Learn the Secrets Needed to Master PowerPoint for Training As a successful facilitator, you know the importance of the resources in your professional toolkit. How you engage your audience and improve learning can be affected by how well you use them. But mastery of PowerPoint evades many. Feedback on presentations can range from "What was the point?" to "That changed my life." Most, though, fall closer to the former. If you are looking for a guide to the PowerPoint practices that will push your presentations into the latter category, look no further. A Trainer's Guide to PowerPoint: Best Practices for Master Presenters is Mike Parkinson's master class on the art of PowerPoint. While Parkinson wants you to understand how amazing a tool PowerPoint is, he's the first to tell you that there is no magic button to make awesome slides. There are, however, proven processes and tools that deliver successful PowerPoint content each and every time you use them. In this book he shares them, detailing his award-winning PowerPoint process and guiding you through three phases of presentation development—discover, design, and deliver. What's more, Parkinson is a Microsoft PowerPoint MVP—most valuable professional—an honorific bestowed by Microsoft on those with "very deep knowledge of Microsoft products and services." He shares not only his tips and best practices for presentation success, but also those from several of his fellow MVPs. Parkinson invites you to master PowerPoint as a tool—just like a paintbrush and paint—and to realize that the tool doesn't make the art, you do. Create memorable presentations on technical and complex topics in slideware such as Microsoft PowerPoint and Apple's Keynote for Mac. Learn good pacing and rhythm as well as judicious use of special effects. Whether the goal is to help a sale or to educate, and whether the final delivery is a live presentation, a webinar, or a short video presentation, this book focuses on the particular difficulties linked to technical presentations. You will learn to create a story when there is none, gain the interest of an audience who may not feel as strongly for the topic as the speaker does, turn abstract concepts into visual models, overcome the limitations of the medium (limited space, two dimensions), maintain interest through rhythm, and use effects, not to look cool or get that "WOW" moment, but to serve the message. Getting The Message Across presents a number of field-tested ideas for raising interest. The use of various techniques and careful scripting will help you, even if you aren't a natural-born show-person, to communicate effectively, and to make your audience remember your message, and not necessarily your slides. This book will teach you: Rhythm and animations, and the use of transitions To hold audience interest even with "dry" topics To create memorable presentations Techniques useful for PowerPoint, Keynote for Mac, and any similar presentation medium or environment What You Will Learn Turn austere topics into interesting stories. Give rhythm and pacing to your presentations. Build a narrative during transitions and animations. Hold audience interest and make listeners feel clever. Make people remember your presentation rather than your cool use of slideware. Who This Book Is For People who have to communicate effectively on strongly technical topics. This book targets educators and trainers as well as technical consultants who need to present complex solutions to customers or leads, as well as would-be speakers at scientific or technical conferences. Getting The Message Across is a book for people who want to make their presentations not only more attractive, but really memorable. It is for people who aren't looking for a standing ovation, but who are willing to do what they can to be understood and to make their messages remembered. Getting The Message Across focuses on using slideware such as PowerPoint and Keynote. Such slideware, for all its flaws, is still one of the best ways to communicate, not only live, but also in dematerialized communications (webinars, video tutorials) for reaching an ever-growing audience. Based on extensive research studies from the fields of communication, marketing, psychology, multimedia, and law, Advanced Presentations by Design, Second Edition, provides fact-based answers to the most-often-asked questions about presentation design. The book shows how to adapt your presentation to different audience personality preferences, what role your data should play and how much of it you need, how to turn your data into a story, and how to design persuasive yet comprehensible visual layouts. The book's accessible 10-step Extreme Presentation™ method has been field-tested in organizations such as Microsoft, ExxonMobil, HJ Heinz, PayPal, and the Executive Office of the President of the United States. Written from the perspective of a marketer and business manager, this new edition offers practical, evidence-based advice for bringing focus to problems and overcoming challenges. The book offers practical guidelines for: Structuring Stories: The book presents the SCORE method for sequencing data (Situation, Complication, Resolution, Example) into a powerful story that grabs the audience's attention at the beginning and holds it through to the end. Using Graphics: The author provides numerous examples of charts and other graphics, explaining which can help you best present your data. Setting Goals for Presentations: The book reveals why it's important to set measurable objectives for what you want your audience to think and do differently after your presentation. This comprehensive resource offers a proven process for creating a presentation that gets noticed and compels your audience to take action. From the illustrator of the #1 smash hit *The Day the Crayons Quit* comes an imaginative tale of friendship in a world where what makes us different isn't nearly as important as what makes us the same. When a boy discovers a single-propeller airplane in his closet, he does what any young adventurer would do: He flies it into outer space! Millions of miles from Earth, the plane begins to sputter and quake, its fuel tank on empty. The boy executes a daring landing on the moon . . . but there's no telling what kind of slimy, slithering, tentacled, fangtoothed monsters lurk in the darkness! (Plus, it's dark and lonely out there.) Coincidentally, engine trouble has stranded a young Martian on the other side of the moon, and he's just as frightened and alone. Martian, Earthling—it's all the same when you're in need of a friend. Reveals the underlying story form of all great presentations that will not only create impact, but will move people to action Presentations are meant to inform, inspire, and persuade audiences. So why then do so many audiences leave feeling like they've wasted their time? All too often, presentations don't resonate with the audience and move them to transformative action. Just as the author's first book helped presenters become visual communicators, *Resonate* helps you make a strong connection with your audience and lead them to purposeful action. The author's approach is simple: building a presentation today is a bit like writing a documentary. Using this approach, you'll convey your content with passion, persuasion, and impact. Author has a proven track record, including having created the slides in Al Gore's Oscar-winning *An Inconvenient Truth* Focuses on content development methodologies that are not only fundamental but will move people to action Upends the usual paradigm by making the audience the hero and the presenter the mentor Shows how to use story techniques of conflict and resolution Presentations don't have to be boring ordeals. You can make them fun, exciting, and full of meaning. Leave your audiences energized and ready to take action with *Resonate*. All the sea creatures agree that Stan is the most talented singing starfish in the bay. 'And as he sang, they cheered and swooned, "Oh, what a gorgeous sound!"' With over 500 million users worldwide, Microsoft's PowerPoint software has become the ubiquitous tool for nearly all forms of public presentation—in schools, government agencies, the military, and, of course, offices everywhere. In this revealing and powerfully argued book, author Franck Frommer shows

us that PowerPoint's celebrated ease and efficiency actually mask a profoundly disturbing but little-understood transformation in human communication. Using fascinating examples (including the most famous PowerPoint presentation of all: Colin Powell's indictment of Iraq before the United Nations), Frommer systematically deconstructs the slides, bulleted lists, and flashy graphics we all now take for granted. He shows how PowerPoint has promoted a new, slippery "grammar," where faulty causality, sloppy logic, decontextualized data, and seductive showmanship have replaced the traditional tools of persuasion and argument. *How PowerPoint Makes You Stupid* includes a fascinating mini-history of PowerPoint's emergence, as well as a sobering and surprising account of its reach into the most unsuspecting nooks of work, life, and education. For anyone concerned with the corruption of language, the dumbing-down of society, or the unchecked expansion of "efficiency" in our culture, here is a book that will become a rallying cry for turning the tide. *Beyond Bullet Points, Fourth Edition* "Throw away those room-emptying, left-brain slides—and use Atkinson's book to turn your PowerPoint presentation into an epic." —Daniel H. Pink, author of *Drive* and *A Whole New Mind* Think beyond bullet points—and amplify the impact of your message! Now in its fourth edition, this popular classic illuminates an innovative, step-by-step methodology designed to unlock the amazing visual story waiting to be released from your message. Communications expert Cliff Atkinson shows how to apply classic storytelling tenets and practical, research-based guidelines as you work with Microsoft PowerPoint—for memorable, meaningful, and persuasive visual stories. Change your approach—and transform your results! Find your story thread Create an emotional connection to increase your impact. Cut through the clutter Distill your message and get right to the point. Bring your story to life Storyboard your ideas, find your natural voice, and deliver a compelling presentation! A guide to using Microsoft PowerPoint describes how to use stories to create effective business presentations. The unforgettable bestseller *Wonder* has inspired a nationwide movement to Choose Kind. Unit in Silicon Valley to develop it further. Now, twenty-five years later, PowerPoint is installed on more than one billion computers, worldwide. In this book, Robert Gaskins (who invented the idea, managed its design and development, and then headed the new Microsoft group) tells the story of its first years, recounting the perils and disasters narrowly evaded as a startup, dissecting the complexities of being the first distant development group in Microsoft, and explaining decisions and insights that enabled PowerPoint to become a lasting success well beyond its original business uses. World-renowned presentation coach Jerry Weissman has spent 20 years helping top executives succeed in the most important business presentations of their lives, and he's learned the best way to get his message across is to show his techniques in action. Weissman does just that in *Presentations in Action: 80 Memorable Presentation Lessons from the Masters*. He teaches how to make spectacularly successful presentations by showing exactly how great presenters have done it. Weissman dives into his library of outstanding presentations, sharing examples from current events, politics, science, art, music, literature, cinema, media, sports, and even the military. His compelling examples don't just demonstrate what's universal about effective human communication: they also reveal powerful ways to solve the specific challenges presenters encounter most often. This book's five sections focus on each element of the outstanding contemporary presentation: Content: Mastering the art of telling your story; Graphics: Designing PowerPoint slides that work brilliantly; Delivery skills: How to make actions speak louder than words; Q&A: How to handle tough questions; Integration: How to put it all together. From clarifying "What's in it for you?" to crafting better elevator pitches, improving flow to using anecdotes, *Presentation in Action* is packed with solutions—and packed with inspiration, too! This was written for teachers who want to use PowerPoint in the classroom to enhance your presentations, teach your students how to use the application, and create interactive educational projects. Think about the most powerful speech you've ever heard a leader give. What made that speech—and that speaker—memorable was likely a mix of authenticity, stage presence, masterful delivery, and—above all—an inspirational message. Nobody ever walked out of a great speech saying, "I loved the way she used PowerPoint." Yet, all too often, speakers rely on tools like it to carry them through a presentation. Real leaders speak to make a difference, to promote a vision, to change the way people think and feel and act. Their ability to lead goes hand in hand with their ability to get their message across, no matter what size audience they're addressing. Drawing on his years of experience in coaching executives, Christopher Witt shows not just how to make a speech but why and when you should make one. His practical advice on how to take your game to the next level includes:

- You are the message. Who you are—your character, experience, values—shapes the message your listeners hear.
- Content is king. Delivery is important, but it is only the helpful-or-unhelpful-servant of your message. So build each speech around one, and only one, "Big Idea."
- A confused mind always says no. When you want your listeners to say yes, you've got to make them understand what you want them to do and why they should care.
- Dare to do the unexpected. Leaders know the rules, and they know when, why, and how to break them.

In chapters that can be read in five minutes or less and in a book that can be gone through in one sitting, Witt shows you how to become more confident, more commanding, more compelling speakers. But this isn't just a book about speaking. It's about leadership and about how people—CEOs and PTA presidents, small business owners and sales reps, middle managers and techno geeks—can present themselves and their ideas with greater impact. *Building PowerPoint Templates Supercharge your PowerPoint® presentations with custom templates and themes!
