Goyal Brothers Prakashan " Do millions of blurry  
notions about the ever-mystic subject of  
astrology intrigue you? Do you want to steer clear  
of all ambiguity that surrounds the mysterious  
phenomenon of life and death? Welcome to Life  
Version 2, a book that will surely unravel some of  
life's biggest and the most intriguing questions.  
God gives us endless opportunities to script our

Life Version 2! Go, grab one..... Abhijeet, 60, is a successful entrepreneur who leads a contented life. Cricket, music and astrology are his deep obsessions. His life is running smooth until an appalling prediction is made that he is going to die within the next six months! This turns his life upside down. He prepares to die and exhibits unprecedented boldness by trying to complete all his pending tasks before he departs from this world. In a strange twist of fate, he does not die as predicted. When he goes in search of the person responsible for making the spectacularly wrong prediction, he unearths a sinister plot. Who is behind this intriguing conspiracy? How does he look at life after his close brush with death? Can he ever live the same life again? Step aboard Life Version 2 and get set to experience the unknown, the very essence of life! " The Mahābhārata has been explored extensively as a work of mythology, epic poetry, and religious literature, but the text's philosophical dimensions have largely been under-appreciated by Western scholars. This book explores the philosophical implications of the Mahābhārata by paying attention to the centrality of dialogue, both as the text's prevailing literary expression and its organising structure. Focusing on five sets of

dialogues about controversial moral problems in the central story, this book shows that philosophical deliberation is an integral part of the narrative. Black argues that by paying attention to how characters make arguments and how dialogues unfold, we can better appreciate the Mahābhārata's philosophical significance and its potential contribution to debates in comparative philosophy today. This is a fresh perspective on the Mahābhārata that will be of great interest to any scholar working in religious studies, Indian/South Asian religions, comparative philosophy, and world literature. Every man's life is governed through dreams. Everyone wants to be the sun and illuminate everyone. But the sun also has to struggle a long time to become the sun. Those who dream of becoming an administrative officer also have to fight with their own mental conflicts from moment to moment. Ashwani, Suryakant and Neelima, the characters of the novel 'Gandhi Chowk', overcome these mental conflicts. This story is the story of Ashwani's preparation for civil service and the obstacles that come in his way after leaving his rugged village and reaching Gandhi Chowk in Bilaspur. How they solve their problems, all this will be seen in this novel. At the same time, it is

also the story of a lover's struggle to get his post after renouncing his elder position in order to get his girlfriend. This story is the story of a common reader. Gandhi Chowk is a story of struggle, dedication and success of the youth who come and prepare. A magisterial overview of the philosophies of the East. 'The time has come for global philosophy to move beyond the model where the West is at the centre of radiating spokes of comparison.' Challenging the notion that Western philosophy is the best or only yardstick against which to judge the so-called 'non-Western' philosophies, Chakravarthi Ram-Prasad sets up a lively debate in which the great thought systems of the East are engaged very much in their own terms. The author's impressive sweep takes him through South Asia east to China and Japan, encompassing 3000 years of philosophy and including the ancient philosophies of India, Jainism, Buddhism, Daoism and Confucianism. At the same time, Ram-Prasad dispels the romantic illusion that there is some common mystical 'wisdom tradition' that binds together the cultures of the East. His aim is to give a sense of the diversity and depth of these philosophical cultures, as well as their sophistication and originality; and to make

comparisons between them to illuminate their varied yet potentially universal appeal. Presents a first-of-its-kind, cross-cultural lens to mental illness through the inspiring story of Gayathri's thirty-year battle with depression. This literary memoir takes readers from her childhood in India where depression is thought to be a curse to life in America where she eventually finds the light within by drawing on both her rich Hindu heritage and Western medicine to spare. As a young girl in Bangalore, Gayathri was surrounded by the fragrance of jasmine and flickering oil lamps, her family protected by Hindu gods and goddesses. But as she grew older, demons came forth from the dark corners of her idyllic kingdom--with the scariest creatures lurking within her. The daughter of a respected Brahmin family, Gayathri began to feel different. "I can hardly eat, sleep, or think straight. The only thing I can do is cry unending tears." Her parents insisted it was all in her head. Because traditional Indian culture had no concept of depression as an illness, no doctor could diagnose and no medicine could heal her mysterious malady. This memoir traces Gayathri's courageous battle with the depression that consumed her from adolescence through marriage and a move to the United States. It was

only after the birth of her first child, when her husband discovered her in the backyard "clawing the earth furiously with my bare hands, intent on digging a grave so that I could bury myself alive," that she finally found help. After a stay in a psych ward she eventually found "the light within," an emotional and spiritual awakening from the darkness of her tortured mind. Gayathri's inspiring story provides a first-of-its-kind cross-cultural view of mental illness--how it is regarded in India and in America, and how she drew on both her rich Hindu heritage and Western medicine to find healing. Five-year-old Dharani was popular in and around Mahadevpur for a rare skill she learned from none other than Lord Shiva. It was a skill she could use in all her lives and in each life, destiny would bring her to Mahadevpur. Years went by and one fateful evening, Dharani stumbled into the village with a deadly arrow stuck in her heart. The truth behind her death remained unknown and the people awaited her return to the village in a new life. Fifty years later, the people of Mahadevpur are excited to see National Award winner, Bhavaani's picture in the newspaper. Is she really Dharani? Will she be able to solve the mystery of her death? 1. The entire syllabus has been divided into sections 2. Questions covered

Economy, General Science, General Knowledge. We all are manav man. Our ancestor is Manu. We all belong to the same family; therefore, in Bharat, we all believe in Vasudhaiva Kutumbakam. Priyavrat had distributed the seven continents among his sons, and all their progeny is spread over everywhere. Deep studies show similarities in languages and names of weekdays, their meanings, and relations. The whole world is one family. The Bible, Koran, Gita, Ramayana, Mahabharata, and Bhagwat all guide us to become great human beings. Manu and Manu-Shatrupa, his wife, decided to go in search of him after living full, glorious lives. Efforts made and consequences are described in Ramcharitmanas by Tulsidas. Knowledge of Hindi language helps us, but the whole life is short to study and grasp Ramcharitmanas. And every day becomes pleasant in trying to do it. There are millions of people in India. We find them devoting themselves for it, and several are making it their career, earning a lot from it. It actually tells us how to lead ones life. 10000 MCQ - General Studies Previous Paper Based Question Bank for UPSC & STate PSC Exams Important for - UTTAR PRADESH UPPSC UPPCS, ANDHRA PRADESH APPSC, ASSAM APSC, BIHAR BPSC, CHHATISGARH

In a tapestry of factual and everyday events, the author makes a well-reasoned argument that we first need to address culture, then a sustainable lifestyle, then ecology, and finally economics. The author strongly reasons that this paradigm in the current century has been reversed by all the countries of the world. The authors compelling argument makes the reader ask some thought-provoking questions: Is our present state of affairs increasing costs in all areas of the economy? Is our system of education placing a distorted emphasis in creating an army of misplaced problem solvers? Is this the right approach? What

is cultural economy? Is a culture-based economy better than a consumer economy? The adventure-filled story telling in this book is a blend of the ancient wisdom of the East with suggestions to using the right sources of practical technological wisdom from the East and the West. It takes the current state of our affairs and economic planning and simply turns the current logic on its head. The reader finds several clues on how to implement and create a people-initiated economic plan without necessarily changing his or her current station in life. The beauty of the book is that any person can help create a technological culture that is aligned with nature and ecology. A scholarly book that offers a fascinating reading, as pleasant as reading a novel.

five trillion dollar Indian economy, there is still an  
India where people struggle to arrange two  
square meals a day. Many strive hard for basic  
needs of food, health and education. Often  
unheard and ignored, these voiceless people  
mostly don't matter to the mainstream media.  
This book, through various ground reports over a  
decade and a half, captures the stories of the  
most marginalised people of society. All the  
reports should serve as a warning bell till the time  
another man dies of starvation, an HIV positive

woman is thrown out of her house, a girl is raped in brick kilns of Andhra Pradesh or a poor child is forced to work in the cotton fields of Gujarat. These are not mere real-life stories but a chronicle of policy and governance failures. The reports analyse the systemic causes of such failures. But all is not lost. Still, there are rays of hope amid the bleak picture. Many positive stories show us how, with the right policy interventions and community effort, the lives and livelihoods of the marginalised can flourish. Goyal Brothers Prakashan This reference provides an overview of the methods used in petroleum refining. Selected topics include exploration, production and refining, crude oils, quality control, petroleum products, thermal conversion, manufacture of bitumens, pollution control in refineries, and more. This volume is a collection of essays that provide a comprehensive coverage of multiple aspects of the discourse on environment, development and sustainability. It is designed to bring in a host of perspectives highlighting the synergies and the trade-offs in this debate, showcasing research along with policy implications of putting research into use. The

global discussion on sustainability paints the broad canvas for this book. This volume aims to probe some contemporary issues that will help in understanding the sustainability narrative in India. The topics span over a host of questions on energy, environment, natural resources and related constituents of development. The discourse further extends to the role of economic modelling, public policy debates, political intervention, stakeholders' response, community participation and so on. The discussions are often based on empirical support, review of existing literature as well as policy analysis. With an ultimate aim to understand the overall development narrative of the people of India, the discourse takes in its ambit the nuances of resource utilisation, economic growth, COVID-19 impacts, competitiveness and market structures, urbanization, sectoral reforms, environmental hazards, climate change, pollution, natural resource accounting and management to name a few. The book is divided into four sections, namely, The Big Picture: Evolving Perspectives; The Energy Scenario: Dilemmas and Opportunities; Sustainability Cross-Cuts: Developmental Aspects and Externality Empirics: Knowledge and Practice. The first section

contains commentaries on the overarching themes of economic growth, development and sustainability. It presents some emerging perspectives on the developmental crisis that has emerged through the environmental lens with additional focus on the need for inclusion of creativity, knowhow, technology and financial resources to achieve the ambitious SDG targets. The second section brings out the dilemmas and opportunities in the energy sector, that has been a key player in discussions of sustainability, especially for India where significant technological advances in conventional forms of energy supply coexists with fairly low levels of per capita energy consumption and energy security is a key challenge. The section on sustainability crosscuts attempts to highlight the problems and processes of mainstreaming the sustainability question into conventional thinking through the concepts of a circular economy, green accounting techniques, institutional and governance structures, public policy and inclusive growth, amongst others. The last section presents some empirical studies on environmental externalities, the unaccounted environmental effects of economic production and consumption and finally the behavioural aspects of the

stakeholders that are crucial in the larger narrative of sustainable development. This edited volume contains contributions of reputed scholars from various Indian universities, research institutions and professionals from outside academia, who are proven experts in their fields. The link between policy, practice, and well-being of the large vulnerable population of India is the major focus of enquiry that will help researchers, practitioners and policy planners in conducting further research in energy, environment, resource and linked areas of development economics. General readers with an active interest in energy, environment, and economic development are also likely to find this book an interesting read, especially in the times of several environmental challenges facing humankind.
