With the help of the Clymer Honda CB550 & 650 Nighthawk, 1983-1985 Repair
Manual in your toolbox, you will be able to maintain, service and repair
your motorcycle to extend its life for years to come. Clymer manuals are
very well known for their thorough and comprehensive nature. This manual is
loaded with step-by-step procedures along with detailed photography,
exploded views, charts and diagrams to enhance the steps associated with a
service or repair task. This Clymer manual is organized by subsystem, with
procedures grouped together for specific topics, such as front suspension,
brake system, engine and transmission It includes color wiring diagrams. The
language used in this Clymer repair manual is targeted toward the novice
mechanic, but is also very valuable for the experienced mechanic. The
service manual by Clymer is an authoritative piece of DIY literature and
should provide you the confidence you need to get the job done and save
money too. "Included in this manual: Basic and improved two and four-stroke
engine types; engine designs and layouts; fuel and exhaust systems; ignition
systems; transmission; lubrication and cooling; wheels, tyres and brakes;
front suspension and steering; frames; rear suspension [and] electrical
systems. A faithful reproduction of the 1967 Floyd Clymer publication of the
official factory BMW (Bayerische Motoren Werke) Workshop Manual for the R50,
R50S, R60 and R69S twin cylinder motorcycles. It also includes the

supplement issued by the factory for the USA versions R50US, R60US and R69US. --- There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic BMW motorcycles. --- There are 257 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from German to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done! --- True to the original, this reproduction is published in four languages, English, German, French and Spanish making this a universal publication and required reading for any owner. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all BMW enthusiasts worldwide. Models: An illustrated workshop manual covering Triumph twin-cylinder motorcycles from 1945 to 1955: This is a faithful reproduction of the Factory Workshop Manual No. 11, originally published in the US by Floyd Clymer. The major revision in the later pre-unit factory manuals was the addition of technical specifications for the T120 Bonneville (1959). Unfortunately, those revisions also included the deletion of repair data for rigid frame, sprung hub and 3T models. This makes the Factory Workshop Manual No. 11 the most comprehensive workshop manual available for pre-unit,

twin-cylinder Triumph motorcycles up to and including 1962 models as it includes repair and maintenance data for the full line of rigid frame, sprung hub, swing-arm and 350cc models. Much more detailed than the owner's handbook, this manual provides the information necessary for the overhaul of engines, gear boxes, frames, swing-arm, forks, wheels, hubs, carburetors, electrics, etc., essential information for the enthusiast, owner or restorer of these classic motorcycles. Size: 5.5" x 8.5" with 224 pages and 84 illustrations, includes 8 pages of detailed technical specification charts and both an illustration index and a comprehensive index of contents. Applicable to the following models: 5T Speed Twin, T100 Tiger 100, TR5 Trophy, 6T Thunderbird, T110 Tiger 110 and 3T De-Luxe. Includes maintenance and repair data for the following engines: Twin Cylinder 350cc OHV, 500cc OHV and 650cc OHV. 200 pages, 60 illustrations, size 5.5 x 8.5 inches. A faithful reproduction of the Floyd Clymer publication of the third edition (1952) of the C.W. Waller Workshop Manual for all models of Ariel motorcycles built between 1933 and 1951. Includes complete technical data, service and maintenance information and comprehensive detailed instructions for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic motorcycles. There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Ariel enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior purchasing of one of these classic motorcycles. Applicable To The Following Models: Four cylinder: 4/F/600cc OHC, 4/F/600cc OHV, 4/G/1,000cc OHV (Cast Iron & Light Alloy). Twin cylinder: 500cc OHV models KG & KH. Single cylinder: 600cc SV model VB. 500cc OHV models VG & VH. 350cc OHV models NH & NG. 250cc OHV models OH, OG, LG & LH. Much of the data is also applicable to later models that utilize these same engines. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Ariel enthusiasts worldwide.
