& Analytical Tools PART 7: Social Media Platforms PART 8: Privacy, Ethics and Inequalities A timely and up-to-date "go-to" reference work for business events, The Routledge Handbook of Business Events explores and critically evaluates the key debates and controversies inherent to this rapidly expanding subject of study and industry. The volume brings together leading specialists from a range of disciplinary backgrounds and geographical regions, to provide state-of-the-art theoretical reflection and empirical research on management aspects as well as economic, social and environmental impacts and external factors such as transportation. The book incorporates the varied expertise of some 30 expert authors to provide a definitive collection of statements in this field, accompanied by illustrative and engaging case studies embodying real-life scenarios and examples on an international scale. This book is an excellent resource for students, researchers and academics of Events, as well as those of related studies in particular Tourism, Hospitality, Sport, Leisure, Marketing, Business and Development Studies. This is a custom eBook for Grand Canyon University. A Flight Attendant's Essential Guide is written for airline executives, university lecturers who specialize in the airline industry, and for undergraduate students preparing for a career as a flight attendant. Those working in passenger, aircraft, airport as well as general communications at an airport or aircraft can benefit from this book through a thorough understanding the responsibilities of flight attendants. This guidebook primarily focuses on the passenger aspect of in-flight service, including operations and communication skills, and how flight attendants interact with passengers at each phase of a flight. This addition to our popular Guides for the Perplexed series tackles a subject that is enjoying renewed debate: Christianity, along with Judaism and Islam, claims that the universe

is not a brute fact. It is 'created'. But what do we mean by 'creation'? Do we mean that the universe is 'designed'? Is it the product of an evolutionary process? How are creatures related to God, and does God act within creation? Simon Oliver begins with the background to the Christian theology of creation in Greek philosophy and the Old Testament. This provides a route into understanding the claim that we are part of a created order that is also the theatre of God's providential action. He examines different understandings of creation, including creation out of nothing and the analogy of being, with close reference to the work of patristic and medieval theologians such as Augustine and Thomas Aquinas. This leads to an historical overview of the relationship between theological, philosophical and scientific approaches to creation in the modern period. Some of the ethical issues concerning humanity's place within, and treatment of, creation and our environment are also examined. A distinctive yet traditional theology of creation is proposed focused on the concepts of gift and participation as ways of understanding more fully the meaning and implications of the claim that the universe is created. Intended to assist designers, engineers, material specifiers, and buyers in quickly locating reputable suppliers of custom forgings in the U.S., Canada and Mexico. Consultation with the forging supplier early in the design process is highly recommended for the most cost-efficient components. This practical guide for advanced students and decision-makers in the pharma and biotech industry presents key success factors in R&D along with value creators in pharmaceutical innovation. A team of editors and authors with extensive experience in academia and industry and at some of the most prestigious business schools in Europe discusses in detail the innovation process in pharma as well as common and new research and innovation

strategies. In doing so, they cover collaboration and partnerships, open innovation, biopharmaceuticals, translational medicine, good manufacturing practice, regulatory affairs, and portfolio management. Each chapter covers controversial aspects of recent developments in the pharmaceutical industry, with the aim of stimulating productive debates on the most effective and efficient innovation processes. A must-have for young professionals and MBA students preparing to enter R&D in pharma or biotech as well as for students on a combined BA/biomedical and natural sciences program. Enderle illustrates the importance of corporate responsibility by integrating wealth creation and human rights. An invaluable reference for students, teachers and researchers in business and economic ethics, social sciences and human rights studies, as well as for leaders in business, civil society organizations and international institutions.

Antimicrobial resistance (AMR) is a global public health threat. The menace of antimicrobial resistance is present across health, animal, agriculture, food, and environment sectors. It, therefore, requires an interdisciplinary combat approach- the one health approach, envisaged by the FAO-UNEP-WHO-WOAH Quadripartite (Food and Agriculture Organization of the United Nations (FAO), the UN Environment Programme (UNEP), the World Health Organization (WHO) and the World Organisation for Animal Health (WOAH)). This comprehensive reference book provides a thorough understanding of antimicrobial resistance across different sectors. It presents deep insights and gives a global perspective on antimicrobial resistance for policymakers. The book offers essential and up-to-date information that enables researchers from multiple fields to design research on antimicrobial resistance. The book discusses molecular mechanisms and antibiotic resistance genes of significant antimicrobial-resistant pathogens, regulatory frameworks available

worldwide, and mitigation strategies across the sectors, including probiotics, prebiotics, antimicrobial peptides, bacteriophages, phytochemical compounds, immunostimulants, vaccines, bacteriocins, etc. It compiles essays from leading experts in the field of antimicrobial resistance research. The book is meant for students and researchers in microbiology, medical microbiology, and public health. It is also helpful for clinicians and policymakers.

Annotation Photoshop CC is truly amazing, but it can also be overwhelming if you're just getting started. This book makes learning Photoshop as easy as possible by explaining things in a friendly, conversational style without technical jargon. After a thorough introduction to the program, you'll delve deep into Photoshop's secrets with expert tips and practical editing advice you can use every day. This book explores how social networking platforms such as Facebook, Twitter, and WhatsApp 'accidentally' enable and nurture the creation of digital afterlives, and, importantly, the effect this digital inheritance has on the bereaved.

Debra J. Bassett offers a holistic exploration of this phenomenon and presents qualitative data from three groups of participants: service providers, digital creators, and digital inheritors. For the bereaved, loss of data, lack of control, or digital obsolescence can lead to a second loss, and this book introduces the theory of 'the fear of second loss'. Bassett argues that digital afterlives challenge and disrupt existing grief theories, suggesting how these theories might be expanded to accommodate digital inheritance. This interdisciplinary

book will be of interest to sociologists, cyber psychologists, philosophers, death scholars, and grief counsellors. But Bassett's book can also be seen as a canary in the coal mine for the 'intentional' Digital Afterlife Industry (DAI) and their race to monetise the dead. This book provides an understanding of the profound effects uncontrollable timed posthumous messages and the creation of thanabots could have on the bereaved, and Bassett's conception of a Digital Do Not Reanimate (DDNR) order and a voluntary code of conduct could provide a useful addition to the DAI. Even in the digital societies of the West, we are far from immortal, but perhaps the question we really need to ask is: who wants to live forever?

ASC 606, Revenue from Contracts with Customers, replaces almost all previously existing revenue recognition guidance, including industry-specific guidance. That means unprecedented changes, affecting virtually all industries and all size organizations. For preparers, this guide provides the comprehensive, reliable accounting implementation guidance you need to unravel the complexities of this new standard. For practitioners, it provides in-depth coverage of audit considerations, including controls, fraud, risk assessment, and planning and execution of the audit. Recent audit challenges are spotlighted to allow for planning in avoiding these new areas of concern. This guide includes 16 industry-specific chapters for the following industries: Aerospace and Defense, Airlines, Asset Management, Broker-Dealers, Construction Contractors, Depository Institutions,

Gaming, Health Care, Hospitality, Insurance, Not-for-Profits, Oil and Gas, Power and Utility, Software, Telecommunications, and Timeshare. In higher education institutions across the world, rapid changes are occurring as the socio-economic composition of these universities is shifting. The participation of females, ethnic minority groups, and low-income students has increased exponentially, leading to major changes in student activities, curriculum, and overall campus culture. Significant research is a necessity for understanding the need of broader educational access and promoting a newly empowered diverse population of students in today's universities. Accessibility and Diversity in the 21st Century University is a pivotal reference source that provides vital research on the provision of higher educational access to a more diverse population with a specific focus on the growing population of women in the university, key intersections with race and sexual preference, and the experiences of low-income students, mid-career and reentry students, and special needs populations. While highlighting topics such as adult learning, race-based achievement gaps, and women's studies, this publication is ideally designed for educators, higher education faculty, deans, provosts, chancellors, policymakers, sociologists, anthropologists, researchers, scholars, and students seeking current research on modern advancements of diversity in higher education systems. Globalisation, and the vast migrations of capital and labour that have accompanied it in recent decades, has transformed family law in once unimaginable ways. Families have been torn apart and new families have been created. Borders have become more porous, allowing adoptees and mail order brides to join new families and women fleeing domestic violence to escape from old ones. People of different nationalities marry, have children, and divorce, not necessarily in that order. They file suits in their

respective home states or third states, demanding support, custody, and property. Otherwise law-abiding parents risk jail in desperate efforts to abduct their own children from foreign ex-spouses. The aim of this Handbook is to provide scholars, postgraduate students, judges, and practitioners with a broad but authoritative review of current research in the area of International Family Law. The contributors reflect on a range of jurisdictions and legal traditions and their approaches vary. Each chapter has a distinct subject matter and was written by an author who was invited because of his or her expertise on that subject. This volume provides a valuable contribution to emerging understandings of the subject. In recent years, all types of businesses have increasingly focused on the importance of the relationship with the customer. Customer knowledge management has become a well-known term used in the business and academic worlds for understanding how to control consumer behavior. The Handbook of Research on Managing and Influencing Consumer Behavior discusses the importance of understanding and implementing customer knowledge management and customer relationship management into everyday business workflows. This comprehensive reference work highlights the changes that the Internet and social media have brought to consumer behavior, and is of great use to marketers, businesses, academics, students, researchers, and professionals. The masses of human-beings on earth are struggling and suffering with poverty because the financial system of Capitalism is a pyramidal structure based upon "divide and conquer" that permits the top 5% to become wealthy at the expense of 95% of the masses of people thereby creating a working poor middle class and a permanent underclass through trickledown economics and debt accumulation. Conversely, Karl Marx's financial system of Socialism (Communism) redistributes wealth equally among the members of Society and eradicates poverty, but

puts a ceiling on the amount of Wealth and Prosperity of its citizens; and does not eliminate debt for all of humanity. Furthermore, the financial system of Capitalistic-Socialism permits certain members of Society to become Wealthy, yet some of this wealth is also distributed among the less fortunate through the taxation of the wealthy, but this still does not create total wealth and prosperity and elimination of debt for all of humanity. This second edition of Job Creation and Local Economic Development examines how national and local actors can better work together to support economic development and job creation at the local level. Explains how to set up and customize QuickBooks to manage small business finances, covering such topics as creating invoices, tracking inventory, running payroll, monitoring sales, and securing data. Producing Women examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photography, Internet how-to instructions about

zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—Producing Women elucidates women's production cultures online, and the ways that individuals can critically study and engage with these practices. This book develops the core system science needed to enable the development of a complex industrial internet of things/manufacturing cyber-physical systems (IIoT/M-CPS). Gathering contributions from leading experts in the field with years of experience in advancing manufacturing, it fosters a research community committed to advancing research and education in IIoT/M-CPS and to translating applicable science and technology into engineering practice. Presenting the current state of IIoT and the concept of cybermanufacturing, this book is at the nexus of research advances from the engineering and computer and information science domains. Readers will acquire the core system science needed to transform to cybermanufacturing that spans the full spectrum from ideation to physical realization. This proceedings volume presents the latest research from the worldwide mass customization & personalization (MCP) community bringing together new thoughts and results from various disciplines within the field. The chapters are based on papers from the MCPC 2017. The book showcases research and practice from authors that see MCP as an opportunity to extend or even revolutionize current business models. The current trends of Industrie 4.0, digital manufacturing, and the rise of smart products allow for a fresh perspective on MCP: Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth, and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers, and the society as a whole. The chapters of

this book are contributed by a wide range of specialists, offering cutting-edge research, as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications, and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing “long tail” business models. The objective of MCP is to provide goods and services that best serve individual customers’ needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers, and researchers with corporate entrepreneurs putting these strategies into practice. Chapter 24 is open access under a CC BY 4.0 license via [link.springer.com](http://link.springer.com). In an increasingly interconnected world, data breaches grab headlines. The security of sensitive information is vital, and new requirements and regulatory bodies such as the Payment Card Industry Data Security Standard (PCI-DSS), Health Insurance Portability and Accountability Act (HIPAA), and Sarbanes-Oxley (SOX) create challenges for enterprises that use encryption to protect their information. As encryption becomes more widely adopted, organizations also must contend with an ever-growing set of encryption keys. Effective management of these keys is essential to ensure both the availability and security of the encrypted information. Centralized management of keys and certificates is necessary to perform the complex tasks that are related to key and certificate generation, renewal, and backup and recovery. The IBM® Enterprise Key Management Foundation (EKMF) is a flexible and highly secure key management system for the enterprise. It provides centralized key management on IBM zEnterprise® and distributed platforms for streamlined, efficient, and secure key and certificate management operations. This IBM Redbooks®

publication introduces key concepts around a centralized key management infrastructure and depicts the proper planning, implementation, and management of such a system using the IBM Enterprise Key Management Foundation solution. Power and Peril of Gene Editing CRISPR/Cas9 Technology This book is a summary of "A Crack in Creation: Gene Editing and the Unthinkable Power to Control Evolution" by Jennifer A. Doudna and Samuel H. Sternberg. This book tells the story of CRISPR and "gene-editing." CRISPR is a cutting-edge gene-editing technology that mimics what happens naturally in bacteria. It enables scientists to "play god" with plant or animal DNA, with unlimited power and peril. The technology of gene editing is the most important advance

in our era. The possibility of forever altering the genetic composition of humankind is frightening. Yet we can't overlook the opportunities that may lead to inventions for cures of HIV, debilitating genetic diseases, and cancers, and end food shortages. The book will demystify this exciting area of science and inspire you to seek answers to tough moral and ethical questions on the use of this technology. Read this book and get involved in the debate on the moral and ethical issues on the use of this technology. This guide includes: \*

- \* Book Summary—helps you understand the key concepts.
- \* Online Videos—cover the concepts in more depth.

Value-added from this guide:

- \* Save time
- \* Understand key concepts
- \* Expand your knowledge

About Trace Trace provides a safe space to add changes to a drawing in the web and mobile apps without altering the existing drawing. The analogy is of a virtual collaborative tracing paper that is laid over the drawing that allows collaborators to add feedback on the drawing. Create traces in the web and mobile apps, then send or share the drawing to collaborators so they can view the trace and its contents.
