***Financial and Managerial Aspects in HRM: A Practical Guide breaks new ground by being the first to compile  
the everyday management and financial decisions of HR managers in a single book. It is an essential resource  
for understanding core practical HRM issues in the modern workplace. With the sixteenth edition of Financial  
and Managerial Accounting: The Basis for Business Decisions, the Williams author team continues to be a solid  
foundation for students who are learning basic accounting concepts. In this revision, the authors have added to  
and refined the coverage of International Financial Reporting Standards (IFRS), particularly in Chapter 15  
("Global Business and Accounting"). Hallmarks of the text—including the solid Accounting Cycle Presentation,  
relevant pedagogy, and high quality, end-of-chapter material—have been updated throughout the book.  
Enhancements in technology have changed how we live and learn. Working with learning resources across  
devices, whether smartphones, tablets, or laptop computers, empowers students to drive their own learning by  
putting increasingly intelligent technology into their hands. Whether the goal is to become an accountant, a  
businessperson, or simply an informed consumer of accounting information, Financial and Managerial  
Accounting has helped generations of students succeed. Its leading edge accounting content, paired with state-of-  
the-art technology, supports student learning and elevates understanding of key accounting principles. Financial  
and Managerial Accounting also delivers innovative technology to help student performance. Connect  
Accounting provides students with a media-rich eBook version of the textbook and offers instant grading and  
feedback for assignments that are completed online. Our system for completing exercise and problem material  
takes accounting content to the next level, delivering assessment material in a more intuitive, less restrictive  
format that adapts to the needs of today's students. A less-expensive grayscale paperback version is available.  
Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence  
requirements of a two-semester accounting course that covers the fundamentals of financial and managerial  
accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing  
students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied  
across business fields. Each chapter opens with a relatable real-life scenario for today's college student.***

*Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization. Written by Jan Williams. For each chapter, students can measure their progress through a wealth of self-test material (with solutions) and a summary of each chapter's key points. This package includes a three-hole punched, loose-leaf edition of ISBN 9781118016114 and a registration code for the WileyPLUS course associated with the text. *Financial and Managerial Accounting, by Weygandt, Kimmel, Kieso is a new introductory program for the two semester accounting sequence that presents equal coverage of both introductory financial and managerial accounting topics. The Team for Success authors of Jerry Weygandt, Paul Kimmel, and Don Kieso bring years of industry, academic, and writing experience to the development of this new title which gives students the tools they need to understand the accounting cycle and key financial accounting topics, while presenting the managerial topics in an easy-to-understand fashion in a decision-making framework. Weygandt Financial and Managerial Accounting relates accounting concepts to real-world experiences, is full relevant examples to students' lives, and provides IFRS coverage that will prepare students for the global economy. Resource added for the Accounting program 101011. "As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business. However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained upward even as they become solidly grounded in accounting fundamentals"-- Managerial Finance provides a clear and readable explanation of the most important topics managers should understand about business finance. These include resource management, investment and decision making, as well as the practical use of financial ratios and performance indicators. Real examples and case studies are used throughout to illustrate points in a practical context. The book is based upon the Management Charter Initiative's Occupational Standards for Management NVQs and SVQs at Levels 4 & 5 and is also particularly suitable for managers on Certificate and Diploma in Management programmes, including those accredited by the IM and Edexcel (formerly BTEC). Managerial Finance is part of the highly successful series of textbooks for managers which cover the knowledge and understanding required as part of any competency based management programme. The books cover the three main levels of management: supervisory/first-line management (NVQ level 3), middle management (Certificate/NVQ level 4) and senior management (Diploma/NVQ level 5). Alan Parkinson is the Hill Samuel Senior Lecturer in Accounting & Finance at the Open Business School. He was previously responsible as Director of the Open University MBA Programme for launching the highly successful MBA Course. This book introduces corporate financial management, based on the basic capital budgeting framework and the time value of money. It focuses on theoretical formulations and correct application of financial techniques that will help improve managerial and financial decisions. Based on fundamental principles of accounting and finance like time value of money and after-tax, it introduces readers to real-world constraints and complexities in the two fields. Written in a simple and accessible manner. It can be read by students of finance and accounting courses, business professionals and general public alike. Redefining tradition in learning accounting. The fourth edition of Horngren's Financial and Managerial Accounting presents the basics of accounting in a fresh format designed to help today's learners succeed. The table of contents for the fourth edition has been significantly overhauled to provide a contemporary approach to the material. Additionally, the whole text has been put through a rigorous accuracy*

There are linkages, ramifications, conditions, and demands made by the global economy on domestic as well as multinational firms--and executives must be aware of all of them. One way is through the medium of accounting information and the special way it reflects the realities of international business. Providing this crucial information is the task of accounting executives and their staffs worldwide. Dr. Riahi-Belkaoui sees it as a distinctly new type of information that applies to external and international users of all kinds, operating in different nations and cultures. He identifies the various issues and problems that are most critical to the efficient management of multinational firms, provides practical solutions to international accounting problems, and with his focus on normative as well as descriptive solutions, helps confer on international accounting the status of a legitimate multidisciplinary inquiry. Dr. Riahi-Belkaoui begins by outlining environmental factors in the global economy and their affect on the definition, dimensions, and conduct of international accounting. He deals next with the international issues of taxation philosophies, types, systems, treaties, havens, and other relevant matters, before moving to the problems of determining and estimating exchange rates and the management of economic exposure. He elaborates on this in Chapter 4 with discussions of international arbitrage, then moves to the problems facing multinational firms when they decide on a choice of organizational structure and attempt to evaluate decisional performance. Chapter 6 addresses the use and misuse of accounting information for various purposes, Chapter 7, the specifics of capital budgeting. He then looks at the accounting and tax issues involved in the determination of transfer prices by multinational firms, and next at the accounting treatments associated with foreign currency translation, transactions, and futures contracts. Chapter 10 concludes the book with an examination of the*

various asset valuation and income determination models available for dealing with international inflation. *Basics of Financial and Managerial Accounting* is a great handbook and learning tool for business management, financial accounting, financial management and finance tutors, students and enthusiasts. Author Kamran Pirnahad has reviewed all key elements of starting and growing a business from the financial accounting, finance, and business and financial managerial perspective in this book. This book also includes all necessary information for those who would like to establish their business on a profitable and ethical and knowledgeable basis. Give your students a solid foundation in core accounting concepts while helping learners develop a true appreciation for why accounting is important to business and a prosperous society.

Warren/Reeve/Duchac's *FINANCIAL AND MANAGERIAL ACCOUNTING, 14E* clearly demonstrates how accounting is much more than simply data and black and white rules. Instead, students see how accounting provides key information used to make critical business decisions. A new chapter schema provides context for how each chapter's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture by connecting journal entries to the accounting equation. Fresh organization progresses from the simplest to the more complex topics with reorganized and fully integrated coverage of the new Revenue Recognition standard, reorganized coverage of adjustments, and reorganized managerial accounting chapters.
