Defiant Dictatorships May 20 2023 Why did some Communist and Middle-Eastern dictatorships, those in China, Vietnam, North Korea, Cuba, Syria, Iraq, Libya and Iran, remained defiantly stable during the onset of a democratic age in the 1980s and early 1990s? The book offers an explanation based upon external relations - the regimes' defiance of external military or political foes - and then searches for alternative or supplementary explanations by examining the changes that occurred in these dictatorships' political structures, ideologies and economic policies during 1980-94.

Narratives of Dictatorship in the Age of Revolution Aug 31 2021 "Between the mid-eighteenth and the mid-nineteenth century, the idea of dictatorship changed drastically, leaving back the ancient Roman paradigm and opening the way to a rule with extraordinary powers and which was unlimited in time. While the French Revolution produced an acceleration of history and created new narratives of dictatorship, with Napoleon Bonaparte as its most iconic embodiment, the Latin American struggle for independence witnessed an unprecedented concentration of rulers seeking those new nations' sovereignty through dictatorial rule. Starting from the assumption that the age of revolution was one of dictators too, this book aims at exploring how this new type of rulers whose authority was no longer based on dynastic succession or religious consecration sought legitimacy. By unveiling the role of emotions - hope, fear and nostalgia - in the making of a new paradigm of rule and focusing on the narratives legitimizing and de-legitimizing dictatorship, this study goes beyond traditional conceptual history. For this purpose, different sources such as libels, history treatises, encyclopedias, plays, poems, librettos, but also visual material will be resorted to. This book is essential reading for scholars and students of modern history, the history of emotions, intellectual history, global history, cultural studies and political science"--

Economic Origins of Dictatorship and Democracy Feb 22 2021 This book develops a framework for analyzing the creation and consolidation of democracy. Different social groups prefer different political institutions because of the way they allocate political power and resources. Thus democracy is preferred by the majority of citizens, but opposed by elites. Dictatorship nevertheless is not stable when citizens can threaten social disorder and revolution. In response, when the costs of repression are sufficiently high and promises of concessions are not credible, elites may be forced to create democracy. By democratizing, elites credibly transfer political power to the citizens, ensuring social stability. Democracy consolidates when elites do not have strong incentive to overthrow it. These processes depend on (1) the strength of civil society, (2) the structure of political institutions, (3) the nature of political and economic crises, (4) the level of economic inequality, (5) the structure of the economy, and (6) the form and extent of globalization.

How Dictatorships Work Mar 06 2022 Explains how dictatorships rise, survive, and fall, along with why some but not all dictators wield vast powers.

Private Government Jul 18 2020 Why our workplaces are authoritarian private governments—and why we can't see it One in four American workers says their workplace is a "dictatorship." Yet that number almost certainly would be higher if we recognized employers for what they are—private governments with sweeping authoritarian power over our lives. Many employers minutely regulate workers' speech, clothing, and manners on the job, and employers often extend their authority to the off-duty lives of workers, who can be fired for their political speech, recreational activities, diet, and almost anything else employers care to govern. In this compelling book, Elizabeth Anderson examines why, despite all this, we continue to talk as if free markets make workers free, and she proposes a better way to think about the workplace, opening up space for discovering how workers can enjoy real freedom.

The End of Europe Feb 17 2023 Once the world's bastion of liberal, democratic values, Europe is now having to confront demons it thought it had laid to rest. The old pathologies of anti-Semitism, populist nationalism, and territorial aggression are threatening to tear the European postwar consensus apart. In riveting dispatches from this unfolding tragedy, James Kirchick shows us the shallow disingenuousness of the leaders who pushed for "Brexit;" examines how a vast migrant wave is exacerbating tensions between Europeans and their Muslim

minorities; explores the rising anti-Semitism that causes Jewish schools and synagogues in France and Germany to resemble armed bunkers; and describes how Russian imperial ambitions are destabilizing nations from Estonia to Ukraine. With President Trump now threatening to abandon America's traditional role as upholder of the liberal world order and guarantor of the continent's security, Europe may be alone in dealing with these unprecedented challenges. Based on extensive firsthand reporting, this book is a provocative, disturbing look at a continent in unexpected crisis.

The Dictatorship of Woke Capital Jan 24 2021 For the better part of a century, the Left has been waging a slow, methodical battle for control of the institutions of Western civilization. During most of that time, “business”— and American Big Business, in particular — remained the last redoubt for those who believe in free people, free markets, and the criticality of private property. Over the past two decades, however, that has changed, and the Left has taken its long march to the last remaining non-Leftist institution. Over the course of the past two years or so, a small handful of politicians on the Right — Senators Tom Cotton, Marco Rubio, and Josh Hawley, to name three — have begun to sense that something is wrong with American business and have sought to identify the problem and offer solutions to rectify it. While the attention of high-profile politicians to the issue is welcome, to date the solutions they have proposed are inadequate, for a variety of reasons, including a failure to grasp the scope of the problem, failure to understand the mechanisms of corporate governance, and an overreliance on state-imposed, top-down solutions. This book provides a comprehensive overview of the problem and the players involved, both on the aggressive, hardcharging Left and in the nascent conservative resistance. It explains what the Left is doing and how and why the Right must be prepared and willing to fight back to save this critical aspect of American culture from becoming another, more economically powerful version of the “woke” college campus.

Encyclopedia of Modern Dictators Nov 21 2020 Original Scholarly Monograph

Latin American Dictators of the 20th Century Nov 14 2022 Throughout the 20th century, the emergence of authoritarian dictatorships in Latin America coincided with periods of social convulsion and economic uncertainty. This book covers 15 dictators representing every decade of the century and geographically from the Caribbean and North and Central and South America. Each chapter covers their personal information (childhood, education, marriage, family...), assumption of power, relationship with the United States, oppression of civilians, and collapse of their regimes. The book also investigates inherent contradictions in U.S. foreign policy: promoting democracy abroad while supporting brutal dictatorships in Latin America. Such analysis requires multiple perspectives and this work embraces an evaluation of the influence of military dictatorships on cultural elements such as art, literature, journalism, music and cinema, while drawing on data from documentary archives, court case files, investigative reports, international treaties, witness testimonies, and personal letters from survivors. The dramatic experiences of courageous individuals who challenged these 15 oppressors are also recounted.

The Infernal Library Oct 01 2021 "A mesmerizing study of books by despots great and small, from the familiar to the largely unknown." —The Washington Post A darkly humorous tour of "dictator literature" in the twentieth century, featuring the soul-killing prose and poetry of Hitler, Mao, and many more, which shows how books have sometimes shaped the world for the worse Since the days of the Roman Empire dictators have written books. But in the twentieth-century despots enjoyed unprecedented print runs to (literally) captive audiences. The titans of the genre—Stalin, Mussolini, and Khomeini among them—produced theoretical works, spiritual manifestos, poetry, memoirs, and even the occasional romance novel and established a literary tradition of boundless tedium that continues to this day. How did the production of literature become central to the running of regimes? What do these books reveal about the dictatorial soul? And how can books and literacy, most often viewed as inherently positive, cause immense and lasting harm? Putting daunting research to revelatory use, Daniel Kalder asks and brilliantly answers these questions. Marshalled upon the beleaguered shelves of *The Infernal Library* are the books and commissioned works of the century's most notorious figures. Their words led to the deaths of millions. Their conviction in the significance of their own thoughts brooked no argument. It is perhaps no wonder then, as Kalder argues, that many dictators began their careers as writers.

Africa in an age of tyrants Jul 30 2021

Dictators Without Borders Jun 16 2020 A penetrating look into the unrecognized and unregulated links between autocratic regimes in Central Asia and centers of power and wealth throughout the West Weak, corrupt, and politically unstable, the former Soviet republics of Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan are dismissed as isolated and irrelevant to the outside world. But are they? This hard-hitting book argues that Central Asia is in reality a globalization leader with extensive involvement in economics, politics and security dynamics beyond its borders. Yet Central Asia's international activities are mostly hidden from view, with disturbing implications for world security. Based on years of research and involvement in the region, Alexander Cooley and John Heathershaw reveal how business networks, elite bank accounts, overseas courts, third-party brokers, and Western lawyers connect Central Asia's supposedly isolated leaders with global power centers. The authors also uncover widespread Western participation in money laundering, bribery, foreign lobbying by autocratic governments, and the exploiting of legal loopholes within Central Asia. Riveting and important, this book exposes the global connections of a troubled region that must no longer be ignored.

Mackenzie King in the Age of the Dictators Jun 28 2021 Until the outbreak of hostilities in 1939, Mackenzie King prided himself on never publicly saying anything derogatory about Hitler or Mussolini, unequivocally supporting the appeasement policies of British prime minister Neville Chamberlain and regarding Hitler as a benign fellow mystic. In *Mackenzie King in the Age of the Dictators* Roy MacLaren leads readers through the political labyrinth that led to Canada's involvement in the Second World War and its awakening as a forceful nation on the world stage. Prime Minister King's fascination with foreign affairs extended from helping President Theodore Roosevelt exclude "little yellow men" from North America in 1908 to his conviction that appeasement of Hitler and Mussolini should be the cornerstone of Canada's foreign and imperial policies in the 1930s. If war could be avoided, King thought, national unity could be preserved. MacLaren draws extensively from King's diaries and letters and contemporary sources from Britain, the United States, and Canada to describe how King strove to reconcile French Canadian isolationism with English Canadians' commitment to the British Commonwealth. King, MacLaren explains, was convinced by the controversies of the First World War that another such conflagration would be disruptive to Canada. When King finally had to recognize that the Liberals' electoral fortunes depended on English Canada having greater voting power than French Canada, he did not reflect on whether a higher morality and intellectual integrity should transcend his anxieties about national unity. A focused view of an important period in Canadian history, replete with insightful stories, vignettes, and anecdotes, *Mackenzie King in the Age of the Dictators* shows Canada flexing its foreign policy under King's cautious eye and ultimately ineffective guiding hand.

The Age of Dictators Jun 21 2023 A history of the world's dictators since World War I--particularly Stalin, Hitler, Mao Tse-tung--and the events preceding and surrounding their rise and rule.

The Dictator's Handbook Feb 05 2022 Explains the theory of political survival, particularly in cases of dictators and despotic governments, arguing that political leaders seek to stay in power using any means necessary, most commonly by attending to the interests of certain coalitions.

No Country for Old Men Apr 14 2020

Strongman Apr 07 2022 From the bestselling author of the Don't Know Much About® books comes a dramatic account of the origins of democracy, the history of authoritarianism, and the reigns of five of history's deadliest dictators. A Washington Post Best Book of the Year! A Bank Street College of Education Best Book of the Year! A YALSA 2021 Nonfiction Award Nominee! What makes a country fall to a dictator? How do authoritarian leaders—strongmen—capable of killing millions acquire their power? How are they able to defeat the ideal of democracy? And what can we do to make sure it doesn't happen again? By profiling five of the most notoriously ruthless dictators in history—Adolf Hitler, Benito Mussolini, Joseph Stalin, Mao Zedong, and Saddam Hussein—Kenneth C. Davis seeks to answer these questions, examining the forces in these strongmen's personal lives and historical periods that shaped the leaders they'd become. Meticulously researched and complete with photographs, *Strongman* provides insight into the lives of five leaders who callously transformed the world and serves as an invaluable resource in an era when democracy itself seems in peril. * "A fascinating, highly readable portrayal of infamous men that provides urgent lessons for democracy now." —Publishers Weekly, starred review "Strongman is a book that is both deeply researched and deeply felt, both an alarming warning and a galvanizing call to action, both daunting and necessary to read and discuss." —Cynthia Levinson, author of *Fault Lines in the Constitution*

Aging Gracefully? Why Old Autocrats Hold Competitive Elections May 16 2020 This paper examines the conditions under which dictators hold competitive elections, and looks specifically at the role played by a dictator's age. Drawing on previous studies arguing that uncertainty increases the likelihood of competitive elections, I argue that as a dictator ages, uncertainty over the future increases within the regime, because government insiders' expected payoffs for supporting the incumbent decline as he ages. As a result, I argue that older dictators are more likely to hold competitive elections in order to reduce the uncertainty. The paper also tests an implication of the argument: if uncertainty over the future drives elections, then it should be mitigated in regimes with a clear successor. Using a large-N, cross-national dataset on autocrats and competitive elections between 1960 and 2012, this paper examines the argument and finds that as dictators age, they are more likely to hold competitive elections, all else equal. The analysis also finds that the effect of autocrats' age on competitive elections is mitigated in dominant party regimes where there exists an established succession rule, while the effect is more apparent in personalist regimes without such a system.

The Age of the Dictators Jul 22 2023 This comprehensive yet succinct history of twentieth century European Dictators stresses both the similarities and differences in each regime. Written for undergraduate students studying modern European History, this book profiles each dictator and sets them within the context of their time and world events. The social, political, economic and foreign policies of the dictatorships are also analysed.

Zionism in the Age of the Dictators Mar 18 2023 Originally published in 1983, Brenner's famous study documents a history of collusion between the Zionist movement and European fascism during the first half of the 20th century. The new edition features a new Afterword by the author.

Internet Freedom In The Age Of Dictators And Terrorists, Briefing of the Commission on Security and Cooperation in Europe, March 3, 2106, 114-2 Sep 12 2022

The Age of the Dictators Aug 23 2023 The Age of the Dictators presents a comprehensive survey of the origins and interrelationship of the European dictatorships. All the regimes are

addressed, with ample coverage of the period 1939-45, and analysis of the Soviet government up to Stalin's death in 1953. Exploring their ideological and political roots, and the role of the First World War in their rise to power, David Williams identifies the dictatorships as products of their time. He examines the Soviet, Italian Fascist and Nazi dictatorships, as well as the authoritarian regimes in Spain, Portugal, Eastern Europe and the Balkans, providing an analysis of each as an entity, of how they evolved and related to one another, and to what extent they were a common response to life after the First World War. Mindful of historiographical issues, the textbook attends to the arguments of key historians, and includes a list of relevant sources to assist students in their study of the period. Combining an accessible, succinct writing style with a broad historical scope, *The Age of the Dictators* is an illuminating and thorough account of a fascinating period in world history.

Defeating the Dictators Jul 10 2022 ' Charles Dunst's deeply researched, timely and powerful book offers a blueprint for how democracies should fight back.' - Sir Kim Darroch 'Remarkable. A thoughtful and perceptive book.' - Rt. Hon. Jeremy Hunt, MP The world is currently experiencing the lowest levels of democracy we have seen in over thirty years. Autocracy is on the rise, and while the cost of autocracy seems evident, it nevertheless remains an attractive option to many. While leaders like Viktor Orbán disrupt democratic foundations from within, autocrats like Xi Jinping and Vladimir Putin do so from abroad, eroding democratic institutions and values and imperilling democracies that appear increasingly fragile. There are even those who, disillusioned with the current institutions in place, increasingly think authoritarianism can deliver them a better life than democracy has or could. They're wrong. Autocracy is not the solution - better democracy is. But we have to make the case for it. We have to combat institutional rot by learning from one another, and, at times, from our rivals. And we have to get our own houses in order. Only then can we effectively stand up for democratic values around the world and defeat the dictators.

Revolutions and Dictatorships Dec 15 2022

Modern Tyrants Jan 16 2023 Along with its much vaunted progress in scientific and economic realms, the twentieth century has witnessed the rise of the most brutal and oppressive regimes in the history of humankind. Even with the collapse of Marxism, current instances of "ethnic cleansing" remind us that tyranny persists in our own age and shows no sign of abating. Daniel Chirot offers an important and timely study of modern tyrants, both revealing the forces that allow them to come to power and helping us to predict where they may arise in the future.

Dictator Style Oct 21 2020 Originally published: Great Britain: Atlantic Books, 2005.

The Dictators Apr 26 2021 Half a century after their deaths, the dictatorships of Stalin and Hitler still cast a long and terrible shadow over the modern world. They were the most destructive and lethal regimes in history, murdering millions. They fought the largest and costliest war in all history. Yet millions of Germans and Russians enthusiastically supported them and the values they stood for. In this first major study of the two dictatorships side-by-side Richard Overy sets out to answer the question: How was dictatorship possible? How did they function? What was the bond that tied dictator and people so powerfully together? He paints a remarkable and vivid account of the different ways in which Stalin and Hitler rose to power, and abused and dominated their people. It is a chilling analysis of powerful ideals corrupted by the vanity of ambitious and unscrupulous men.

Children of Monsters Nov 02 2021 "Some years ago, the author, Jay Nordlinger, was in Albania. He was there to give a talk under State Department auspices. Albania was about ten years beyond the collapse of Communism. For almost 40 years, the country had been ruled by one of the most brutal dictators in history: Enver Hoxha. Nordlinger wondered whether this dictator had had children. He had indeed: three of them. And they were still in Albania, with their 3 million fellow citizens. Nordlinger wondered, "What are the lives of the Hoxha kids like? What must it be like to be the son or daughter of a monstrous dictator? What must it be like to bear a name synonymous with oppression, terror, and evil?" In this book, Nordlinger surveys 20 dictators in all. They are the worst of the worst: Stalin, Mao, Idi Amin, Pol Pot, Saddam Hussein, and so on. The book is not about them, really, though of course they figure in it. It's about their children. Some of them are absolute loyalists. They admire, revere, or worship their father. Some of them actually succeed their father as dictator-as in North Korea, Syria, and Haiti. Some of them have doubts. A couple of them become full-blown dissenters, even defectors. A few of the daughters have the experience of having their husband killed by their father. Most of these children are rocked by exile, prison, and the like. Obviously, the children have some things in common. But they are also individuals, making of life what they can. The main thing they have in common is this: They have been dealt a very, very unusual hand. What would you do, if you were the offspring of an infamous dictator, who lords it over your country? Chances are, you'll never have to find out! But some people have-and this book investigates those lucky, or unlucky, few"--

The Dictator's Learning Curve May 08 2022 In this riveting anatomy of authoritarianism, acclaimed journalist William Dobson takes us inside the battle between dictators and those who would challenge their rule. Recent history has seen an incredible moment in the war between dictators and democracy—with waves of protests sweeping Syria and Yemen, and despots falling in Egypt, Tunisia, and Libya. But the Arab Spring is only the latest front in a global battle between freedom and repression, a battle that, until recently, dictators have been winning hands-down. The problem is that today's authoritarians are not like the frozen-in-time, ready-to-crack regimes of Burma and North Korea. They are ever-morphing, technologically savvy, and internationally connected, and have replaced more brutal forms of intimidation with subtle coercion. *The Dictator's Learning Curve* explains this historic moment and provides crucial insight into the fight for democracy.

Dictators at War and Peace Mar 26 2021 Why do some autocratic leaders pursue aggressive or expansionist foreign policies, while others are much more cautious in their use of military force? The first book to focus systematically on the foreign policy of different types of authoritarian regimes, *Dictators at War and Peace* breaks new ground in our understanding

of the international behavior of dictators. Jessica L. P. Weeks explains why certain kinds of regimes are less likely to resort to war than others, why some are more likely to win the wars they start, and why some authoritarian leaders face domestic punishment for foreign policy failures whereas others can weather all but the most serious military defeat. Using novel cross-national data, Weeks looks at various nondemocratic regimes, including those of Saddam Hussein and Joseph Stalin; the Argentine junta at the time of the Falklands War, the military government in Japan before and during World War II, and the North Vietnamese communist regime. She finds that the differences in the conflict behavior of distinct kinds of autocracies are as great as those between democracies and dictatorships. Indeed, some types of autocracies are no more belligerent or reckless than democracies, casting doubt on the common view that democracies are more selective about war than autocracies.

Spin Dictators Oct 13 2022 How a new breed of dictators holds power by manipulating information and faking democracy Hitler, Stalin, and Mao ruled through violence, fear, and ideology. But in recent decades a new breed of media-savvy strongmen has been redesigning authoritarian rule for a more sophisticated, globally connected world. In place of overt, mass repression, rulers such as Vladimir Putin, Recep Tayyip Erdogan, and Viktor Orbán control their citizens by distorting information and simulating democratic procedures. Like spin doctors in democracies, they spin the news to engineer support. Uncovering this new brand of authoritarianism, Sergei Guriev and Daniel Treisman explain the rise of such “spin dictators,” describing how they emerge and operate, the new threats they pose, and how democracies should respond. Spin Dictators traces how leaders such as Singapore’s Lee Kuan Yew and Peru’s Alberto Fujimori pioneered less violent, more covert, and more effective methods of monopolizing power. They cultivated an image of competence, concealed censorship, and used democratic institutions to undermine democracy, all while increasing international engagement for financial and reputational benefits. The book reveals why most of today’s authoritarians are spin dictators—and how they differ from the remaining “fear dictators” such as Kim Jong-un and Bashar al-Assad, as well as from masters of high-tech repression like Xi Jinping. Offering incisive portraits of today’s authoritarian leaders, Spin Dictators explains some of the great political puzzles of our time—from how dictators can survive in an age of growing modernity to the disturbing convergence and mutual sympathy between dictators and populists like Donald Trump.

The End of Europe Aug 11 2022 The disintegration of Europe's post-Cold War consensus in the face of anti-Semitism, populist nationalism, and territorial aggression

The Vatican in the Age of the Dictators 1922 - 45 Sep 19 2020

How to Be a Dictator Jun 09 2022 'Brilliant' NEW STATESMAN, BOOKS OF THE YEAR 'Enlightening and a good read' SPECTATOR 'Moving and perceptive' NEW STATESMAN Mussolini, Hitler, Stalin, Mao Zedong, Kim Il-sung, Ceausescu, Mengistu of Ethiopia and Duvalier of Haiti. No dictator can rule through fear and violence alone. Naked power can be grabbed and held temporarily, but it never suffices in the long term. A tyrant who can compel his own people to acclaim him will last longer. The paradox of the modern dictator is that he must create the illusion of popular support. Throughout the twentieth century, hundreds of millions of people were condemned to enthusiasm, obliged to hail their leaders even as they were herded down the road to serfdom. In How to Be a Dictator, Frank Dikötter returns to eight of the most chillingly effective personality cults of the twentieth century. From carefully choreographed parades to the deliberate cultivation of a shroud of mystery through iron censorship, these dictators ceaselessly worked on their own image and encouraged the population at large to glorify them. At a time when democracy is in retreat, are we seeing a revival of the same techniques among some of today's world leaders? This timely study, told with great narrative verve, examines how a cult takes hold, grows, and sustains itself. It places the cult of personality where it belongs, at the very heart of tyranny.

Doing Business with the Dictators Aug 19 2020 The United Fruit Company (UFCO) developed an unprecedented relationship with Guatemala in the first half of this century. By 1944, UFCO owned 566,000 acres, employed 20,000 people, and operated 96% of Guatemala's 719 miles of railroad, making the multinational corporation Guatemala's largest private landowner and biggest employer. In Doing Business with the Dictators, Paul J. Dosal shows how UFCO built up a profitable corporation in a country whose political system was known to be corrupt. His work is based largely on research of company documents recently acquired from the Justice Department under the Freedom of Information Act—no other historian researching this topic has looked at these sources. As a result, Dr. Dosal is able to offer the first documentary evidence of how UFCO acquired, defended, and exploited its Guatemalan properties by collaborating with successive authoritarian regimes.
