28 of the leading social policy commentators in Ireland contribute to 22 chapters ranging across the social policy spectrum. On the afternoon of September 11 2001 the Irish Prime Minister (Taoiseach), Bertie Ahern ordered the 'heads of the security services of key government departments' to undertake a complete re-evaluation of measures to protect the state from attack. Hence, underway within hours of the 9/11 outrage in the United States was potentially the most far-reaching review of Irish national security in decades. This book, the first major academic investigation of Irish national security policy as it has operated since 9/11, provides a theoretically informed analysis of that re-

evaluation and the decisions which have been taken as a consequence of it up until September 2008. In so doing it draws on unprecedented access to Ireland's police, security and intelligence agencies; over twenty senior personnel agreed to be interviewed. Theoretically the author demonstrates the utility to the analysis of national security policy of three conceptual models of historical institutionalism, governmental politics and threat evaluation. The text is of interest to scholars of Security Studies, International Relations and Politics, as well as state and NGO personnel, journalists and general readers. On cover: 91 HSA 97. You can continue to supply workers with the earlier 1999 leaflet until June 2014. After this date you must supply the 2009 approved poster or give workers personal copies of this 2009 equivalent pocket card. This study considers writing within the cultural context of Northern Ireland and discusses how writing creates a sense of community, and the different forms this takes when written from loyalist or republican perspectives. The book takes its major theoretical energy from readings of Antonio Gramsci's concept of hegemony and Walter Benjamin's work on historiography. These are applied to major writers such as Seamus Heaney, Tom Paulin, Paul Muldoon and Edna Longley and to institutions such as the Ulster Folk and Transport Museum. In 1832, 57 Irish Catholic workers were brought to the United States to lay one of the most difficult miles of American railway, Duffy's Cut of the Pennsylvania Railroad. These men were chosen because, in the eyes of the railroad company that hired them, they were expendable. Deaths were common during the building of the railway but this stretch was worse than most. When cholera swept the camp basic medical attention and community support was denied to them. In the end all 57 men—the entire work crew—died and were buried in a mass unmarked grave. Their families in Ireland were never notified about what happened to them. The company did its best to cover up the incident, which was certainly one of the worst labor tragedies in U.S. history.

Set against the backdrop of a rapidly industrializing America, this book tells the story of these men, the sacrifices they made, and the mistreatment that claimed their lives. The saga of Duffy's Cut focuses particularly on the Irish laborers who built the railroads. Who were these men? Who hired them? Why did they come? Perhaps most important, why did they die? Based on archaeological digs at the site and meticulous historical research, the authors argue that the annihilation of the work crew came about because of the extreme conditions of their employment, the prejudice of the surrounding community, and the vigilante violence that kept them isolated. In shedding light on this tragic chapter in American labor history, *The Ghosts of Duffy's Cut* also illuminates a dark side of America's rise to greatness. When the citizens of the United Kingdom voted to leave the European Union, they delivered a profound shock to its nearest neighbour: Ireland. Brexit represents potentially the single greatest foreign-policy and economic challenge to the Irish state since the Second World War. More than any other journalist, RTE's long-time Brussels correspondent Tony Connelly has been helping the public make sense of the implications of Brexit for Ireland. Now, in *Brexit and Ireland*, he tells the inside story of the Irish response and explores the many ways in which this political and economic earthquake is likely to play out. Based on extensive interviews with insiders in Dublin, London, Belfast and Brussels, and building on Tony Connelly's unmatched feel for how the EU really works, *Brexit and Ireland* is a must-read for anyone who cares about Ireland's future. The National Bureau of Economic Research, Inc. presents an abstract of the May 2001 working paper entitled "Economic Problems of Ireland in Europe," written by Martin Feldstein. This paper discusses the general relation between the European Union (EU), the European Monetary Union (EMU), and the member countries, in light of the controversy between the EU and the Irish Republic. Feldstein describes a policy of creating investment-based personal retirement accounts that would allow Ireland to share its future budget surpluses with taxpayers. Essay from the year 2010 in the subject Politics - International Politics - Region: Western Europe, grade: 1,0, University of Wales, Aberystwyth (Department of International Politics), language: English, abstract: Some argue that most major conflicts are triggered by internal, elite-level activities. At the same time peace processes are often elite-driven with a relatively small number of people responsible for making final decisions. The following analysis examines different attempts in Northern Ireland and the Basque Country to contribute sustainably to a peace process on a political elite-level. It will be shown that the success of leadership and political risk-taking by elites is highly dependent on the circumstances. It will be shown that courageous elite decisions are doomed to have little effect if basic requirements are lacking. Simultaneously, even if the preconditions seem to be appropriate peace processes can fail due to a lack of commitment on the side of political leaders. The conflicts in Northern Ireland

and the Basque Country show - up to a certain extent - notable similarities in their initial situations. In both cases nationalist movements tried/try to alter the state of autonomy in one part of the country. Both conflicts led to cruel violence and left numerous civilians dead. Both conflicts took and take politically place within the particular province and between the province and the federal government of the nation state (Spain/United Kingdom and Ireland). The nationalist movements in both cases are divided between a radical party (Batasuna/Sinn Fein) and a more moderate one (PNV/SDLP). These similarities compose a good starting point for a comparative analysis. Regarding the generalizability of the findings, two central restrictions must be made. First the small number of cases (only two) discussed in this paper limit the possibility to draw universal conclusions. In statistical terms the extent of the sample is insufficient to make a valid stat
