Learn to build successful working relationships with your patients Psychology and Dentistry: Mental Health Aspects of Patient Care is a practical guide to an often-neglected aspect of dentistry—the contributions of the behavioral sciences to dental research and practice. Dr. William A. Ayer, Professor of Behavioral Sciences at Nova Southeastern University College of Dental Medicine in Fort Lauderdale, Florida, presents a comprehensive textbook that's an essential study aid for students preparing for their National Dental Board Examinations and a valuable classroom resource for dental school faculty. This unique book identifies the everyday concerns of dentists, dental students, and dental hygienists, offering proven strategies for patient management and for building—and maintaining—a successful dentist-patient relationship. Psychology and Dentistry examines the contributions of the behavioral sciences to the practice of dentistry, drawing subject matter from a wide range of disciplines that include psychology, sociology, education, anthropology, economics, epidemiology, health services, and public health. child abuse and neglect, spousal violence, elder abuse, aging and changes associated with age, death and dying, and bereavement. Psychology and Dentistry examines: behavior therapies behavioral interventions management techniques for patients with acute and/or chronic pain how to train patients to manage their oral habits how to get patients to comply with health care recommendations pain perception and pain expression the therapeutic use of hypnosis how to make psychological referrals for patients the effect of stress on dentists and dental students and much more! The book's practical approach and unique insights are invaluable for helping you develop healthy relationships with your patients. Whether attending decidedly awkward dinner parties or hayseed weddings complete with karaoke and inebriated attendants, or risking life and limb to aid the impoverished in Belize and Peru (with near-drastic results of misspoken Spanish), there's a story for everyone in this third installment of Dr. Carroll James's series of rollicking and touching memoirs. And Nothing but the Tooth offers up a continuation of bizarre episodes during Dr. James's forty-plus years of dental practice--including perhaps the worst hires in employment history. On the personal side, we catch a glimpse of some questionable family lineage, a hilarious first ski trip, amateur sheep herding, and a soggy camping trip sure to test a marriage. As always, we get to

tag along with young Carroll as he gets into summer mischief with his cousins at his grandparents' home in the backwoods of Nealy Ridge, VA, this time toying with a treasure chest of found explosives and almost--but not quite--getting away with it. -Detailed dental implant laboratory procedures for multiple clinical conditions with recent advances -Extensive chapter on virtual laboratory -Laboratory disinfection protocol for COVID-19 -Detailed discussion of metal ceramics and all ceramics -More than 3400 coloured photos and illustrations -More than 100 flowcharts and diagrams for easy understanding -Mouthguards and TMJ appliances -Digital version and videos for enhanced learning -Comprehensive laboratory reference for prosthodontists and clinicians Includes the proceedings. This book explores the affordances of disciplinary corpora for the teaching and learning of the language of dentistry, within the field of English for Specific Academic Purposes (ESAP). We extract disciplinary register features and vocabulary from three key genres of the dentistry discipline (published experimental research articles, case reports, and novice/professional research reports within the Dental Public Health domain), before integrating these features into ESAP pedagogy in the form of corpus-based ESAP materials that promote student-led direct engagement with disciplinary corpora - an approach known as 'data-driven learning'. This book is a timely and relevant addition to the field of corpus linguistics and ESAP, and is especially

targeted at ESAP professionals who are required to teach disciplinary discourses but who may struggle to know what to teach as non-experts of the target discipline.
