Operations Management, 4th Edition, shows how vital it is to have world-class operations management in any organisation. In the past, where organisations tended to be more hierarchical than today, the words, "strategy" and "operations" were almost mutually exclusive. In today's highly competitive environment, though, strategic operational capabilities must be in place for organisations to provide goods and services that meet and exceed customer requirements. Key issues such as cost, speed, quality, flexibility and constant innovation are all part of strategic operations. However, achieving such capabilities does not come by chance - instead a range of factors need to be in place. This new edition pays equal attention to manufacturing and service sectors. It includes numerous references to, and discusses, major changes taking place in the business world, including 3-D printing; virtual organisations; Cloud - Big Data and the Internet of Things; Servitization, global markets, ongoing innovation and managing within complex supply networks. Cases are included from a range of settings across the globe. Students taking MBA, MSc and MBM classes on operations management, advanced operations management, and strategic operations management will find this textbook fulfills all their requirements whilst advanced undergraduate classes in these areas will also find the book an essential read.

Hyperspectral Remote Sensing of Vegetation April 2022

Hyperspectral narrow-band (or imaging spectroscopy) spectral data are fast emerging as practical solutions in modeling and mapping vegetation. Recent research has demonstrated the advances in and merit of hyperspectral data in a range of applications including quantifying agricultural crops, modeling forest canopy biochemical properties, detecting crop stress and disease, mapping chlorophyll content as it influences crop production, identifying plants affected by contaminants such as arsenic, demonstrating sensitivity to plant nitrogen content, classifying vegetation species and type, characterizing wetlands, and mapping invasive species. The need for significant improvements in quantifying, modeling, and mapping plant chemical, physical, and water properties is more critical than ever before to reduce uncertainties in understanding of the Earth and to better sustain it. There is also a need for a synthesis of the vast knowledge spread throughout the literature from more than 40 years of research. *Hyperspectral Remote Sensing of Vegetation* integrates this knowledge, guiding readers to harness the capabilities of the most recent advances in applying hyperspectral remote sensing technology to the study of terrestrial vegetation. Taking a practical approach to a complex subject, the book demonstrates the experience, utility, methods and models used in studying vegetation using hyperspectral data. Written by leading experts, including pioneers in the field, each chapter presents sp

applications, reviews existing state-of-the-art knowledge, highlights the advances made, and provides guidance for appropriate use of hyperspectral data in the study of vegetation as well as its numerous applications, such as yield modeling, crop and vegetation biophysical and biochemical property characterization, and crop moisture assessment. This comprehensive book brings together the best global expertise on hyperspectral remote sensing of agriculture, crop water use, plant species detection, vegetation classification, biophysical and biochemical modeling, crop productivity and water productivity mapping and modeling. It provides the pertinent facts, synthesizing findings so that readers can get the correct picture on such as the best wavebands for their practical applications, methods of analysis using whole spectra, hyperspectral vegetation indices targeted to study specific biophysical and biochemical quantities, and methods for detecting parameters such as crop moisture variability, chlorophyll content, and stress levels. A collective "knowledge bank," guides professionals to adopt the best practices for the work.

RKO Radio Picture Dec 25 2020 One of the "Big Five" studios of Hollywood's golden age, RKO is remembered today primarily for the famous films it produced, from King Kong and Citizen Kane to the Astaire-Rogers musicals. But its own story also provides a fascinating case study of industry management during one of the most vexing periods

in American social history. *RKO Radio Pictures: A Titan is Born* offers a vivid history of a thirty-year roller coaster of unstable finances, management battles, and artistic gambles. Richard Jewell has used unparalleled access to studio documents generally unavailable to scholars to produce the first business history of RKO, exploring its decision-making processes and illuminating the complex interplay between art and commerce during the heyday of the studio system. Behind the blockbuster films and the glamorous stars, the story of RKO often contained more drama than any of the movies it ever produced.

INTERNATIONAL BUSINESS Mar 08 2022 Today, with the pervasive impact of globalization and liberalization sweeping across the globe, exerting its influence on both developed and the developing nations, business is no more confined to the national borders of a country. More and more companies are spreading their business to markets abroad (for example, Tata Consultancy Services and Infosys Technologies spreading their business to USA and elsewhere) or acquiring new companies (for instance, Tata acquiring the Corus and the Land Rover and Jaguar, or reversely, Vodafone acquiring Hutch). International business, therefore, has become such an important area of study for students of management and commerce. This comprehensive and easy-to-read text tries to lay bare the ramifications and complexities of international business. Divided into six sections, the book provides a harmonious blend of concepts and applications of international business. What distinguishes the text is the emphasis it lays on the Indian cases and the Indian scenario through the provision of many cases and illustrative examples. However, the book goes beyond the Indian context by giving international c

thus imbuing the text with a global business flavour. Key Features ? The case studies discussed include the cases as Tata Motors, Hindustan Unilever, Ranbaxy, McDonald, Nokia, Microsoft and Walt Disney. ? The opening case in each chapter introduces the students to a real-life example followed by the text which provides the theoretical knowledge on the subject. The concluding case study correlates the theoretical knowledge with the real-life situation. ? Review questions are cited after every case study to check student comprehension of the subject. Primarily intended as a text for undergraduate and postgraduate students of Business Administration, MBA, MIB and postgraduate students of Commerce, the book would be of great value also to practising managers.

CASE STUDIES IN MARKETING, SEVENTH EDITION

Sep 21 2020 This well-received and widely accepted book for the students of business schools across the country, in its Seventh Edition, provides cases that have been culled from the real business world and drawn from authentic sources. NEW TO THE SEVENTH EDITION In the present edition, the following cases have been thoroughly updated: • Ace Designers • BEML • BHEL • BPL • Gillette India • Infosys • Oracle • SAP • Standard Chartered Bank • Taj West End • HMT Watches • HMT Machine Tools These cases highlight the business environment of different companies specifically from the view of competitiveness, product development, market strategies and inter-national business

The facts and data given in the case studies are compiled and presented in a simple and easy-to-read style for better understanding of the market practices. TARGET AUDIENCE • MBA • PGDM • MIB

The Routledge Handbook of Cultural Tourism Sep 14 2022 The Routledge Handbook of Cultural Tourism explores and critically evaluates the debates and controversies in this of Tourism. It brings together leading specialists from a range of disciplinary backgrounds and geographical regions to provide state-of-the-art theoretical reflection and empirical research on this significant stream of tourism its future direction. The book is divided into 7 inter-related sections. Section 1 looks at the historical, philosophical & theoretical framework for cultural tourism. This section

debates tourist autonomy role play, authenticity, imagination, cross-cultural issues and inter-disciplinarity. Section 2 analyses the role that politics takes in cultural tourism. This section also looks at ways in which cultural tourism is used as a policy instrument for economic development. Section 3 focuses on social patterns and trends, such as the mobility paradigm, performativity, reflexivity and traditional hospitality, as well as considering sensitive social issues such as dark tourism. Section 4 analyses community and development, exploring adaptive forms of cultural tourism as well as more sustainable models for indigenous tourism development. Section 5 discusses Landscapes and Destinations, including the transformation of space into place, issues of authenticity in landscape, the transformation of urban and rural landscapes into tourism products and conservation versus development dilemmas. Section 6 relates to Regeneration and Planning, especially the creative turn in cultural tourism, which can be used to avoid problems of serial reproduction, standardisation and homogenisation. Section 7 deals with The Tourist and Visitor Experience, emphasising the desire of tourists to be more actively and interactively engaged in cultural tourism. This significant volume offers the reader a comprehensive synthesis of the field, conveying the latest thinking and research. The text is international in focus, encouraging dialogue across disciplinary boundaries and areas of study and will be an invaluable resource for all those with an interest in Cultural Tourism.

Tourism. This is essential reading for students, researchers and academics of Tourism as well as those of related studies in particular Cultural Studies, Leisure, Geography, Sociology, Politics and Economics.

Hyperspectral Remote Sensing of Vegetation, Second Edition, Four Volume Set Dec 05 2021 Written by leading global experts, including pioneers in the field, the four-volume set on Hyperspectral Remote Sensing of Vegetation, Second Edition, reviews existing state-of-the-art knowledge, highlights advances made in different areas, and provides guidance for the appropriate use of hyperspectral data in the study and management of agricultural crops and natural vegetation. Volume I, Fundamentals, Sensor Systems, Spectral Libraries, and Data Mining for Vegetation introduces the fundamentals of hyperspectral or imaging spectroscopy data, including hyperspectral data processing, sensor systems, spectral libraries, and data mining and analysis, covering both the strengths and limitations of these topics. Volume II, Hyperspectral Indices and Image Classifications for Agriculture and Vegetation evaluates the performance of hyperspectral narrowband or imaging spectroscopy data with specific emphasis on the uses and applications of hyperspectral narrowband vegetation indices in characterizing, modeling, mapping, and monitoring agricultural crops and vegetation. Volume III, Biophysical and Biochemical Characterization and Plant Species Studies demonstrates the methods that are developed and used

study terrestrial vegetation using hyperspectral data. The volume includes extensive discussions on hyperspectral processing and how to implement data processing mechanisms for specific biophysical and biochemical applications such as crop yield modeling, crop biophysical and biochemical property characterization, and crop moisture assessments. Volume IV, *Advanced Applications Remote Sensing of Agricultural Crops and Natural Vegetation* discusses the use of hyperspectral or imaging spectroscopy data in numerous specific and advanced applications, such as forest management, precision farming, managing invasive species, and local to global land cover change detection.

E-Economy Apr 28 2021 As dot.com became dot.bomb, the hype that surrounded the meteoric growth of the network economy has given way to realism, or even scepticism, and the potential of ICT as a source of new business models is now appropriate to reflect critically on the e-economy and to use this as a way of looking forward to new, more realistic possibilities. Using a business and socio-economic framework, this book investigates a range of challenges restructuring the e-economy. This framework includes operations management, human resource management, e-learning, e-retailing, e-marketing, e-government, enterprise culture and digital divide. Divided into four themes (the changing business environment, knowledge management, learning in the public domain and e-business practices

within and between organizations), each chapter considers the international context and critically explores a key aspect of the e-economy. Rigorous yet still retaining the accessible format which distinguishes all the volumes in this series, this book provides a thorough critique of the prospects facing businesses in the new economy and will be of interest to anyone studying e-business/commerce.

Titan Unveiled Jul 20 2020 For twenty-five years following the Voyager mission, scientists speculated about Saturn's largest moon, a mysterious orb clouded in orange haze. Finally, in 2005, the Cassini-Huygens probe successfully parachuted down through Titan's atmosphere, all the while transmitting images and data. In the early 1980s, when two Voyager spacecraft skimmed past Titan, Saturn's largest moon, they transmitted back enticing images of a mysterious world concealed in a seemingly impenetrable orange haze. **Titan Unveiled** is one of the first general interest books to reveal the startling new discoveries that have been made since the arrival of the Cassini-Huygens mission to Saturn and Titan. Ralph Lorenz and Jacqueline Mitton take readers behind the scenes of this mission. Launched in 1997, Cassini entered orbit around Saturn in summer 2004. Its formidable payload included the Huygens probe, which successfully parachuted down through Titan's atmosphere in early 2005, all the while transmitting images and data--and scientists were startled by what they saw. One of those researchers is Lorenz, who gives an insider's account of the scientific

community's first close encounter with an alien landscape of liquid methane seas and turbulent orange skies. Amid the challenges and frayed nerves, new discoveries are made, including methane monsoons, equatorial sand seas, and Titan's polar hood. Lorenz and Mitton describe Titan as a world strikingly like Earth and tell how Titan may hold clues to the origins of life on our own planet and possibly to its presence on others. Generously illustrated with many stunning images, Titan Unveiled is essential reading for anyone interested in space exploration, planetary science, or astronomy. A new afterword brings readers up to date on Cassini's ongoing exploration of Titan, describing the many new discoveries made since 2006.

Broadband Access Networks Apr 16 2020 The access network is expected to be one of the major battlegrounds for telecommunications network operators, since upgrades to the existing narrowband access network will be the critical factor in supplying multimedia broadband services in a competitive market. The future broadband access network architecture needs to be flexible enough to efficiently support the provision of a full set of broadband and narrowband services with a wide range of capacity demands. A wide range of broadband access technologies are available. Furthermore, the key issues in the upgrading of the very sensitive access network are financial as well as technological, both for incumbent and new entrant operators. Thus, in order to identify minimum-risk

introductory strategies the economic viability of access network broadband upgrades needs to be carefully assessed. However, despite the definite need for techno-economic evaluations, very few books have been published in this area. One of the reasons might be that broadband access network upgrading only very recently gained wide recognition as a key challenge for broadband delivery. Secondly, this kind of strategic work and these studies tend to be considered sensitive by operators, and thus both results and methodologies are not usually readily available. Thirdly, the work reported in this book in many respects was a major pioneering effort, which quite ambitiously aimed at modelling the whole life-cycle costs and revenue streams of access network upgrades, as opposed to several other studies which often are limited to pure investment cost comparisons.

Computational Science and Its Applications – ICCSA 2016
Oct 03 2021 The five-volume set LNCS 9786-9790 constitutes the refereed proceedings of the 16th International Conference on Computational Science and Its Applications, ICCSA 2016, held in Beijing, China, in July 2016. The 239 revised full papers and 14 short papers presented at 33 workshops were carefully reviewed and selected from 800 submissions. They are organized in five thematic tracks: computational methods, algorithms and scientific applications; high performance computing and networks; geometric modeling, graphics and visualization; advanced

and emerging applications; and information systems and technologies.

CIM Coursebook 07/08 Strategic Marketing in Practice Aug 01 2021 BH CIM Coursebooks are crammed with a range of learning objective questions, activities, definitions and summaries to support and test your understanding of the theory. Die KiVS 2007 dient der Standortbestimmung aktueller Entwicklungen, der Präsentation laufender Forschungsarbeiten und der Diskussion zukunftssträchtiger Ansätze für die Kommunikation in verteilten Systemen.

Mastering Information Security Compliance Management Nov 16 2022 Strengthen your ability to implement, assess, evaluate, and enhance the effectiveness of information

security controls based on ISO/IEC 27001/27002:2022 standards Purchase of the print or Kindle book includes free PDF eBook Key Features Familiarize yourself with the clauses and control references of ISO/IEC 27001:2022 Define and implement an information security management system aligned with ISO/IEC 27001/27002:2022 Conduct management system audits to evaluate their effectiveness and adherence to ISO/IEC 27001/27002:2022 Book Description ISO 27001 and ISO 27002 are globally recognized standards for information security management systems (ISMSs), providing a robust framework for information protection that can be adapted to all organization types and sizes. Organizations with significant exposure to information-security-related risks are increasingly choosing to implement an ISMS that complies with ISO 27001. This book will help you understand the process of getting your organization's information security management system certified by an accredited certification body. The book begins by introducing you to the standards and then takes you through different principles and terminologies. Once you completely understand these standards, you'll explore their execution, wherein you find out how to implement these standards in different sized organizations. The chapters also include case studies to enable you to understand how you can implement the standards in your organization. Finally, you'll get to grips with the auditing process, planning, techniques, and

reporting and learn to audit for ISO 27001. By the end of this book, you'll have gained a clear understanding of ISO 27001/27002 and be ready to successfully implement an audit for these standards. What you will learn

- Develop a strong understanding of the core principles underlying information security
- Gain insights into the interpretation of control requirements in the ISO 27001/27002:2022 standard
- Understand the various components of ISMS with practical examples and case studies
- Explore risk management strategies and techniques
- Develop an audit plan that outlines the scope, objectives, and schedule of the audit
- Explore world case studies that illustrate successful implementation approaches

Who this book is for This book is for information security professionals, including information security managers, consultants, auditors, officers, risk specialists, business owners, and individuals responsible for implementing, auditing, and administering information security management systems. Basic knowledge of organization-level information security management, such as risk assessment, security controls, and auditing, will help you grasp the topics in this book easily.

PRODUCT POLICY AND BRAND MANAGEMENT,
Fourth Edition Jul 12 2022 The book, now in its fourth edition, continues to elucidate the concepts and topics of Product Policy and Brand Management in a concise and clear manner. The text has been further enriched by introducing more case studies based on various mobile

phones and smartphones as well as on generic drugs and pharmaceuticals to explain and highlight the concept of branding process. In addition, there are case studies on product development, branding of foods, their positioning and pricing strategy. The book has been systematically divided into four parts. Part I on "Fundamentals of Product Management" throws light on the concepts of product and its management, role of product managers, product life cycle, diffusion models, developing a product manager, and the product planning system and strategies. Part II on "Product Development and Its Barriers" explains the challenges that are faced by a new product during its development, the test marketing stages and its alternatives for launching a product, future trends of product management and success stories. Part III on "Brand Management" defines branding, branding decisions, brand equity, brand identity, and brand positioning. Whereas, Part IV "Live Case Studies" exclusively includes 40 live cases that provide analytical and practical insights to the readers on the discussed concepts. The text is primarily intended for the students of MBA, MMS, and ME/MTech (Industrial Management). Besides, the book is also a valuable source for practicing managers.

Exploring Supply Chain Management in the Creative Industries
Nov 04 2021 SCM is a rapidly emerging paradigm that is transforming the organisation of business operations

as firms seek ever new and innovative ways of finding the elusive mantra of competitive advantage. Little work has been undertaken on the creative sector. This e-book hopes to address this, by offering some interesting and informative exploratory work in different areas of the sector. One aim was to offer some insights and lessons that could be drawn on by the wider business community.

Titan Feb 19 2023 "Although Titan is similar in terms of mass and size to Jupiter's moons, Ganymede and Callisto, it is the only one harboring a massive atmosphere. Moreover, unlike the Jovian system populated with four large moons, Titan is the only large moon around Saturn. The other Saturnian moons are much smaller and have an average density at least 25% less than Titan's uncompressed density and much below the density expected for a Solar composition (Johnson and Lunine, 2005), although with a large variation from satellite to satellite. Both Jupiter's and Saturn's moon systems are thought to have formed in a disk around the growing giant planet. However, the difference in architecture between the two systems probably reflects different disk characteristics and evolution (e.g. Sasaki et al., 2010), and in the case of Saturn, possibly the catastrophic loss of one or more Titan-sized moons (Canup, 2010). Moreover, the presence of a massive atmosphere on Titan, well as the emission of gases from Enceladus' active south polar region (Waite et al., 2009) suggest that the primordial building blocks that comprise the Saturnian system were

probably more volatile-rich than Jupiter's"--

Extremely Short Cases on Strategic Management **Nov 23**

2020 The subject of Strategy is extremely complex and perhaps can be taught only through the use of Cases. Unfortunately, most of the available cases in Strategic Management tend to be extremely long, which test more patience rather than the intellectual rigour. This book therefore fulfills the void in the literature by offering a bouquet of cases that are designed not only to test the operational understanding but the conceptual and intellectual discipline that the reader must inculcate to be a successful strategist. The book contains 24 cases, ranging from mammoth public sector organisations like SBI and SAIL to global corporations like Cray and Apple, as also the sublimely interesting episodes in the life of Phoolan Devi and Princess Diana. All the cases are extremely readable and are designed to introduce the different aspects of Strategic Management to the reader. The book is a must for students, strategists as well as practicing managers.

CASE STUDY Mar 28 2021 The basic purpose of this Book
is to make learning simple yet enriching so that anyone can
easily read and understand. It will certainly help the reader
to improve, explore, and have a meaningful insight of the
various concepts and strategies. This Book consists of

various National and International case studies and cover major aspects namely- • CASE STUDIES ON MARKETING STRATEGIES TO CONNECT WITH THE TARGET MARKET. • CASE STUDIES ON CSR INITIATIVES UNDERTAKEN BY COMPANIES. • CASE STUDIES ON BRAND FAILURES AND THE REASONS BEHIND IT.

("The aim of marketing is to know and understand the customer so well the product or service fits him and sells itself." - Peter Drucker) ("Change is not a destination, just as hope is not a strategy." - Rudy Giuliani) ("The customer expects you to have knowledge of their stuff, not just your stuff." - Jeffrey Gitomer)

Tiny Titan Dec 17 2022 Best Adult Non-Fiction Mom's Choice Award Winner! Congratulations to an amazing family with an amazing story. The immensity of the challenges taken on by this family, the anguish they go through as systems fail them, and the dedication they show to their children inspire awe and deep respect. Languages, Compilers, and Run-Time Systems for Scalable Computer Systems Feb 24 2021 This book constitutes the strictly refereed post-workshop proceedings of the 4th International

Workshop on Languages, Compilers, and Run-Time Systems for Scalable Computing, LCR '98, held in Pittsburgh, PA, USA in May 1998. The 23 revised full papers presented were carefully selected from a total of 47 submissions; also included are nine refereed short papers. All current issues in developing software systems for parallel and distributed computers are covered, in particular irregular applications, automatic parallelization, run-time parallelization, load balancing, message-passing systems, parallelizing compilers, shared memory systems, client server applications, etc.

Lessons from the Titans: What Companies in the New Economy Can Learn from the Great Industrial Giants to Drive Sustainable Success [ISBN 23 2023](#) Three top Wall Street analysts reveal enduring lessons in sustainable success from the great industrial titans—the high-tech companies of their day—to the disruptors that now dominate the economy. Before Silicon Valley disrupted the world with new technologies and business models, America's industrial giants paved the way. Companies like General Electric, United Technologies, and Caterpillar were the Google and Amazon of their day, setting gold standards in innovation, growth, and profitability. Today's leaders can learn a great deal from their successes, as well as their missteps. In this essential guide, three veteran Wall Street analysts reveal timeless lessons from the titans of industry—and offer hard-tested survival tactics for an ever-changing world. You'll learn: how GE became the largest company on earth—on

for a culture of arrogance to set in motion the largest collapse in history how Boeing reassessed risks, raised profits—and tragically lost its balance how Danaher avoided the pitfalls of tremendous success—by continually reinventing itself how Honeywell experienced a near-fatal cultural breakdown—and executed a flawless turnaround how Caterpillar relied too much on forecasting, lost billions—rallied by recommitting to the basics Filled with illuminating case studies and brilliant in-depth analysis, this invaluable book provides a multitude of insights that will help you weather market upheavals, adapt to disruptions, and optimize your resources to your best advantage. You'll learn hard-won lessons in innovation, growth, resilience, and operational excellence, as well as the time-proven fundamentals of continuous improvement for lasting success. In the end, you'll have your own personal toolbox of useful takeaways from more than a century's worth of data, experience, wisdom, and can-do spirit, courtesy of some of the greatest business enterprises of all time. This is how manufacturers survived the first disruptors of technology—and how today's giants can survive and thrive during continuous cycles of disruption.

The Architecture of Supercomputing [July 24, 2023](#) The Architecture of Supercomputers: Titan, A Case Study describes the architecture of the first member of an entirely new computing class, the graphic supercomputing workstation known as Titan. This book is divided into several

chapters. Chapter 1 provides an overview of the Titan architecture, including the motivation, organization, and processes that created it. A survey of all the techniques speed up computation is presented in Chapter 2. Chapter 3 reviews the issue of particular benchmarks and measurements while Chapter 4 analyzes a model of a concurrency hierarchy extending from the register set to the entire operating system. The architecture of Titan graphics supercomputer and its implementation are considered in Chapter 5. Chapter 6 examines the performance of Titan in terms of the various information flow data rates. The last chapter is devoted to the actual performance on benchmark kernels and how the architecture and implementation affect performance. This publication is recommended for architects and engineers designing processors and systems.

Advanced Applications in Remote Sensing of Agricultural Crops and Natural Vegetation Jan 06 2022 Written by leading global experts, including pioneers in the field, the four-volume set on Hyperspectral Remote Sensing of Vegetation, Second Edition, reviews existing state-of-the-knowledge, highlights advances made in different areas, provides guidance for the appropriate use of hyperspectral data in the study and management of agricultural crops and natural vegetation. Volume IV, Advanced Applications in

Remote Sensing of Agricultural Crops and Natural Vegetation discusses the use of hyperspectral or imaging spectroscopy data in numerous specific and advanced applications, such as forest management, precision farming, managing invasive species, and local to global land cover change detection. It emphasizes the importance of hyperspectral remote sensing tools for studying vegetation processes and functions as well as the appropriate use of hyperspectral data for vegetation management practices. The concluding chapter provides readers with useful guidance on the highlights and essence of Volume IV through the editors' perspective. Key Features of Volume IV: Guides readers to harness the capabilities of the most recent advances in applying hyperspectral remote sensing technology to the study of terrestrial vegetation. Includes specific applications on agriculture, crop management practices, study of crop stress and diseases, crop characteristics based on inputs (e.g., nitrogen, irrigation), study of vegetation impacted by heavy metals, gross and primary productivity studies, light use efficiency studies, water use and actual evapotranspiration studies, phenology monitoring, land use and land cover studies, global change studies, plant species detection, wetland and forest characterization and mapping, crop productivity and crop water productivity mapping, and modeling. Encompasses hyperspectral or imaging spectroscopy data in narrow wavebands used across visible, red-edge, near-infrared, and

infrared, shortwave infrared, and thermal portions of the spectrum. Explains the implementation of hyperspectral remote sensing data processing mechanisms in a standard, fast, and efficient manner for their applications. Discusses cloud computing to overcome hyperspectral remote sensing massive big data challenges. Provides hyperspectral analysis of rocky surfaces on the earth and other planetary systems.

Titan from Cassini-Huygens Oct 15 2022 This book is one of two volumes meant to capture, to the extent practical, the scientific legacy of the Cassini-Huygens prime mission, a landmark in the history of planetary exploration. As the most ambitious and interdisciplinary planetary exploration mission known to date, it has extended our knowledge of the Saturn system to levels of detail at least an order of magnitude beyond that gained from all previous missions to Saturn. Nestled in the brilliant light of the new and deeper understanding of the Saturnian planetary system is the shining nugget that is the spectacularly successful collaboration of individuals, organizations and governments in the achievement of Cassini-Huygens. In some ways the partnerships formed and lessons learned may be the most enduring legacy of Cassini-Huygens. The broad, international coalition that is Cassini-Huygens is now conducting the Cassini Equinox Mission and planning the Cassini Solstice Mission, and in a major expansion of the fruitful efforts, has extended the collaboration to the state-of-the-art new flagship missions to both Jupiter and Saturn. Such

ventures have and will continue to enrich us all, and evoke a very optimistic vision of the future of international collaboration in planetary exploration.

eBay: An E-Titan Success Story Apr 21 2023

Titan May 18 2020 When Titan Company Limited launched its quartz watches some 30 years ago, the founders - a bunch of Tata employees who started out simply wanting to 'do something different' - could not have foreseen just how completely they would capture the imagination of Indian consumers in the post-liberalization era of the 1990s. The brand they created - at first against tremendous odds and restrictive norms - injected freshness into the market and retail spaces through its cutting-edge marketing strategy and empathetic advertising. Not only did the new watchmaker on the block transform watches from being utilitarian objects to fashion statements, but it also systematically ventured into areas untapped by corporate entities with its brands Titan Tanishq, Titan Eyeplus, Skinn and Taneira, and established itself as a winner across multiple verticals. Titan: Inside India's Most Successful Consumer Brand takes readers from boardrooms to back rooms to reveal how a quintessential Indian brand from the house of the Tatas, not known till then for its success in the consumer goods market, reached such remarkable heights. It is a tale of innovation and fortitude, of thinking outside the box and staying the course of obsession with detail and the courage to acknowledge failure. A story that will inspire every reader, here is the

inside account of what continues to make Titan tick.
