PMBOK® Guide is the go-to resource for project management practitioners. The project management profession has significantly evolved due to emerging technology, new approaches and rapid market changes. Reflecting this evolution The Standard for Project Management enumerates 12 principles of project management and the PMBOK® Guide – Seventh Edition is structured around eight project performance domains. This edition is designed to address practitioners' current and future needs and to help them be more proactive, innovative and nimble in enabling desired project outcomes. This edition of the PMBOK® Guide: Reflects the full range of development approaches (predictive, adaptive, hybrid, etc.); Provides an entire section devoted to tailoring the development approach and processes; Includes an expanded list of models, methods, and artifacts; Focuses on not just delivering project outputs but also enabling outcomes; and Integrates with PMIstandards+™ for information and standards application content based on project type, development approach, and industry sector. The Save a Life Initiative has just released its newest course: Basic Life Support. This manual is based on the 2015-2020 Basic Life Support guidelines published by the American Heart Association. The Basic Life Support (BLS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Basic Life Support Certification or Recertification Course. It serves as the primary training material for BLS Certification and Recertification courses. Although it is primarily intended for professionals to use during their courses, the handbook was also created to serve as daily resource material for health care professionals. Information covered in the handbook includes Basic Life Support instruction for adults and children, AED usage, airway obstruction and rescue breathing techniques, and more. Specific Algorithms for BLS and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible. The Vaccine Handbook has a simple purpose- to draw together authoritative information about vaccines into a simple and concise resource that can be used

in the office, clinic, and hospital. Not an encyclopedia or scientific textbook, The Vaccine Handbook gives practical advice and provides enough background for the practitioner to understand the recommendations and explain them to his or her patients. For each vaccine, the authors discuss the disease and its epidemiology, the vaccine's efficacy and safety, and the practical questions most frequently asked about the vaccine's use. The authors also discuss problems such as allergies, breastfeeding, dosing intervals and missed vaccines, and immunocompromised individuals. This handbook is also available electronically for handheld computers. See Media listing for details. Product 15-3105

This provider manual features case scenarios that help course participants apply new concepts to real-life situations. It includes material such as Effective Resuscitation Team Dynamics and the 10 ACLS Core Cases; a Student CD with video clips, optional material, anatomy/physiology, a quick reference guide, and reminder cards; two ACLS pocket reference cards; and the required ACLS Precourse Checklist. -- [from publisher's website]

Basic Life Support (BLS) Provider Manual - The content in this handbook is in compliance with the 2020 guidelines for CPR and ECC (Emergency Cardiac Care), recently released by the American Heart Association - therefore, all the protocols illustrated in this book are based on up-to-date evidence. These guidelines are updated every 5 years. The BLS Provider Manual is a complete guide and reference tool that covers all the information students need to know in order to successfully complete the BLS course. For easier learning, multiple-choice questions can be found at the end of each chapter. The answers to these exercises are found at the very end of the book. Basic Life Support (BLS) refers to a set of procedures that can be learned to prolong survival in life-threatening situations until more professional help is available. Any individual can become certified in basic life support protocols. These protocols are frequently updated, based on the latest evidence available, and every individual who undergoes BLS certification may need to refresh their knowledge every two years. Medical professionals usually have a sound understanding of basic life support protocols. Even then, it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence-based protocols. This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The intended audience is healthcare students and personnel who need to learn how to perform CPR and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings. About the Clinical Editor Kate Stout, RN, MSN, is a Critical Care Charge RN at Southern Hills Hospital in Las Vegas, Nevada. Foundations for Community Health Workers Foundations for Community Health Workers is a training resource for client- and community-centered public health practitioners, with an emphasis on promoting health equality. Based on City College of San Francisco's CHW Certificate Program, it begins with an overview of the historic and political context informing the practice of community health workers. The second section of the book addresses core competencies for working with individual clients, such as behavior change counseling and case management, and practitioner

development topics such as ethics, stress management, and conflict resolution. The book's final section covers skills for practice at the group and community levels, such as conducting health outreach and facilitating community organizing and advocacy. Praise for Foundations for Community Health Workers "This book is the first of its kind: a manual of core competencies and curricula for training community health workers. Covering topics from health inequalities to patient-centered counseling, this book is a tremendous resource for both scholars of and practitioners in the field of community-based medicine. It also marks a great step forward in any setting, rich or poor, in which it is imperative to reduce health disparities and promote genuine health and well-being." Paul E. Farmer, MD., PhD, Maude and Lillian Presley Professor of Social Medicine in the Department of Global Health and Social Medicine at Harvard Medical School; founding director, Partners In Health. "This book is based on the contributions of experienced CHWs and advocates of the field. I am confident that it will serve as an inspiration for many CHW training programs." Yvonne Lacey, CHW, former coordinator, Black Infant Health Program, City of Berkeley Health Department; former chair, CHW Special Interest Group for the APHA. "This book masterfully integrates the knowledge, skills, and abilities required of a CHW through storytelling and real life case examples. This simple and elegant approach brings to life the intricacies of the work and espouses the spirit of the role that is so critical to eliminating disparities a true model educational approach to emulate." Gayle Tang, MSN, RN., director, National Linguistic and Cultural Programs, National Diversity, Kaiser Permanente "Finally, we have a competency-based textbook for community health worker education well informed by seasoned CHWs themselves as well as expert contributors." Donald E. Proulx, CHW National Education Collaborative, University of Arizona Take notes for critical thinking and clinical reasoning in every course, class, and clinical. Focus on prioritization in every subject to include fundamentals, medical surgical, mental health, pediatrics, and even community health. Nursing students will be able to focus on the nursing process every step of the way while ensuring that they are very comfortable with QSEN (quality and safety) and NCLEX competencies and standards. [www.nursethink.com](http://www.nursethink.com) 20-2804 Instructor CD contents include: Precourse materials -- Course materials -- Evaluation materials -- Resources. This book is a simplified manual for Cardio-Pulmonary Resuscitation (CPR). Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006. Cancer and its treatments have far-reaching and long-lasting effects on quality of life, and no more so than in the area of sexuality and sexual functioning. The successful treatment of cancer often leaves survivors with an enhanced appreciation of life and the love they have in their lives. Difficulty expressing love through the most

intimate of acts is devastating for many couples after treatment. For those who are not partnered, treatment side effects pose additional challenges in the realm of dating and establishing new relationships when body image is altered. In the 10 years since the first edition of this book was published, oncology care providers have shown an increasing interest in addressing their patients' change to sexuality. The field has moved from an overwhelming silence to discussions that are much more open. Both survivors and their partners have benefited from this. But so too have oncology care providers who are increasingly providing comprehensive care for their patients, especially in this most sensitive aspect of quality of life. This second edition of the award-winning and practice-changing text includes updated evidence and models that address the assessment and management of cancer-related sexual problems for survivors of all ages with a broad variety of cancers. Book jacket. The purpose of the 'Microfinance Handbook' is to bring together in a single source guiding principles and tools that will promote sustainable microfinance and create viable institutions. Product 90-1075 20-1100 20-1118 Printed in color. U.S. History is designed to meet the scope and sequence requirements of most introductory courses. The text provides a balanced approach to U.S. history, considering the people, events, and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience). U.S. History covers key forces that form the American experience, with particular attention to issues of race, class, and gender. 20-1132 Product 90-1011 20-1100 The S.T.A.B.L.E. Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. S.T.A.B.L.E. stands for the 6 assessment parameters covered in the program: Sugar, Temperature, Airway, Blood pressure, Lab work, and Emotional support for the family. The S.T.A.B.L.E. Program is designed to provide important information about neonatal stabilization for maternal/infant healthcare providers in all settings - from community hospitals and birth centers, to emergency rooms and hospital environments.
