Overview Whatever you wanted to know about nutrition, in this diploma course you will find it. And upon completion you can advise people as nutrition advisor. Content - What Is a Healthful Diet? - Ten (Well, Okay, Twelve) Superstar Foods - Ten Easy Ways to Cut Calories - Better Eating through Chemistry - Carbohydrates: A Complex Story - Powerful Protein - The Lowdown on Fat and Cholesterol - Food and Mood - Mighty Minerals - Vigorous Vitamins - Alcohol: Another Form of Grape and Grain - Ten Nutrition Web Sites etc. Duration 12 months Assessment The assessment will take place on the basis of one assignment at the end of the course. Tell us when you feel ready to take the exam and we'll send you the assignment questions. Study material The study material will be provided in separate files by email / download link. This volume approaches the study of pain, risk and injury in sport from a variety of social scientific perspectives. Contributions focus on the manifestations of pain, risk and injury within sport cultures, and the degree to which the research is rapidly expanding to include new ways of thinking

about risky and painful 'suffering' in sport.

Overview In this course you will learn all you need to know to become a Digital Marketing Expert. As you surely know, Digital Marketing Specialists are in high demand and well paid. Content - Digital Marketing Strategy - Market Research - Crowdsourcing - Web Development and Design - Writing for the Web - Mobile Development - Email Marketing - Online Advertising - Affiliate Marketing - Search Engine Marketing - Search Engine Optimisation - PPC Advertising - And much more Duration 10 months Assessment The assessment will take place on the basis of one assignment at the end of the course. Tell us when you feel ready to take the exam and we'll send you the assignment questions. Study material The study material will be provided in separate files by email / download link. This book surveys the landscape of supermarket retailing in Africa, showing how this expanding part of the retail sector is changing consumerism on the continent. Drawing on research covering retail formats, consumer behaviour, strategies, operation research, ICT, relationship marketing, and market linkage, the book investigates the many factors impacting the growth of supermarkets in Africa. The contributors employ theories, concepts, and methods in order to help us to understand changing consumer behaviour, the strategies used by suppliers to access supermarkets, the role of service suppliers in the growth of the sector, and ultimately how supermarkets can assist in making the market linkage between producers and consumers in Africa. The chapters provide a comprehensive exploration of modern retail, discussing its growth and future,

identifying consumer preferences, as well as suggesting solutions to the challenges that retailers and suppliers on the continent face in developing the sector. This book will be of interest to scholars and students of the retail sector and retail management in Africa.

**Overview** This course deals with everything you need to know to become a successful IT Consultant.

**Content** - Business Process Management - Human Resource Management - IT Manager's Handbook - Principles of Marketing - The Leadership - Information Systems and Information Technology - IT Project Management

**Assessment** The assessment will take place on the basis of one assignment at the end of the course. Tell us when you feel ready to take the exam and we'll send you the assignment questions.

**Study material** The study material will be provided in separate files by email / download link.

**Examine cataloging and classification training programs around the world**

**Education for Library Cataloging: International Perspectives** examines the global development of educational programs for cataloging and classification in the library and information field. Library school faculty and professional librarians from more than 20 countries discuss a wide range of topics, including formal school and continuing education of catalog librarians, education and training for paraprofessional staff in cataloging and technical services, changes in library school programs, and metadata and information organization instruction. Faculty members and seasoned librarians from Europe, Africa, Asia, Australia, Latin America, and the Middle East present case studies and overviews of library and

information school programs, bibliographies of cited works in both Western and non-Western language literature, and plenty of helpful tables and charts. Articles presented in *Education for Library Cataloging: International Perspectives* are organized geographically to make it easier to check which countries are covered in each region, and to determine regional similarities and differences. Political, historical, cultural, religious, and linguistic factors were also considered to demonstrate the wide range of educational efforts and programs to cultivate cataloging professionals all over the world. Topics examined in *Education for Library Cataloging: International Perspectives* include: \* education and training development for librarians in the University of Botswana Library \* the library science school curricula in the Cross River State of Nigeria \* the training of students in cataloging via distant education in South Africa \* education programs in China \* the education for knowledge organization (including cataloging and classification) in India \* the current status of cataloging education in Japan \* on the job training of catalog librarians in South Korea \* the education for cataloging in Australia \* how catalog librarians are trained in Germany and Austria \* recent changes to the library education system in Poland \* a critical study of cataloging instruction within the library and information science programs in Spain \* a recent survey of graduate education and training for cataloging and classification in the United Kingdom \* an overview of the education for cataloging and classification in Mexico \* the current status of cataloging and classification

education in Egypt \* recent changes to cataloging teaching in Israel \* the continuing education for catalogers in Saudi Arabia \* and much more Many of the articles presented in Education for Library Cataloging: International Perspectives document the initial efforts to introduce education for cataloging in particular countries, including Egypt and Japan. This book is an invaluable resource for library and information school educators, administrators, and students. Contributed articles. After the success of the first two books with the proceedings of the newly established series of European conferences in Health Telematics Education the third one gives a new dimension in the field of Health and Medical Informatics Education in Europe. It deals with the needs and the current status in Health Telematics Education in Europe, with curriculum development in Health- Medical and Nursing Informatics, with development of courseware material, computer based training and computer assisted learning. Also distance learning and Internet applications, training in using Hospital Information Systems (HIS) and Departmental Information Systems, Inter-University programmes and accreditation of courses are discussed.
