*The History of the Book in the Middle East Oct 29 2020 This selection of papers by scholarly specialists offers an introduction to the history of the book and book culture in West Asia and North Africa from antiquity to the 20th century. The flourishing and long-lived manuscript tradition is discussed in its various aspects - social and economic as well as technical and aesthetic. The very early but abortive introduction of printing - long before Gutenberg - and the eventual, belated acceptance of the printed book and the development of print culture are explored in further groups of papers. Cultural, aesthetic, technological, religious, social, political and economic factors are all considered throughout the volume. Although the articles reflect the predominance in the area of Muslim books - Arabic, Persian and Turkish - the Hebrew, Syriac and Armenian contributions are also discussed. The editor's introduction provides a survey of the field from the origins of writing to the modern literary and intellectual revivals.*

*Zayed the Founder Jul 07 2021 Zayed the Founder sheds light on the life and achievements of the late Sheikh Zayed bin Sultan Al Nahyan (may God rest his soul in peace). Following on from the centennial anniversary of the birth of the founding father (1918-2018), and when exploring the rise of this blessed country, its people and residents, we discover the late Sheikh Zayed dedicated his life to serving his homeland, overcoming challenges and achieving great progress with patience and determination. The book explores the upbringing and early life of Sheikh Zayed, as well as the various factors that shaped his character and thought, seeing him become an exceptional role model who left his mark on the history of the UAE, Gulf, Arab region and world. The book also charts Sheikh Zayed's rule in the city of Al Ain, where early success was an indication of his leadership genius and sound approach to making the most of opportunities and addressing challenges. The book goes on to examine Sheikh Zayed's time as ruler in Abu Dhabi, and the pivotal role he played in modernizing the emirate, which paved the way to seeing his dream of unification become a reality. The book examines Sheikh Zayed's role in establishing the UAE Federation, highlighting several important aspects, including his views on the Union and the measures he took to overcome difficulties to achieve unity, and preserve it. Sheikh Zayed's work to establish the Union, at constitutional and institutional levels, created a development model based on balance and sustainability; combining authenticity and modernity. The book also highlights the humanitarian aspect of Sheikh Zayed's life, looking at his approach to humanitarian action and his countless charitable deeds. Sheikh Zayed's foreign policy principles and objectives are also explored, as well as his achievements in promoting joint Gulf and Arab action, and his support of the Palestinian cause. Zayed the Founder concludes with the testimonies of Arab and foreign leaders and officials, who have honored Sheikh Zayed (may God rest his soul in peace). The many awards he received from various international and regional institutions are highlighted, given in recognition of his great service to humanity, development and peace across the world.*

*Atlas of Human Chromosome Heteromorphisms Jun 25 2020 Critical to the accurate diagnosis of human illness is the need to distinguish clinical features that fall within the normal range from those that do not. That distinction is often challenging and not infrequently requires considerable experience at the bedside. It is not surprising that accurate cytogenetic diagnosis is also often a challenge, especially when chromosome study reveals morphologic findings that raise the question of normality. Given the realization that modern human cytogenetics is just over five decades old, it is noteworthy that thorough documentation of normal chromosome variation has not yet been accomplished. One key diagnostic consequence of the inability to distinguish a "normal" variation in chromosome structure from a pathologic change is a missed or inaccurate diagnosis. Clinical cytogeneticists have not, however, been idle. Rather, progressive biotechnological advances coupled with virtual completion of the human genome project have yielded increasingly better microscopic resolution of chromosome structure. Witness the progress from the early short condensed chromosomes to the later visualization of chromosomes through banding techniques, high-resolution analysis in prophase, and more recently to analysis by fluorescent in situ hybridization (FISH).*

*industry related to specific international countries and regions. Additional consideration on how advertising is utilized across the world is vital to understand the current best practices, challenges, and opportunities in the marketing field. The Handbook of Research on Global Perspectives on International Advertising considers various perspectives on international advertising through global and local lenses and discusses strategies and tactics of advertising across the globe. Covering topics such as branding, political advertising, cultural features, and tourism advertising, this reference work is ideal for industry professionals, academicians, practitioners, researchers, scholars, instructors, and students.*

*Additive Manufacturing: Materials, Processes, Quantifications and Applications Jun 05 2021 Additive Manufacturing: Materials, Processes, Quantifications and Applications is designed to explain the engineering aspects and physical principles of available AM technologies and their most relevant applications. It begins with a review of the recent developments in this technology and then progresses to a discussion of the criteria needed to successfully select an AM technology for the embodiment of a particular design, discussing material compatibility, interfaces issues and strength requirements. The book concludes with a review of the applications in various industries, including bio, energy, aerospace and electronics. This book will be a must read for those interested in a practical, comprehensive introduction to additive manufacturing, an area with tremendous potential for producing high-value, complex, individually customized parts. As 3D printing technology advances, both in hardware and software, together with reduced materials cost and complexity of creating 3D printed items, these applications are quickly expanding into the mass market. Includes a discussion of the historical development and physical principles of current AM technologies Exposes readers to the engineering principles for evaluating and quantifying AM technologies Explores the uses of Additive Manufacturing in various industries, most notably aerospace, medical, energy and electronics*

*A practical guide to Community Management in Dubai Jul 31 2023 Waqar has spent his whole career working in the Community Management profession. Mostly self-taught, he has established and developed his business and trained his staff directly. The inspiration for this book comes from his desire to extend the dissemination of his knowledge further afield. With the recent introduction of a brand new and bespoke Jointly Owned Property (JOP) law in Dubai, the timing of the book seems perfect. The new law sets a milestone in the development of the Real Estate market in Dubai. It was needed to address specifically the diversity of the communities which have been developed in the region and to establish a framework to regulate their operations more effectively with less red tape. Many of the Community Management professionals who have learned the previous methods of Owners Association are now faced with the daunting task of unlearning the past and facing the future of JOP management. This book neatly and precisely sets out the key principles of JOP management. It does not pretend to be a reference document but does cover all the salient information that anyone seeking to work in the industry needs to know. It is an absolute must-read for anyone joining the family of Facilities Management (FM) and JOP service providers in the rapidly expanding domain of community managers, all of which are key parts in the success story of Dubai. *Transit Oriented Development and Sustainable Cities May 05 2021 This book provides new dimensions and a contemporary focus on sustainable transport, urban regeneration and development in eight countries spanning four continents at different stages of development. It examines the role of transit oriented development (TOD) in improving urban sustainability and providing different transport choices, exploring how these can be implemented in modern cities.*

*Shipping and Development in Dubai Feb 23 2023 A small town on a sandy creek half a century ago, Dubai is now the largest trading, commercial, leisure and transport entrepot in the Gulf and wider region. This book explains the reasons for the emergence of Dubai and its distinctive development trajectory, arguing that the decision, in the 1970s, to invest in infrastructure made possible by shipping containerization laid the foundations for its future expansion. The book shows that in contrast to its competitors' hydrocarbon rentier economic model, Dubai's creation and expansion of ports and airports, together with 'value-added' logistics and business-friendly enhancements, were used to out-compete regional rivals. Drawing on a range of primary and secondary sources, including interviews with logistics business-people, government records, memoirs, it fills a significant lacuna in the history of Dubai's development and emergence as a global trade hub.*

***The Gulf Stock Exchange Crash Aug 08 2021*** The collapse of Souq Al-Manakh in Kuwait in August 1982 was the most spectacular financial crash of recent years. The market had developed as a parallel stock exchange dealing in the shares of Gulf companies not resident in Kuwait. Fuelled by manic speculation, the market grew at a phenomenal rate throughout 1981 and early 1982. Inexperienced investors gambled huge sums on the shares of shell companies promoted largely for share speculation. At the height of the market US\$92 billion was outstanding on nearly 30,000 postdated cheques, the usual form of payment used in the market. The financial crisis created by the collapse of the Souq Al-Manakh threatened the stability of Kuwait. The government was forced to intervene and absorb the major part of the loss. This book, first published in 1986, traces the growth of the stock market and analyses its collapse. It also discusses in detail the wider impact of this debacle on the economic life of the Gulf.

***Finance of International Trade in the Gulf Apr 15 2022*** This book analyses the legal structure and operation of the conventional and Islamic banking systems in the Gulf Arab states. It defines the legal issues involved and case law decided by the English, American and the Gulf Arab states courts in operating the two systems in financing the international trade transactions and covering the concurrent application, the advantages and disadvantages and the problems of each system. This book also gives a particular challenge to the fraud in international trade and considers the development of countertrade and electronic funds transfer as methods of financing some of the international business transactions. This book is very helpful for those who are dealing with the financing of the international trade, their professional advisors, staff of the conventional and Islamic banks and students who study law and commerce as part of their syllabuses of legal and international business studies. This book is also very essential reading for anyone who wants to succeed in the competitive conditions of modern banking business vis-a-vis the international trade in the Gulf Arab states. This book is also very helpful for the lawyer who is called upon to assist the businessman in his ventures or who wants to resolve a problem which has arisen in financing the international business transactions.

***KASAB Jul 27 2020*** On 26 November 2008 ten heavily armed terrorists entered Mumbai. They headed for the city's iconic landmarks and the mayhem they unleashed lasted nearly 60 hours. The audacious terror attacks jolted Mumbai like never before. Even as they mourned; the residents of Maximum City demanded answers. But the information they got in return—accounts of the investigation; government rhetoric; newspaper reports; television features; books and even a film—was sketchy at best. Meanwhile; the courts continued with their prosecution of Mohammed Ajmal Amir Kasab; the lone surviving 26/11 gunman. The broad picture available to the public is of the Pakistan-based terrorist organization Lashkar-e-Taiba and its ringleaders such as Hafiz Muhammad Saeed and Zaki-ur-Rehman Lakhvi training; arming and dispatching ten young men in a boat to attack India's commercial capital. All we have been told about Kasab is that he was just another recruit brainwashed into carrying out the plot against Mumbai. ***Kasab: The Face of 26/11 breaks new ground by***

*painstakingly piecing together Kasab's terror trail. The narrative follows Kasab through the bylanes of Pakistani villages and cities as he made his way towards PoK; the dense forests where the terrorist-training camps are situated; the trains; buses and jeeps he boarded; the Indian vessel he and the others hijacked en route to Mumbai's shores; Kasab's capture and incarceration. Rommel Rodrigues' path-breaking investigative journalism fleshes out for the first time the well thought-out planning and organization that lay behind the attacks of 26/11.*

*Edible Plants in Health and Diseases Aug 27 2020 The book provides significant information on some of the promising edible medicinal plants and how these possess both nutritive as well as medicinal value. The significance of these edible plants in traditional medicine, their distribution in different regions and the importance of their chemical constituents are discussed systematically concerning the role of these plants in ethnomedicine in different regions of the world. The current volume focuses on the economic and culturally important medicinal uses of edible plants and a detailed survey of the literature on scientific researches of pharmacognostical characteristics, traditional uses, scientific validation, and phytochemical composition, and pharmacological activities. This book is a single-source scientific reference to explore the specific factors that contribute to these potential health benefits, as well as discussing how to maximize those potential benefits. Chemists, food technologists, pharmacologists, phytochemists as well as all professionals involved with quality control and standardization will find in this book a valuable and updated basis for their work.*

*The UAE Jan 13 2022 William Gueraiche's work is the first scholarly study of the UAE's campaign to establish itself on the international stage and to explore the impact that its economic transformation has had on the country. Emirati society remains at core conservative and the preservation of Arab-Islamic identity remains important, yet the UAE has the highest proportion of foreigners of any country in the world. What does this mean for the identity of Emiratis living there and what are the implications for foreigners working there? The author also explores the environmental costs of the Dubai lifestyle, its 'Look East' policy and increasing volume of trade with eastern Asia, and the ways in which the UAE has sought to challenge the traditional hegemony of Saudi Arabia in the region. In a final chapter the author examines the impact of the economic depression that called the whole representation of Dubai into question.*

*Public Relations in the Gulf Cooperation Council Countries Oct 22 2022 The Arab world has engaged in public relations for thousands of years, and the public relations literature provides multiple examples extending from ancient times. However, modern public relations is much more vaguely defined. This is partly because the research surrounding public relations practice in the Middle East remains sparse, especially in the Gulf Cooperation Council (GCC) countries. This book presents a clear picture of contemporary PR practice in this region, providing a background on the evolution of public relations in each GCC country. It shows how environmental factors (historical, cultural, socio-political, and economic) influence practice in the region. It also contributes to public relations scholarship, education, and practice worldwide by providing new perspectives to those unfamiliar with its practice in this region. This book will benefit scholars and practitioners alike through its informed analysis of the strengths and weaknesses of practice in the GCC countries, as well as being of great benefit to the development of professional practice in the region.*

*Court Uncourt - STA Law Firm Dubai Jan 01 2021 Regardless of its size, a piece of paper can only be folded in half a maximum of six times. Sure, there's a scientific explanation for this (with every fold the paper becomes twice as thick, with the thickness becoming disproportionate to the other dimensions by the sixth fold) – but telling a person that they will not be able to achieve a particular task is a guaranteed way to ensure that they will try. And if the obvious method looks set to fail, maybe a creative alternative is the best route to success. The paper may not fold any smaller if you use the obvious method, BUT what if you try with tissue paper or kitchen foil? Or make parallel folds along the same axis? We at STA pride ourselves on our bespoke, fresh and innovative approach to each and every situation – both with paper, on paper and in law. Welcome back to Court Uncourt! Our latest issue once again discusses a variety of prevalent legal topics, both in the UAE and further afield, from a unique and imaginative perspective. Enjoy your read – and fold carefully afterwards!*

*Tomorrow's People and New Technology Dec 24 2022 As we witness a series of social, political, cultural, and economic changes/disruptions this book examines the Fourth Industrial Revolution and the way emerging technologies are impacting our lives and changing society. The Fourth Industrial Revolution is characterised by the emergence of new technologies that are blurring the boundaries between the physical, the digital, and the biological worlds. This book allows readers to explore how these technologies will impact peoples' lives by 2030. It helps readers to not only better understand the use and implications of emerging technologies, but also to imagine how their individual life will be shaped by them. The book provides an opportunity to see the great potential but also the threats and challenges presented by the emerging technologies of the Fourth Industrial Revolution, posing questions for the reader to think about what future they want. Emerging technologies, such as robotics, artificial intelligence, big data and analytics, cloud computing, nanotechnology, biotechnology, the Internet of Things, fifth-generation wireless technologies (5G), and fully autonomous vehicles, among others, will have a significant impact on every aspect of our lives, as such this book looks at their potential impact in the entire spectrum of daily life, including home life, travel, education and work, health, entertainment and social life. Providing an indication of what the world might look like in 2030, this book is essential reading for students, scholars, professionals, and policymakers interested in the nexus between emerging technologies and sustainable development, politics and society, and global governance.*

*Reinventing the Sheikhdom Jan 30 2021 Though the Arab Spring has reverberated through the Middle East, largely leaving a path of destruction, the relative calm in the United Arab Emirates has offered a regional roadmap for stability. Domestic changes since 2000 have significantly altered the country's dynamics, firmly cementing power within Abu Dhabi. While Khalifa bin Zayed succeeded his father as emir of Abu Dhabi and UAE president in 2004, the Emirates' evolution has largely been accredited to Abu Dhabi's crown prince, Mohammed bin Zayed. His reign has been characterized by the rise of the security apparatus and a*

*micromanaged approach to governance. Mohammed bin Zayed's strategy of fortification has focused on pre-empting threats from the UAE's native population, rather than from expatriates or foreign actors. As a result, he has consolidated power, distributing its administration among his tribal and kinship allies. In essence, Mohammed bin Zayed has driven modernization in order to strengthen his grasp on power. This book explores Mohammed bin Zayed's regime security strategy, illustrating the network of alliances that seek to support his reign and that of his family. In an ever-turbulent region, the UAE remains critical to understanding the evolution of Middle Eastern authoritarian control.*
