Learning

Understanding Language and Literacy Development Dec 24 2020 Understanding Language and Literacy Development: Diverse Learners in the Classroom offers effective supporting strategies to address the cultural and linguistic diversity of students in contemporary classrooms. Discusses learners with different linguistic abilities—infancy, early childhood, middle childhood, and adolescence—by suggesting effective ways to reach them based on their strengths and needs Emphasizes language and literacy supporting strategies in a variety of everyday classroom settings Includes activities and questions to motivate readers to think and develop their own perspectives on language and literacy development Considers a variety of different language acquisition experiences, including monolingual, multilingual, and language impairment Discusses different types of literacies, including digital and hypertext Connects language and literacy development to identity and motivation to contextualize learning styles for pre-service teachers Supported by a companion website that includes additional resources such as PowerPoint presentations by chapter and a summary of relevant information from the Common Core K-12 English Language Arts Standards [Connecting Content and Language for English Language Learners](#) Jul 19 2020 Bridge the gap between content and language and put research into practice to instruct English language learners with strategies that meet their needs in language development and literacy. [Second Language Learners in International Schools](#) Aug 20 2020 Available in paperback from mid-December 2018. By 2020 it is estimated that there will be more than ten thousand international schools educating five million students. Native speakers of English, the language of instruction in 90 per cent of these

schools, will be in the minority. The learning needs of second language learners in national education systems differ fundamentally from those in the international community. This book argues that second language learners in international schools are better provided for within models of instruction that do not assimilate to any political system; where motivation can come from areas other than wanting to belong to a specific culture; and where students can develop all their languages equitably. The authors trace the theories underpinning second language learning programmes in international schools and delve into the complexities of teacher relationships and the influence of curriculum agencies on second language learning. Through case studies and vignettes, they argue for establishing a department of Professional English as a Second Language at the centre of the academic life in each school, whose staff will build on the widely acknowledged potential of second language learners and enhance their capabilities in all their languages.

Foreign Language Learning Apr 15 2020

Developing Intercultural Language Learning

Nov 15 2022 This book presents a detailed account of a self-study in which the author considers why a developmental perspective matters in language learning within an intercultural orientation, and how teachers of languages might understand and attend to this notion in their work. The discussion is based on the author's experience as a teacher-researcher and traces aspects of teachers' work from planning, teaching and mediating, to assessing and judging evidence of student learning and development over time. This book is grounded in a praxis view of language teaching and learning and will be of interest to other language teachers, pre-service teachers, teacher trainers and applied linguists.

Multilingual Education Jun 17 2020 "This cutting edge volume explores holistic trends in multilingualism, analysing the processes of both 'becoming multilingual' and 'being multilingual'. Multilingualism has increased in recent years due to globalisation, transnational mobility and the spread of Information and Communications Technology (ICT). This volume explores some of the trends in the study of multilingual education

by putting together research studies that analyse the processes of both 'becoming multilingual' and 'being multilingual' in educational contexts."--Publisher's website.
Children's Second Language Learning Jan 05 2022 This monograph discusses the state of the art in child second language acquisition research. It is of particular interest to teachers, administrators, and others concerned with educating children whose first language is not English. The first chapter deals with preschool second language acquisition. It examines processes of acquiring the sound system, the meaning system, the rules for language use, the developmental stages in acquisition, and the differences between first and second language learning in preschool children. Chapter 2 treats second language acquisition in the classroom. It examines the nature of the school experience and how the language of the school differs from language used outside the classroom. Bilingual education programs in Canada and in the United States are compared and various types of U.S. bilingual programs are discussed in order to specify the various instructional and interactional features that differentiate bilingual classrooms. The third chapter describes ways in which researchers have investigated second language acquisition. The major research areas are studies of the second language-learning process, the question of language assessment, and research on the effectiveness of bilingual education. Each chapter contains suggestions for further reading. (Author/AMH).

Teaching-and-learning Language-and-culture

May 09 2022 Increasingly, cultural learning is seen as an integral part of foreign- language learning. This book offers a practical introduction to the issues by providing descriptions of classroom practice, of curriculum innovation and of experimental courses.

Common European Framework of Reference for Languages Jan 25 2021 This book contains

a number of descriptor scales which describe the linguistic skills needed by language learners to become competent speakers of another language.

New Frontiers in Second Language Learning

Apr 27 2021

Foreign language learning Jan 17 2023

Language Learning Oct 02 2021 Language

Learning provides an introduction to language development that differs from existing books in that it traces language and cognitive development (together with the associated debates) from babyhood, through the school years of middle childhood and adolescence, into adulthood and the world of work. Increasingly, the global trend is towards learning to speak, read and write more than one language.

Language Learning is a comprehensive book that includes descriptions and discussions of learning more than one language sequentially and simultaneously. The only book to look at language with a lifelong perspective, it is ideal as an introductory student text. Each chapter contains ideas and suggestions for students to follow-up and begin their own small scale investigations into language development.

First Language Use in Second and Foreign Language Learning May 21 2023 This volume offers fresh perspectives on a controversial issue in applied linguistics and language teaching by focusing on the use of the first language in communicative or immersion-type classrooms. It includes new work by both new and established scholars in educational scholarship, second language acquisition, and sociolinguistics, as well as in a variety of languages, countries, and educational contexts. Through its focus at the intersection of theory, practice, curriculum and policy, the book demands a reconceptualization of code-switching as something that both proficient and aspiring bilinguals do naturally, and as a practice that is inherently linked with bilingual code-switching.

Second Language Learning and Language Teaching Nov 03 2021 11 Second Language Learning and Language Teaching Styles -- Coursebooks Mentioned -- References -- Index *Literature, Spoken Language and Speaking Skills in Second Language Learning* Jun 29 2021 Explores how literature is used as a model of spoken language and to develop speaking skills in second language learning.

Learning-to-Write and Writing-to-Learn in an Additional Language Jul 31 2021 This book is a pioneer attempt to bridge the gap between the fields of second language acquisition (SLA) and second and foreign language (L2) writing. Its ultimate aim is to advance our understanding of written language learning by compiling a

collection of theoretical meta-reflections and empirical studies that shed new light on two crucial dimensions of the theory and research in the field: first, the manner in which L2 users learn to express themselves in writing (the learning-to-write dimension), and, second, the manner in which the engagement in written output practice can contribute to developing competences in an L2 (the writing-to-learn dimension). These two areas of disciplinary inquiry have up until now developed separately: the learning-to-write dimension has been the cornerstone of L2 writing research, whereas the writing-to-learn one has been theorized and researched within SLA studies, hence the relevance of the book for exploring L2 writing-SLA interfaces.

Learning and Teaching Languages Through Content Jul 11 2022

Based on a synthesis of classroom SLA research that has helped to shape evolving perspectives of content-based instruction since the introduction of immersion programs in Montreal more than 40 years ago, this book presents an updated perspective on integrating language and content in ways that engage second language learners with language across the curriculum. A range of instructional practices observed in immersion and content-based classrooms is highlighted to set the stage for justifying a counterbalanced approach that integrates both content-based and form-focused instructional options as complementary ways of intervening to develop a learner's interlanguage system. A counterbalanced approach is outlined as an array of opportunities for learners to process language through content by means of comprehension, awareness, and production mechanisms, and to negotiate language through content by means of interactional strategies involving teacher scaffolding and feedback.

[Bringing the Standards for Foreign Language Learning to Life](#) Aug 12 2022 First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Second-language Discourse in the Digital World Nov 22 2020 Second-language Discourse in the Digital World illustrates a new, practice-driven approach to technology in second-language (L2) learning that begins with what L2 users do when they connect with others online. With its rich set of examples from a number of

different languages and a variety of digital platforms, in and beyond the classroom, this book provides a structured account of L2 computer-mediated discourse. The book is divided into four sections. Section I considers how new media have changed language learning. Section II is about L2 participation in digital forms and practices in online communities. Section III centers around L2 linguistic and other semiotic practices, including the use of multimodal and multilingual resources while section IV analyzes social practices to explore how networked L2 users build, maintain and challenge relationships. Written in accessible style, the volume will be an important read to anyone interested in L2 use and learning in Web 2.0. Finalist for the AAAL 2019 book award.

Learning Foreign Languages in Primary School
Feb 18 2023 This book presents research on the learning of foreign languages by children aged 6-12 years old in primary school settings. The collection provides a significant and important contribution to this often overlooked domain and aims to provide research-based evidence that might help to inform and develop pedagogical practice. Topics covered in the chapters include the influence of learner characteristics on word retrieval; explicit second language learning and language awareness; meaning construction; narrative oral development; conversational interaction and how it relates to individual variables; first language use; feedback on written production; intercultural awareness raising and feedback on diagnostic assessment. It will be of interest to undergraduate and graduate students, researchers, teachers and stakeholders who are interested in research on how children learn a second language at primary school.

The Art and Science of Learning Languages
Jul 23 2023 Offers a framework for learning any language and provides the arguments as to why anyone should do so, as well as examining the merits of various methods of language learning. The key message of the book is the importance of self-reliance based on a positive approach and efficient organization.

The Personal World of the Language Learner
Mar 19 2023 This book presents a radical turn in Second Language Acquisition research by

introducing a conceptual paradigm that challenges rationalist, instrumental and empiricist approaches to language learning theory. It argues for a shift in focus from measuring the effectiveness of language learning processes to humanising the language learning experience. This new paradigm explores the force of affect, the imagination and creativity and their roles in assembling language learners' intimate worlds. 'The personal' is reclaimed and acts as driving force for language learning and the sphere in which learners engage both their minds and bodies in a constant socialization of feelings and emotions. The author provides examples from real language learners using a variety of modern languages to provide insights on the kind of personal worlds that languages compel us to inhabit. This book will be of interest to those working with language learning and language education theory, language teachers, and researchers and students who are interested in issues of identity and intercultural communication in language learning.

Second Language Learning Theories May 17 2020 Written by a team of leading experts working in different SLA specialisms, this fourth edition is a clear and concise introduction to the main theories of second language acquisition (SLA) from multiple perspectives, comprehensively updated to reflect the very latest developments SLA research in recent years. The book covers all the main theoretical perspectives currently active in SLA and sets each chapter within a broader framework. Each chapter examines the claims and scope of each theory and how each views language, the learner and the acquisition process, supplemented by summaries of key studies and data examples from a variety of languages. Chapters end with an evaluative summary of the theories discussed. Key features to this fourth edition include updated accounts of developments in cognitive approaches to second language (L2) learning, the implications of advances in generative linguistics and the "social turn" in L2 research, with re-worked chapters on functional, sociocultural and sociolinguistic perspectives, and an entirely new chapter on theory integration, in addition to updated examples using new studies. Second Language Learning

Theories continues to be an essential resource for graduate students in second language acquisition. nal, sociocultural and sociolinguistic perspectives, and an entirely new chapter on theory integration, in addition to updated examples using new studies. Second Language Learning Theories continues to be an essential resource for graduate students in second language acquisition.

Foreign Language and Mother Tongue Apr 20 2023 This is the first book that discusses the effect of foreign language learning on first language processing. The authors argue that multilingual development is a dynamic and cumulative process characterized by transfer of different nature, and results in a common underlying conceptual base with two or more language channels that constantly interact with each other. Language representation and processing are discussed from a cognitive-pragmatic rather than a lexical-syntactic perspective. This required the review of several crucial issues of L2 acquisition, such as transfer, vocabulary development, conceptual fluency, and pragmatic skills. The authors also reviewed a large body of literature touching on cognitive psychology, linguistics, psycholinguistics, SLA, philosophy, and education in order to explain multilingual development and the positive effect of foreign language learning on the first language. An important read for linguists and language educators alike, this volume: * attempts to explain multilingual development from a cognitive-pragmatic perspective, * argues that foreign language learning has a positive effect on the development and use of mother tongue skills, * relies on research findings of several different disciplines, * builds on the results of quantitative research conducted by the authors, and touches on a wide range of literature.

Teaching Languages Creatively Apr 08 2022 Teaching Languages Creatively brings together the experience of international primary language experts to explore creative teaching and learning in primary languages. Drawing on the latest research and theory and illustrated with ideas and case studies from real schools, it covers key topics, including: engaging students in the target language; celebrating bilingualism in the classroom; incorporating technology into

modern teaching; integrating language learning across the curriculum; successful transitions; learning languages through singing, storytelling and dance. Ideal for primary trainee teachers, newly qualified teachers, and established teachers looking for creative new ideas to enrich the learning experience of their students, Teaching Languages Creatively is an essential guide for inspiring the love of languages that is so vital for young learners.

Polyglot: How I Learn Languages Jun 22 2023 KAT LOMB (1909-2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. *Polyglot: How I Learn Languages*, first published in 1970, is a collection of anecdotes and reflections on language learning. Because Dr. Lomb learned her languages as an adult, after getting a PhD in chemistry, the methods she used will be of particular interest to adult learners who want to master a foreign language.

English Language Learners and the New Standards Oct 22 2020 In *English Language Learners and the New Standards*, three leading scholars present a clear vision and practical suggestions for helping teachers engage ELL students in simultaneously learning subject-area content, analytical practices, and language. This process requires three important shifts in our perspective on language and language learning—from an individual activity to a socially engaged activity; from a linear process aimed at correctness and fluency, to a developmental process, focused on comprehension and communication; and from a separate area of instruction to an approach that embeds language development in subject-area activities. In *English Language Learners and the New Standards*, the authors: Clarify the skills and knowledge teachers need to integrate content knowledge and language development Show how teachers can integrate formative assessment in ongoing teaching and learning Discuss key leverage points and stress points in using interim and summative assessments with ELLs Provide classroom vignettes illustrating key practices Finally, the authors explain the

theories and research that underlie their vision and examine the role of policy in shaping pedagogy and assessment for ELL students.

The Role of the First Language in Foreign Language Learning Dec 16 2022 This book is concerned with the foreign language learner's underlying processes. The book analyses the different ways in which the learner's knowledge of the first language and other languages affect the processes of comprehension and production.
Language Learning and the Brain Mar 07 2022 Takes the reader on a fascinating journey through the brain to demonstrate how language is processed.

Objectives for Foreign Language Learning Sep 20 2020

The Metalinguistic Dimension in Instructed Second Language Learning Mar 27 2021 The metalinguistic dimension refers to the way in which learners bring to bear knowledge about language into their learning of a second language, the "L2". This book brings together new research on the metalinguistic dimension, given its increasing importance in the study of L2 acquisition. In applied linguistics it is widely accepted that L2 learners develop and use knowledge about language when engaging with the challenging task of acquiring a new language; this applies to both children and adults. It is definitions of the metalinguistic dimension that vary, and findings regarding its role in L2 learning are not necessarily homogenous or compatible. The scope exists for further, empirical, detailed research. This book explores the nature, development and role of the metalinguistic dimension and will be essential reading for all SLA scholars and those working in language and education.

Modern Languages and Learning Strategies Sep 01 2021 Every secondary school pupil studies modern foreign languages as part of the curriculum, and some do so with considerably more success than others. This book looks firstly at the ways in which languages can be taught, and secondly at case studies that highlight the practical methods that will help teachers get the best results. The case studies included show that the best learners are those who have developed learning strategies that help them succeed. These learning strategies are examined through practical examples carried out in classrooms,

and advice is given about ways in which teachers can ensure that all their pupils have the opportunity to develop these skills. Lots of suggestions are made about the various activities teachers can carry out in order to make learning enjoyable and positive. In some cases, the results are shown to be very encouraging and any language teacher should be left with a feeling not only of renewed enthusiasm for their subject area but also a deeper understanding of how to enable learners to reach their full potential.

Context and Culture in Language Teaching and Learning Feb 23 2021 The chapters in this book all address the significance of the relationship between the aims and methods of language teaching and the contexts in which it takes place. Some consider the implications for the ways in which we research language teaching; others present the results of research and development work.

Modern Languages in the Primary School Jun 10 2022 How can foreign language learning be developed in primary schools? In what ways can it be integrated into the primary classroom? *Modern Languages in the Primary School* tackles these questions, challenging current perceptions of primary modern languages, arguing that modern languages should be fully integrated into the primary curriculum, and looking at ways in which this can be achieved. The authors examine ways in which language-learning can be made a rich experience for all. They offer ideas on how to start language programmes in schools, or enhance those already in place. The book: - Features a 3-stage practical approach to teaching languages with different age groups in primary schools - Develops a coherent view of language learning and teaching - Refers to the KS2 Framework elements of oracy, literacy, intercultural understanding, knowledge about language and language learning strategies - Contains a chapter which offers a theoretical introduction to content and language integrated learning (CLIL) - Refers to the QTS Standards and offers a short guide to internet-based and multimedia resources This book is for Primary ITE students and experienced teachers who are taking on the Modern Language coordinator role or teaching modern languages in primary schools for the

first time. Philip Hood is Course Director of the National SCITT Primary PGCE and Lecturer in Modern Languages Education at the University of Nottingham. Kristina Tobutt is a Primary teacher and Associate Consultant for Nottinghamshire LA.

[An Introduction to Grammar for Language Learners](#) May 29 2021 Explains universal concepts of language structure to help students preparing to study a foreign language.

Automata Theory and Formal Languages: Aug 24 2023 The organized and accessible format of Automata Theory and Formal Languages allows students to learn important concepts in an easy-to-understand, question-and-answer format. This portable learning tool has been designed as a one-stop reference for students to understand and master the subjects by themselves.

[Learner Language and Language Learning](#) Oct 14 2022 This book is a comprehensive introduction to foreign language pedagogy, primarily intended for students and teachers of English. Methods for analysing learner languages are presented and related to a coherent theory of communicative competence and to principles of foreign language learning and teaching.

The Neurolinguistic Approach (NLA) for Learning and Teaching Foreign Languages Dec 04 2021 Since its inception in Canada in 1998 as a method for teaching French as a second language in a school setting, the Neurolinguistic Approach to second-language acquisition (NLA) has expanded to several countries and is now also applied to teaching adults. Based on research in the neurosciences, psychology, and sociology, the NLA focuses on providing learners with the conditions necessary to acquire spontaneous communication skills in a classroom setting. By ensuring the independent development of effective communication and implicit competence in the second language, the NLA allows learners to genuinely express themselves in their new language. In this volume, co-developer of the approach Claude Germain outlines the history of the NLA's development and provides insights into its principles, its teaching and acquisition strategies applied in the classroom, and the results it has achieved. This is an essential book

for all second-language teachers, as well as researchers interested in the transmission of second languages.

[7 Steps to a Language-Rich, Interactive Foreign Language Classroom](#) Feb 06 2022 The 7 Steps to a Language-Rich, Interactive Foreign Language Classroom are research-based strategies designed to increase comprehensible input and provide low-stress opportunities for language output and interaction. These practical techniques provide an essential foundation that ensures students are motivated and engaged, while offering access points to any target language in a way that is easy to implement and comprehensively scaffolded.

Language Learning and Intercultural Understanding in the Primary School Sep 13 2022 *Language Learning and Intercultural Understanding in the Primary School* shows how to deliver a progressive and holistic embedded language curriculum. It provides guidance on inclusive approaches for students with English as an additional language, including native speakers in the target language as well as language awareness activities that maximise links with learning in English. Practical and accessible, it contains classroom examples, plans, resources and pedagogical approaches all underpinned by theory, research and practice. Each chapter examines specific themes relating to language, culture, identity and wellbeing, providing rich discussions and a range of perspectives. Case studies 'bring to life' the examples provided, and reflection points offer the reader the opportunity to pause and consider an idea, resource, or challenging concept before moving on. Presenting a lived narrative of shared voices, the authors invite readers to learn about their own cultural and linguistic identities and how these relate to their practice. This is a must-read for teachers, language specialists and school leaders who wish for a clear rationale for the role of language, culture, identity and wellbeing within and beyond the curriculum.
