Provides consumers with a step-by-step method for calculating how much insurance coverage they need and how much it will cost. Examples

of common consumer situations show how brokers and agents evaluate necessary coverage. Case studies provide valuable tips for getting the coverage they need at prices they can afford. Includes worksheets. Abstract: A comprehensive list of 727 commonly used foods, from almonds to yoghurt, compares costs on the basis of market units, servings per unit, and size of serving. Home economics teachers, extension agents, and health occupations workers can use this list in educational and consumer programs. Amounts of foods to be purchased can be calculated to keep waste and expenditures at a minimum by comparing the economics of various market forms of foods, including fresh, frozen, canned or dried; with or without bone; and ready-to-eat or ready-to-cook. Each item is described as purchased, by unit of measurement, and by preparation after purchase. The amount-to-buy factor gives the consumer a quick method of calculating total amount of the food needed, as well as a comparison of the cost per serving of different foods or different forms of the same food. (cj). Reviews a variety of current consumer products and helps consumers obtain the most value for their money "What every first-time homebuyer needs to know... this easy-to-read guide efficiently answers all the questions every first-time homebuyer should ask: How to start the home buying process; how long does the home buying process take; how much home can you afford; how to compare mortgages; why first-time home buyers should use a realtor and need a real estate attorney; how to make and negotiate your offer and much more." from the back cover. You're no idiot, of course. You keep your projects on budget at work, shop around to find the best prices on groceries and clothing, and even manage to sock away money for your kids' college tuition.
