

describing the most current methodologies. Updated to reflect emerging trends, this Eighth Edition features a stronger emphasis on the important role of marketing intelligence, new cases and real-world examples, and new topics of interest and methods of practice in marketing research. An introductory textbook for management undergraduates. Topics cover creating a research design, data acquisition, and data analysis. The CD-ROM contains Internet links, case and data sets, and a PowerPoint presentation that includes testing questions. Annotation copyrighted by Book News, Inc., Portland, OR. Advanced Marketing Research is a companion volume to Richard Bagozzi's Principles of Marketing Research. It is intended for students on advanced marketing research courses at the graduate and postgraduate levels and on executive programs. Each chapter begins with a historical development of the topical area before moving on to advanced issues and coverage of latest developments. To aid students learning, questions and exercises are included throughout. This title contains working with SPSS, descriptive statistics, univariate tests, analysis of variance, linear regression analysis, logistic regression analysis, exploratory factor analysis, confirmatory factor analysis and path analysis using SEM, cluster analysis and multidimensional scaling techniques. Marketing Research: An International Approach is a comprehensive text written with the decision-maker in mind. It is written from the perspective of the firm conducting marketing research in the national and international markets irrespective of its country of origin. This tools-oriented book shows how international marketing managers can transform existing (Secondary) and newly collected (primary) data into useful information. This is a comprehensive and advanced marketing research book that offers an analytical and decision-oriented framework of the subject. This book looks at firms conducting market research in the national and international markets irrespective of its country of origin. This book is written for advanced undergraduate and graduate students studying Marketing Research. It is also appropriate for practitioners who wish to keep abreast of the most recent developments in the field. This is a perfect guide to understanding the core principles of qualitative marketing research. It presents qualitative marketing research in the broader context of marketing and managerial decisions, consumer psychology and contemporary knowledge about unconscious and automatic processes. Different types of qualitative marketing research methods are examined, from the classic focus group interview (FGI) and individual in-depth interview (IDI), to more cutting-edge methods such as ethnography or bulletin boards, which enable marketing researchers to discover and understand real consumer motivations, needs, values, and attitudes. With numerous international case studies, including PepsiCo, Unilever, Danone, Nestle, Aviva and Citibank, the book is uniquely practical in its approach. It is vital reading for advanced undergraduate and postgraduate students of marketing research, consumer behaviour and consumer psychology. Marketing Research: An Applied Orientation presents a comprehensive look at both the principles and practices of marketing research with balanced coverage of qualitative and quantitative material. Written from the perspective of marketing research users, the Second Edition reflects current trends in international marketing, ethics, and the integration of microcomputers and mainframes. It strives to build on the enormous success of the first edition by being even more current, contemporary, illustrative and user-friendly. Get a thorough review of vital research issues! Fundamentals of Business Marketing Research examines recent industrial/business research, evaluates its current effectiveness, and offers suggestions for future use. This unique book includes and is based on "Business Marketing: A Twenty Year Review," a thorough study of industrial/business research from 1978-1997 with critical commentary from a distinguished panel of business academics and the response of the study's authors. The combination of critiques, insights, and viewpoints will challenge you to think beyond the traditional role of B2B marketing into a future that's anything but business as usual. Through an unusual format that gives you access to critical academic analysis, Fundamentals of Business Marketing Research presents a comprehensive review of vital research areas, including marketing to businesses/institutions/governments; buyer-seller relationships; computer use for business marketing; industrial segmentation; channel management and development; physical distribution; advertising; and public relations. The book's give-and-take is equally focused on areas that have traditionally received a larger share of the research effort (organizational buyer behavior, business marketing strategy and planning, industrial selling and sales management) and those that have taken a back seat in terms of research attention (computers and ethical business marketing). The original study, its criticisms, and the authors' subsequent assessment spotlight major themes, individual contributions, and future trends in major topic areas, including: business marketing strategy organizational buying behavior and purchasing management business marketing research methodology products/services pricing management issues distribution/logistics and supply chain management promotion Fundamentals of Business Marketing Research is equally effective as a practical guide for professionals and researchers, and as an academic text for doctoral studies. Marketing Research 4th Asia-Pacific edition continues to equip students with the knowledge and skills required to successfully undertake marketing research. Combining a solid theoretical foundation with a practical, step-by-step approach, the marketing research process is explored through a learning model that is constantly reinforced throughout the text. Using a raft of contemporary local and international examples, data sets and case studies to explain traditional marketing research methods, Marketing Research also examines new theories and techniques. To reflect emerging industry practices, each stage of research reporting is detailed, as well as a range of presentation methodologies. For analysing data, the text covers both SPSS and EXCEL outputs. This text is indispensable for students studying marketing research in any business or marketing course. 'Anyone using, practising or teaching qualitative research will find in this series a treasure-house of ideas, techniques and issues. This is a -must-have-' - Admap 'this is one of the best texts on the subject I've come across and I did find some of the content truly inspirational' - Mick Williamson, Creative Director, TRBI for in Brief magazine 'It will be essential reading for anyone involved with qualitative market research' - David Barr, Director General of the Market Research Society 'An ideal resource for people aiming for a qualitative market research career, for academics interested to know more about an important field of application for qualitative research methods, or for those who are already engaged in the field and who wish to update their skills and reflect on their practice and profession' - Nigel Fielding, University of Surrey Qualitative Market Research is a landmark publishing event. The seven volumes provide, for the first time, complete coverage of qualitative market research practice, written by experienced practitioners, for both a commercial and academic audience. The set fills two important market gaps: it offers commercial practitioners authoritative source texts for training and professional development; and provides students and researchers with an account of qualitative research theory and practice in use today. Each book cross-references others in the series, but can also be used as a stand-alone resource on a key topic. The seven books have been carefully structured so as to be completely accessible in terms of language, use of jargon and assumed knowledge. Experienced market researchers will find the tools to help them critically evaluate their own work. Those new to market research will be provided with a complete map of qualitative market research theory and practice (including brands and advertising theory) and the stimulation to discuss and learn more with tutors and practitioners. Qualitative Market Research will be an invaluable resource for academic and professional libraries, commercial market researchers, as well as essential reading for students in market research, marketing and business studies. Marketing Research, 5e equips students with the knowledge and skills required to successfully undertake marketing research. Combining a solid theoretical foundation with a practical, step-by-step approach, the marketing research process is explored through a learning model that is constantly reinforced throughout the text. Using local and international examples, data sets and case studies to explain traditional marketing research methods, Marketing Research also examines new theories and techniques. To reflect emerging industry practices, each stage of research reporting is detailed, as well as a range of presentation methodologies. For analysing data, the text covers both SPSS and Excel outputs. This text is indispensable for students studying marketing research in any business or marketing course. Premium online teaching and learning tools are available on the MindTap platform. Learn more about the online tools [cengage.com.au/mindtap](http://cengage.com.au/mindtap) Aimed at anyone who needs to carry out a market research project, but lacks knowledge and experience, this text is organized in workbook format and will be relevant to both consumer and industrial markets.
