Collage Feb 23 2021 Collage has a relatively short, but incredibly rich history. The popularity of collage is on the increase again, partly as a result of such postmodernist concerns as pluralism, multiplicity and hybridity. This book features works by international artists Picasso, Schwitters and Ernst, through to Hannah Hoch, Martha Rosler, John Stezaker, Richard Hamilton, Layla Curtis, David Salle, Eduardo Poalozzi, Javier Rodriguez, Robert Rauschenberg, Mimei Thompson, David Thorpe, Fred Tomaselli and many more.

Design Strategies in Architecture Oct 14 2022 A groundbreaking and interdisciplinary work on architectural collage. Design Strategies in Architecture collects wide-ranging reflections on the use of architectural collage, which has become a popular way of sharing a project's design because collages can be faster and more approachable than traditional detailed renderings. This book brings together contributions from architectural historians, theoreticians, and architects to look at the role of collage. The essays gathered here reconstruct the role of representation in the evolution of architecture and offer a large selection of relevant case studies in the use of collage, incorporating critical historical analysis of the technical aspects and significance of the case studies within their cultural and political contexts. Together they also provide a critical and historical framework for architectural offices engaged in research related to representation. Groundbreaking and thought-provoking Design Strategies in Architecture is vital reading for understanding architectural collage.

Jan Digerud Feb 06 2022 Jan Digerud and figurative postmodernism: "My world is in fragments, smashed into pieces so fine I doubt I will ever re-assemble them" wrote the film director Derek Jarman in 1987. The statement tends to pop up whenever postmodernism is attempted

described or diagnosed. Jarman seems to pin-point the dystopia of postmodernism: Utopia is dead and the only thing left is the ironic play with fragments. Or could Jarman's fragments be understood differently? Did postmodernism's cultural re- and deconstructions amount to, not just a dystopic critique but also a cornucopian projection of new, imagined totalities? Looking at the work of Jan Digerud one gets an inkling that that may be the case. To be sure: postmodernism in architecture was posed, first and foremost, as a critique--a break with an abstract and elitist modernism and a reconquest of the historical figure. With thinkers such as Pablo Portoghesi and Christian Norberg-Schulz at the helm, postmodernism was a call to arms, a double warfare on utopian high modernism and impoverished late modernism alike. In Stanley Tigerman's photo montage, Mies' IIT-building sinks into the sea like a modernist Titanic, while Leon Krier's fat, red cross annuls Le Corbusier's green city for eternity. The siege culminated in Charles Jencks' iconic announcement of the death of modernism on the 15th of July 1972, "at 3.32 p.m. or thereabouts", illustrated by stills from the demolition of the modernist Pruitt-Igoe project in St. Louis.--Preface by Mari Hvattum.

Generations Sep 13 2022 Generations showcases six decades of the art and architecture of Herb Greene, informed by his interest in science and history. This "picture book" is organized to showcase large-scale images of Mr. Greene's architectural work alongside his collage paintings and Armature drawings in a way that reveals the unified philosophy behind all of his work. Its purpose is to tell a story of the important interrelationships between art, science, and philosophy, which is described with simple narrative juxtaposed alongside these images.

Collage and Architecture Aug 24 2023 Collage and Architecture is the first book to cover collage as a tool for design in architecture, making it a valuable resource for students and practitioners. Author Jennifer Shields uses the artworks and built projects of leading artists and architects, such as Le Corbusier, Daniel Libeskind, and Teddy Cruz to illustrate the diversity of collage techniques. The six case study projects from Mexico, Argentina, Sweden, Norway, the United States, and Spain give you a global perspective of architecture as collage. Collage is an important instrument for analysis and design, and Shields's presentation of this versatile medium draws on decades of relevance in art and architecture, to be adapted and transformed in your own work.

Le Corbusier Apr 27 2021 "Each day of my life has been dedicated in part to drawing. I have never stopped drawing and painting, seeking,

where I could find them, the secrets of form."--Le Corbusier Charles-Édouard Jeanneret, known as Le Corbusier (1887-1965), is famous for transforming 20th-century architecture and urbanism. Less attention has been paid to his artistic production, although he began his career as a painter. Le Corbusier indeed studied under Charles L'Éplattenier and, together with the artist Amédée Ozenfant, founded the Purist movement in the manifesto After Cubism. Even after Le Corbusier turned to architecture, he continued to paint and draw. His thousands of drawings, rarely exhibited but meticulously stored in two watch cabinets from his family home, were particularly significant; he considered his work as a draftsman to be fundamental to his creative process. Beautifully illustrated with more than 300 drawings that have never before been published for an English readership, this revealing book charts the evolution of Le Corbusier's process from his youthful travels abroad to his arrival and maturation in Paris. Danièle Pauly shows how his drawings functioned within an intimate zone of private reflection and situates his work within the broader artistic and intellectual currents of Cubism, Purism, Primitivism, and Surrealism. In addition to providing a crucial new background against which to comprehend Le Corbusier's architecture and urbanism, this important volume advocates for understanding him alongside leading modern artists including Pablo Picasso and Fernand Léger.

City Life Collage Sep 01 2021 In his collages, the Berlin architect Klaus Theo Brenner--who coined the term Stadtarchitektur, or urban architecture--engages with both the urban mix and public space. The collages reflect a broad spectrum--sometimes coming closer to his office's projects, sometimes less so. What they have in common is an atmospheric compression and the elaboration of theatrical qualities. The numerous works, presented together in this volume for the first time, convey an architecture that is always situated in an urban context, in relation to the city's inhabitants and the reality of their lives.

Architecture as Artform Aug 12 2022 The development of an American architectural avant-garde after the Second World War is examined in relation to the formal properties and institutionalized cultural authority of modern art. Rather than looking to the artwork of their American artistic contemporaries, architects and critics appropriated the early European avant-garde as typological precedents, guided by a pedagogical approach steeped in Bauhaus teaching methods. Drawing became the common conduit between the abstract work of art and its transformation into modern architecture. Architecture was seen as a problem that could be studied diagrammatically, and consequently also thought of as a fundamentally conceptual, immaterial artifact. At the same time that architecture was moving towards a flattened artistic condition, however, abstract expressionist painting began to take on the material and dimensional properties of the architectural object, demarcating volume and structure. Modernist collage techniques were also introduced into postwar architectural design, but again the material aspects of the medium were suppressed in favor of its purely visual qualities.

Elements of Architecture Jun 17 2020 "Une mine d'or à parcourir encore et toujours, un de ces livres qui fournira aux bâtisseurs actuels et futurs de notre monde tout le savoir dont ils ont besoin pour aborder les questions actuelles et celles auxquelles ils seront confrontés". ArchDaily Architecture is a compelling mixture of stability and flux. In its solid forms, time and space collide, amalgamating distant influences, elements that have been around for over 5, 000 years and others that were (re-)invented yesterday. Elements of Architecture focuses on the fragments of the rich and complex

architectural collage. Window, facade, balcony, corridor, fireplace, stair, escalator, elevator : The book seeks to excavate the micro-narratives of building detail. The result is no single history, but rather the web of origins, contaminations, similarities, and differences in architectural evolution, including the influence of technological advances, climactic adaptation, political calculation, economic contexts, regulatory requirements, and new digital regimes. Derived from Koolhaas' exhaustive and much-lauded exhibition at the 2014 Venice Architecture Biennale, this is an essential toolkit to understanding the pieces, parts, and fundamentals that comprise structure around the globe. Designed by Irma Boom, the book contains essays from Rem Koolhaas, Stephan Trueby, Manfredo di Robilant, and Jeffrey Inaba; interviews with Werner Sobek and Tony Fadell (of Nest); and an exclusive photo essay by Wolfgang Tillmans.

Collage and Architecture Jul 23 2023 Collage and Architecture remains an invaluable resource for students and practitioners as the first book to cover collage as a tool for analysis and design in architecture. Since entering the contemporary art world over a century ago, collage has profoundly influenced artists and architects throughout the twentieth century and into the twenty-first. In Collage and Architecture, Jennifer A. E. Shields explores its influence, using the artworks and built projects of leading artists and architects, such as Mies van der Rohe, Daniel Libeskind, and Teddy Cruz to illustrate the diversity of collage techniques. This new edition includes: A stronger focus on contemporary practices, including digital methods; New designers and architects, including Marshall Brown, WAI Architecture Think Tank, and Tatiana Bilbao, bringing their methods and work to life; An expanded global and diverse perspective of architecture as collage; Collage is an important instrument for analysis and design. Through its 261 color images, this book shows how this versatile medium can be adapted and transformed in your own work.

Before Publication May 29 2021 At the moment of going to press, a publication irreversibly reaches its final form. Simultaneously, it also reaches an audience. Naturally, this audience very often is oblivious to the many, and sometimes complex, steps towards the construction and montage of (visual) meaning that precedes the actual publication of a book. The contributors to 'Before Publication' consider such construction of meaning as montage and look at materials and processes involved before publication. Their focus is on concrete artistic and visual artifacts such as scrapbooks, book mock-ups, and press layouts by artists, authors, and graphic designers. In particular, they shed light on the relationship between the spheres of privacy and publicity. The new book features a programmatic introduction by the editors Nanni Baltzer and Martino Stierli and eight concisely illustrated topical essays.

Seamless May 09 2022 During the past fifty years, documentary photography and architecture have become increasingly interdependent, blurring the disciplinary boundary between the two. Seamless looks at the work of a new generation of European photographers and architects working together to produce images of

architecture made from fragments of reality. At the same time, it investigates how shared digital technologies influence the creation of architecture and its photographic representation through images. Based on a series of interviews, Seamless discusses the collaborations between Filip Dujardin and Jan De Vylder, Philipp Schaerer and Roger Boltshauser, and Bas Princen and OFFICE Kersten Geers David van Severen. Each of the three sections is illustrated with a series in images that form parallel narratives within the book. In the concluding essay, architect Jes s Vassallo pulls together the treads of the conversations to investigate questions about the impact of digital technology on the value assigned to images, how shared technological platforms enhance the influence photographers and architects have on each other, and why they have often chosen to focus on the dirty realism of the urban spaces.

Narrative Architecture May 17 2020 The first book to look architectural narrative in the eye Since the early eighties, many architects have used the term "narrative" to describe their work. To architects the enduring attraction of narrative is that it offers a way of engaging with the way a city feels and works. Rather than reducing architecture to mere style or an overt emphasis on technology, it foregrounds the experiential dimension of architecture. Narrative Architecture explores the potential for narrative as a way of interpreting buildings from ancient history through to the present, deals with architectural background, analysis and practice as well as its future development. Authored by Nigel Coates, a foremost figure in the field of narrative architecture, the book is one of the first to address this subject directly Features architects as diverse as William Kent, Antoni Gaudí, Eero Saarinen, Ettore Sottsass, Superstudio, Rem Koolhaas, and FAT to provide an overview of the work of NATO and Coates, as well as chapters on other contemporary designers Includes over 120 colour photographs Signposting narrative's significance as a design approach that can aid architecture to remain relevant in this complex, multi-disciplinary and multi-everything age, Narrative Architecture is a must-read for anyone with an interest in architectural history and theory.

Graphic Assembly Jun 10 2022 An innovative look at the contribution of montage to twentieth-century architecture Graphic Assembly unearths the role played by montage and collage in the development of architectural culture over the past century, revealing their unexamined yet crucial significance. Craig Buckley brings together experimental architectural practices based in London, Paris, Vienna, and Florence, showing how breakthroughs in optical media and printing technologies enabled avant-garde architects to reimagine their field. Graphic Assembly considers a range of architects and movements from the 1950s through the early '70s, including Theo Crosby, Hans Hollein, and John McHale; the magazine Clip-Kit; and the groups Archigram, Superstudio, and Utopie. It gives a thorough

account of how montage concepts informed the design of buildings, prototypes, models, exhibitions, and multimedia environments, accompanied by Buckley's insightful interpretations of the iconic images, exhibitions, and buildings of the 1960s that mark how the decade is remembered. Richly illustrated with never-before-published material from more than a dozen archives and private collections, *Graphic Assembly* offers a comparative overview of the network of experimental architectural practice in Europe. It provides a deep historical account of the cut-and-paste techniques now prevalent with architecture's digital turn, demonstrating the great importance of montage to architecture past, present, and future.

The Architecture of Collage Dec 16 2022 The first book on American architect Marshall Brown and his collages, which sit at the intersection of architecture and art. Despite its consistent presence in architectural practice throughout the twentieth and twenty-first centuries, collage has never been considered a standard form of architectural representation like drafting, model making, or sketching. The work of Marshall Brown, an architect and artist, demonstrates the power of collage as an architectural medium. In Brown's view, collage changes the terms of architectural authorship and challenges outdated definitions of originality. Published in conjunction with the exhibition *The Architecture of Collage: Marshall Brown* at the Santa Barbara Museum of Art, the book features some forty collages by Marshall Brown. These works come from four of his collage series, including *Chimera*, *Je est un autre*, as well as the previously unpublished *Prisons of Invention* and *Piranesian Maps of Berlin*. Additionally, there are photographs of *Ziggurat*, an outdoor sculpture with a design based on a collage from *Chimera*. The full-color plates are supplemented with essays by critic and curator Aaron Betsky, scholar of art history and archaeology Anna Arabindan-Kesson, Santa Barbara Museum of Art's curator James Glisson, and Marshall Brown that outline the conceptual foundations of Brown's intriguing exploration of an intersection of architecture and art.
