"Brief table of contents of vols. I-XX" in v. 21, p. [502]-618. The study of the textile sector has always been central to economic history: from reconstructions of the dynamic growth in the medieval wool industry, to the rise of silk and light and mixed fabrics in the modern era, to the driving role of cotton in the industrialisation process. Although the dynamics of textile manufacturing are closely linked to the transformations of fashion, economic history has long neglected its role as a factor in economic change, treating it primarily as a kind of exogenous catalyst. This book makes a decisive contribution to the understanding of a fundamental transformation, the consequences of which are projected into contemporary society, but which matured in pre-industrial times: the advent of fashion. Se l'Informe è un carattere della nostra epoca, è indispensabile ripensare gli strumenti con cui descriviamo e trasformiamo la realtà. Come potrebbero mutare i nostri paradigmi se assumessimo l'Informe come strumento critico? Il ruolo operativo dell'Informe, proposto da Georges Bataille, permette di dare senso a molte pratiche di trasformazione del mondo. "Assemblaggi" è costruito come un montaggio di testi su autori di diverse epoche. La descrizione e il commento delineano un percorso che indaga la potenza plastica e critica dell'Informe come apertura all'indeterminato. L'idea di un'Architettura geologica interroga le pieghe della Terra e dispiega una pratica del "maifinito" come nodo di congiunzione tra tempi e mondi diversi. Mettere in forma la tensione tra le cose costituisce il compito di un'Architettura terrestre per immaginare nuove alleanze capaci di generare futuri.

L'Analisi Linguistica e Letteraria è una rivista internazionale di linguistica e letteratura peer reviewed. Ha una prospettiva sia sincronica che diacronica e accoglie ricerche di natura teorica e applicata. Seguendo un orientamento spiccatamente interdisciplinare, si propone di approfondire la comprensione dei processi di analisi testuale in ambito letterario come anche in ambito linguistico. La rivista è organizzata in tre sezioni: la prima contiene saggi e articoli; la seconda presenta discussioni e analisi d'opera relative alle scienze linguistiche e letterarie; la terza sezione ospita recensioni e una rassegna di brevi schede bibliografiche riguardanti la linguistica generale e le linguistiche delle singole lingue (francese, inglese, russo, tedesco). La rivista pubblica regolarmente articoli in francese, inglese, italiano e tedesco, e occasionalmente anche in altre lingue: nel 2010, ad esempio, ha pubblicato un volume tematico interamente in russo.

AN INDISPENSABLE OVERVIEW OF EARTH-FRIENDLY DESIGN AND AN IMPORTANT RESOURCE FOR DESIGNERS AND ENVIRONMENTALISTS. The refereed proceedings of the First Iberial Conference on Pattern Recognition and Image Analysis, IbPria 2003, held in Puerto de Andratx, Mallorca, Spain in June 2003. The 130 revised papers presented were carefully reviewed and selected from 185 full papers submitted. All current aspects of ongoing research in computer vision, image processing, pattern recognition, and speech recognition are addressed. Now featuring a brand-new design and integration of short film, the newly-revised PONTI: ITALIANO TERZO MILLENNIO provides an up-to-date look at modern Italy, with a renewed focus on helping the second year student bridge the gap from the first year. With its innovative integration of cultural content and technology, the Third Edition encourages students to expand on chapter themes through web-based exploration and activities. Taking a strong communicative approach, the book's wealth of contextualized exercises and activities make it well suited to current teaching methodologies, and its emphasis on spoken and written communication ensures that students express themselves with confidence. Students will also have the chance to explore modern Italy with a cinematic eye through the inclusion of five exciting short films by Italian filmmakers. Audio and video files can now be found within the media enabled eBook.

English summary: The names, origins, and by ways in the west, and the uses and 'imaginary' symbolism that has for centuries distinguished the commerce in incense, cinnamon, and myrrh from the far away regions of the orient to the merchant's stalls of the Greeks and Romans. This is an ideal journey through the centuries of classical antiquity following the caravan routes, legends and the Levantine enchantment that instill an atmosphere of dreams around the commercial and cultural exchanges between the Orient and Occident, prior to the advent of the great Islamic civilization.

Italian description: I nomi, le origini, le vie di penetrazione in Occidente, gli usi e il simbolismo immaginario che ha contraddistinto per secoli il commercio di incenso, cinnamomo, mirra dalle lontane plaghe d'Oriente ai banchi dei mercati greci e romani. Un viaggio ideale nei secoli dell'antichità classica al seguito di vie carovaniere, di leggende e magie levantine che infondono un'atmosfera di sogno agli scambi commerciali e culturali tra Oriente ed Occidente, prima dell'avvento della grande civiltà islamica. Questo Atlante contiene più di 260 schede di prodotti tipici e tradizionali della Lombardia. Aggiornato al 2015.

In European law, "non-contractual liability arising out of damage caused to another" is one of the three main non-contractual obligations dealt with in the Draft of a Common Frame of Reference. The law of non-contractual liability arising out of damage caused to another is in the common law known as tort law or the law of torts, but in most other jurisdictions referred to as the law of delict is the area of law which determines whether one who has suffered a damage, can on that account demand reparation in money or in kind from another with whom there may be no other legal connection than the causation of damage itself. Besides determining the scope and extent of responsibility for dangers of one's own or another's creation, this field of law serves to protect fundamental rights in the private law domain, that is to say horizontally between citizens inter se. Based on pan-European comparative research which annotates the work, this book presents model rules on liability. Explanatory comments and illustrations amplify the policy decisions involved. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come, but also provides a fairly detailed indication of the present legal situation in the Member States.

Symposia Mathematica, Volume I focuses on research in the field of mathematics and its applications. This book discusses the definition of S-semigroup, extensions of R modules, structure of H, laws of conservation and equations of motion, and measures of strain. The basic equations for continua with internal rotations, general concepts of the discrete particle mechanics of matter, and implications of the first law of thermodynamics are also elaborated. This text likewise covers the homomorphism theorem, magneto-elastic interactions, transition from discrete particle mechanics to continuum mechanics, and passage to the continuum. This publication is suitable for mathematicians, specialists, and students interested in mathematical structures.

La difesa delle (tue) idee è un agile libro di facile lettura e comprensione destinato a tutti quelli che pensano di avere buone idee ma non sanno come difenderle ed a tutti quelli che prima di leggere questo libro non pensavano di avere buone idee da dover difendere.

Temples are the most prestigious buildings in the urban landscape of ancient Italy, emerging within a network of centres of the then-known Mediterranean world. Notwithstanding the fragmentary condition of the buildings remains, these monuments and especially their richly decorated roofs are crucial sources of information on the constitution of political, social and craft identities, acting as agents in displaying the meaning of images. The subject of this volume is thematic and includes material from the Eastern Mediterranean (including Greece and Turkey). Contributors discuss the network between patron elites and specialized craft communities that were responsible for the sophisticated terracotta decoration of temples in Italy between 600 and 100 BC, focusing on the mobility of craft people and craft traditions and techniques, asking how images, iconographies, practices and materials can be used to explain the organization of ancient production, distribution and consumption. Special attention has been given to relations with the Eastern Mediterranean (Greece and Anatolia). Investigating craft communities, workshop organizations and networks has never been thoroughly undertaken for this period and region, nor for this exceptionally rich category of materials, or for the craftspeople producing the architectural terracottas. Papers in this volume aim to improve our understanding of roof production and construction in this period, to reveal relationships between main production centres, and to study the possible influences of immigrant craftspeople.

Fuels and New Propellants is a compendium of papers presented at a conference on Fuel and New Propellants by the Federazione Associazioni Scientifiche e Tecniche, sponsored by the Consiglio Nazionale Delle Ricerche, held at Milan, Italy in June 1963. The book presents the researches made on the scientific, technical, and industrial applications of new and improved fuels and propellants. The collection contains papers that deal with residual fuels and the marine diesel engine; the characteristics of processes for the production of high octane fuels; liquid and solid propellants for space rockets; and technical problems in the production of solid and liquid propellants. Petrochemists, chemists, and researchers in the field of fuels and propellants will find this text interesting and insightful. Unlike the many magazines that revolve around the architectural world, Ardeth concerns neither with outcomes (architecture) nor with the authors (architects). Ardeth concerns instead with their operational work, i.e. projects. The shift from subjects (their good intentions, as taught in Universities and reclaimed in the profession) to objects (the products of design, at work within the social system that contains them) engenders an analytical and falsifiable elaboration of the complex mechanisms that an open practice such as design involves. Through a process of disciplinary redefinition, Ardeth explores the falsifiability of design hypotheses as the object that allows the project to scientifically confront errors and approximations.
