It remains the innovative series teachers and students have grown to love, while incorporating suggestions from teachers and students all over the world. Suggested daily lesson plans, suggested assignments following each lesson plan, teaching tips for each unit, suggested examinations for the semester and answer keys for the written exercises and unit review worksheets. Turner, this edition includes plenty of practice exercises as well as new Next Generation NCLEX® (NGN) case studies to prepare you for the NGN exam. UNIQUE! Useful FAQs and answers in each chapter are based on years of classroom questions compiled by the author. UNIQUE! Rapid Practice quizzes provide practice problems following each new topic, making it easy to master both math concepts and drug calculation at the same time. Mnemonics offer shortcuts to make memorization easier, and save time in learning. Red arrow alerts call attention to potential math errors and patient safety issues. High-risk drug icons are used to highlight potentially dangerous drugs. QSEN competencies are included where appropriate. Multiple choice-format questions at the end of each chapter help you review the material and prepare for the NCLEX® exam. Chapter finals boost your understanding by providing additional practice with the major concepts covered in each chapter; the answer key shows how to work out the problems.
