These workbooks will boost confidence in problem-solving and critical-thinking skills! The Problem Every year my students struggled with retaining information about key topics that we covered in math class. Through the years I have tried a variety of Spiral Review math programs with mixed results. Some of these programs required too much of a class time commitment. Others, seemed unfocused or didn't hammer away at key concepts. Frustrated with the options available, I began to experiment and develop The Great 8 Middle School Spiral Review. The classroom has served as my laboratory to test and refine the Great 8. The Basics The Great 8 is a 25 week Spiral Review of key mathematical concepts for middle school. The focal point is for 7th grade, but the Great 8 is also ideal for stronger 6th grade students and 8th and 9th graders that need to review these key concepts. The Great 8 includes 100 worksheets and 25 Quizzes. Each worksheet and Quiz includes a total of 8 questions. The combination of all the worksheets and Quizzes equals a total of 1,000 questions. Each week includes 4 worksheets and a quiz. How it Works At the beginning of a week a packet of four worksheets is given to each student. The first and third worksheets of the week are the same questions (with different answers) and the second and fourth are also the same. At the end of the week 4 questions are taken from the first/third worksheets and 4 questions are taken from the second/fourth worksheets and are used to create the quiz. Advanced Pre-Med Studies Course Description Semester 1: From surgery to vaccines, man has made great strides in the field of medicine. Quality of life has improved dramatically in the last few decades alone, and the future is bright. But students must not forget that God provided humans with minds and resources to bring about these advances. A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury. In Exploring the History of Medicine, author John Hudson Tiner

reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God. The fascinating history of medicine comes alive in this book, providing students with a healthy dose of facts, mini-biographies, and vintage illustrations. It seems that a new and more terrible disease is touted on the news almost daily. The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as: Where did all these germs come from, and how do they fit into a biblical world view? What kind of function did these microbes have before the Fall? Does antibiotic resistance in bacteria prove evolution? How can something so small have such a huge, deadly impact on the world around us? Professor Alan Gillen sheds light on these and many other questions in *The Genesis of Germs*. He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view. Dr. Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ. Semester 2: *Body by Design* defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint. Every chapter explores the wonder, beauty, and creation of the human body, giving evidence for creation, while exposing faulty evolutionist reasoning. Special explorations into each body system look closely at disease aspects, current events, and discoveries, while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body. Within *Building Blocks in Life Science* you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process. Children are naturally inquisitive and eager to explore and learn about the world around them. It is important for their guardians, both Parents and Teachers, to satisfy their queries, and that too, in such a way that the children are able to understand and comprehend the concepts as well as learn from them. Also, there exists a gap in the level of information and knowledge provided to the children by the Parents vs. that provided by their Teachers. Discrepancies might also exist in the methodology(ies) through which the information and knowledge is relayed. This increases the possibility that the children might either not understand the concept clearly or become confused about the correct interpretation of the concepts. With these objectives in mind, and to build connectivity between the teaching methodologies by Parents and Teachers, we at Oswaal Books, have come up with this *Manual for Teachers and Parents*. Some benefits of using this manual are:

- It aims to aid the Teachers and Parents in simplifying the concepts studied by children as a part of their curriculum
- It equips the parents and teachers to enable the children to understand the subjects, and also evaluate their measure of understanding and creativity.
- It includes Learning and Understanding Aids along with a Lesson Plan for each Chapter
- It demonstrates Effective Teaching Techniques
- It also gives various Propositions for Step-wise Learning and Building up of Concepts

IMPORTANT FEATURES OF THE BOOK: Strictly based on latest NCERT Textbook The manual is based on the latest NCERT Textbook 6 Exploratory Learning objectives These provide explicit instructions to parents and teachers to teach their wards Effective Teaching Techniques The manual has tried and tested teaching techniques for higher success rate **WHAT THIS BOOK HAS FOR YOU:** Lesson Plan for each Chapter This provides clarity and direction to the users Tabulated and Categorised information This helps in creating and effectively executing the lesson plan 5Es of Learning This Manual is based on the 5 Es of Learning: Engage, Explore, Explain, Elaborate & Evaluate About Oswaal Books: We feel extremely happy to announce that Oswaal Books has been awarded as 'The Most Promising Brand 2019' by The Economic

See how hard work and perseverance can help someone overcome their shortcomings. The higher level questioning in this comprehensive novel study works great with small groups. Students are prompted to think about their future and imagine what they want to be when they grow up. Put events in the order they occur when Sam meets the swans. Describe what the teacher's first reaction to Louis was when he decided to go to school. Predict how the campers will react to Louis. Students write a poem about something they love, similar to what Sam did for the Head Man at the zoo. Label and describe the different parts that make up the anatomy of a Trumpeter Swan. Aligned to your State Standards and written to Bloom's Taxonomy, additional crossword, word search, comprehension quiz and answer key are also included. **About the Novel: The Trumpet of the Swan** tells the story of a young swan without the ability to talk. Louis is a trumpeter swan. Unfortunately, he is unable to talk to other swans. Louis decides he needs to learn how to read and write so that he can properly communicate. He goes to his human friend, Sam, for help. Sam

*takes Louis to school with him, where he learns how to read and write, and is gifted with a slate and piece of chalk. When he returns to his family, Louis quickly learns that this method won't work, as other swans can't read what he writes on his board. In an effort to help his son, Louis' father steals a trumpet from a local music store. Finally, Louis is able to trumpet like the rest of the swans. However, now he faces a new problem—his father is a thief. Louis decides to leave the nest in an effort to earn enough money to pay for the stolen trumpet and restore his father's honor. What follows is a series of events that entwine Louis in the lives of several humans. **This is the chapter slice "Word Problems Vol. 4 Gr. PK-2" from the full lesson plan "Number & Operations"**. For grades PK-2, our resource meets the number & operations concepts addressed by the NCTM standards and encourages the students to learn and review the concepts in unique ways. Each task sheet is organized around a central problem taken from real-life experiences of the students. The pages of this resource contain a variety in terms of levels of difficulty and content so as to provide students with a variety of differentiated learning opportunities. Included are problems involving place value, fractions, addition, subtraction and using money. The task sheets offer space for reflection, and opportunity for the appropriate use of technology. Also contained are assessment and standards rubrics, review sheets, color activity posters and bonus worksheets. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy, STEM, and NCTM standards.*
