Homelessness May 13 2020 Multiple federal programs provide homelessness assistance through programs targeted to those experiencing homelessness or through mainstream programs that broadly assist low-income populations. Programs' definitions of homelessness range from including primarily people in homeless shelters or on the street to also including those living with others because of economic hardship. GAO was asked to address (1) the availability, completeness, and usefulness of federal data on homelessness, (2) the extent to which research identifies factors associated with experiencing homelessness, and (3) how differences in definitions and other factors impact the effectiveness of programs serving those experiencing homelessness. GAO reviewed laws, agency regulations, performance and planning documents, and data as well as literature on homelessness, and spoke with stakeholders, such as government officials and service providers, about potential barriers. GAO recommends that Education, HHS, and HUD (1) develop a common vocabulary for homelessness; and (2) determine if the benefits of collecting data on housing status in targeted and mainstream programs would exceed the costs. To the extent that the agencies explicitly addressed the recommendations in their comments, they agreed with them. Appended are: (1) Objectives, Scope and Methodology; (2) Bibliography of Studies GAO Reviewed That Analyze Factors Associated with Homelessness; (3) Comments from the Department of Education; (4) Comments from the Department of Health and Human Services; (5) Comments from the Department of Housing and Urban Development; (6)

Comments from the Executive Director of the U. S. Interagency Council on Homelessness; and (7) GAO Contact and Staff Acknowledgments. (Contains 3 tables, 2 figures and 48 footnotes.).

The Curious Incident of the Dog in the Night-Time Apr 11 2020 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Academic Vocabulary in Learner Writing Aug 28 2021 Academic vocabulary is in fashion, as witnessed by the increasing number of books published on the topic. In the first part of this book, Magali Paquot scrutinizes the concept of 'academic vocabulary' and proposes a corpus-driven procedure based on the criteria of keyness, range and evenness of distribution to select academic words that could be part of a common-core academic vocabulary syllabus. In the second part, the author offers a thorough analysis of academic vocabulary in the International Corpus of Learner English (ICLE) and describes the factors that account for learners' difficulties in academic writing. She then focuses on the role of corpora, and more particularly, learner corpora, in EAP material design. It is the first monograph in which Granger's (1996) Contrastive Interlanguage Analysis is used to compare 10 ICLE learner sub-corpora, in order to distinguish between linguistic features that are shared by learners from a wide range of mother tongue backgrounds and unique features that may be transfer-related.

Vocabulary Games for the Classroom Mar 03 2022 Make direct vocabulary instruction fun and successful with this simple, straightforward, and easy-to-use book. Hundreds of critical vocabulary terms handpicked by Dr. Marzano cover four content areas and all grade levels. Each game identifies the appropriate grade level and subject area, as well as whether or not the students should already be familiar with the vocabulary.

USING SCAFFOLDING TECHNIQUE TO IMPROVE VOCABULARY ACHIEVEMENT OF THE FIFTH GRADE PUPILS OF SD NEGERI 1 SEMBAWA BANYUASIN III Jun 06 2022 This is an experimental study which is aimed to see whether or not there was a significant difference in vocabulary achievement between the pupils who were taught by using scaffolding technique and those who were taught by using conventional technique. For this purpose, a non equivalent control group design was used. The population was the fifth grade pupils at SD Negeri 1 Sembawa Banyuasin III in the academic year of 2009/2010. The total number of population was 47 pupils. The sample involved in this study was all pupils in the population. The pupils were grouped into two: the experimental group and the control group. The experimental group consisted of 24 pupils participated in the 10-week intervention of scaffolding technique while the control group consisted of 23 pupils received typical classroom instruction without intervention of scaffolding technique. To collect the data, test and

questionnaire were used. To assess pupil ' s vocabulary knowledge, the writer proceeded the pre-test at the beginning of the research and followed the posttest at the end of the research. The vocabulary achievement was analyzed by examining vocabulary gains that participants made from the pre-test to the post-test. To find out whether there was a statistically significant difference on pupils ' vocabulary learning achievement before and after the treatment, the t-analysis was used. The result of the study indicated that there was a significant difference between the pupils Who were taught by using scaffolding technique and those who were taught by using common technique. It was found that the t-obtained value was 4.515 at significant value of 0.05 for two tailed test and degree of freedom 45, t-table value was 1.6794. Since the value of t-obtained is higher than that of t table, the null hypothesis was rejected and the alternative hypothesis was accepted. Based on the result of the questionnaire, it was found that the total score of positive response was 225 of all 24 pupils. This means that 93. 75% pupils who participated in 10- week intervention of scaffolding technique had positive response to all of the statements in the questionnaire. In other words, the pupils agreed that the use of scaffolding technique in vocabulary learning had positive effects on their vocabulary learning.

504 Absolutely Essential Words Oct 30 2021 This updated vocabulary-building book presents the essential core of words that students at middle-school and higher levels must know and be able to use fluently for academic success. These words also constitute essential vocabulary for ESL students and test-takers, as well as others who speak English as their second language. The authors present a series of brief word-building lessons, each introducing 12 new words that are presented in sample sentences and short articles. Fill-in-the-blanks exercises help students measure their word-building progress. Informed with clear yet simple definitions and examples, readers will find their vocabulary has improved dramatically.

The talking heads experiment : origins of words and meanings Aug 16 2020 The Talking Heads Experiment, conducted in the years 1999-2001, was the first large-scale experiment in which open populations of situated embodied agents created for the first time ever a new shared vocabulary by playing language games about real world scenes in front of them. The agents could teleport to different physical sites in the world through the Internet. Sites, in Antwerp, Brussels, Paris, Tokyo, London, Cambridge and several other locations were linked into the network. Humans could interact with the robotic agents either on site or remotely through the Internet and thus influence the evolving ontologies and languages of the artificial agents. The present book describes in detail the motivation, the cognitive mechanisms used by the agents, the various installations of the Talking Heads, the experimental results that were obtained, and the interaction with humans. It also provides a perspective on what happened in the field after these initial groundbreaking experiments. The book is invaluable reading for anyone interested in the history of agent-based models of language evolution and the future of Artificial Intelligence.

Academic Language Mastery: Vocabulary in Context Sep 16 2020 By now it ' s a given: if we ' re to help our ELLs and SELs access the rigorous demands of today ' s content standards, we must cultivate the " code " that drives school success: academic language. Look no further for assistance than this much-anticipated series from Ivannia Soto, in which she invites field authorities Jeff Zwiers, David and Yvonne Freeman, Margarita Calderon, and Noma LeMoine to share every teacher ' s need-to-know strategies on the four essential components of academic language. The subject of this volume is vocabulary. Here, Margarita Calderon reveals how vocabulary is best taught as a tool for completing and constructing more complex messages. With this book as your roadmap, you ' ll learn how to: Teach high-frequency academic words and discipline-specific vocabulary across content areas Utilize strategies for teaching academic vocabulary, moving students from Tier 1 to Tiers 2 and 3 words and selecting appropriate words to teach Assess vocabulary growth as you go Our vocabulary instruction must come from the texts our ELLs and SELs are about to read, not from a set of activities that teach words in

isolation. This guidebook will help you get started as early as tomorrow. Better yet, read all four volumes in the series and put in place an all-in-one instructional plan for closing the achievement gap.

Among the Hidden Feb 14 2023 In a future where the Population Police enforce the law limiting a family to only two children, Luke, an illegal third child, has lived all his twelve years in isolation and fear on his family's farm in this start to the Shadow Children series from Margaret Peterson Haddix. Luke has never been to school. He's never had a birthday party, or gone to a friend's house for an overnight. In fact, Luke has never had a friend. Luke is one of the shadow children, a third child forbidden by the Population Police. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to?

Teaching and Learning Vocabulary Sep 09 2022 Although proficiency in vocabulary has long been recognized as basic to reading proficiency, there has been a paucity of research on vocabulary teaching and learning over the last two decades. Recognizing this, the U.S. Department of Education recently sponsored a Focus on Vocabulary conference that attracted the best-known and most active researchers in the vocabulary field. This book is the outgrowth of that conference. It presents scientific evidence from leading research programs that address persistent issues regarding the role of vocabulary in text comprehension. Part I examines how vocabulary is learned; Part II presents instructional interventions that enhance vocabulary; and Part III looks at which words to choose for vocabulary instruction. Other key features of this timely new book include: *Broad Coverage. The book addresses the full range of students populating current classrooms--young children, English Language Learners, and young adolescents. *Issues Focus. By focusing on persistent issues from the perspective of critical school populations, this volume provides a rich, scientific foundation for effective vocabulary instruction and policy. *Author Expertise. Few volumes can boast of a more luminous cast of contributing authors (see table of contents). This book is suitable for anyone (graduate students, in-service reading specialists and curriculum directors, college faculty, and researchers) who deals with vocabulary learning and instruction as a vital component of reading proficiency.

World Without Fish Jul 19 2023 A KID ' S GUIDE TO THE OCEAN "Can you imagine a world without fish? It's not as crazy as it sounds. But if we keep doing things the way we've been doing things, fish could become extinct within fifty years. So let's change the way we do things!" World Without Fish is the uniquely illustrated narrative nonfiction account—for kids—of what is happening to the world ' s oceans and what they can do about it. Written by Mark Kurlansky, author of Cod, Salt, The Big Oyster, and many other books, World Without Fish has been praised as “ urgent ” (Publishers Weekly) and “ a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea ” (Paul Greenberg, author of Four Fish). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum. Written by a master storyteller, World Without Fish connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, swordfish—even anchovies— could disappear within fifty years, and the domino effect it would have: the oceans teeming with jellyfish and turning pinkish orange from algal blooms, the seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen, who are the original environmentalists, and scientists, who not that long ago considered fish an endless resource. It explains why fish farming is not the answer—and why sustainable fishing is, and how to help return the oceans to their natural ecological balance. Interwoven with the book is a twelve-page graphic novel. Each beautifully illustrated chapter opener links to the next to form a larger fictional story that perfectly complements the text.

The Use and Abuse of EFL Dictionaries Dec 20 2020 This volume examines some of the ways in which dictionary use has been studied, considers the problems encountered by researchers in this field, and presents a series of experiments which explore fundamental questions concerning the use of dictionaries by learners of English as a foreign language. - Are dictionaries helpful in examinations? Does defining style affect consultation success? Do dictionaries benefit some kinds of learners more than others? How useful are illustrative examples? The author concludes with an analysis of current trends in the design of dictionaries for learners of English, and considers the possible impact of new electronic formats on dictionary use.

It was never about brains or ability. His students simply didn 't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a

student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of workbooks and applications to teach this "Insider's Language" to students around the world.

[A Dictionary of Green Ideas](#) Mar 23 2021 First published in 1988. A Dictionary of Green Ideas collects together the concepts which go to make up a green view of the world. Ecology and the environment, conservation and appropriate technology, politics and philosophy, peace and health, spirituality and world development - all these areas and more are reflected in nearly 1500 entries. The entries range from the very short to full-length essays, reflecting the diversity of the subject matter. All give a clear definition of the meaning of the term and an indication of its etymology and earliest use. But the Dictionary of Green Ideas is much more than simply a list of definitions. The concepts discussed are elaborated upon, interpreted, set in context, exemplified by quotations from a wide range of sources, and related to other entries by means of an extensive network of cross-references. The result is a fascinating and immensely readable book which successfully fulfils a double role as an accessible introduction to green thought, and as a source of reference offering new insights to green thinkers of long standing.

The Evaluation of Forensic DNA Evidence Aug 20 2023 In 1992 the National Research Council issued DNA Technology in Forensic Science, a book that documented the state of the art in this emerging field. Recently, this volume was brought to worldwide attention in the murder trial of celebrity O. J. Simpson. The Evaluation of Forensic DNA Evidence reports on developments in population genetics and statistics since the original volume was published. The committee comments on statements in the original book that proved controversial or that have been misapplied in the courts. This volume offers recommendations for handling DNA samples, performing calculations, and other aspects of using DNA as a forensic tool - modifying some recommendations presented in the 1992 volume. The update addresses two major areas: Determination of DNA profiles. The committee considers how laboratory errors (particularly false matches) can arise, how errors might be reduced, and how to take into account the fact that the error rate can never be reduced to zero. Interpretation of a finding that the DNA profile of a suspect or victim matches the evidence DNA. The committee addresses controversies in population genetics, exploring the problems that arise from the mixture of groups and subgroups in the American population and how this substructure can be accounted for in calculating frequencies. This volume examines statistical issues in interpreting frequencies as probabilities, including adjustments when a suspect is found through a database search. The committee includes a detailed discussion of what its recommendations would mean in the courtroom, with numerous case citations. By resolving several

remaining issues in the evaluation of this increasingly important area of forensic evidence, this technical update will be important to forensic scientists and population geneticists and helpful to attorneys, judges, and others who need to understand DNA and the law. Anyone working in laboratories and in the courts or anyone studying this issue should own this book.

Homelessness Jul 15 2020 Multiple federal programs provide homelessness assistance through programs targeted to those experiencing homelessness or through mainstream programs that broadly assist low-income populations. Programs ' definitions of homelessness range from including primarily people in homeless shelters or on the street to also including those living with others because of economic hardship. This report addressed: (1) the availability, completeness, and usefulness of federal data on homelessness; (2) the extent to which research identifies factors associated with experiencing homelessness; and (3) how differences in definitions and other factors impact the effectiveness of programs serving those experiencing homelessness. Charts and tables.
