The College Level Examination Program (CLEP) enables students to demonstrate college-level achievement and earn college credit in various subject areas based on knowledge acquired through self-study, high school and adult courses, or through professional means. The CLEP Money & Banking Passbook(R) prepares you by sharpening knowledge of the skills and concepts necessary to succeed on the upcoming exam and the college courses that follow. The Bank Examiner Trainee Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam. Model Answers in the Structure of Commerce aims to do the following: (a) to be a guide to students as to how to tackle questions in this particular subject; (b) to give some indication as to the length of answers and content an examiner would expect; and (c) to help students to appreciate the scope of the syllabus and also the type of questions likely to be set in examinations. The book begins with a discussion of how to answer examination questions on the Structure of Commerce. Subsequent chapters present questions relating to industry and commerce, types of business organizations, distribution methods, import and export procedure, foreign trade, the capital market, the banking system and methods of payments, transport, location of industry, insurance, consumer protection. Also provided are a selection of questions requiring brief treatment on a variety of subjects and questions relating to trade calculations. This book does not attempt to replace good textbooks on the subject of Commerce although much benefit will be derived from studying carefully the answers to the questions. Mainstream economists tell us that developing countries will replicate the economic achievements of the rich countries if they implement the correct "free-market" policies. But scholars and activists Toussaint and Millet demonstrate that this is patently false. Drawing on a wealth of detailed evidence, they explain how developed economies have systematically and deliberately exploited the less-developed economies by forcing them into unequal trade and political relationships. Integral to this arrangement are the international economic institutions ostensibly created to safeguard the stability of the global economy—the International Monetary Fund (IMF) and the World Bank—and the imposition of massive foreign debt on poor countries. The authors explain in simple language, and ample use of graphics, the multiple contours of this exploitative system, its history, and how it continues to function in the present day. Ultimately, Toussaint and Millet advocate cancellation of all foreign debt for developing countries and provide arguments from a number of perspectives—legal, economic, moral. Presented in an accessible and easily-referenced question and answer

format, Debt, the IMF, and the World Bank is an essential tool for the global justice movement. It contains frequently asked 580 questions, out of a question bank of over 1600 questions. I have reviewed whole syllabuses of many marketing courses in Diploma to Undergraduate level and have included questions on fundamental concepts and terms that are tested in a marketing exam. I have purposely avoided questions that are easy and not tested frequently to bring down the load on students to study on marketing MCQs. Hence, this book will take away a big burden on students in reading the whole syllabus, sifting, selecting important questions from big question banks and memorizing all of them. In addition to helping students in answering MCQs, this book provides a revision of the whole syllabus offered in a marketing course. Therefore, the knowledge gathered by answering MCQs in this book will surely help the student to write short and essay type answers as well with confidence. Multiple Choice Questions (MCQs) are used as an objective assessment in almost all the mid-term and final exams of marketing in universities and professional institutions all over the world. The MCQs in marketing are set from the whole syllabus. MCQs generally test the knowledge of fundamental concepts, terms and the ability of students in application of such knowledge in interpreting practical situations. MCQs are tricky and cleverly designed to distract students to mark incorrect answers. The time given to answer MCQs are limited and students should have a thorough knowledge of the subject to select the correct answer within the restricted time. The best way to prepare yourself for MCQs is to know them in advance. The challenge for students is, they are required to study many subjects in addition to marketing in one semester. Therefore, not every student has the time to go through the whole syllabus and remember all the concepts. This book is written with the sole aim of helping students to get exams through and you will not regret the investment you make on this book.
