Excerpt from The Higher Education as a Training for Business Few facts in education are more striking of late years than the growth in attendance at colleges and universities. The rate of this growth considerably exceeds that of the population of the country as a whole. A concomitant fact is the comparatively small number of college students who are seeking the learned professions. The great mass of the young men in college after graduation will be connected with some form of business. There are those who think that the present situation is a mistake; that young men are wasting their time, so far as a business career is concerned, by spending years in obtaining a college course. Is this a correct view of the situation? It must not be forgotten that no college can insure an education to a young man. More definitely, no college ever gives an education to anyone. Donald Miller learned how to rise to the top using the principles he shares in this book. offer. In 'How to Build a Six-Figure Personal Training Business', Dave Fletcher, one of the UK's best-known personal trainers and fat loss specialists, gives you the six-step formula that you need to achieve this. Using his own experiences as a highly successful PT, he shows you how to apply your business brain and transform your passion for health and fitness into an income worthy of a top city professional. Dozens of books have been written about how to do training more effectively, with more impact, and so on. Yet despite all that well-meaning advice, of the \$70 billion spent on training in the U. S., only 12-15 percent actually gets applied in ways that contribute tangible value to organizations. But Tim Mooney and Robert Brinkerhoff have discovered that some iconoclastic trainers achieve breakthrough results by having the courage to break away from the usual approaches and identify what is really needed and what really works. Studying why these bold training leaders were so successful implementing Brinkerhoff and Mooney's High Impact Learning tools and methods led them to distill the principles and practices outlined

in Courageous Training. Mooney and Brinkerhoff lay out the Four Pillars of Courageous Training, illustrating each with real-life examples that highlight specific concepts, methods, and tools. Going deeper, they delve into the mindset needed to truly transform training, which they summarize in the Courageous Training Code. And they present four in-depth case studies, written by training leaders in major organizations, showing the audacious actions these leaders took to produce dramatic—and measurable—business results. Introduction to system performance; Monitoring system activity; Managing the workload; Memory performance; Disk performance issues; Network performance; Terminal performance; Kernel configuration. The Financial Times Guide to Business Training shows you how to develop, design and deliver outstanding business training. Written by two of the UK's leading business trainers and based on extensive research into what the best trainers say and do. Using a courtroom trial as a metaphor, Training on Trial seeks to get to the truth about why training fails and puts the business

partnership model to work for real. While upbeat lingo abounds about “complementing strategic objectives” and “driving productivity,” the fact is that most training does not make a significant enough impact on business results, and when it does, training professionals fail to make a convincing case about the value added to the bottom line. The vaunted “business partnership model” has yet to be realized?and in tough economic times, when the training budget is often the first to be cut, training is on trial for its very existence. Readers on both sides of the “courtroom” will learn how to: Build expertise and become genuinely involved in your company's or client's business Pledge to work together to positively impact a pressing business need or pivotal business opportunity Ask the jury their expectations and revise your own to be more realistic and mutually satisfying Develop a plan, targeting the key drivers of performance success after training has taken place Execute your initiative and deliver a stellar ROESM (Return on Expectations) A thought-provoking read for trainers and business

unit leaders alike, Training on Trial provides a new application of the Kirkpatrick Four-Level Evaluation Model and a multitude of tips and techniques that allow lessons learned to be put into action now. Too often today, when companies recognize the need for training in a specific topic--business writing, behavior interviewing, customer service, or other--they apply the same standard instruction they utilized the last time they addressed a need for training--which was in a completely different area! But one-size-fits-all approaches rarely work anywhere, especially in the professional world. Training That Delivers Results offers a far better way to educate employees, one that connects learning solutions with strategic business goals. With more than 30 years of experience as a learning and performance improvement professional, author Dick Handshaw proposes that organizations cannot simply tell their trainers what to teach but rather they need to proactively collect data in order to define problems and develop unique training interventions. Handshaw's results-oriented model is systematic, yet flexible,

and works for both instructor-led training and e-learning. Readers will learn how to: • Analyze performance gaps • Create targeted performance objectives and connect them with the right measurement tools • Determine the best instructional strategy and the appropriate media • Build consensus with project blueprint meetings • Evaluate the effectiveness of training and use the data to continually improve

Training will not be effective and beneficial in sustaining, rewarding ways unless the employee education experience is successfully linked with the overall business goals. Training That Delivers Results supplies the tools, worksheets, and assessments needed to tie the learning experience to enhanced performance outcomes--and deliver sustainable, quantifiable business results.
