appealing.”—People Very pregnant and not quite married, Jenny Harris doesn’t mind that she and her live-in fiancé, Dean, accidentally started their family a little earlier than planned. But Dean is acting distant, and the night he runs out for cigarettes and doesn’t come back, he demotes himself from future husband to sperm donor. And the very next day, Jenny goes into labor. In the months that follow, Jenny plunges into a life she never anticipated: single motherhood. At least with the sleep deprivation, sore boobs, and fits of crying (both hers and the baby’s), there’s not much time to dwell on her broken heart. Then things start looking up: Jenny learns how to do everything one-handed, makes friends in a mommy group, and even gets to know a handsome, helpful neighbor. But Dean is never far from Jenny’s thoughts or, it turns out, her doorstep, and in the end she must choose between the old life she thought she wanted and the new life she’s been lucky to find.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. The sudden disappearance of men, women, and children of all ages shocked humanity into chaos and governments into global totalitarianism. Those souls that remain on the Earth are left to face the reality that the promises and warnings recorded and preserved in the Bible were true. But what hope could there be after The Vanishing? What is to become those who realize that The Vanishing was of God? And what hope of Heaven could there be for those who pray for forgiveness and salvation after that day? The Garnering is that hope. To garner is to glean. To glean is to salvage the fallen bits of a harvest that were rejected on harvesting day. Workers are sent into the fields to find and garner that which can be saved. And so our story begins.

Kerryn Goldsworthy, *The Sydney Morning Herald* The UTS Writers' Anthology is an annual publication produced by the University of Technology Sydney. Students from the undergraduate, postgraduate and research programs submit their work anonymously, and a student editorial committee selects and edits the Anthology over a period of four months. In 2016, from over 300 submissions, the committee selected 25 outstanding pieces. Over the years the Anthology has featured UTS alumni who have gone on to make names for themselves as authors. Gillian Mears, Bernard Cohen, Jill Jones, MTC Cronin, David Astle and Arabella Edge, along with more recent emerging authors such as P.M. Newton, Clinton Caward, Julie Chevalier and Isabelle Li, have all had early or indeed their first publications here. In addition, the Anthology has been supported by forewords from leading writers such as James Bradley, Delia Falconer, Nam Le and Anna Funder - many of whom have been involved with the UTS creative writing program, and who have acknowledged the outstanding talent of its students. The foreword to the 2016 Anthology is by the author of *The Rosie Project*, Graeme Simsion. The 30th UTS Writers' Anthology, *Seeds & Skeletons*, is a not-to-be missed event on the Australian literary calendar. As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada’s automotive “Dr. Phil” for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler’s days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of “zombie” vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There’s only one Saturn you should buy. Toyota - enough apologies: “when you mess up, ‘fess up.” What do we mean by wellbeing, and what does it look like as it takes shape in early childhood? What can we do to support the wellbeing of children at home and in settings? This book provides some answers to these complex questions, in a straightforward, accessible way. PART 1: INTRODUCING WELLBEING describes the ‘backdrop’ for a new model of wellbeing, outlining

research and policy background, and underpinning early childhood themes. PART 2: THE THEORY OF WELLBEING defines wellbeing itself, describing the new model and the mechanism of wellbeing development called companionable learning. PART 3: EVERYDAY WELLBEING contains ideas and examples from homes and settings of 'real-life' wellbeing. Chapter 6: 'All to play for' is rich with ideas and examples of "profoundly satisfying" wellbeing play. PART 4: INVESTING IN WELLBEING is about professional development. It covers observation, assessment and planning; the key person approach; 'when things go wrong'; and integrating services across settings and communities. The book ends with the importance of collective wellbeing, arguing that all young children need experiences of individual and collective wellbeing, in their families and their communities. Essential reading for anyone studying early childhood, and for managers and practitioners working with young children and their families, this book is an inspirational guide to developing a framework for wellbeing from birth.
