The eighth edition of Evidence Under the Rules: Text, Cases, and Problems, one of the most widely-adopted Evidence coursebooks ever published, has been thoroughly revised and redesigned to be even more teachable and student friendly. A new two-color design enhances the reading experience, and new text boxes (many with photographs) provide interesting background on select cases and additional perspectives on key issues. New classroom aids include video excerpts of courtroom scenes from famous movies and actual trials, videos of courtroom enactments of many of the book's problems, and a comprehensive set of PowerPoint slides that can be used, at the option of the instructor, with "clickers" so that students can vote on the admissibility of the evidence offered in each problem. Many elements, however, remain the same, including: the book's structuring around the Federal Rules of Evidence; carefully edited cases and secondary materials; and the inclusion of numerous problems that allow students to apply new concepts. Look for these key features of the new edition: * New two-color design to enhance readability * Addition of side bars that contain photographs and text relating to important cases, offering background on how the evidence issue arose * New "Comment/Perspective" text boxes provide broader*

*perspectives to aid in understanding doctrine * Addition of several more problems to allow students to apply important concepts * More introductory text to provide a foundation for understanding the materials that follow * Notes have reduced in number and made more comprehensible * Guidance for answering Note questions is provided so that students understand how to approach questions * Excerpts of cases in the Crawford line of decisions interpreting confrontation rights have been replaced by summary discussions [Evidence Under the Rules 8th Edition - PDF Version] Through ten editions, Fox and McDonald's Introduction to Fluid Mechanics has helped students understand the physical concepts, basic principles, and analysis methods of fluid mechanics. To enhance student learning, the book incorporates numerous pedagogical features including chapter summaries and learning objectives, end-of-chapter problems, useful equations, and design and open-ended problems that encourage students to apply fluid mechanics principles to the design of devices and systems. It is time to look at OSINT in a different way. For many years, and within the previous editions of this book, we have relied on external resources to supply our search tools, virtual environments, and investigation techniques. We have seen this protocol fail us when services shut down, websites disappear, and custom resources are dismantled due to outside pressures. This book aims to correct our dilemma. We will take control of our investigative resources and become self-reliant. There will be no more need for online search tools; we will make and host our own locally. We will no longer seek pre-built virtual machines; we will create and configure our own. This book puts the power back in your hands. COMMUNICATION IN OUR LIVES, 8th Edition, provides everything students need to strengthen their interpersonal, group, public speaking, and media literacy skills -- as well as demonstrates the value of communication in their personal and professional lives. Award-winning

scholar Julia T. Wood combines the latest research and theory with hands-on skills development to help readers become more confident and effective communicators. In addition to its signature coverage of social and cultural diversity, the eighth edition includes an early emphasis on public speaking, expanded coverage of mass and social media, a new focus on health communication, and examples of the importance of effective communication in today's careers.

Written by an esteemed educator and founder of the renowned Chicago Review Course in Neurological Surgery™, this updated review reflects substantive content additions to the 8th edition. The two prior editions of the Rapid Review were must-have companions that fully leveraged the vast knowledge contained within Greenberg's legendary tome. Through repetition and spot-on questions, this book brings clarity to a specialty whose sheer depth and breadth presents comprehension and retention challenges. This book helps readers determine if they are retaining key data and information, thereby providing a robust self-assessment study tool for ABNS certification. The 7th companion generated glowing reviews, such as: "A wonderful example of how to turn the classic Greenberg text into a study guide rather than an encyclopedic reference to a young neurosurgeon" –AANS Young Neurosurgeons News Key Highlights

Question formats include fill in the blank, open-ended questions, true/false, matching, and identification of various elements in diagrams/figures Mnemonic devices, helpful hints, clinical pearls, and study charts aid in comprehension and long-term retention Greenberg chapter headings are used (e.g. 4.2.3), thereby providing clear-cut Handbook references This book is designed to help neurosurgical residents prepare for the ABNS primary examination and/or rounds. It will enable practicing neurosurgeons, neurologists, neuroradiologists, and

neuropathologists to develop a storehouse of knowledge required to efficaciously examine, analyze, diagnose, and treat neurosurgical patients. Connected eBooks provide what you need most to be successful in your law school classes. Learn more about Connected eBooks Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs. Although it starts with "Agreement" and moves to "Consideration," it is also designed for teachers who prefer to begin with "Consideration" or "Remedies." It can be used in courses that both

include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit from: Coverage of the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the "right answer" so much as on what real attorneys must consider when confronted with the issues presented The entire book's approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms.
