Learning Portuguese as a Second Language Aug 24 2023 This volume examines the specific effects that schools have on the performance of immigrant students and linguistic minority groups. Especially in the European context this study fills a gap in examining the effects that schools have on these students' performance and performance differentiation, taking into account school related factors such as resources and teachers, and the influence of other variables like mother tongue and socioeconomic status. This report on an ongoing research project in Portugal examines state schools within the same district, in the same tests over the same assessment period. The study is based on the following set of relationships: between schools that administer proficiency tests to their non-native students; schools that do not use such tests; and schools with verifiable support programs (including physical and digital materials); and between the effect of the school and the predictive values of the nationality, mother tongue and socioeconomic status variables on the performance of non-native students of Portuguese.

The book is organized around areas where most future research is needed in CSL: phonology, semantics, grammar, and pragmatics. English as a Second Language in the Mainstream Feb 18 2023 Since it was first established in the 1970's the Applied Linguistics and Language Study series has become a major force in the study of practical problems in human communication and language education. Drawing extensively on empirical research and theoretical work in linguistics, sociology, psychology and education, the series explores key issues in language acquisition and language use. English as a Second Language learners are now a considerable and increasing part of the mainstream of urban schools in English-speaking countries. Beyond the learning of English, this development raises broader questions of language as a medium of education in a multilingual, multicultural environment. Drawing on their experience as researchers and educators in Australia, Canada and England, the authors of English as a Second Language in the Mainstream present an up-to-date account of advances in theory and practice. Their analysis of system-wide provision however, suggests that a truly responsive educational vision is lacking: government policy is inadequate, educational practices for ESL students are either underdeveloped or poorly coordinated with practices for other students, and the rhetoric of reform fails to engage significantly with issues of teaching and resources. The authors argue towards a more comprehensive vision which can acknowledge the relation between issues concerning ESL students and issues concerning the educational system as a whole, which can coordinate reforms in ESL education with general reforms, which can explicitly and systematically integrate language learning and content learning, and which can build more positively on the multilingual and multicultural nature of modern education for all students.

Speaking English as a Second Language Oct 02 2021 This book focuses on understanding the process of problem construction in oral communication in foreign language contexts, examining how speakers of English as a second language approach issues in oral communication, as well as the strategies they employ to overcome these difficulties. Using theories of general communication, and in particular current approaches to L2 oral communication and strategies in interactional discourse, the authors construct a theoretical framework for defining, identifying and classifying learners' problems and coping strategies when speaking English as a second or foreign language. The book offers a coherent process-oriented description of the complex and multidimensional nature and typology of oral interaction problems in EFL contexts, and it will be of interest to practitioners, teachers, researchers, students, and curriculum designers in Applied Linguistics and TESOL.

Classroom Research on Chinese as a Second Language Jul 11 2022 This collection brings together a series of empirical studies on topics surrounding classrooms of Chinese as a second language (L2) by drawing on a range of theoretical frameworks, methodological strategies, and pedagogical perspectives. Over the past two decades, research on classroom-based second language acquisition (SLA) has emerged and expanded as one of the most important sub-domains in the general field of SLA. In Chinese SLA, however, scarce attention has been devoted to this line of research. With chapters written by scholars in the field of SLA—many of whom are experienced in classroom teaching, teacher education, or program administration in Chinese as a second language—this book helps disentangle the complicated relationships among linguistic targets, pedagogical conditions, assessment tools, learner individual differences, and teacher variables that exist in the so-called "black-box" classrooms of L2 Chinese.

Chinese as a Second and Foreign Language Education Sep 20 2020 This book presents key issues in the teaching of Chinese as a second or foreign language (TCSL or TCFL). It investigates how multimedia can help to assist TCSL/TCFL and explores practical effects of multimedia-assisted teaching at secondary schools in the Philippines. It addresses the psychology of TCSL/TCFL and discusses various recurring foreign graduate students concerns when learning academic Chinese in graduate institutes in Taiwan. It examines issues of educational assessment and testing, analyzing the validity of a self-made placement test for an immigrant Chinese program, as well as the psychological characteristics of adult learners and their implications for immigrant Chinese curriculum design. As foreign learners of Chinese grow exponentially, this cutting edge read conceptualizes the educational philosophy of TCSL/TCFL as a distinctive discipline.

Teaching English as a Second Language Jun 22 2023 This guide examines the concepts that most often confound ESL students, whose confusion can generally be reduced to one very basic question: Why does English work that way? Focusing on the grammar of conversational speech, the book goes beyond simple description of the parts of speech, tenses and modes, and other topics of instruction to consider the cultural differences in language use (for native speakers of Japanese, for instance, the painting may be on the wall—but the wall is also on the painting) and even the neuroscience of our speech patterns. With 36 illustrations, an annotated bibliography and list of online resources, a glossary, and end-of-chapter exercises, this book equips instructors and advanced students to explain everyday language choices that stymie non-native speakers. Instructors considering this book for use in a course may request an examination copy here.
