This volume focuses on the outstanding contributions made by botany and the mathematical sciences to the genesis and development of early modern garden art and garden culture. The many facets of the mathematical sciences and botany point to the increasingly "scientific" approach that was being adopted in and applied to garden art and garden culture in the early modern period. This development was deeply embedded in the philosophical, religious, political, cultural and social contexts, running parallel to the beginning of processes of scientization so characteristic for modern European history. This volume strikingly shows how these various developments are intertwined in gardens for various purposes. A collection of miscellaneous international publications related to maternal and child welfare collected by Richard Bolt, the founder of the University of California, Berkeley, School of Public Health. Volumes are collated alphabetically by country of origin of each publication. Margaret Plant presents a wide-ranging cultural history of the city from the fall of the Republic in 1797, until 1997, showing how it has changed and adapted and how perceptions of it have shaped its reality. Vols. for 1889- contain the almanac for the United States and also almanacs in various languages for various parts of the world.
