With clear facts and answers to the questions kids six to ten ask most, this adaptation of Lee Strobel's bestselling The Case

for a Creator uses kid-friendly language, examples, and easy-to-understand information to introduce children to the research, eyewitness accounts, and evidence behind the questions of whether God created the universe, what science tells us about our world, and what those answers mean for us and our faith. Whether they've grown up in the church or are encountering faith for the first time, The Case for a Creator for Kids is the perfect resource to answer the questions about God kids 6-10 ask most. Inside, readers will discover: An introduction to the historical evidence, expert testimonies, extensive research, and scientific proof that back up what the Bible says Scientific research that covers cosmology (how the universe began), DNA, physics, astronomy, and more to look at how the way our world works connect with Scripture Answers for why Christians believe what they do Kid-friendly stories and examples that make the facts easy to understand Ways to talk to other people about God and share what they know The Case for a Creator for Kids: Is a solid source of information that looks at all sides of the issue to present solid evidence behind each conclusion and fact about the Christian faith Has illustrations and callout graphics to make the topics

engaging for kids six and up Is an excellent resource for Sunday schools, church libraries, and homeschooling This book can be used on its own or alongside The Case for Christ for Kids, The Case for Faith for Kids, The Case for Grace for Kids, and The Case for Miracles for Kids to help children with faith development and answer questions they wonder about most. Does God exist? Which is true? Evolution, creation...or both? Are we no more than meaningless collisions of molecules? Or do we owe our existence to a Creator, who has willed us (and everything else) into being, and who has a plan and purpose for our lives? The Reality of God addresses these all-important questions by providing an introductory overview of key scientific evidence, philosophical reasons, and insights drawn from human nature demonstrating God's existence. In simple, accessible language, and well-supported by scientific experts, author Steven Hemler guides the reader through the most compelling evidence for the existence of God. Hemler shows how natural sciences such as biology, chemistry and physics far from disproving religious belief suggest and reveal the existence of a Creator at every turn. Those seeking sound reasons and credible science supporting

belief in God will cherish this easy-to-read book. The Reality of God provides:

- An opportunity to address doubts about God's existence
- Persuasive reasons for belief
- Arguments showing the compatibility of faith and reason
- Answers to the evolution vs. creation debate

The Reality of God puts forth in layman's terms how science and the natural world point to God's existence. Anyone seeking answers to life's deepest question will find in author Steven Hemler an indispensable guide.

Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way. The go-to entrepreneurial guide for

establishing your platform, building your audience, and monetizing your skills and services on Clubhouse, the audio-only social media app. On a social media app with more than 10 million users and a plethora of dynamic voices jostling for attention, how do you stand out from the noise? How do you draw people to your particular stage, and how do you convert the casual sharing of your unique expertise into a tangible revenue stream? This is the creator economy that we live in, and Clubhouse is the most effective place to organically grow your audience with the most basic of business resources: your networking capability. In *The Clubhouse Creator*, Gary Henderson, founder of DigitalMarketing.org, reveals his tried-and-true strategies on Clubhouse for:

- finding your niche audience
- integrating into the flow of social circles and conversations
- conveying the value of your goods or services
- monetizing your knowledge and expertise

By using Gary's 7-Figure Clubhouse Funnel, you will be able to generate tangible sales and revenue and establish a core element of your marketing strategy. Now is the time to step fully into an abundance mindset and accelerate your success. New York Times bestselling author Lee Strobel trains his investigative sights on the hot-button question: is it really credible to believe God intervenes supernaturally in people's lives today? This provocative book starts with an unlikely interview in which

America's foremost skeptic builds a seemingly persuasive case against the miraculous. But then Strobel travels the country to quiz scholars to see whether they can offer solid answers to atheist objections. Along the way, he encounters astounding accounts of healings and other phenomena that simply cannot be explained away by naturalistic causes. The book features the results of exclusive new scientific polling that shows miracle accounts are much more common than people think. What's more, Strobel delves into the most controversial question of all: what about miracles that don't happen? If God can intervene in the world, why doesn't he do it more often to relieve suffering? Many American Christians are embarrassed by the supernatural, not wanting to look odd or extreme to their neighbors. Yet, *The Case for Miracles* shows not only that the miraculous is possible, but that God still does intervene in our world in awe-inspiring ways. Here's a unique book that examines all sides of this issue and comes away with a passionate defense for God's divine action in lives today. Also available: *The Case for Miracles* Spanish edition, kids' edition, and student edition. Now you can discover answers to the most important questions in life (Who am I? What is my purpose in life? Who or what is God?), when you read *Creator, Protector, Destroyer* by J.R. Picken, Ph.D., M.D. For over a thousand years, there has been a spiritual system hidden in the area now known as Kashmir.

This beautiful land (often referred to as the Switzerland of the East) is located at the northern tip of India and has Pakistan, Afghanistan, and China as neighbors. There is political unrest there. There is also great spirituality that is little known in the West. It is called Kashmir Shaivism. Its message is both simple and radical: each of us is God, equal parts creator, protector, and destroyer—and, because we are all God, we are each perfect at our core. ·Discover the secrets of Swami Lakshmanjoo, the last living Shaivite master ·Learn this ancient theory of Divinity ·Uncover the true nature of consciousness ·Realize how you can become nonviolent Creator, Protector, Destroyer is the first and only nonacademic book on Kashmir Shaivism; it is intended to be read by anyone. It is also a passionate, personal journey of discovery and realization. Dr. Picken traveled to Kashmir, where he studied with Swami Lakshmanjoo. The deep insights of Shaivism will help you understand why your true identity is Divine and how you can cast aside feelings of isolation, loneliness, and powerlessness forever. The wisdom and spirituality you will find in Creator, Protector, Destroyer will help you experience empowering truths about yourself and the world. It will transform your life forever. Get Creator, Protector, Destroyer today. Was God telling the truth when he said, "You will seek me and find me when you seek me with all your heart"? In The Case for Faith, bestselling author, journalist,

and former atheist Lee Strobel turns his investigative skills to the most persistent emotional objections to belief in God--the eight "heart barriers" to faith: "Since evil and suffering exist, a loving God cannot" "Since miracles contradict science, they cannot be true" "Evolution explains life, so God isn't needed" "God isn't worthy of worship if he kills innocent children" "It's offensive to claim Jesus is the only way to God" "A loving God would never torture people in Hell" "Church history is littered with oppression and violence" "I still have doubts, so I can't be a Christian" This book is for those who may be feeling attracted to Jesus but who are faced with difficult questions standing squarely in their path. For Christians, it will deepen their convictions and give them fresh confidence in defending their faith to skeptical friends, or during the hardest of times, when they have to defend their faith to themselves in moments of doubt. Also available: The Case for Faith Spanish edition, kids' edition, and student edition. Plus, be sure to check out Lee Strobel's entire collection of Case for... books: The Case for Christ investigates the historical evidence for Jesus The Case for a Creator explores the scientific evidence for God The Case for Grace uncovers the "how" and "why" behind God's amazing grace . . . and more! The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions.

According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. Our purpose with You Are the Creator, Seven Powerful Principles to Engineer the Life You Deserve is to inspire you to visualize your possibilities; encourage you to develop your full potential, and to have the confidence to act on the opportunities these principles will create for you. Be the Change you want to see You Are the Creator reminds you that there is no shortage of opportunities in the world. Shortages of opportunities are only limited to your ability to think creatively and empowers you to think and act outside the box. You are What You Think The power of your presence makes a difference in everyone that you encounter. It also affirms that change begins and ends with you. Award-winning reporter and author Lee Strobel uses his investigative skills to address the primary objections to Christianity. Ever since it was demonstrated in the 1920s that the universe, with its trillions of galaxies, is caught up in a process of steady expansion, it became evident that it must have originated from an "initial singularity," a "Big Bang," which gave rise to the formation of subatomic parts, atoms, molecules, clouds of gas, and finally, stars and galaxies. Running this expansion back in time, scientists began to reckon with the miracle of an evolving universe of which we are the outcome: the iron in our blood

has been formed in the stars. This book gives an overview of the cosmologies that were in vogue in antiquity--the Jewish and Christian concepts of Creation, and the classical thinkers in Greek cosmology: Plato, Aristotle, and Ptolemy--and in modern times, Copernicus, Galileo, Kepler, and Newton. The book brings us right down to the present day with a careful and readable treatment of the scientific innovations inaugurated by Einstein and the specialists in quantum physics, and to recent developments in astrophysics. This path of exploration opens the avenue for imagining a Creator God who is so generous that he invites creation to share in his own creativity. Who Was Jesus? A good man? A lunatic? God? There's little question that he actually lived. But miracles? Rising from the dead? Some of the stories you hear about him sound like just that--stories. A reasonable person would never believe them, let alone the claim that he's the only way to God! But a reasonable person would also make sure that he or she understood the facts before jumping to conclusions. That's why Lee Strobel--an award-winning legal journalist with a knack for asking tough questions--decided to investigate Jesus for himself. An atheist, Strobel felt certain his findings would bring Christianity's claims about Jesus tumbling down like a house of cards. He was in for the surprise of his life. Join him as he retraces his journey from skepticism to faith. You'll consult expert testimony as you

sift through the truths that history, science, psychiatry, literature, and religion reveal. Like Strobel, you'll be amazed at the evidence--how much there is, how strong it is, and what it says. The facts are in. What will your verdict be in The Case for Christ? "My road to atheism was paved by science... but, ironically, so was my later journey to God." Former atheist Lee Strobel has discovered that science, far from being the enemy of faith, now provides a solid foundation for belief in God. New scientific discoveries point to the incredible complexity of our universe, a complexity best explained by the existence of a Creator. This revised six-session study (DVD/digital video) invites participants to encounter this evidence delivered in a compelling conversational style. Join Strobel in reexamining the theories that once led him away from God. Pastors, small group leaders, and individuals seeking resources that answer tough questions about the existence of God will find compelling answers in the Case for a Creator study. Sessions include: Science and God Doubts about Darwinism The Evidence of Cosmology The Fine-tuning of the Universe The Evidence of Biochemistry The DNA and the Origin of Life Designed for use with the Case for a Creator Revised Video Study 9780310699606 (sold separately). In this collection, Templeton brings together a gallery of respected scientists to reflect on the evidence that find through their scientific research for design and

purpose in the creation and workings of the universe. Contributors include Owen Gingerich, Russell Stannard, Paul Davies, John Polkinghorne, and others. Few of us can venture outside on a clear, dark night and not pause for a silent, reflective look at the stars. For countless centuries people have felt a sense of wonder about the heavens. How did our universe come into being? Has it always been here? Is our existence due to random chance or supernatural design? Is God "out there"? If so, what is He like? Traditionally, the church has answered such questions with Scripture, while science has contributed theories and formulas of its own. Torn between a deep respect for church doctrines and an intellectual need for answers that support what their senses are telling them, many Christians have avoided such discussions altogether. Actually, the two sides are no longer that far apart. In The Creator and the Cosmos, astrophysicist Dr. Hugh Ross explains how recent scientific measurements of the universe have clearly pointed to the existence of God. Whether you're looking for scientific support for your faith or new reasons to believe, The Creator and the Cosmos will enable you to see the Creator for yourself. Digital Storytelling shows you how to create immersive, interactive narratives across a multitude of platforms, devices, and media. From age-old storytelling techniques to cutting-edge development processes, this book covers

creating stories for all forms of New Media, including transmedia storytelling, video games, mobile apps, and second screen experiences. The way a story is told, a message is delivered, or a narrative is navigated has changed dramatically over the last few years. Stories are told through video games, interactive books, and social media. Stories are told on all sorts of different platforms and through all sorts of different devices. They're immersive, letting the user interact with the story and letting the user enter the story and shape it themselves. This book features case studies that cover a great spectrum of platforms and different story genres. It also shows you how to plan processes for developing interactive narratives for all forms of entertainment and non-fiction purposes: education, training, information and promotion. Digital Storytelling features interviews with some of the industry's biggest names, showing you how they build and tell their stories. Lee Strobel's bestselling books on creation is adapted for a new generation. "Based on in-depth interviews with more than 200 leading entrepreneurs, [including the founders of LinkedIn, Chipotle, eBay, Under Armour, Tesla Motors, SpaceX, Spanx, Airbnb, PayPal, JetBlue, Gilt Group, Theranos, and Dropbox], a business executive and senior fellow at [the Harvard Kennedy School] identifies the six essential disciplines needed to transform your ideas into real-world successes, whether you're an

innovative manager or an aspiring entrepreneur"-- Sean McDowell and Jonathan Morrow have penned an accessible yet rigorous look at the arguments of the New Atheists. Writing from a distinctively Christian perspective, McDowell and Morrow lay out the facts so that the emerging generation can make up their own mind after considering all the evidence. "Art is often viewed as being inherently spiritual. But what does it mean to describe an experience of art or beauty as spiritual? Is there a relationship between the spiritual experience a person has in the presence of a work of art and the Holy Spirit of Christian faith? Theologian, musician, and educator Steven Guthrie examines particular areas of overlap between spirituality, human creativity, and the arts with the goal of sharpening and refining how we speak and think about the Holy Spirit. Through his exploration of the many different connections between art and spirituality, Guthrie uses the arts as a creative lens for exploring the Holy Spirit and offers a unique introduction to pneumatology. He also introduces an important idea from the early church that is now unfamiliar to many Christians: the Holy Spirit is the humanizing Spirit, whose work is to remake our humanity after the image of the perfect humanity of Jesus Christ. This clear, engaging theology of the arts will be of interest to professors and students in theology and the arts, pneumatology, and

systematic theology courses as well as thoughtful lay readers, Christian artists, worship leaders, and pastors" -- Publisher description. OUR DEAR YOUNG MEN AND YOUNG WOMEN, we have great confidence in you. You are beloved sons and daughters of God and He is mindful of you. You have come to earth at a time of great opportunities and also of great challenges. The standards in this booklet will help you with the important choices you are making now and will yet make in the future. We promise that as you keep the covenants you have made and these standards, you will be blessed with the companionship of the Holy Ghost, your faith and testimony will grow stronger, and you will enjoy increasing happiness. Join investigative journalist and bestselling author Lee Strobel as he embarks on his life-changing quest to solve the riddle of grace. Along the way, you'll find the undeniable evidence of grace in the true stories of racists, addicts, and even murderers who have found new hope and purpose--all through the redemptive power of God's amazing grace. In *The Case for Grace*, Lee offers an accessible explanation of the theology of God's grace, shown through the incredible, dramatic, can't-put-it-down stories of people whose lives were changed by the gift of grace--true accounts of people whose transformation and renewal are so radical that they seem to be best explained as the work of a gracious God. Lee draws upon his own journey from atheism to

Christianity to explore the depth and breadth of God's redeeming love for spiritually wayward people, traveling thousands of miles to capture the inspiring stories of everyday people whose values have been radically changed and who have discovered the "how" and "why" behind God's amazing grace. Each story that Strobel shares in *The Case for Grace* contributes a piece to the puzzle of grace, showing us: How grace goes beyond forgiveness to acceptance and even adoption by God How it restores hope when none is left; how it extends to the most heinous circumstances How it allows us to forgive those who caused our most intimate wounds--and even to forgive ourselves Through it all, you will be encouraged as you see how God's grace can revolutionize your life--starting today. Discover the astonishing evidence for intelligent design in this New York Times bestselling book by award-winning journalist Lee Strobel. "My road to atheism was paved by science . . . but, ironically, so was my later journey to God," Strobel says. During his academic years, Lee Strobel became convinced that God was obsolete, a belief that colored his journalism career. Science had made the idea of a Creator irrelevant--or so Strobel thought. But today science points in a different direction. A diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed. At the same time, Darwinism has faltered in the face of concrete

facts and hard reason. Has science discovered God? At the very least, it's giving faith an immense boost, as new findings emerge about the incredible complexity of our universe. Join Strobel as he reexamines the theories that once led him away from God. Through his compelling and highly readable account, you'll encounter the mind-stretching discoveries from cosmology, cellular biology, DNA research, astronomy, physics, and human consciousness that present compelling evidence in *The Case for a Creator*. Also available: *The Case for a Creator* small group video study and study guide, Spanish edition, kids' edition, student edition, and more. The NIV is the world's best-selling modern translation, with over 150 million copies in print since its first full publication in 1978. This highly accurate and smooth-reading version of the Bible in modern English has the largest library of printed and electronic support material of any modern translation. The renowned science writer, mathematician, and bestselling author of *Fermat's Last Theorem* masterfully refutes the overreaching claims the "New Atheists," providing millions of educated believers with a clear, engaging explanation of what science really says, how there's still much space for the Divine in the universe, and why faith in both God and empirical science are not mutually exclusive. A highly publicized coterie of scientists and thinkers, including Richard Dawkins, the late Christopher Hitchens, and

Lawrence Krauss, have vehemently contended that breakthroughs in modern science have disproven the existence of God, asserting that we must accept that the creation of the universe came out of nothing, that religion is evil, that evolution fully explains the dazzling complexity of life, and more. In this much-needed book, science journalist Amir Aczel profoundly disagrees and conclusively demonstrates that science has not, as yet, provided any definitive proof refuting the existence of God. *Why Science Does Not Disprove God* is his brilliant and incisive analyses of the theories and findings of such titans as Albert Einstein, Roger Penrose, Alan Guth, and Charles Darwin, all of whose major breakthroughs leave open the possibility-- and even the strong likelihood--of a Creator. Bolstering his argument, Aczel lucidly discourses on arcane aspects of physics to reveal how quantum theory, the anthropic principle, the fine-tuned dance of protons and quarks, the existence of anti-matter and the theory of parallel universes, also fail to disprove God. Highlights various manmade inventions and shows that their origins are in things that God created first. A book for young Christians to help answer questions about their faith. A curriculum guide for a six session class on how a married couple can use problems to strengthen their marriage. Charts Lee Strobel's personal journey from spiritual skepticism to a profound faith

in God. In this book, we have hand-picked the most sophisticated, unanticipated, absorbing (if not at times crackpot!), original and musing book reviews of "The Case For A Creator: A Journalist Investigates Scientific Evidence That Points Toward God." Don't say we didn't warn you: these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. You expect to get pregnant in the next five minutes. 3. You've heard it all. In *The Case for a Creator—Student Edition*, best-selling author and former atheist Lee Strobel and popular writer Jane Vogel take younger readers on a remarkable investigation into the origin of the universe, interviewing many of the world's most renown scientists and following the evidence wherever it leads. Their findings—presented in the third blockbuster "Case" book student edition—offer the most compelling scientific proof ever for intelligent design. Perfect for youth groups and young people eager to rebut the Darwinian and naturalistic views taught so commonly in schools. Explores provocative questions about modern scholarship and conspiracy theories that debunk the traditional Christ, inviting readers to evaluate the arguments and evidence presented by Muslim scholars, liberal theologians, and atheists, and reach their own verdict. Based on the eye-

opening best-selling series, this 90-day devotional for kids ages 9-12 explores the life of Jesus and what it means to be a Christian, while also tackling tough questions kids ask about God. For kids who want to learn more about their faith so they can share with others, this devotional uses light-hearted prose, illustrations, historical facts, research and true stories to bring to life the miracles, ministry and way of life of Jesus. The purpose of writing this book is to expose irrational religious teachings and encourage readers to think independently. The author questions the assumption that faiths are the revelations of our Creator. There are multiple questions to pose regarding this topic: what is the soul, and what happens after death? Why are there so many different religions, holy books, and worship rituals? Who were prophets? Why did god conceal himself from humanity? There is no god, but humans created brand-name gods of religions. Organized religions are spending billions of dollars every year in marketing their brand-name-god as the Creator and are profiting from it handsomely. Millions are making millions in this business. Cut-throat competition, winner takes all, and losers are forced to submit. Nations with standing armies are willing to give their all to protect their brand-name-god. Religion is the 'Brand' and the god of the faith 'Brand-name' god (Logo). The prophet is the 'CEO, ' and the followers are loyal 'Customers.' God cannot be without a religion, and

Creator does not need one. Is there a god who can deliver justice in this world and not keep making promises, or keep issuing threats? To keep our god relevant in all situations, we continually flip-flop, and that makes everything foolproof. The author makes a passionate case for Creator, who is utterly incomprehensible, establishes the laws of nature to manage the affairs of the universe, is impartial and does not interfere in human affairs. Making Creator a party in humans struggles is self-serving. Creator is not a god of any religion. Creator does not show fake miracles, write mythical stories, make false promises, or write defective laws; One is exceptionally neutral and loves all. Creator and the universe is One. God does not exist, and Creator does not support any religion. Creator has no rival god to eliminate. One is not a Lord and does not demand or rewards worship. Don't need followers. Creator created humans capable of taking care of themselves so, humans don't need a message coming from the heave. The founders of religions were spiritual leaders who served humanity to the best of their abilities; however, they were not commissioned by any god, and they were not infallible. The message from a founder of a religion was accepted as the message from a brand-name god that the founder created for this purpose, who then is called the Creator, and that's a grand deception. Believers criticize science because they are

concerned that science will prove that their religious teachings are false. Sun, Moon, and Stars are planets that revolve around each other in galaxies and not around the Earth, which itself is a small planet. And there is no sky but infinite space. Please, god, take note of it. Just because we can't explain something through science, does not mean that god is doing it. Religions gave us divine kings, feudal lords, slavery, and cast system. Genocides, inquisitions, and witch burnings. Persecutions, cutting of limbs and stoning to death. Wife beating, honor killing, and blasphemy laws. All on the name of god. The author encourages readers to live their lives, guided by their conscience, and enjoy it while they have it. No smoke screens and no make-believe worlds, you obey the law and do not worry. It's your deeds and not your beliefs that matter. Relax, be good, and be happy. With engaging rhyme and stunning illustrations, this picture book sparks readers' imaginations with the big idea that God created human beings to make, model, and work like Him. The Creator in You is a book that children, graduates, and even many adults will treasure for a lifetime. This fresh perspective on the creation account from the Bible's first book, Genesis, helps readers see that "the sixth day" wasn't the end of creation—it was "just the beginning." "Before His day off, God had one more to-do. On His sixth day creating, God chose to make you." God made kids to create like he does—by filling the world with sand

castles and s'mores today, and businesses and books tomorrow. Through inspiring illustrations and text, readers of all ages will feel connected to God's story of creation in a deeply personal way, inspiring them to view their current and future work with purpose, enthusiasm, and joy. Many of the ills of our society can be traced to the sense of worthlessness that afflicts so many people today. If we only understood in the depths of our being how valuable we are in the eyes of our Creator, we could learn to obey Christ's commandment to love our neighbor as ourselves. Priest and counselor David Fontes marries the best insights of psychology with those of the spiritual tradition of the Orthodox Church to point the way toward this understanding. Content-hosting websites, videoconferencing apps, grade- or subject-focused social media accounts: with such a dizzying array of mechanical and virtual help at our disposal, it can be a challenge for educators to know where to even start. Educator and technology consultant Monica Burns can relate, which is why she wrote this book: to share strategies, tools, and insights that teachers can use, regardless of subject or grade level, to effectively incorporate technology in the classroom. Focusing on the "three Cs" of technology implementation—creation, curiosity, and collaboration—Tasks Before Apps offers K-12 teachers Detailed advice for (and copious examples of) tech-

infused lessons that help students meet learning goals while also developing vital digital citizenship skills. Customizable checklists and graphic organizers for planning tech-enabled activities; choosing appropriate programs, devices, and platforms; and setting unit and lesson goals. Recommendations for and links to apps and online resources that can facilitate and energize learning. Reflection and brainstorming questions for use in book clubs and PLC discussions. Knowing how to navigate technology wisely—how to communicate effectively on posts and message boards, locate credible information on search engines, and select efficient, cost-effective equipment—is essential for both teachers and students. Whether you are a novice or a veteran, teach kindergarten students or high school seniors, this book is an indispensable guide to furthering academic skills, social development, and digital aptitude in the classroom.
