Credential Market Apr 25 2021 This book makes an original contribution to credential sociology by analysing how high school certificates become and remain valuable in a context of mass high school participation (i.e. credentialism). Building on

a detailed analysis of the International Baccalaureate (IB) Diploma, a senior secondary school certificate offered in over 150 countries, Quentin Maire argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context of intensified academic competition. Using original data on high school credentials in Australia and internationally, the author makes a strong case for certificates to be studied relationally, by locating them in the credentialing structures in which they are inserted. He systematically applies the comparative method to explain the role of the curriculum, family resources, school segregation and higher education selection in creating a credential hierarchy. His robust combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems, credential theory and the IB Diploma.

The International Baccalaureate Diploma Program and the

School Library Nov 01 2021 This book, a blend of practice and theory, shows how the school library can contribute to the success of the International Baccalaureate Diploma Program. Written for librarians in schools that are applying to offer the program as well as those who already work with it, *The International Baccalaureate Diploma Program and the School Library: Inquiry-Based Education* provides information and strategies specifically relating libraries to the IBDP. The guide includes information about the IBDP ranging from the subject matrix to unique aspects of the program, such as the Theory of Knowledge course, the Extended Essay requirement, and the Learner Profile. The book also discusses other important features of IB programs, such as internationalism and academic honesty. Finally, it blends theory and practice by providing details and findings from the only two-year research study to follow students and teachers through the IBDP. The study demonstrates the role of the school library in the program, showing how both students and teachers used and valued it. Each chapter concludes with a series of points or strategies for the librarian to reflect upon and/or use as the basis of action.

The International Baccalaureate Diploma Programme Mar 25 2021 The International Baccalaureate (IB) is a respected qualification gaining increasing currency around the world, and which has been adopted by a wide variety of schools, both public and private. In the UK, growing dissatisfaction with the A-level system has led to an intense debate about alternative qualifications, and in many schools IB courses have been introduced alongside conventional A-level courses. This practical introduction to the IB takes a balanced look at the pros and cons and features a wealth of advice from those actually involved in teaching and implementing it in schools. Providing comparative material on how IB courses differ from A-levels and a subject-by-subject account of best practice in teaching the IB, this book offers a rich source of practical advice for teachers, school leaders or managers involved in teaching or implementing the IB programmes.
