This book contains lecture notes and invited contributions presented at the NATO Advanced Study Institute and EPS Liquid State Conference on PHYSICOCHEMICAL HYDRODYNAMICS-PCH: INTERFACIAL PHENOMENA that were held July 1-15, 1986, in LA RABIDA (Huelva) SPAIN. Although we are aware of the difficulty in organizing the contents due to the broad and multidisciplinary aspects of PCH-Interfacial Phenomena, we have tried to accomodate papers by topics and have not followed the order in the presentation at the meetings. There is also no distinction between the ASI notes and Conference papers. We have done our best to offer a coverage as complete as possible of the field. However, we had difficulties coming from the fact that some authors were so busy that either did not find time to submit their contribution or did not have time to write a comprehensive paper. We also had to cope with very late arrivals, postdeadline valuable contributions that we felt had to be included here. Our gratitude goes to the NATO Scientific Affairs Division for its economic support and to the EPS Liquid State Committee for its sponsorship. Financial support also came from Asociacion Industrias Quimicas-Huelva (Spain), Caycit-Ministerio De Educacion Y Ciencia (Spain), Canon-Espana (Spain), Citibank-Espana (Spain), CNLS-Los Alamos Nat. Lab. (U. S. A. ), CSIC (Spain), EPS, ERT (Spain), ESA, Fotonica (Spain), IBM-Espana (Spain), Junta De Andalucia (Spain), NATO, NSF (U. S. A. ), ONR-London (U. S. A. The Council of Europe youth sector aims at enabling young people across Europe to actively uphold, defend, promote and benefit from the Council of Europe's core values of human rights, democracy and the rule of law, notably by strengthening young people's access to rights, deepening youth knowledge and broadening youth participation. The activities of the European Youth Centres of Budapest and Strasbourg play a central role in the education and training of young 'multipliers' of Council of Europe values. The core of these activities is the programme of study sessions, week-long intercultural non-formal learning activities that are held in cooperation with European youth organisations and networks. These activities bring to the Youth for Democracy programme of the Council of Europe the unique experiences, expectations and concerns of young people regarding contemporary issues and challenges that affect their access to rights and of participating in all spheres of society. The study sessions of the European Youth Centres have been trendsetters in European youth work and remain a benchmark for intercultural youth activities. This manual is published to support the quality of study sessions and other educational activities in the Youth for Democracy programme. Preparing facilitators and developing their competences is one of the essential prerequisites for enabling exchanges of views and dialogical learning, preparing the participants to act as multipliers in their day-to-day lives, and ultimately contributing to the values and priorities of the Council of Europe and its youth sector. This Manual for Facilitators provides essential information, insights and practical tips in the planning and delivering of non-formal education intercultural activities while taking into account essential approaches of intercultural learning, human rights education and youth participation. This manual is a contribution to the quality of intercultural non-formal education activities of youth organisations and at making those activities a truly learning experience for young people in the Council of Europe. This manual contains protocols and guidance documents assembled by the authors during many years of clinical experience in nephrology. Many are not evidence-based but we have found them useful and hope that others will do likewise. The recommendations were made on the basis of clinical trials wherever possible. In the absence of relevant clinical trials, we used evidence available or our personal experience. Our aim was to provide a manual for the treatment of the most frequent kidney diseases or disorders related to the practice of Nephrology. The information may be of use to nephrologists, general internists, general practitioners or medical students. Covers planning and design of thesaurus systems, thesaurus construction standards, vocabulary control, specificity and compound terms, structure, and auxiliary retrieval devices. Discusses possible forms of thesaurus presentation, different types of thesauri, including multilingual thesauri merged vocabularies and searching thesauri, and looks at maintenance and updating, and computer aids. Children are the group most likely to be victimized yet least likely to report the crimes against them. Because of their unique vulnerability, an elaborate set of protections tries to secure their safety at home, in school, and in the community, yet they often experience further trauma inside the very criminal justice system designed to punish those who harm them. Such a system can leave child victims without emotional healing and a sense of justice because it does not consider the full scope of their wishes, interests, and rights. This failure can be attributed to the system's tendency to view children as objects of protection instead of legitimate rights-holders. Here, using a nuanced, multi-dimensional theory of children's interrelated rights and needs vis a vis victimization, Tali Gal presents an innovative restorative justice model for repairing harms and rebuilding relationships in the wake of crimes against children. It validates empirically documented children's needs--such as telling their stories, asking questions, and a sense of autonomy and control over the proceedings--and holds their associated and often-overlooked rights--such as rehabilitation and their overarching best interests-paramount. The rich theoretical underpinnings of the book are vividly illustrated by examples of successful restorative justice programs involving children (including the highly controversial inclusion of child victims of sexual assault). In addition, a set of eight heuristics provides a convenient reference for restorative justice programs to ensure that they safeguard the full range of child victims' needs and rights at all times. With its unique human-rights perspective on the study of childhood victimization and an innovative, child-inclusive restorative justice model, this book promises to be a touchstone for practitioners, policymakers, and researchers concerned with children's well-being in the aftermath of crime and violence.
