From the author of *Better Than Before* and *The Happiness Project* comes a groundbreaking analysis of personality type that "will immediately improve every area of your life" (Melissa Urban, co-founder of *The Whole30*). During her multibook investigation into human nature, Gretchen Rubin realized that by asking the seemingly dry question "How do I respond to expectations?" we gain explosive self-knowledge. She discovered that based on their answer, people fit into Four Tendencies: • Upholders meet outer and inner expectations readily. "Discipline is my freedom." • Questioners meet inner expectations, but meet outer expectations only if they make sense. "If you convince me why, I'll comply." • Obligers (the largest Tendency) meet outer expectations, but struggle to meet inner expectations—therefore, they need outer accountability to meet inner expectations. "You can count on me, and I'm counting on you to count on me." • Rebels (the smallest group) resist all expectations, outer and inner alike. They do what they choose to do, when they choose to do it, and typically they don't tell themselves what to do. "You can't make me, and neither can I." Our Tendency shapes every aspect of our behavior, so using this framework allows us to make better decisions, meet deadlines, suffer less stress, and engage more effectively. It's far easier to succeed when you know what works for you. With sharp insight, compelling research, and hilarious examples, *The Four Tendencies* will help you get happier, healthier, more productive, and more creative. After the Clone Wars, the Galactic Empire spared no expense to build a massive fleet of warships to enforce Imperial rule, intimidate defenseless worlds, and destroy all opposition. However, the Imperial Navy underestimated Rebel Alliance fighter pilots, who flew X-wing, Y-wing, A-wing, U-wing and B-wing starfighters, and whatever else they could obtain to fight their Imperial enemies. Decades later, Resistance pilots would fly next-generation versions of Rebel starfighters against the First Order. The Rebel Starfighters Owners' Workshop Manual presents a thorough history of the starfighters that served the Rebel Alliance and the Resistance. The history includes

design origins, production, and modifications for each Rebel starfighter, and is fully illustrated with numerous photographs, schematics, exploded diagrams, and computer-generated artwork by Star Wars vehicle experts Chris Reiff and Chris Trevas. Early February in 2020, Canon, arguably the best camera producer in the globe today and a giant creator of digital solutions, revealed the aesthetic Canon EOS Rebel T8i/850D, a beauty that speaks more pleasantly than its tag - Rebel. The camera was unveiled as a high-performing device and brandished with high-quality features. The picturing device is easily Canon's most populous Digital Single-Lens Reflex (DSLR) camera line manufactured in the last few years. Likewise, the most intriguing aspect of it is that it gives a soft landing to those who are previously most exposed to Smartphones and other picturing devices. This leverage means that neophytes do not have to bother themselves with getting abreast with the technicalities of the camera. Canon, with this design, has provided an incredible performance level, which gives users control over the device. It has also been given an affordable and supportive setup for beginners and more experienced users. Embodied in the Canon EOS Rebel T8i/850D is a 24.1-megapixel Advanced Photo System type-C (APS-C) size sensor which is similar to the kind of sensor found in one of Canon's top designs, the T7i camera. Although, the image quality between both cameras is nearly identical, with the T8i given a little nudge. However, as an advantage, Canon placed in the T8i a DIGIC eight image processor which allows for the filming of Ultra High Definition (UHD) 4k video at 24 frames per second.
