From the author of *Country Weekend Knits*, Madeline Weston's latest book *Country Weekend Socks* presents 25 unique designs knitted in sumptuous wool and cotton yarns. The rich textures and soft natural colorways take their cue from the coastline and countryside—big skies, choppy seas and fishing boats, sand dunes, driftwood, and beach pebbles, rolling hills, woodland, and old stone walls, heather, moss and autumn leaves. Virtually any stitch pattern can be adapted to socks, and the ones featured here come from all corners of the British Isles and beyond. They include multicolored designs from Fair Isle, Turkey, and Egypt; intricate lace and openwork knitting from the Shetland Isles; textured gansey stitches from the east coast of England and the Western Isles of Scotland; and chunky cable and Aran patterns from the Isles of Aran. Some of these traditional patterns—designs dating from the eighteenth and nineteenth centuries—have been re-created by Margaret Stuart and Margaret MacInnes. Others have been reinterpreted by leading designer-knitters, including Sasha Kagan, Debbie Abrahams, and Rita Taylor. Most of the socks are knitted on four double-pointed needles from the top down; the Turkish and Egyptian patterns are knitted from the toe up; while some lace and intarsia designs are knitted on two needles. With both long and short styles, there are socks for every occasion—to wear with sturdy walking boots, classic tweeds, pretty dresses, and cozy pajamas. Full of charm and personality, these 30 knitted finger puppets will appeal to children of all ages. Not too long ago it was almost unheard of that people would crochet socks. Written for novice stitchers, Tilly Walnes demystifies dressmaking for the generations that have never been taught to sew. This book presents the core sewing basics in an informal style, with Tilly’s friendly and encouraging voice cheering the reader on throughout. ‘Growing up in the fifties was a time of isolation and innocence. We didn’t know what was going on in the rest of the world. We could only compare ourselves with those around us.’ So writes Max Lees in his reminiscence, ‘Freedom’, one of the 13 contributions to this delightful evocation of childhood edited by Susan Blackburn. An associate professor at Monash University and a specialist in Southeast Asian politics who grew up in suburban Adelaide, Blackburn asked friends and acquaintances to join her in trying to recreate the experience of childhood in that place in that time. Most of the memories in this book are of happy, sunlit childhoods, but there are shadows too. Polio was a constant fear and unwanted children were often neglected in orphanages. On the whole, though, the experiences of the contributors were positive and they look back on the fifties with enjoyment, inviting us into their childhood and teenage worlds. There are patterns for over 50 garments and accessories in which to dress the toys - most of them knitted and some sewn garments. All the clothes are one size and designed to fit every animal, so the reader can mix and match items to create their chosen toy’s own unique wardrobe. The outfits are split into themes such as Out to Play, Picnic Time and Time for School, and include pyjamas, outdoor clothes, summer dresses, school uniform and so on, with added accessories. Be aware that crochet terms in the United States are different from those in the U.K. This can be confusing as the same terms are used to refer to different stitches under each system. All crochet patterns in this book are written in U.K. and European terms. U.S. crocheters must take care that they work the correct stitches. One way to tell which system is being used in other patterns is that the American system starts with a single crochet, which the U.K. system doesn't have; so patterns with “sc” in them can be identified as American patterns. Advanced Knitting Technology provides complete coverage of the latest innovations and developments in knitting technology, including emerging methods as well as the latest best practice for classical processes. Many technologies can be used for the production of cloth such as weaving, knitting, nonwoven, and braiding. Knitting methods are being selected for a growing range of applications due to the spectacular properties of knitted fabric, such as softer tactile quality, higher stretchability, bulkiness, and functional properties that compare favorably with other woven fabrics. Beyond the well-known apparel applications, specially designed knitted structures are uniquely suitable for high performance applications like reinforcement for composites, medical implants, and geotextiles. This book presents recent advances in knitting technology, including structures, properties and applications of knitted fabrics in modern apparel, activewear, composites, medical textiles, and geotextiles. With reference to the latest industry practice, testing, quality and process control methods for knitting technologies are discussed. Advanced Knitting Technology covers recent advances in knitting technology, properties and performance of knitted structures, their applications in apparel and technical fields. Provides detailed and practical

instructions for the sustainable production of knitted textiles, including sustainable chemical processing natural dyeing processes, and sustainability analysis methods Draws on the latest research to discuss the future of knitted apparels and high-tech applications of knitted structures as technical textiles Explores the latest applications of AI and machine learning to the knitting process “Out of the Ordinary is one part unembellished documentation and one part verbi-visual equivalent of a Pro Hart work made with nineteenth-century, paint-loaded canons. It is a cultural history, resource for contemporary designers, imaginarium and luminous almanac of an explorer of the stranger species of creativity – from brick art to letterboxes, junk mail, mail art, television, fashion, food, model trains, Disney’s imagineering, amusement parks, feng-shui, Postmodern architecture, human-scale craftsmanship, forgotten Australian architects in China, famous architects (that, perhaps, should be forgotten save for their bow ties), collectors of Sherlock Holmes memorabilia, outsider artists and clients – and none of these things exactly. Everywhere Derham Groves attends to and finds significance in the minutiae of everyday life, inter-association, and those things that affect us so profoundly but remain just outside the purview of the ‘normal.’ And in these things – objects, art, architecture, environment(s) – he finds stories and teaches his reader how to do the same. Out of the Ordinary is also a motivational text. It begins with bricks, perhaps the most standardized and repeatable units of construction, and reveals how they can be used as vehicles for unfettered creativity and not merely for the creation of containers. Groves shows how art and architecture can emerge and receive nourishment from the garbage of the everyday and creative collisions. Groves also calls, albeit subtly, for a turn away from homogeneity, the standardized, and unimaginative or ‘lazy’ design informed by principles of economy, efficiency, utility and function conceived in abstraction. Rather, Groves celebrates the reanimation and/or rejuvenation of place by the makers of anything out of the ordinary (who don’t necessarily pray to the demiurge of good taste) who have created spaces and things through which the creative imagination shines.” – Dr Andrew Chrystall, School of Communication, Journalism and Marketing, Massey University

This fourth edition of *Metric Pattern Cutting for Children’s Wear and Babywear* remains the standard text book but has three major improvements. First, the sections have been re-organised to reflect changes in producing and marketing children’s clothes. Today’s popularity of easy-fitting styles and knitted fabrics means that basic ‘flat’ pattern cutting is used to construct the majority of children’s wear and babywear and this type of cutting is therefore emphasised in this new edition. Shaped blocks and garments, cut to fit the body form, are still included, and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes. The book now clearly separates the sections useful to student beginners (Parts One, Two and Three), and also offers more advanced or specialist sections for students who wish to pursue a career in children’s wear or for designers working in the different manufacturing sectors of the trade. The second change in this fourth edition is the introduction of colour coding to the sections; this makes it easier to identify specific processes in the book and enhances the illustrations. Finally, the size charts have been revised to reflect the changes in body sizing. The clear division of the boys’ and girls’ measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts. ‘Plus’ charts for heavier children have also been added. “Beautiful designs . . . children will love the whimsical results.” —Publishers Weekly
