Winner of the Commonwealth Prize New York Times Book Review—Notable Fiction 2002 Entertainment Weekly—Best Fiction of 2002 Los Angeles Times Book Review—Best of the Best 2002 Washington Post Book World—Raves 2002 Chicago Tribune—Favorite Books of 2002 Christian Science Monitor—Best Books 2002 Publishers Weekly—Best Books of 2002 The Cleveland Plain Dealer—Year’s Best Books Minneapolis Star Tribune—Standout Books of 2002 Once upon a time, when the earth was still young, before the fish in the sea and all the living things on land began to be destroyed, a man named William Buelow Gould was sentenced to life imprisonment at the most feared penal colony in the British Empire, and there ordered to paint a book of fish. He fell in love with the black mistress of the warder and discovered too late that to love is not safe; he attempted to keep a record of the strange reality he saw in prison, only to realize that history is not written by those who are ruled. Acclaimed as a masterpiece around the world, Gould’s Book of Fish is at once a marvelously imagined epic of nineteenth-century Australia and a contemporary fable, a tale of horror, and a celebration of love, all transformed by a convict painter into pictures of fish. The formidable River Cottage team turns their attention to all matters aquatic in this definitive guide to freshwater fish, saltwater fish, and shellfish. Hugh Fearnley-Whittingstall and Nick Fisher examine the

ecological and moral issues of fishing, teach individual skills such as catching and descaling, and offer a comprehensive (and fascinating) species reference section. They also demystify the cooking of fish with 135 recipes for preparing fish and shellfish in diverse ways, from pickling to frying to smoking. This ambitious reference-cookbook appeals to both intellect and appetite by focusing on the pleasures of catching, cooking, and eating fish while grounding those actions in a philosophy and practice of sustainability. The authors help us understand the human impact on the seafood population, while their infectious enthusiasm for all manner of fish and shellfish—from the mighty salmon to the humble mackerel to the unsung cockle—inspires us to explore different and unfamiliar species. Fish is superlative food, but it's also a precious resource. The River Cottage Fish Book delivers a complete education alongside a wealth of recipes, and is the most opinionated and passionate fish book around. Infinity Fish: Economics and the Future of Fish and Fisheries is a practical and science-based reference that demonstrates how to value the benefits from restored marine ecosystems to sustain ocean and fishery resources for years to come. It discusses ecological and economical aspects to support the preservation of marine resources by understanding cost-benefits of fishery management systems. The book explains the economic benefits of restoring ecosystems that have been overexploited and how to maintain fisheries in a sustainable level. Infinity Fish: Economics and the Future of Fish and Fisheries is a useful reference to a wide range of audiences. It is for those who wish to make systematic efforts to develop their fisheries sector, scientists and researchers, anyone in fisheries management, marine resource management, economists, fish farmers, policy makers, leaders and regulators,

operations researchers, as well as faculty and students. Includes case studies for each topic and provides detailed summaries to further understand them Presents examples and practical applications of cost-benefit concepts Provides models of statistical analysis to optimize decision making “A necessary book for anyone truly interested in what we take from the sea to eat, and how, and why.” —Sam Sifton, *The New York Times* Book Review Acclaimed author of *American Catch* and *The Omega Principle* and life-long fisherman, Paul Greenberg takes us on a journey, examining the four fish that dominate our menus: salmon, sea bass, cod, and tuna. Investigating the forces that get fish to our dinner tables, Greenberg reveals our damaged relationship with the ocean and its inhabitants. Just three decades ago, nearly everything we ate from the sea was wild. Today, rampant overfishing and an unprecedented biotech revolution have brought us to a point where wild and farmed fish occupy equal parts of a complex marketplace. *Four Fish* offers a way for us to move toward a future in which healthy and sustainable seafood is the rule rather than the exception. Among the fishes, a remarkably wide range of biological adaptations to diverse habitats has evolved. As well as living in the conventional habitats of lakes, ponds, rivers, rock pools and the open sea, fish have solved the problems of life in deserts, in the deep sea, in the cold Antarctic, and in warm waters of high alkalinity or of low oxygen. Along with these adaptations, we find the most impressive specializations of morphology, physiology and behaviour. For example we can marvel at the high-speed swimming of the marlins, sailfish and warm-blooded tunas, air breathing in catfish and lungfish, parental care in the mouth-brooding cichlids and viviparity in many sharks and toothcarps. Moreover, fish are of considerable importance to the

survival of the human species in the form of nutritious and delicious food of numerous kinds. Rational exploitation and management of our global stocks of fishes must rely upon a detailed and precise insight of their biology. The Chapman and Hall Fish and Fisheries Series aims to present timely volumes reviewing important aspects of fish biology. Most volumes will be of interest to research workers in biology, zoology, ecology and physiology, but an additional aim is for the books to be accessible to a wide spectrum of non specialist readers ranging from undergraduates and postgraduates to those with an interest in industrial and commercial aspects of fish and fisheries. "What is this fish? Is it good to eat? Is it a record? Answers to these common questions, plus many others, are finally answered in this new book by Florida Sportsman Senior Editor Vic Dunaway"--Page 4 of cover. 2017 Nominee for James Beard Cookbook Award: International 2017 Nominee for IACP Cookbook Award: International The lower Yangtze region, or Jiangnan, with its modern capital Shanghai, has been known since ancient times as a "land of fish and rice." For centuries, local cooks have harvested the bounty of its lakes, rivers, fields, and mountains to create a cuisine renowned for its delicacy and beauty. In *Land of Fish and Rice*, Fuchsia Dunlop draws on years of study and exploration to present the recipes, techniques, and ingredients of the Jiangnan kitchen. You will be inspired to try classic dishes such as Beggar's Chicken and sumptuous Dongpo Pork, as well as fresh, simple recipes such as Clear-Steamed Sea Bass and Fresh Soybeans with Pickled Greens. Evocatively written and featuring stunning recipe photography, this is an important new work celebrating one of China's most fascinating culinary regions. Food Writers) 1001 Fishing Tips reveals the insider secrets that you need to become the greatest fisherman out there. It focuses on the most popular freshwater game fish, including trout, bass, crappie, bluegill, walleye, catfish, salmon, and pike, and saltwater favorites, such as striped bass, bluefish, flounder, redfish, weakfish, and sea trout. Included are techniques applicable to any environment, such as rivers and streams, lakes and ponds, estuaries and inlets, bays, beaches, and off-shore hotspots. Better your game with 1001 Fishing Tips and be ready to catch more fish, bigger fish, and have more fun! This is a summary of Indiana fishing regulations. It is designed as a service to anglers and is not intended to be a complete digest of fishing regulations.

Harvest of Fish and Wildlife: New Paradigms for Sustainable Management unites experts in wildlife and fishery sciences for an interdisciplinary overview of harvest management. This book presents unique insights for embracing the complete social-ecological system to ensure a sustainable future. It educates users on evolutionary and population dynamics; social and political influences; hunter and angler behavior; decision processes; impacts of regulations; and stakeholder involvement. Features: Written by twenty-four teams of leading scientists and managers. Promotes transparent justification for fishing and hunting regulations. Provides examples for integrating decision making into management. Emphasizes creativity in management by integrating art and science. This book appeals to population biologists, evolutionary biologists and social scientists. It is a key resource for on-the-ground managers and research scientists developing harvesting applications. As the book's contributors explain: "Making decisions that are robust to uncertainty...is a paradigm shift with a lot of potential to improve outcomes for fish and wildlife

populations.” –Andrew Tyre and Brigitte Tenhumberg
“Temporal shifts in system states...must somehow be anticipated and dealt with to derive harvest policies that remain optimal in the long term.” –Michael Conroy “Proactive, effective management of sportspersons...will be essential in the new paradigm of harvest management.” –Matthew Gruntorad and Christopher Chizinski

A boy and his dog embark on a fishing journey. Their first catch of the day: a big fat letter F. Their second? A slippery I. After an epic journey beneath the lake's surface, they find what they came for-- a FISH, along with some unanticipated menace from a few other letters. This clever, wordless picture book, by a popular New Yorker cartoonist, is filled with charm and heart and will have no problem swimming its way into the hearts of young readers. Some years have

statistical summary. From the acclaimed executive chef of a Michelin-starred seafood restaurant comes a comprehensive, beautifully designed guide to cooking fish, for home cooks of all skill levels. School of Fish is an all-encompassing culinary education in one handy—not to mention gorgeously photographed—cookbook. Ben Pollinger, executive chef of upscale Manhattan restaurant Oceana, distills years of experience working in some of the world's best restaurants in this no-nonsense book that demystifies the art of cooking seafood. With more than 100 recipes organized by technique from the easiest to the most advanced, Pollinger takes you through the ins and outs of baking, roasting, braising, broiling, steaming, poaching, grilling, frying, sautéing, and of course seasoning. In addition, he offers up terrific recipes for basics (like Homemade Hot Sauce and Fish Fumet); dressed fish (from ceviche to tartars); salads, pasta, rice, and sides (such as Salmon Salad with Spinach, Dill, and Mustard Vinaigrette); soups and

chowders (including Gazpacho with Seared Scallops); and one-pot meals (like Caribbean Fish Stew and Thai-Style Bouillabaisse). And to round out your seafood education, School of Fish includes a Fish-ionary, a Guide to Unusual Ingredients, and detailed step-by-step photos to complement the 100 photographed recipes. As appealing in its presentation as it is useful, this guide outlines all the skills you need for perfecting your culinary craft. So whether you're a home cook trying something new or an experienced "afishionado," School of Fish will turn you into a better cook and an authority on all things seafood. Answer to these common questions, plus many others, are finally answered in this new book by Florida Sportsman Senior Editor Vic Dunaway. "Fans of R.J.
