**Cases and Materials on Torts** Jan 05 2022 Cases and Materials on Torts preserves historical and conceptual continuity between the present and the past, while addressing the most significant contemporary controversies in such fast-moving areas like public nuisance, global warming, and product liability, with new litigation against internet providers. Toward these dual ends, Richard A. Epstein and Catherine M. Sharkey have retained in the Twelfth Edition the great older cases, both English and American, that have proved themselves time and again in the classroom, and which continue to exert great influence on the modern law. Our book also provides a rich exploration of the dominant corrective justice and law-and-economics approaches to tort law, as exemplified both in the retained and new cases and materials. New to the Twelfth Edition: Extensive new treatment of public nuisance cases to address the profound expansion of the once-sleepy area of public nuisance law into the realms of the opioid crisis, toxic torts, and global warming. Major reconsideration of who counts as a seller in the chain of distribution for goods sold online with product liability updates for various forms of e-commerce, such as Amazon's liability for defective products sold on its site. Updates to incorporate two major new Torts Restatements on Intentional Harms and Liability Insurance. The Reforms of the Michigan No-Fault Legislation Enhanced treatment of privacy in the era of "Big Data" to address trend of large data collectors like Facebook and Google to determine what is reasonable online, incorporating major privacy legislation such as California's Consumer Privacy Act and the European GDPR (General Data Protection Regulation). Expansion of materials that address race and gender disparities in the setting of damages awards; and, in the realm of punitive damages innovative remedies directing some portion of the award to public interest groups. Professors and students will benefit from: Clear organizational framework of the book. Important lines of cases that help understand legal reasoning and the evolution of precedent Inclusion of key academic commentary and elaboration of central intellectual disputes over the nature and function of the tort law Ability to pick and choose modules of interest – such as defamation, privacy, and economic harms – which are of increasing importance in real world of tort litigation. **Cases and Materials on Modern Antitrust Law and Its Origins** Aug 12 2022 This text organizes cases over four periods: a 25-year period from 1890 to 1914, in which most of today's issues were foreshadowed; a 25-year period from 1915 to 1939, in which the 'rule of reason' forced courts to investigate the actual consequences of business practices; a 35-year period from 1940 to 1975, in which the per se rule and industry concentration provided the predominant models for analysis; and the modern period of over 40 years, which is a synthesis of the second and third periods. The new Seventh Edition describes the many major changes in antitrust law and policy that the present leaders of the FTC and the Antitrust Division at the Department of Justice are attempting to make and includes questions after many of the modern cases that require students to evaluate those proposed changes. The historical approach the authors take will be particularly helpful to students because the new leadership is urging a return to the approach to antitrust law that the Supreme Court embraced before 1974. The book includes all of the major cases that illustrate that approach. The new edition includes all of the important recent court opinions, including the Supreme Court's opinions in *Ohio v. American Express* and *NCAA v. Alston* and the D.C. Circuit's opinion in *U.S. v. AT&T*.

CasebookConnect offers you what you need most to be successful in your law school classes—portability, meaningful feedback, and greater efficiency. Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs. Although it starts with “Agreement” and moves to “Consideration,” it is also designed for teachers who prefer to begin with “Consideration” or “Remedies.” It can be used in courses that both include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit from: Coverage of the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented The entire book’s approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms.
