**Tony Northrup's DSLR Book: How to Create Stunning Digital Photography** Jan 30 2021 The top-rated and top-selling photography ebook since 2012 and the first ever Gold Honoree of the Benjamin Franklin Digital Award, gives you five innovations no other book offers: Free video training. 9+ HOURS of video training integrated into the book's content (requires Internet access). Travel around the world with Tony and Chelsea as they teach you hands-on. Appendix A lists the videos so you can use the book like an inexpensive video course. Classroom-style teacher and peer help. After buying the book, you get access to the private forums on this site, as well as the private Stunning Digital Photography Readers group on Facebook where you can ask the questions and post pictures for feedback from Tony, Chelsea, and other readers. It's like being able to raise your hand in class and ask a question! Instructions are in the introduction. Lifetime updates. This book is regularly updated with new content (including additional videos) that existing owners receive for free. Updates are added based on reader feedback and questions, as well as changing photography trends and new camera equipment. This is the last photography book you'll ever need. Hands-on practices. Complete the practices at the end of every chapter to get the real world experience you need. 500+ high resolution, original pictures. Detailed example pictures taken by the author in fifteen countries demonstrate both good and bad technique. Many pictures include links to the full-size image so you can zoom in to see every pixel. Most photography books use stock photography, which means the author didn't even take them. If an author can't take his own pictures, how can he teach you? In this book, Tony Northrup (award-winning author of more than 30 how-to books and a professional portrait, wildlife, and landscape photographer) teaches the art and science of creating stunning pictures. First, beginner photographers will master: Composition Exposure Shutter speed Aperture Depth-of-field (blurring the background) ISO Natural light Flash Troubleshooting blurry, dark, and bad pictures Pet photography Wildlife photography (mammals, birds, insects, fish, and more) Sunrises and sunsets Landscapes Cityscapes Flowers Forests, waterfalls, and rivers Night photography Fireworks Raw files HDR Macro/close-up photography Advanced photographers can skip forward to learn the pro's secrets for: Posing men and women. including corrective posing (checklists provided) Portraits (candid, casual, formal, and underwater) Remotely triggering flashes Using bounce flash and flash modifiers Using studio lighting on any budget Building a temporary or permanent studio at home Shooting your first wedding High speed photography Location scouting/finding the best spots and times Planning shoots around the sun and moon Star trails (via long exposure and image stacking) Light painting Eliminating noise Focus stacking for infinite depth-of-field Underwater photography Getting close to wildlife Using electronic

**Archives of Memory** Apr 03 2021 "Tell me about the war"—these words launched a ten-year project in oral history by a husband-and-wife team. Howard Hoffman fought in World War II from Cassino to the Elbe as a mortar crewman and a forward observer. His war experiences are of intrinsic interest to readers who seek a foot soldier's view of those historic events. But the principal purpose of this study was to explore the bounds of memory, to gauge its accuracy and its stability over time, and to determine the effects of various efforts to enhance it. Alice Hoffman, a historian, initiated the study because she recognized the critical role of memory in gathering oral history; Howard Hoffman, the subject, is an experimental psychologist. Alice's tape-recorded interviews with her husband over a period of ten years are the basic material of the study, which compares the events as recounted in the first phase of the interviews with later accounts of the same experiences and with the written records of his company as well as the memories of fellow soldiers and the evidence of photographs and other documents. This engrossing story of World War II breaks new ground for practitioners of oral history. The Hoffmans' findings indicate that a subset of human memory exists that is so permanent and resistant to change that it can properly be labeled "archival". In addition to describing some of the circumstances

under which archival memories are formed, the Hoffmans describe the conditions that were found to influence their storage and retrieval.

**Moving Rooms** Oct 29 2020 Since at least Tudor times there have been architectural salvages: panelling, chimney pieces, doorways, or any fixtures and fittings might be removed from an old interior to be replaced by more fashionable ones. Not surprisingly a trade developed and architects, builders, masons, and sculptors sought out these salvages. By 1820 there was a growing profession of brokers and dealers in London, and a century later antique shops were commonplace throughout England. This fascinating book documents the break-up, sale, and re-use of salvages in Britain and America, where the fashion for so-called "Period Rooms" became a mainstay of the transatlantic trade. Much appreciated by museum visitors, period rooms have become something of a scholarly embarrassment, as research reveals that many were assembled from a variety of sources. One American embraced the trade as no other--the larger-than-life William Randolph Hearst--who purchased tens of thousands of architectural salvages between 1900 and 1935.
