationships.' Melba Vasquez, PhD, ABPP Past President, American Psychological Association Independent Practice, Austin, Texas

Doctrine of Terror Apr 16 2020 The book highlights the fact that Islam does not encourage or incite intolerance of other faiths, and that it values sanctity of human life, regardless of religious affiliation, and abhors violence and extremism, as being perpetrated by the misguided muslim jihadists of al-Qaeda, ISIS, and their associated terrorist groups that have been wreaking atrocities on defenseless civilian populations of Muslim majority countries, including women and children. The book describes the inception, support, and unlimited funding of these groups by the Sunni Arab countries, and implores the Funders to discontinue their support, forthwith, to restore peace and stability to the marginalized communities, particularly the Shia Muslims of the world who have been subjected to persecution for centuries, ever since the advent of Islam in the seventh century, following the death of the Prophet of Islam in 623. The book also implores the World powers to end their tacit support of terrorism by seriously confronting the supporters of terrorist groups, without which the terrorism will not end.

Did Ancient Chinese Explore America Dec 05 2021 A Chinese classic, the Shan Hai Jing, reportedly from 2000 BC claimed travels to the ends of the earth. However, today many, while accepting the antiquity of this account, believe it was just mythology. But was it? Testing the hypothesis that the Shan Hai Jing described actual surveys of North America, Charlotte Harris Rees, author of books about early Chinese exploration, followed an alleged 1100 mile Chinese trek along the eastern slope of the US Rocky Mountains. The Chinese account should have been easy to disprove. In the travelogue

Did Ancient Chinese Explore America? Rees candidly shares her initial doubts then her search and discoveries. She weaves together history, subtle humor, academic studies, and many photographs to tell a compelling story.

Capital Punishment: New Perspectives Sep 02 2021 This collection asks questions about the received wisdom of the debate about capital punishment. Woven through the book, questions are asked of, and remedies proposed for, a raft of issues identified as having been overlooked in the traditional discourse. It provides a long overdue review of the disparate groups and strategies that lay claim to abolitionism. The authors argue that capital litigators should use their skills challenging the abuses not just of process, but of the conditions in which the condemned await their fate, namely prison conditions, education, leisure, visits, medical services, etc. In the aftermath of successful constitutional challenges it is the beneficiaries (arguably those who are considered successes, having been 'saved' from the death penalty and now serving living death penalties of one sort or another) who are suffering the cruel and inhumane alternative. Part I of the book offers a selection of diverse, nuanced examinations of death penalty phenomena, scrutinizing complexities frequently omitted from the narrative of academics and activists. It offers a challenging and comprehensive analysis of issues critical to the abolition debate. Part II offers examinations of countries usually absent from academic analysis to provide an understanding of the status of the debate locally, with opportunities for wider application.

China's Human Rights Lawyers May 18 2020 This book offers a unique insight into the role of human rights lawyers in Chinese law and politics. In her extensive account, Eva Pils shows how these practitioners are important as legal advocates for victims of injustice and how bureaucratic systems of control operate to subdue and marginalise them. The book also discusses how human rights lawyers and the social forces they work for and with challenge the system. In conditions where organised political opposition is prohibited, rights lawyers have begun to articulate and coordinate demands for legal and political change. Drawing on hundreds of anonymised conversations, the book analyses in detail human rights lawyers' legal advocacy in the face of severe institutional limitations and their experiences of repression at the hands of the police and state security apparatus, along with the intellectual, political and moral resources lawyers draw upon to survive and resist. Key concerns include the interaction between the lawyers and their bureaucratic, professional and social environments and the forms and long term political impact of resistance. In addressing these issues, Pils offers a rare evaluative perspective on China's legal and political system, and proposes new ways to assess domestic advocacy's relationship with international human rights and rule of law promotion. This book will be of great interest and use to students and scholars of law, Chinese studies, socio-legal studies, political studies, international relations, and sociology. It is also of direct value to people working in the fields of human rights advocacy, law, politics, international relations, and journalism.

Afghan National Army Dec 25 2020 The Afghan National Army (ANA) and Afghan National Air Force (AAF) stand today as products of the 2001 war and Western intervention in Afghanistan. This is not only because they were established in 2002 by the government brought to power by that intervention, but even more importantly because they were funded, designed and trained by the intervening forces. It was perhaps inevitable therefore that the question of their sustainability should arise.
