Vocationalisation of Secondary Education

Revisited Jul 25 2023 The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

Reignited Jun 12 2022 Will robots take over the world? When will we meet aliens? How are memories stored inside the brain? Join Dr A.P.J. Kalam on a fascinating quest to explore the realm of science and technology, its extraordinary achievements and its impact on our lives in the days to come. Co-written with Srijan Pal Singh, this book features exciting and cutting-edge career paths in areas such as robotics, aeronautics, neurosciences, pathology, paleontology and material sciences . . . in other words, careers that are going to make a difference in the future. The result of extensive research, this book offers a plethora of ground-breaking ideas that will make

youngsters think out of the box. Filled with anecdotes, conversations, experiments and even inputs from leading scientists, Reignited is the perfect handbook that is bound to create a spark for science among students, youth and science enthusiasts.

Business Information Systems and Technology 4.0 Mar 29 2021 This book discusses digitalization trends and their concrete applications in business and societal contexts. It summarizes new findings from research, teaching and management activities comprising digital transformation, e-business, the representation of knowledge, human-computer interaction and business optimization. The trends discussed include artificial intelligence, virtual reality, robotics, blockchain, and many more. Professors and researchers who conduct research and teach at the interface between academia and business present the latest advances in their field. The book adopts the philosophy of applied sciences and combines both rigorous research and practical applications. As such, it addresses the needs of both professors and researchers, who are constantly seeking inspiration, and of managers seeking to tap the potential of the latest trends to take their business to the next level. Readers will find answers to pressing questions that arise in their daily work.

ICSE-The Science Orbit(Phy)-TB-07-R May 19 2020 Kishwar Raza brings to the table more than 20 years of teaching experience. Her vast and rich experience makes her a passionate author. Both teachers and students will find the books to be greatfully useful.

Curricula, Examinations, and Assessment in Secondary Education in Sub-Saharan Africa Jan 19 2023 Economic and social changes, fast evolution of technology, and the growing importance of Internet services and international communications--all these require secondary education providers to adapt what is taught and learned in schools. However, in Africa the content of secondary curricula is in most cases ill-adapted to 21st century challenges, where young people are mobile, have access to 'more and instant information,' and face health threats such as HIV/AIDS. In addition, implementation problems exist, and the time for instruction is often much less than what is required by the prescribed secondary curriculum. In Africa there is a need to develop a secondary education curriculum adapted to the local economic and social environment, but with international-comparable performance indicators. This study analyzes that challenge: the quality of curricula and assessment, and their development processes in secondary education in Africa against the background of existing contexts, conditions, and ambitions on

the one hand and current pedagogical thinking on the other. This World Bank Working Paper was prepared as part of the Secondary Education and Training in Africa (SEIA) initiative which aims to assist countries to develop sustainable strategies for expansion and quality improvements in secondary education and training.
